Gum, Laxative chewing. Health Products Corporation. 171,732; Apr. 10.

Hæmostatics. Farbenfabriken vorm. Friedr. Bayer & Co. 173,922; Apr. 10.
Hair dressing. F. H. Scot. 168,279; Apr. 10.
Hair grower. G. J. Neal. 172,237; Apr. 10.
Hair nets. Ad-Packed Hair Net Co. 176,240–3; Apr. 10.
Hair tonic. B. A. Rotolo. 174,030; Apr. 10.
Hair tonics. Hygienic Laboratories. 173,932; Apr. 10.
Hand bags, purses, and pocketbooks, Ladies' and children's. M. J. Vogel. 176,386; Apr. 10.
Handkerchiefs. Western Bottle Manufacture Company. 176,139; Apr. 10.
Handkerchiefs. Western Bottle Manufacturing Company. 176,144; Apr. 10.
Hats, Men's. Gimbel Brothers, Incorporated. 166,944; Apr. 10.
Hats, Misses' and ladies'. C-R Millinery Co. 171,905; Apr. 10.
Hoists and their parts, Hydraulic. Wood Hydraulic Hoist & Body Company. 173,801; Apr. 10.
Hormone Products. Colwell Pharmacal Corporation. 170,866; Apr. 10.
Hosiery. Platt's. 163,170; Apr. 10.
Hydrocarbon black. United Oil & Natural Gas Products Corporation. 172,133; Apr. 10.
Ice cream or analogous filler within, Product consisting of an edible container with. E. J. H. Westphal. 171,146; Apr. 10.
Kerosene. Miller Petroleum Company. 175,673; Apr. 10.
Kerosene, gasoline, and lubricating oil. Petroleum Export Corporation. 176,211; Apr. 10.
Kindergarten material. E. Steiger. 154,769; Apr. 10.
Knit underwear, Children's. J. H. Semel & Co. 163,653; Apr. 10.
Leather. C. G. Fleckenstein Company. 166,362; Apr. 10.
Leather. W. Graham. 171,693; Apr. 10.
Lenses, Photographic, projecting, and optical. M. H. Tromba. 162,327; Apr. 10.
Lime, Hydrated, Charles Warner Company. 154,344; Apr. 10.
Link belts. Victory V Belt Co. 167,744; Apr. 10.
Liquid preparation for treatment of asthma. K. Karas. 166,836; Apr. 10.
Malt extract. Chicago Malt Extract Co. 168,754; Apr. 10.
Malt extract. R. W. Murray & Co. 174,970; Apr. 10.
Manicure preparations. G. E. Kobalt. 173,711; Apr. 10.
Massage for the face and body. L. Philippe. 170,542; Apr. 10.
Mayonnaise. Atmore and Son, Inc. 172,196; Apr. 10.
Meat products. Hygrade Provision Co. 138,568; Apr. 10.
Medicinal compound for promoting calcification. J. H. Hoim. 171,539; Apr. 10.
Medicinal preparation for an aid to nature in lung affections, coughs, etc. American Chemical & Drug Co. 171,889; Apr. 10.
Medicinal preparation for asthma, etc. E. Bilhuber, Inc. 173,695; Apr. 10.
Medicinal preparation in the nature of a purgative and liver medicine. J. G. Williams. 168,626; Apr. 10.
Medicinal preparations for the treatment of glandular deficiency. G. W. Carnrick Co. 173,127; Apr. 10.
Medicine, Dry anticonstipation. Nestor Drug and Chemical Company. 174,023; Apr. 10.
Medicine for sore throat, influenza, etc. W. V. Pateychuk. 173,206; Apr. 10.
Metals, Compound for the desulphurization and deoxidation of molten. W. A. Rosenberger. 172,059; Apr. 10.
Mincemeat. T. F. B. Sotham. 172,126; Apr. 10.
Motor cycles. W. Korn. 175,086; Apr. 10.
Naphtha. Miller Petroleum Company. 176,200; Apr. 10.
Nasal solution, douche therefor, and a package containing both. Rosebrand Co. 173,008; Apr. 10.
Oil for salads and cooking. American Cotton Oil Company. 171,520; Apr. 10.
Oil, Salad vegetable. Reliable Importing Company. 172,174; Apr. 10.
Oils and essences for deodorizing and purifying the air, Ethereal. Peroiin Fabrikationsgesellschaft m. b. H. 146,780; Apr. 10.
Oils for painted, varnished, and lacquered surfaces, Polishing. R. Douglas. 174,429; Apr. 10.
Oils, greases, compounds, etc., Lubricating. Indian Refining Company Inc. 172,596; Apr. 10.
Ointment for the treatment of piles, fistula, constipation, etc. J. C. McCarthy. 173,840; Apr. 10.
Ophthalmic mountings and parts thereof. Stevens & Company. 175,224; Apr. 10.
Paint enamel, White-. Paramount Paint & Varnish Co. 175,209; Apr. 10.
Paint, Lead, oil, and zinc. M. J. Merkin Paint Co. Inc. 174,583; Apr. 10.
Paint, Ready-mixed. Paramount Paint & Varnish Co. 172,208; Apr. 10.
Paper and mailing envelopes, Writing and printing. Chapin & Gould Paper Company. 176,114; Apr. 10.
Paper and paper towels, Toilet. Albany Perforated Wrapping Paper Co. 176,437; Apr. 10.
Paper, Book. Peninsular Paper Company. 172,555; Apr. 10.
Paper cartons. Standard Paper Company. 176,659; Apr. 10.
Paper, Cigarette. E. M. Brenchley. 176,445; Apr. 10.
Paper, envelopes, and papeteries. Birnie Paper Company. 176,876–7; Apr. 10.
Paper, paper napkins, towels, and table cloths, Toilet. Fort Howard Paper Company. 176,674; Apr. 10.
Paper tubes to be used with explosive powder in blasting. Clark Patent Tubing Co. 175,069; Apr. 10.
Paper, Waxed. Hummer Brothers Co. 175,394; Apr. 10.
Paper, Wrapping. McLaurin-Jones Co. 174,147; Apr. 10.
Parasiticides. Farbenfabriken vorm. Friedr. Bayer & Co. 173,920–1; Apr. 10.
Pastes, Dry. Penn Paste Milling Company. 160,255; Apr. 10.
Pencils, Lead and paper crayon. United States Pencil Co. 166,334; Apr. 10.
Perfume, toilet water, rouges, face and talcum powders, etc. E. Daltroff & Cie. 173,882; Apr. 10.
Perfume, toilet water, rouges, face and talcum powders, etc. E. Daltroff & Cie. 173,916; Apr. 10.
Perfumes. De Cameron, Inc. 171,155; Apr. 10.
Perfumes, Oils and materials for the production of. Polak's Frutal Works. 172,240; Apr. 10.
Petroleum and petroleum products. Standard Oil Company of New York. 176,506; Apr. 10.
Petroleum combined with hypophosphites, Emulsion of. R. E. O'Rear. 172,051; Apr. 10.
Petroleum, Volatile compound derived from. Gilmore Petroleum Company. 166,557; Apr. 10.
Piles, Internal treatment of. Happy Thought Remedy Co. 173,596; Apr. 10.
Pillow and bolster cases, bed sheets, shams, scarfs, table covers, and napkins. Washington Embroidery Co. 174,805; Apr. 10.
Pipe nipples, Metal. Chicago Nipple Manufacturing Co. 163,502; Apr. 10.
Plasters, Corn. J. J. Newman. 173,851; Apr. 10.
Plates, Wooden. Oval Wood Dish Corporation. 176,204; Apr. 10.
Polishes, Furniture and automobile. Mansfield Chemical Company. 164,600; Apr. 10.
Portfolios (brief cases). New Process Company. 176,496; Apr. 10.
Potatoes. C. Hechtman. 169,902; Apr. 10.
Powder used as water softener. Dakota Compound Company. 172,084; Apr. 10.
Preparation for influenza. Mrs. L. A. Blackburn. 173,952; Apr. 10.
Preparation for the treatment of pneumonia. E. A. Morgan. 171,507; Apr. 10.
Prophylactics for the prevention of sexual diseases. Retailers' Manufacturing Corporation. 172,014; Apr. 10.
Publications and negotiable papers. North-Western Trust & Savings Bank. 151,922; Apr. 10.
Pudding, pie, and layer-cake filling. W. H. Simonson. 169,186; Apr. 10.
Railroad frogs. Kilby Frog & Switch Co. 152,224; Apr. 10.
Raisins. J. H. Keely. 156,281; Apr. 10.
Ranges and gas and coal heaters, Gas and combination coal and gas. A. H. Tinnerman. 169,261; Apr. 10.
Recoil checkers. H. G. Cloyes. 168,102; Apr. 10.
Remedy for diseases in poultry. Thos. Southard Poultry Supply Co. 167,337; Apr. 10.
Remedy, Prophylactic. Reese Chemical Co. 155,122; Apr. 10.
Remedy used for the treatment of distemper in dogs. Dr. W. D. Jensen. 167,943; Apr. 10.
Rope. Columbian Rope Company. 161,619; Apr. 10.
Rubber-composition floor covering. Hupp Products Company, The. 175,196; Apr. 10.
Rubber tissue for reenforcing, stiffening, and waterproofing of garments, etc. Edward P. Stahel & Co. 174,676; Apr. 10.
Salve, Corn. M. L. Wilson. 165,251; Apr. 10.
Salve for burns, wounds, etc. A. J. Krank Mfg. Co. 173,050; Apr. 10.
Scissors and pocketknives. J. Richter. 169,517; Apr. 10.
Scoops, shovels, and steel chutes. H. B. Sackett Screen & Chute Company. 172,443; Apr. 10.
Seed, Grass and field. Egyptian Seed Growers Exchange. 170,759; Apr. 10.
Shampoo. Concentrated Products Corporation. 173,323; Apr. 10.
Shampoo. Hygienic Laboratories. 173,931; Apr. 10.
Sheets and pillowcases. Marshall Field & Company. 140,289; Apr. 10.
Shoe fabrics. Peters Manufacturing Company. 176,209; Apr. 10.
Shoes. Curtis & Jones Company. 171,414; Apr. 10.
Shoes. Melville Shoe Corporation. 169,406; Apr. 10.
Shoes. Melville Shoe Corporation. 171,704; Apr. 10.
Shoes. Bion F. Reynolds Company. 169,730; Apr. 10.
Shoes, Dress and sport. Whitehouse & Hardy, Inc. 171,972; Apr. 10.
Shoes, insoles, and outer soles. Allen-Spiegel Shoe Mfg. Co. 171,519; Apr. 10.
Shortening, lard substitute, Vegetable. Jefferson Co. Inc. 153,551; Apr. 10.

PUBLISHED FOR OPPOSITION.

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907.]

Shovels and spades. John Dunn, Son & Co. 172,037; Apr. 10.
Signs, advertising boards, and painted board signs, Sheet-metal bill. G. Minck. 169,136; Apr. 10.
Silk goods in the piece. Salembier & Clay, Inc. 176,045; Apr. 10.
Silk goods in the piece, Broad. Lenapé Silk Company. 175,089; Apr. 10.

Varnishes. Remien & Kuhnert Co. 175,885; Apr. 10.
Varnishes, paint enamels, varnish stains. Murphy Varnish Company. 154,986; Apr. 10.
Vermifuge to be used in the treatment of live stock. Welch & Marker. 172,022; Apr. 10.
Vulcanization accelerators. Farbenfabriken vorm. Friedr. Bayer & Co. 173,926; Apr. 10.
Woodworking machines, Combination. Hutchinson Manufacturing Co. 172,094; Apr. 10.
Woolen goods in the piece. Grant S. Kelley Inc. 175,930; Apr. 10.
Yarns for knitting, crocheting, and art needlework. Bernhard Ulmann Co. Inc. 176,375; Apr. 10.
Yarns for knitting, crocheting, and art needlework. Bernhard Ulmann Co. Inc. 176,379; Apr. 10.
Yarns for knitting, crocheting, and art needlework. Bernhard Ulmann Co. Inc. 176,382; Apr. 10.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 10TH DAY OF APRIL, 1923.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

A. & J. Manufacturing Company, The. (See Johnson, Edward H., assignor.)
A C Spark Plug Company. (See Berge, Joseph, assignor.)
Acme Cushion Wheel Company. (See Cornfield, Noah, assignor.)
Adam Fisher Manufacturing Co. (See Graber, Henry P., assignor.)
Adams, Edwin G., The Dalles, Oreg. Tractor. 1,451,194; Apr. 10.
Adelson, Edward. (See Adelson, Philip and E.)
Adelson, Philip and E., Cambridge, Mass. Carrousel. 1,451,605. Apr. 10.
Advance Rumely Company. (See Ross, James, assignor.)
Affel, Herman A., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Synchronizing system. 1,450,966; Apr. 10.
Air Reduction Company. (See Anderson, James L., assignor.)
Akron Lamp Company, The. (See Steese, J. C., and Hoff, assignors.)
Aktiebolaget Ljungströms Angturbin. (See Ljungstrom, F., Broberg, and Eriksson, assignors.)
Aldrich, Thomas B., assignor to Parke, Davis & Company, Detroit, Mich. Nitrobenzoic acid esters of trihalogentertiary butyl-alcohol. 1,451,357; Apr. 10.
Allebrand, Charles W., and C. G. Guyatt, Duquesne, Pa. Arm support. 1,451,561; Apr. 10.
Allen, Alfred E., et al. (See Beingessner, Albert J., assignor.)
Allnutt, Benjamin F., Chicago, Ill. Filling tube for liquid receptacles. 1,451,136; Apr. 10.
Allshouse, Reuben R., Freedom, Pa. Metallic railway tie and chair. 1,450,967; Apr. 10.
American Can Company. (See Fleischer, Paul W., assignor.)
American Chain Company. (See Weston, Alonzo H., assignor.)
American Lithographic Company. (See Hopkins, William L., assignor.)
American Multigraph Company, The. (See Chisholm, Clifton, assignor.)
American Reduction Company. (See Baxter, Burke M., assignor.)
American Telephone and Telegraph Company. (See Affel, Herman A., assignor.)
American Telephone and Telegraph Company. (See Carson, John R., assignor.)
American Wringer Company. (See Kowalsky, Rudolf A., assignor.)
American Zinc, Lead & Smelting Co. (See Pedersen, John E., assignor.)
Anderson, Charles W., Brooklyn, N. Y. Power control for saw tables and the like. 1,450,906; Apr. 10.
Anderson, James L., Bayonne, N. J., assignor, by mesne assignments, to Air Reduction Company, Incorporated, New York, N. Y. Permanent joint in fabricated form and making the same. 1,450,935; Apr. 10.
Anderson, Peter, Owatonna, Minn. Pencil pin and clip. 1,451,418; Apr. 10.
Anthony, Alfred R., Detroit, Mich. Burner. 1,451,063; Apr. 10.
Anthony, Marcus O., New York, N. Y. Pin ticket. 1,451,486; Apr. 10.
Archer, Charles L., Des Moines, Iowa. Cord tire. 1,451,645; Apr. 10.
Ardo, Joseph, assignor of one-half to K. Horvath, Newhall, W. Va. Manually-propelled flying machine. 1,451,385; Apr. 10.
Arent, Arthur, assignor to Arthur Arent Laboratories, Inc., Des Moines, Iowa. Reducing inflammability of materials. 1,451,313; Apr. 10.
Arent, Arthur, Laboratories, Inc. (See Arent, Arthur, assignor.)
Armbroster, Frederick, Averne, N. Y. Window or door stop. 1,451,487; Apr. 10.
Arneson, Oscar, Garretson, S. Dak. Lifting tongs. 1,451,606; Apr. 10.
Arrow Electric Company, The. (See Gates, Frederic P., assignor.)
Arrow Grip Manufacturing Co. (See Avery, True M., assignor.)
Assistant Secretary of Agriculture of the United States of America. (See Reed, Jesse O., assignor.)
Atlantic Refining Company, The. (See Van Dyke, John W., assignor.)
Austin, F. C., Machinery Company. (See French, James C., assignor.
Austin, F. C., Machinery Company. (See Olsen, Halften E., assignor.)
Austin, Henry F., New Orleans, La. Feeder for fountain pens. 1,451,314; Apr. 10.
Avery, True M., assignor to Arrow Grip Manufacturing Co., Inc., Glens Falls, N. Y. Hook fastener. 1,451,315; Apr. 10.
Ayres, Elwood B. (See Schwartz, W. M., and Ayres.)
Babcock, Henry W., Bloomington, Ill. Comb. 1,451,562; Apr. 10.
Babel, Raymond. (See Vareaux, P., and Babel.)
Baer, Carl J., Riverside, Ill. Boat-propelling means. 1,451,563; Apr. 10.
Bagley, Joseph C., Beloit, Ala. Combined shovel, torch, and match holder. 1,451,195; Apr. 10.
Bahr, Joseph C., St. Louis, Mo. Pocket lock for garments. 1,451,198; Apr. 10.
Baily, Franklin L., Los Angeles, Calif. Ventilated hand protector for guns. 1,451,137; Apr. 10.
Baird-Daniels Co. et al. (See Popper, Joseph, assignor.)
Baker, Joseph, & Sons, Limited. (See Prescott, William E., assignor.)
Baker, Joseph, Sons and Perkins Company. (See Head, Ronald, assignor.)
Baldt Anchor & Chain Company. (See Powell, Norris D., assignor.)
Ball, John P., Chicago, Ill. Aeroplane gun mounting. 1,451,197; Apr. 10.
Ball, Joseph A. (See Comstock, D. F., and Ball.)
Barber-Colman Company. (See Colman, Howard D., assignor.)
Barnett, Lyman R., Missoula, Mont. Clasp. 1,451,316; Apr. 10.
Barnia, Frank I., assignor of one-half to M. Barnia, Merrill, Wis. Artificial minnow. 1,451,436; Apr. 10.
Barnia, Mathilde. (See Barnia, Frank, I., assignor.)
Barr and Stroud, Limited. See Barr, A., and Stroud, assignors.)
Barr, Archibald, and W. Stroud, assignors to Barr and Stroud, Limited, Anniesland, Glasgow, Scotland. Apparatus for testing and recording the efficiency of range-finder operators. 1,450,907; Apr. 10.
Barrett Company, The. (See Miller, Stuart P., assignor.)
Barrett Company, The. (See Perry, Ray P., assignor.)
Barrett, Roy, Palmyra, N. Y. Burglar alarm. 1,451,414; Apr. 10.
Barton, Louis E., and C. J. Kinzie, assignors to The Titanium Alloy Manufacturing Company, Inc., Niagara Falls, N. Y. Separating zircon from undesired substances. 1,451,004; Apr. 10.
Barton, Robert W., Chicago, Ill. Combined flywheel and suction fan. 1,450,936; Apr. 10.
Bartosz, Joseph A., Turner, Oreg. Flax-puller attachment for binders. 1,451,317; Apr. 10.
Bates, Langdon B., Thomaston, Me. Knife. 1,451,607; Apr. 10.
Baxter, Burke M., Cleveland, Ohio, assignor to American Reduction Company, Pittsburgh, Pa. Mechanism for the recovery of paper stock. 1,451,522; Apr. 10.
Beauchamp, Frederick A., Berkeley, Calif. Process and apparatus for recovery of precious metals. 1,451,454; Apr. 10.
Becker, George. (See Higerd, F. A., and Becker.)
Beebe, Louis, M., Kansas City, Mo. Caster. 1,451,250; Apr. 10.
Beecher, Milton F. (See Klein, A. A., and Beecher.)
Beingessner, Albert, et al. (See Beingessner, Albert J., assignor.)
Beingessner, Albert J., assignor of one-third to A. Beingessner and one-third to A. E. Allen, Calgary, Alberta, Canada. Weed puller. 1,451,455; Apr. 10.
Belcher, Donald. (See Eustis, F. A., Hayward, Schleicher, and Belcher.)
Bell, Thomas T., and J. G. Schoenleber, New York, N. Y. Torch. 1,450,908; Apr. 10.
Bell, William C., Baltimore, Md. Crank shaft and connecting-rod bearing. 1,451,608; Apr. 10.
Benham, William T., Norwood, Ohio, assignor to The Mosler Lock Company, Covington, Ky. Combination lock. 1,451,036; Apr. 10.
Benner, James, et al. (See Helm, Emerson B., assignor.)
Benson, Carl N., New York, N. Y., assignor to The Skayef Ball Bearing Company. Bearing mounting. 1,451,523; Apr. 10.

Benson, Victor A., San Jose, Calif. Building construction. 1,451,198; Apr. 10.
Bercka, Nilsen, Buenos Aires, Argentina. Artificial teeth. 1,451,005; Apr. 10.
Berg, Franz W. (See Federsen, Anton, assignor.)
Bergander, John F., Chicago, Ill. Phonograph. 1,451,358; Apr. 10.
Berge, Joseph, assignor to A C Spark Plug Company, Flint, Mich. Temperature-compensating means for speedometers. 1,450,909; Apr. 10.
Berkley, Oscar V., Barbourville, Ky. Vehicle headlight. 1,451,318; Apr. 10.
Bernier, Leah E., Kelso, Wash. Bed bathing apparatus. 1,451,437; Apr. 10.
Bernstein, Samuel, New York, N. Y. Insect-powder gun. 1,451,138; Apr. 10.
Bess, Gustavus, Scappoose, Oreg. Aeroplane. 1,451,415; Apr. 10.
Bialick, Michael H., Saginaw, Mich. Cigar holder and ash receptacle. 1,450,910; Apr. 10.
Biggs, Robert H., St. Catharines, Canada. Combination string holder and advertising device. 1,451,251; Apr. 10.
Billings, Frank. (See Greenleaf, Robert P., assignor.)
Birchy, R. O., et al. (See Busby, Robert S.)
Birkholz, Benjamin L., Colonia, N. J. Controlling mechanism for toilet stools. 1,451,524; Apr. 10.
Bittler, Edward R., Schuylkill Haven, Pa. Automobile dash attachment. 1,451,646; Apr. 10.
Bjerklund, Eric G., assignor to The Lake Torpedo Company, Bridgeport, Conn. Torpedo guide for torpedo tubes. 1,451,319; Apr. 10.
Blair, Frank M., assignor to The Cree-Becker Oil Tool Company, Newark, Ohio. Casing elevator. 1,451,199; Apr. 10.
Blanchard, William N., East St. Louis, Ill. Valve. 1,451,037; Apr. 10.
Blatch, Francis H. (See Wilmot, G. W., and Blatch.)
Blaw, Jacob B., Atlantic City, N. J. Adjustable fire-nozzle support. 1,451,006; Apr. 10.
Boatright, Lenore, Sausalito, Calif. Doll. Des. 62,189; Apr. 10.
Bodnar, John, Springfield, Mass. Can opener. 1,451,320; Apr. 10.
Bogle, George M., and A. Smithson, Glenwood, Minn. Horseshoe. 1,451,007; Apr. 10.
Bondy, Richard S. (See Feder, Louis H., assignor.)
Bonelli, Louis, Upper Montclair, N. J. Shoe tool. 1,451,288; Apr. 10.
Booze, Macdonald C., assignor to Norton Company, Worcester, Mass. Nonslip quartz tile. 1,451,456; Apr. 10.
Borax Consolidated Limited. (See Kelly, Andrew, assignor.)
Bosworth, George P., assignor to Hemphill Company, Central Falls, R. I. Spring-needle presser. 1,450,937; Apr. 10.
Bouton, Edgar M., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electromagnet. 1,451,525; Apr. 10.
Bowles, Byron E., Council Bluffs, Iowa. Knife sharpener. 1,451,526; Apr. 10.
Bowlus, Lauren M., San Luis Obispo, Calif. Ice box for fish and other sea food. 1,451,416; Apr. 10.
Boyce, Harrison H., Forest Hills, N. Y. Temperature-indicating instrument for motor-vehicle radiators. 1,451,527; Apr. 10.
Boyer, Thomas A., Gainesville, Tex. Vehicle wheel. 1,451,528; Apr. 10.
Boyle, Alfred S., Cincinnati, Ohio. Floor waxer and polisher. 1,451,200; Apr. 10.
Boyle, James C., Flint, Mich. Ford brake-clutch connector. 1,451,488; Apr. 10.
Brackett, Quincy A., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Resistor element. 1,451,529; Apr. 10.
Braun, Louis. (See White, Charles C., assignor.)
Breeding, Delson, Tulsa, Okla. Control head. 1,450,968; Apr. 10.
Breil, Julius, J., New York, N. Y. Snap fastener. 1,450,938. Apr. 10.
Brhel, John W., (See Palmer, H. D., and Brhel.)
Brill, Max, New York, N. Y. Hand bag. Des. 62,199; Apr. 10.
Brisbois, Odilon, Chicago, Ill. Electric starter for internal-combustion engines. 1,451,530; Apr. 10.
Broad, William, Beaver Falls, Pa. Electric switch, 1,451,008; Apr. 10.
Broberg, Isidor. (See Ljungstrom, F., Broberg, and Eriksson.)
Brobst, Ulysses S. G., Fresno, Calif. Headlight dimmer. 1,451,321; Apr. 10.
Brooks, Thomas J., Sheridan, Pa. Method of and apparatus for detecting faulty engine construction. 1,451,386; Apr. 10.
Brother, William, Salt Lake City, Utah. Fluid clutch mechanism. 1,451,139; Apr. 10.
Brown, Alexander T. and C. S., Syracuse, N. Y. Air-cooled internal-combustion engine and electric generator plant. 1,451,201; Apr. 10.
Brown, Alexander T., Syracuse, N. Y. Agricultural machine. 1,451,140; Apr. 10.
Brown, Charles S. (See Brown, Alexander T. and C. S.)
Brown Company. (See Richter, George A., assignor.)
Brown, E. W. (See Bote, Charles V., assignor.)
Brown, James W., San Diego, Calif. Automobile tool-box support. 1,451,202; Apr. 10.
Brown, Oliver W., and C. O. Henke, Bloomington, Ind. Manufacture of azoxy, azo, hydrazo, and amino compounds. 1,451,489; Apr. 10.
Brown, Theophilus, assignor to Deere and Company, Moline, Ill. Motor cultivator. 1,451,672; Apr. 10.
Brunner, Harold E., Larchmont, N. Y. Manufacturing antifriction bearing rings. 1,451,531; Apr. 10.
Brunswick-Balke-Collender Company. (See Miller, John O., assignor.)
Buchenau, John C., De Witt, N. Y. Adjustable form tie and spacer. 1,451,457; Apr. 10.
Buchner, Louis B., Caldwell, N. J., Convertible baby crib and seat for automobiles. 1,451,532; Apr. 10.
Buckingham, Harry W., et al., executors. (See Mathews, Thomas.)
Buckles, James H. (See Simpson, E. M., and Buckles.)
Buckley, Harry and R., Louisville, Ky. Grinding machine. 1,451,647; Apr. 10.
Buckley, Ray. (See Buckley, Harry and R.)
Bugbee, Lucian W., assignor to Franklin Optical Company, Indianapolis, Ind. Making bifocal lenses. 1,451,490; Apr. 10.
Burrell, Ellis B., Baltimore, Md. Shoe-polish-applying brush. 1,451,322; Apr. 10.
Burrill, Harold G., Baltimore, Md. Agitator for mechanical stokers. 1,451,141; Apr. 10.
Burns, Fred T., Detroit, Mich., assignor of one-third to J. J. Burns, Race Track, and one-third to F. L. Fisher, Butte, Mont. Gradometer. 1,451,387; Apr. 10.
Burns, Jay J., et al. (See Burns, Fred T., assignor.)
Burns, Robert M. (See Nordblad, Gunnar F., assignor.)
Burson Knitting Company. (See Hinchliff, Ralph, assignor.)
Burt, George W., et al. (See Myers, Wilson R., assignor.)
Busby, Robert S., assignor of one-half to A. D. Richardson and R. O. Birchy, Jacksonville, Fla. Tilting and locking device for steering wheels. 1,451,458; Apr. 10.
Busch-Sulzer Bros.-Diesel Engine Company. (See Schlatter, Rudolph, assignor.)
Cain, William H., Los Angeles, Calif. Gas radiator. 1,451,600; Apr. 10.
California Packing Corporation. (See Smith, Otto, assignor.)
Calkins, Seward H., assignor to The Traitel Marble Company, Long Island City, N. Y. Pattern and guide strip. 1,451,491; Apr. 10.
Campbell, Harry E., New York, N. Y., assignor to Campbell Metal Window Corporation, Baltimore, Md. Suspension means for vertically-sliding sashes. 1,451,668; Apr. 10.
Campbell, Joseph E., Rosedale, Kans. Sash antirattler. 1,451,359; Apr. 10.
Campbell Metal Window Corporation. (See Campbell, Harry E., assignor.)
Canadian Electro Products Company Limited. (See Matheson, Howard W., assignor.)
Carpenter, Charles U., Dayton, Ohio. Typewriting machine. 1,451,203; Apr. 10.
Carroll, Houston M., sr., San Antonio, Tex. Denture. 1,451,533; Apr. 10.
Carson, Clarence, New Rochelle, N. Y., assignor to Johns-Manville, Incorporated. Speedometer. 1,450,939; Apr. 10.
Carson, John R., New York, N. Y., assignor to American Telephone and Telegraph Company. Receiving circuits for weak signal currents. 1,450,969; Apr. 10.
Cartter, William G., Monrovia, and F. W. Thompson, Arcadia, Calif. Electric water heater. 1,451,671; Apr. 10.
Casamayor, Marcos, Manzanillo, Cuba. Sling releaser for transporting apparatus. 1,451,324; Apr. 10.
Casper, George C., assignor of one-half to A. N. Evans, Chicago, Ill. Vehicle spring. 1,451,492; Apr. 10.
Caughey, Arnott S. (See Miebach, H. E., and Caughey.)
Century Machinery Corporation. (See Schmelzer, Anton C., assignor.)
Chain Belt Company. (See Montague, W. L., and Welser, assignors.)
Chain Belt Company. (See Shafer, Samuel, jr., assignor.)
Chapin, Alfred H., et al. (See Smith, Hazor H., assignor.)
Charlesworth, Fred H., St. Paul, Minn. Casket. 1,451,009; Apr. 10.
Cheever, Dwight B. (See Ecker, William B., assignor.)
Cheezneky, Frank, Yukon, W. Va. Trolley hanger. 1,450,970; Apr. 10.
Chicago Railway Signal and Supply Company. (See McCarthy, Daniel J., assignor.)
Chicago Railway Signal and Supply Company. (See Vogel, Eugene W., assignor.)
Chipperfield, Walter, Hornchurch, England, assignor to A. B. Dick Company, Chicago, Ill. Duplicating machine. 1,451,142; Apr. 10.
Chisholm, Clifton, assignor to The American Multigraph Company, Cleveland, Ohio. Flexible printing form. 1,451,204; Apr. 10.
Choppa, John, New Haven, Conn. Tomato strainer. 1,451,534; Apr. 10.
Christian, William, Bridgeport, Conn. Drum. 1,451,289; Apr. 10.

Church, Harold D., Fairfield, assignor to The Locomobile Company, Bridgeport, Conn. Internal-combustion engine. 1,451,648; Apr. 10.
Church, Lewis H., Roselle, and G. C. Thomas, jr., assignors to The Thomas & Betts Co., Elizabeth, N. J. Outlet box. 1,450,972; Apr. 10.
Churchill, Edwin, jr. (See Morgan, R. L., Griffith, and Churchill.)
Clark, Daniel W., Los Angeles, Calif. Core box for pistons. 1,451,010; Apr. 10.
Clark, James H., Portage, Wis., assignor of one-half to J. M. Russell, Portland, Oreg. Demountable hard-rubber cushioned tire and rim. 1,451,143; Apr. 10.
Clark, John T., Provo, Utah. Necktie holder. 1,451,290; Apr. 10.
Clark, Raymond P., Rochester, N. Y. Cover cushion for fruit baskets. 1,450,911; Apr. 10.
Cleary, John W., New York, N. Y. Shield for bank windows. 1,451,360; Apr. 10.
Clopton, William H., jr., Camp Meade, Md. Wrench. 1,450,973; Apr. 10.
Cobb, Isaac W., Portland, Me. Door clamp. 1,450,940; Apr. 10.
Cohen, Charles, Bridgeport, Conn. Bottle holder. 1,451,649; Apr. 10.
Collings, William R. (See Cottringer, P., and Collings.)
Colman, Howard D., assignor to Barber-Colman Company, Rockford, Ill. Knotter. 1,450,941; Apr. 10.
Colman, Howard D., assignor to Barber-Colman Company, Rockford, Ill. Machine for operating upon warps. 1,450,942; Apr. 10.
Colnot, Henri, Paris, France. Internal-combustion engine. 1,451,417; Apr. 10.
Comegys, Edward F. (See Hormann, Diedrich, F., assignor.)
Commercial Camera Company. (See Greene, John S., assignor.)
Comstock, Daniel F., Cambridge, and J. A. Ball, Wollaston, assignors, by mesne assignments, to Technicolor Motion Picture Corporation, Boston, Mass. Cinematographic film. 1,451,325; Apr. 10.
Connecticut Telephone & Electric Co. (See Stahl, Charles E., assignor.)
Continental and Commercial Trust and Savings Bank. (See Hubbard, James W., assignor.)
Cooney, Colonel, Ada, Ohio. Combined weather strip and sash fastener. 1,451,650; Apr. 10.
Cornell, Jacob J., Paducah, Ky. Whistle. 1,451,459; Apr. 10.
Cornfield, Noah, Detroit, Mich., assignor to Acme Cushion Wheel Company, Wilmington, Del. Vehicle wheel. 1,451,252; Apr. 10.
Cornfield, Noah, Detroit, Mich., assignor to Acme Cushion Wheel Company, Wilmington, Del. Vehicle wheel. 1,451,253; Apr. 10.
Cottringer, Paul, and W. R. Collings, assignors to The Dow Chemical Company, Midland, Mich. Making anhydrous magnesium chloride. 1,450,912; Apr. 10.
Cox Brass Manufacturing Company. (See Cox, William G., assignor.)
Cox, William G., Cleveland, Ohio, assignor to Cox Brass Manufacturing Company, Albany, N. Y. Appliance for attaching bumpers adjustably to automobiles. 1,451,535; Apr. 10.
Cracker Jack Co., The. (See Eckstein, Henry G., assignor.)
Crawford, McGregor and Candy Company, The. (See Long, Claud L., assignor.)
Cree-Becker Oil Tool Company, The. (See Blair, Frank M., assignor.)
Crockett, Jesse G., Winnebago, Nebr., assignor to Sloan-Crockett Co., Sioux City, Iowa. Elevating jack. 1,451,661; Apr. 10.
Cruickshank, James H., Big Indian, N. Y. Stopping and landing mechanism for aeroplanes, dirigibles, balloons, and the like. 1,451,493; Apr. 10.
Cruyt, Lucien C., London, assignor to Heenan & Froude Limited, Worcester, England. Wet-filter screen. 1,450,951; Apr. 10.
Cruzan, Wayne M., Eureka, Kans. Fruit pitter. 1,451,254; Apr. 10.
Crysdale George F., Toronto, Ontario, Canada. Bicycle stand and carrier. 1,451,651; Apr. 10.
Cundy, Jack A., London, England. Ring for curtains and the like. 1,451,326; Apr. 10.
Cunningham, Austin, L. (See Olop, Stephen, assignor.)
Cunningham, John D., Houston, Tex. Vehicle tire. 1,451,327; Apr. 10.
Cutsinger, T. H. (See Lawlor, James M., assignor.)
Daniels, George W., Hamilton, Ontario, Canada. Automobile lock. 1,450,943; Apr. 10.
Darling, Elmer E., Salt Lake City, Utah. Tire alarm. 1,451,291; Apr. 10.
Dashew, Jacob, Baltimore, Md. Steam garment-pressing machine. 1,451,292; Apr. 10.
Daughdrill, John D., Anniston, Ala. Molding machine. 1,451,323; Apr. 10.
Davis, Solomon L., and E. H. Rinehart, El Paso, Tex. Tire tube. 1,451,536; Apr. 10.
Decker, Frank L., Kimble, Pa. Building construction. 1,451,144; Apr. 10.
De Clairmont, Adolfo, Toledo, Ohio. Combined purse and bill fold. 1,451,205; Apr. 10.
Deere and Company. (See Brown, Theophilus, assignor.)
Deere & Company. (See Welker, Henry C., assignor.)
Deere & Company. (See White, Charles H., assignor.)
De Lacy, Thomas H., Trenton, N. J. Hosiery form. 1,450,913; Apr. 10.
Deming Company, The. (See Vincent, Elbert S., assignor.)
Dennis, Gibbons J., Kiefer, Okla. Clamp. 1,451,091; Apr. 10.
Desplats, Domingo, Buenos Aires, Argentina. Electric signal transmitter. 1,451,328; Apr. 10.
De Vere, Eugene L., Chicago, Ill. Resilient shoe heel. 1,451,494; Apr. 10.
Dick, A. B., Company. (See Chipperfield, Walter, assignor.)
Dillon, Edward P., and A. A. Helmrod, assignors to Research Corporation, New York, N. Y. Electric precipitator. 1,451,418; Apr. 10.
Dills, Thomas O., Batesville, Miss. Dirigible headlight. 1,451,419; Apr. 10.
Dinsmoor, John L., Philadelphia, Pa. Audible signal device. 1,451,495; Apr. 10.
Dodge Tool Company. (See Larson, Arvid G., assignor.)
Dominguez, Manuel D., New Orleans, La. Electric heater. 1,451,537; Apr. 10.
Donaldson, Stephen M., Meggett, S. C. Railway signal. 1,451,438; Apr. 10.
Donlon, Charles. (See Kroonen, Leo, assignor.)
Doody, John E., Toronto, Ontario, Canada, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,451,293; Apr. 10.
Dorrington, H. T. (See Van Doren, Chester J., assignor.)
Doucet, Louis C. A. de B., London, England. Firearm for teaching or practicing the aiming thereof, and for adapting the same for signaling. 1,451,294; Apr. 10.
Douglass, Frank E. (See Townsend, W. S., and Douglass.)
Dow Chemical Company, The. (See Cottringer, P., and Collings, assignors.)
Dow, Vernon E., Muskegon, Mich. Strainer-cloth clamp. 1,451,206; Apr. 10.
Draeseke, Alfred W., and A. W. Parkes, Dundas, Ontario, Canada, assignors to Niles-Bement-Pond Company, New York, N. Y. Planer. 1,450,971; Apr. 10.
Draper, Thomas B., Toronto, Ontario, Canada. Dressing table. 1,451,207; Apr. 10.
Dreffein, Henry A., Chicago, Ill. Regulator for gas producers. 1,451,011; Apr. 10.
Drekmeier, Frederick J., Beloit, Wis. Automobile curtain. 1,451,255; Apr. 10.
Dressler, Alvin R., Sheboygan, Wis. Air filter for engines. 1,451,329; Apr. 10.
Dreyfus, Henry, London, England. Manufacture of cellulose derivatives. 1,451,330; Apr. 10.
Dreyfus, Henry, London, England. Manufacture of cellulose derivatives. 1,451,331; Apr. 10.
Driver, Arthur S. and S. R., Summit, N. J. Artificial-fly container. 1,451,295; Apr. 10.
Driver, Susan R. (See Driver, Arthur S. and S. R.)
Duchemin, George W., Newark, N. J. Machine for turning irregular forms. 1,451,496; Apr. 10.
Dunajeff, Leonid A., New York, N. Y. Speed indicator. 1,451,064; Apr. 10.
Dunham, Joseph C., Oklahoma, Okla. Weather strip. Re15,574; Apr. 10.
Dunn, Benjamin F., St. Paul, Minn. Tent-tension equalizer. 1,451,208; Apr. 10.
Dunston, Wayne E., assignor to C. Girl, Kalamazoo, Mich. Pivotal clamping device for bumpers and the like. 1,451,497; Apr. 10.
Dura Company, The. (See Nicholson, Stanley W., assignor.)
Durand, Victor, jr., Vineland, N. J. Making solid glass rods having bends therein. 1,451,361; Apr. 10.
Dye, Glen M., Minneapolis, Minn. Method and device for handling photographic films. 1,451,066; Apr. 10.
Dye, Glen M., Minneapolis, Minn. Photographic-developing apparatus and method. 1,451,065; Apr. 10.
Eaton, Crane & Pike Company. (See Hopkins, Leonard, assignor.)
Ecker, William B., assignor of one-fourth to D. B. Cheever, Chicago, Ill. Tire spreader. 1,450,944; Apr. 10.
Eckert, Fritz, Wetzlar, Germany. Hollow wall. 1,451,439; Apr. 10.
Eckstein, Henry G., Chicago, Ill., assignor, by mesne assignments, to The Cracker Jack Co. Manufacture of moistureproof packages. 1,451,145; Apr. 10.
Edmister, William W., Kokomo, Ind. Bottle attachment. 1,451,564; Apr. 10.
Edwards, Orin R. (See Haughey, Charles B., assignor.)
Egger, Louis, Sumiswald-Grunen, Berne, Switzerland. Book-sewing machine. 1,450,914; Apr. 10.
Ehrlich, Albert H., St. Joseph, Mo. Display refrigerator. 1,451,565; Apr. 10.
Ehrlich, Albert H., St. Joseph, Mo. Refrigerator display counter. 1,451,566; Apr. 10.
Eisenhart, George W., assignor to Mid-East Specialty Company, Inc., Binghamton, N. Y. Handle construction for paper bags. 1,451,652; Apr. 10.
Elastic Paint Co. (See Goldthorpe, Edwin T., assignor.)
Elder, Andrew D. (See Elder, Robert B., assignor.)
Elder, Robert B., assignor to A. D. Elder, Denver, Colo. Hydraulic classifier. 1,451,067; Apr. 10.
Electric Arc Cutting & Welding Company. (See Holslag, Claude J., assignor.)
Ellis, Carleton, Montclair, N. J., assignor to Ellis-Foster Company. Cumaron paint. 1,451,092; Apr. 10.

Ellis-Foster Company. (See Ellis, Carleton, assignor.)
Ellis Resilient wheel Corporation. (See Patch, H. M., and Romney, assignors.)
Ellison, Edward H., Jamestown, N. Y. Metallic frame for windows, doors, etc. 1,451,012; Apr. 10.
Elmore, Richard E., New York, N. Y. Locking system for automobiles. 1,451,209; Apr. 10.
Emery, Erastus, Pittsburgh, Pa. Brake-shoe key. 1,451,332; Apr. 10.
Engel, Frank, assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y. Ventilator. 1,451,538; Apr. 10.
Eppenstein, Otto, assignor to Firm of Carl Zeiss, Jena, Germany. Stereoscopic telemeter. 1,450,915; Apr. 10.
Erickson, Charles E., Delta, Utah, and M. J. Mast, Grand Junction, Colo. Gold-panning machine. 1,451,567; Apr. 10.
Ericson, Emile, Pelham, and R. Weiss, New York, N. Y., assignors to The Pennsylvania Textile Mills Inc., Glenriddle, Pa. Textile fabric. Des. 62,191; Apr. 10.
Ericsson, Elov, St. Paul, Minn. Rotary steam engine. 1,451,653; Apr. 10.
Eriksson, Erik O. (See Ljungstrom, F., Broberg, and Eriksson.)
Esch, Henry S., New York, N. Y. Articulated tire guard. 1,451,013; Apr. 10.
Eslick, Joseph S., San Jose, Calif. Motor-cycle support. 1,451,210; Apr. 10.
Eustis, Frederic A., Milton, C. R., Hayward, Quincy, and H. M. Schleicher and D. Belcher, Boston, Mass., assignors of one-half to said Eustis and one-half to C. P. Perin, New York, N. Y. Making electrolytic iron. 1,451,333; Apr. 10.
Evans, Arthur N. (See Casper, George C., assignor.)
Ewell, Charles O., Dyer, Tenn. Barrel. 1,451,068; Apr. 10.
Ewing, James C., Oakland, Calif. Pyjamas. 1,451,093; Apr. 10.
Faitz, Gustav A., Chicago, Ill. Ratchet wrench. 1,451,498; Apr. 10.
Faries, Robert, Williamsport, Pa., assignor to A. Schrader's Son, Inc., New York, N. Y. Pressure gauge. 1,451,038; Apr. 10.
Farley, John W., trustee. (See Tolson, Robert L., assignor.)
Farmer, Clyde C., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Car-door-control device. 1,451,441; Apr. 10.
Farmer, Clyde C., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid-pressure brake. 1,451,440; Apr. 10.
Farnham, Bion B., Buffalo, N. Y. Vacuum roll. 1,451,568; Apr. 10.
Fate, Daisy L., executrix. (See Fate, John L.)
Fate, John L., deceased; D. L. Fate, executrix, assignor, by mesne assignments, to C. R. Gleason, Chicago, Ill. Rack for stacked containers. 1,451,146; Apr. 10.
Fay, John L., St. Louis, Mo. Chassis lubricating and cleaning system. 1,451,388; Apr. 10.
Feder, Louis H., assignor of one-half to R. S. Bondy, Cleveland, Ohio. Curtain-supporting means for automobile doors. 1,451,147; Apr. 10.
Fether, George A., El Dorado, Pa. Nut and bolt lock. 1,451,014; Apr. 10.
Fibre Corporation Limited. (See Michot, Georges, assignor.)
Fike, Oliver P., assignor of one-half to E. M. Hoppenberg, Findlay, Ohio. Conveyer. 1,450,952; Apr. 10.
Firestone, Joseph B., Roanoke, La. Band cutter and feeder. 1,451,442; Apr. 10.
Firestone Tire and Rubber Company. (See Maranville, Harvey H., assignor.)
Fisher, Frank L., et al. (See Burns, Fred T., assignor.)
Flannery, Martin A., New York, assignor to Will & Baumer Candle Co., Inc., Syracuse, N. Y. Votive stand. Des. 62,190; Apr. 10.
Fleischer, Paul W., Weehawken Heights, N. J., assignor to American Can Company, New York, N. Y. Automatic chain-feed attachment. 1,451,015; Apr. 10.
Floring, Frank H., Syracuse, N. Y. Clutch-pedal control for motor vehicles. 1,451,148; Apr. 10.
Fontaine, Marie A., Manchester, N. H. Abdominal supporter. 1,450,953; Apr. 10.
Forbes, Kingston, Flint, assignor to General Motors Corporation, Detroit, Mich. Fastening device for motor-vehicle hoods. 1,451,002; Apr. 10.
Ford, James H., Mount Vernon, N. Y. Locking device for automobiles. 1,451,490; Apr. 10.
Forshee, Frank F., Flint, Mich., assignor to Westinghouse Electric Products Company. Electric heating system for ironing machines. 1,451,539; Apr. 10.
Forton, George, Detroit, Mich. Handsaw. 1,451,211; Apr. 10.
Foster, Theodore W., & Bro. Co. (See Foster, Theodore W., assignor.)
Foster, Theodore W., assignor to Theodore W. Foster & Bro. Co., Providence, R. I. Vanity case. Des. 62,200; Apr. 10.
Fowler, Elbert, Baltimore, Md. Machine gun. 1,451,443; Apr. 10.
Fowler, William C., Birmingham, Ala. Convertible vehicle body. 1,451,016; Apr. 10.
France, William A., Philadelphia, Pa. Manufacture of self-hardening refractory articles. 1,451,540; Apr. 10.
Franklin Optical Company. (See Bugbee, Lucian W., assignor.)
Franklin, Sterling B., and G. S. Younkin, Arkansas City, Kans. Light shield and reflecting device. 1,451,017; Apr. 10.
Fraser, George H., Brooklyn, N. Y. Crushing machine. 1,451,149; Apr. 10.
Fraser, George H., Brooklyn, N. Y. Machine for crushing and grinding. 1,451,156; Apr. 10.
Fraser, George H., Brooklyn, N. Y. Machine for crushing or grinding. 1,451,150; Apr. 10.
Fraser, George H., Brooklyn, N. Y. Machine for crushing or grinding. 1,451,151; Apr. 10.
Fraser, George H., Brooklyn, N. Y. Machine for crushing or grinding. 1,451,155; Apr. 10.
Fraser, George H. Brooklyn, N. Y. Machine for grinding and crushing. 1,451,154; Apr. 10.
Fraser, George H., Brooklyn, N. Y. Pulverizing mill. 1,451,152; Apr. 10.
Fraser, George H., Brooklyn, N. Y. Pulverizing mill. 1,451,153; Apr. 10.
Frederick, Foster T. (See Smith, A. J., and Frederick.)
Frederick, Louis T., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Method of and apparatus for making propellers. 1,451,541; Apr. 10.
Frederick, Roland, Fairmount, Ind. Permutation switch. 1,451,569; Apr. 10.
French, James C., Chicago, Ill., assignor, by mesne assignments, to F. C. Austin Machinery Company. Motor-truck dumping vehicle. 1,451,018; Apr. 10.
Frey, Elmer E., Long Beach, Calif. Time switch. 1,451,094; Apr. 10.
Friedley Voshardt Co. (See Mohrmann, Paul, assignor.)
Frobbieter, Gerhard E., Princeton, Ind. Process and means for removing corroded terminals from storage batteries. 1,451,500; Apr. 10.
Frost, Eber. (See Gavel, S., and Frost.)
Ftyklo, Andrew, Braznell, Pa. Combination utensil. 1,451,542; Apr. 10.
Fulton Iron Works Company. (See Hurter, Henry, assignor.)
Furber, Frederick M., Revere, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine and method applicable in the cutting of sheet material. 1,450,945; Apr. 10.
Fye, John G., Ollie, Iowa. Valve-spring-lifting device. 1,451,212; Apr. 10.
Fynn, Valère A., assignor, by mesne assignments, to Wagner Electric Corporation, St. Louis, Mo. Speed-regulating apparatus. 1,451,501; Apr. 10.
Fynn, Valère A., assignor, by mesne assignments, to Wagner Electric Corporation, St. Louis, Mo. Speed-regulating apparatus. 1,451,502; Apr. 10.
Gagné, Augustin, assignor to Hemphill Company, Central Falls, R. I. Open or lace work knitting machine. 1,450,946; Apr. 10.
Gallagher, George D. (See Moore, J. B., and Gallagher.)
Gantt, Michael D. (See Youngson, James, assignor.)
Garcin, Marie L., New York, N. Y. Marking device. 1,451,654; Apr. 10.
Gardner, William C., Ardmore, Okla. Fishhook holder. 1,451,256; Apr. 10.
Gates, Frederic P., West Hartford, assignor to The Arrow Electric Company, Hartford, Conn. Electric switch. 1,451,570; Apr. 10.
Gavel, Stephen, and E. Frost, Olds, Alberta, Canada. Shock absorber. 1,450,954; Apr. 10.
Gay, Edward E., Springdale, Ark. Apple-preparing machine. 1,451,571; Apr. 10.
Gebauer, Charles L., et al. (See Helm, Emerson B., assignor.)
Geddes, Charles A., Philadelphia, Pa., assignor to National Carbonator Manufacturing Company, Incorporated. Carbonator and draft arm for soda water. Re15,575; Apr. 10.
Gee, Norman E., assignor of one-half to J. W. Parks, Altoona, Pa. Milk receptacle. 1,451,420; Apr. 10.
General Motors Corporation. (See Forbes, Kingston, assignor.)
Gerbig, Bert G., Seattle, Wash. Circuit breaker. 1,451,157; Apr. 10.
Gestas, Isidore, Los Angeles, Calif. Boring machine for paper. 1,451,610; Apr. 10.
Gibbons, William J., Philadelphia, Pa. Contact for electric knife switches. 1,451,296; Apr. 10.
Gilbert, Harold K., Garner, Iowa. Direction signal for automobiles. 1,451,213; Apr. 10.
Gile Engine Company. (See Gile, William A., assignor.)
Gile, William A., Stoneham, assignor to Gile Engine Company, Boston, Mass. Internal-combustion engine. 1,450,916; Apr. 10.
Gill, David R., assignor of one-half to H. M. Sturgeon, Erie, Pa. Forging press. 1,450,947; Apr. 10.
Gillcy, Sullivan E., New York, N. Y. Auxiliary seat for automobiles. 1,451,655; Apr. 10.
Gilson, Ara, assignor to Packard Motor Car Company, Detroit, Mich. Lock for motor vehicles. 1,451,039; Apr. 10.
Ginabat, André, Paris, France. Surface condenser. 1,451,334; Apr. 10.
Girl, Christian. (See Dunston, Wayne E., assignor.)
Girl, Christian. (See Short, Bladen M., assignor.)
Glassman, Allan, New York, N. Y. Bonquet holder. 1,450,955; Apr. 10.

Gleason, C. Roy. (See Fate, John L., assignor.)
Glidden, Harvey L., Needham Heights, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Shoe rack. 1,450,948; Apr. 10.
Goertz, August, & Co. (See Goertz, Frederick, assignor.)
Goertz, Frederick, Newark, N. J., assignor to August Goertz & Co. Combined stiffening and closing device for bags. 1,451,504; Apr. 10.
Goertz, Frederick, Newark, N. J., assignor to August Goertz & Co. Container. 1,451,505; Apr. 10.
Goetz, Henry A., Chicago, Ill. Dirigible airship. 1,451,503; Apr. 10.
Goitre, Mario, Turin, Italy. Tab of guide cards for card indexes and the like. 1,451,214; Apr. 10.
Goldee Mfg. Co. (See Olshan, Harry, assignor.)
Goldthorpe, Edwin T., assignor to Elastic Paint Co., Chicago, Ill. Drier. 1,450,917; Apr. 10.
Gombos, Karoly. (See Toth, F., and Gombos.)
Goodman, Irving, New York, N. Y. Bloomers. 1,451,421; Apr. 10.
Goodrich, B. F., Company, The. (See MacDonald, Frank J., assignor.)
Goodwin, Lewis A., Cora, Mo. Cooling system for houses or rooms. 1,451,215; Apr. 10.
Goodyear Tire & Rubber Company, The. (See Upson, Ralph H., assignor.)
Gossner, Joseph, New York, N. Y. Combined ash tray, match holder, and cigar cutter. Des. 62,201; Apr. 10.
Gottsch, Christian H., New Hyde Park, N. Y. Drainpipe trap. 1,450,956; Apr. 10.
Graber, Henry P., assignor to Adam Fisher Mfg. Co., St. Louis, Mo. Vacuum massager. 1,451,019; Apr. 10.
Graf, Fredrik, Krokslatt, and J. W. Svensson, Molndal, Sweden. Self-acting friction clutch. 1,451,506; Apr. 10.
Graff, Oscar, Philadelphia, Pa. Shoe lacing. 1,450,918; Apr. 10.
Graham, Ulysses G. (See Lorig, E. V., and Graham.)
Grannan, Thomas W. and W. D., Loogootee, Ind. Internal-combustion engine. 1,451,389; Apr. 10.
Grannon, William D. (See Grannon, Thomas W. and W. D.)
Grant, Hugo B., assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Liquid-elevating device for motor-vehicle engines. 1,451,158; Apr. 10.
Green, William R., Downers Grove, Ill. Measuring instrument. 1,451,572; Apr. 10.
Greene, Gustave F., South Manchester, Conn. Apron. 1,451,095; Apr. 10.
Greene, John S., Rochester, N. Y., assignor to Commercial Camera Company, Providence, R. I. Photographic dark room. 1,451,159; Apr. 10.
Greenfield Tap and Die Corporation. (See Morgan, R. L., Griffith, and Churchill, assignors.)
Greenleaf, Robert P., assignor to F. Billings, Cleveland, Ohio. Loading machine. 1,451,020; Apr. 10.
Greenslade, Louis M., Los Angeles, Calif. Spring-leaf spreader. 1,451,297; Apr. 10.
Greger, George G., Detroit, Mich. Wheeled toy. Des. 62,202; Apr. 10.
Greth, August, Los Angeles, Calif. Windmill. 1,451,298; Apr. 10.
Griffith, Winifred S. (See Morgan, R. L., Griffith, and Churchill.)
Gruetter, John R., Cleveland, Ohio. Discharge mechanism. 1,451,216; Apr. 10.
Guelbaum, David, Syracuse, N. Y. Grain-cutting machine. 1,451,217; Apr. 10.
Guilbert, Augustus T., Pasadena, Calif. Statuette lamp stand. Des. 62,203; Apr. 10.
Gulick, Edward J., Elkhart, Ind., assignor to Packard Motor Car Company, Detroit, Mich. Steering-rod connection. 1,451,040; Apr. 10.
Guyatt, Christopher G. (See Allebrand, C. W., and Guyatt.)
Guynn, John M., assignor of one-half to J. D. McLain, Newport, Ark. Dumping wagon. 1,451,218; Apr. 10.
H-R Manufacturing Company. (See Hilliard, Harry D., assignor.)
Haas Electric Sales Company, The. (See Haas, Max L.)
Haas, Joseph, jr., Muncie, Ind., assignor to The Roessler & Hassiacher Chemical Company, New York, N. Y. Electroplating with zinc. 1,415,543; Apr. 10.
Haas, Max L., assignor to The Haas Electric Sales Company, Cleveland, Ohio. Electric fixture. Des. 62,204; Apr. 10.
Hagen, Oscar A., Fargo, N. Dak. Telescope. 1,451,096; Apr. 10.
Hahnemann, Walter, Kitzeberg, near Kiel, Germany, assignor to the Firm Signal Gesellschaft m. b. H., Kiel, Germany. Sound-signaling device for dense sound-propagating mediums. 1,451,422; Apr. 10.
Halferty, Peter F., Grayland, Wash. Fly hook and leader. 1,451,656; Apr. 10.
Hammond, William P., Passaic, N. J., assignor to A. Schrader's Son, Incorporated, Brooklyn, N. Y. Pressure gauge. 1,451,257; Apr. 10.
Handley, George F., Glendale, N. Y., assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,451,423; Apr. 10.
Hondoll, Percy G., Battersea, London, England. Cleaner for water-tube boilers. 1,450,957; Apr. 10.
Hanks, George R., assignor to Taylor-Wharton Iron and Steel Company, High Bridge, N. J. Grinding body and producing same. 1,451,335; Apr. 10.
Hanner, Edward, Philadelphia, Pa. Hoop. 1,451,258; Apr. 10.
Hansen, August, Aberdeen, S. Dak. Automatic punching device. 1,451,219; Apr. 10.
Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Independent rotation for percussive tools. 1,451,362; Apr. 10.
Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Lug chuck for rock drills. 1,451,363; Apr. 10.
Hanson, John, Alderson, Alberta, Canada. Water drain for windows. 1,451,021; Apr. 10.
Hanson, John A., Harwood, N. Dak. Seal case and ejector. 1,451,069; Apr. 10.
Harrington, Norman T., Cleveland, Ohio. Tower. 1,451,259; Apr. 10.
Harris, Loy E., and T. A. Leach, Emporia, Kans. Gravity angle meter for dental radiography. 1,451,507; Apr. 10.
Harris, Paul, New York, N. Y. Rheostat. 1,450,919; Apr. 10.
Haskell, Samuel, Brooklyn, N. Y. Phonograph doll. 1,451,022; Apr. 10.
Hastings Manufacturing Company. (See Johnson, A. E., and Taffee, assignors.)
Haughey, Charles B., Council Bluffs, assignor of one-half to O. R. Edwards, Davenport, Iowa. Printing vulcanizer. 1,451,611; Apr. 10.
Hausner, Ben Z., New York, N. Y. Attaching means for separable fastener elements. 1,451,612; Apr. 10.
Haynn, Richard, and F. Münz, Fechenheim-on-the-Main, Germany, assignors to Leopold Cassella & Co., Gesellschaft mit beschränkter Haftung. Production of shot effects, not to be stained in piece dyeing. 1,451,299; Apr. 10.
Hayward, Carle R. (See Eustis, F. A., Hayward, Schleicher, and Belcher.)
Head, Ronald, Luton, England, assignor to Joseph Baker Sons and Perkins Company, Incorporated, White Plains, N. Y. Means for grinding or pulverizing food or other substances of a similar nature. 1,451,424; Apr. 10.
Heap, Jesse J., New York, N. Y., assignor to Union Special Machine Company, Chicago, Ill. Plait folder for sewing machines. 1,451,220; Apr. 10.
Heberling, John, assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Belt buckle. 1,451,160; Apr. 10.
Heenan & Froude Limited. (See Cruyt, Lucien C., assignor.)
Hefner, Jesse A. L., Danese, W. Va. Jay bar. 1,451,657; Apr. 10.
Helmrod, Albert A. (See Dillon, E. P., and Helmrod.)
Heinz, H. J., Company. (See Higerd, F. A., and Becker, assignors.)
Hellmund, Rudolf E., Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company. Control apparatus. 1,451,544; Apr. 10.
Heotes, John, Tomahawk, Wis. Sliding drawer and locking means therefor. 1,450,974; Apr. 10.
Helfrecht, Fred A., Berkeley, Calif. Casing for holding counting disks. Des. 62,192; Apr. 10.
Helm, Emerson B., assignor of one-third to C. L. Gebauer and one-third to J. Benner, Cleveland, Ohio. Headlight for automobiles. 1,451,161; Apr. 10.
Helman, Calvin C., Cleveland, Ohio. Cord dispenser. 1,451,300; Apr. 10.
Hemphill Company. (See Bosworth, George P., assignor.)
Hemphill Company. (See Gagné, Augustin, assignor.)
Henderson, Charles J., Chicago, Ill. Combined table and ironing board. 1,451,508; Apr. 10.
Hendrix, Roberta W., Chicago, Ill. Doll walker. 1,451,390; Apr. 10.
Hendry, Alexander and M. A., Glasgow, Scotland. Belt for machinery driving. 1,451,573; Apr. 10.
Hendry, Malcolm A. (See Hendry, Alexander and M. A.)
Henke, Clyde O. (See Brown, O. W., and Henke.)
Hennekin, Kaspar F., Seaside, Calif. Release device for towing. 1,451,658; Apr. 10.
Herr, Henry A., Chicago, Ill. Producing a matrix. 1,451,162; Apr. 10.
Herrmann, Charles F. (See Ladd, Earnest W., assignor.)
Heys, William E. (See Macpherson, R., and Heys.)
Hickok Manufacturing Company. (See Heberling, John, assignor.)
Higerd, Floyd A., Bellevue, Pa., and G. Becker, Silver Creek, N. Y., assignors to H. J. Heinz Company, Pittsburgh, Pa. Means for shipping fruit, etc. 1,451,070; Apr. 10.
Highland Body Manufacturing Company, The. (See Morrison, James, assignor.)
Hilliard, Harry D., assignor, by mesne assignments, to H-R Manufacturing Company, Chicago, Ill. Shock absorber for automobiles. 1,451,509; Apr. 10.
Hillman, Charles F., Wichita Falls, Tex. Oil-refining device. 1,451,574; Apr. 10.
Hinchliff, Ralph, assignor to Burson Knitting Company, Rockford, Ill. Openwork knitted fabric and producing same. 1,451,391; Apr. 10.
Hochman, Jacob, New York, N. Y. Quick-stop emergency brake for vehicles. 1,451,336; Apr. 10.
Hockman, Russel, assignor of one-third to H. H. Wilson and one third to E. B. Shaffer, Lock Haven, Pa. Automatic stock regulator for paper-making machines. 1,451,659; Apr. 10.

Hodgkiss, Frank, Oakland, Calif. Tractor. 1,451,613; Apr. 10.
Hoecke, David, Greenwich, Conn. Leaf turner. 1,451,614; Apr. 10.
Hoff, Chester A. (See Steese, J. C., and Hoff.)
Hoffman, Clarence O., assignor of one-half to L. Schulman, Detroit, Mich. Window-cleaning device. 1,451,221; Apr. 10.
Hoffstetter, Carl H., assignor to Odin Stove Manufacturing Company, Erie, Pa. Burner. 1,451,072; Apr. 10.
Hoffstetter, Carl H., assignor to Odin Stove Manufacturing Company, Erie, Pa. Stove. 1,451,071; Apr. 10.
Holland, Henry T., Windeld, N. Y. Comb. 1,451,260; Apr. 10.
Holmes, George E., Salt Lake City, Utah. Oil-shale retort. 1,451,575; Apr. 10.
Holmes, Levi, Raynham, Mass. Mold for rubber heels. 1,451,510; Apr. 10.
Holslag, Claude J., South Orange, assignor to Electric Arc Cutting & Welding Company, Newark, N. J. Electrode for electric-arc cutting or reducing. 1,451,392; Apr. 10.
Holtorp, Wilhelm, Hamburg, Germany. Bearing. 1,451,222; Apr. 10.
Hope, Alfred S., Chicago, Ill. Candle pointer. 1,451,163; Apr. 10.
Hopkins, Leonard, assignor, by mesne assignments, to Eaton, Crane & Pike Company, Pittsfield, Mass. Imprinting machine. 1,450,949; Apr. 10.
Hopkins, William L., Roslyn, assignor to American Lithographic Company, New York, N. Y. Display device. 1,451,023; Apr. 10.
Hoppenberg, Ernest M. (See Fike, Oliver P., assignor.)
Hormann, Diedrich F., assignor of one-half to E. F. Comegys, Oklahoma, Okla. Homogenizing valve. 1,451,393; Apr. 10.
Horvath, Kalman. (See Ardo, Joseph, assignor.)
Houston, Harold A., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Flexible pinion. 1,451,576; Apr. 10.
Howard, Rowland G., Jackson, Tenn. Animal trap. 1,451,223; Apr. 10.
Huckestein, Norman C., Pittsburgh, Pa. Radiator guard. 1,451,337; Apr. 10.
Hurley, Roy F., assignor to A. T. Twesme, Galesville, Wis. Sterilizing holder for toothbrushes. 1,451,425; Apr. 10.
Hurst, Frederick G., Portland, Oreg. Fish screen. 1,451,394; Apr. 10.
Hurter, Henry, assignor to Fulton Iron Works Company, St. Louis, Mo. Cane-crushing apparatus. 1,451,164; Apr. 10.
Hustvedt, Olaf M., and H. J. Nichols, Washington, D. C. Spotting projectile. 1,451,395; Apr. 10.
Hubbard, James W., Eau Claire, Wis., assignor, by mesne assignments, to Continental and Commercial Trust and Savings Bank. Ticket-printing machine. Re15,576; Apr. 10.
Hunt, William J., St. Joseph, Mo. Tire-carrier lock. 1,451,615; Apr. 10.
Hutchinson, William M., New Kensington, Pa. Window screen. 1,450,920; Apr. 10.
Hyde, Burdon P., assignor to Scovill Manufacturing Company, Waterbury, Conn. Producing distinctive articles. 1,451,041; Apr. 10.
Hyland, Edward J., Mount Morris, Ill. Curtain mounting for trucks. 1,451,690; Apr. 10.
Impellizieri, Joseph, Brooklyn, N. Y. Power-transmission mechanism. 1,451,516; Apr. 10.
Ingersoll, Fred, Omaha, Nebr. Frying-pan-cover holder. 1,451,545; Apr. 10.
Ingersoll-Rand Company. (See Hansen, Charles C., assignor.)
Ingle, Arthur H. (See Trosch, Alfred, assignor.)
Instant Hot Primer Company. (See Sweet, Frederick D., assignor.)
International Motor Company. See Masury, Alfred F., assignor.)
International Scale Company. (See Osgood, Louis A., assignor.)
International Silver Company. (See Leech, John, assignor.)
Intertype Corporation. (See Sperry, Samuel E., assignor.)
Jacobs, George W. (See Wade, E. J., and Jacobs.)
Jallier, Gustave P., Paris, France. Fountain-pen spring safety clip. 1,451,261; Apr. 10.
Jantzen, Paul H. H., London, England. Dynamo-electric machine. 1,451,577; Apr. 10.
Jarmer, William C., Chicago, Ill. Weather strip. 1,450,921; Apr. 10.
Jenkins, Stanley S., Buffalo, N. Y. Invalid lifter and carrier. 1,450,950; Apr. 10.
Johannesen, Conrad A., Erie, Pa. Game board. 1,450,958; Apr. 10.
Johns, Elvy E., Heppner, Oreg. Adjustable bearing. 1,451,224; Apr. 10.
Johns-Manville, Incorporated. (See Carson, Clarence, assignor.)
Johnson, Aben E., and L. H. Taffee, assignors to Hastings Manufacturing Company, Hastings, Mich. Tire carrier. 1,451,262; Apr. 10.
Johnson, Edward H., assignor to The A. & J. Manufacturing Company, Binghamton, N. Y. Handle for kitchen utensils. 1,451,358; Apr. 10.
Johnson, James R., Omaha, Nebr. Pan lifter. 1,451,642; Apr. 10.
Jokisch, Rudolf. (See Schember, K., and Jokisch.)
Jones, Alfred E., Indian Orchard, Mass. Aeroplane race game. 1,451,511; Apr. 10.
Jones, Earle M., assignor to O. B. McClintock Company, Minneapolis, Minn. Burglar-alarm housing. Des. 62,205; Apr. 10.
Jones, Walter, Cleveland, Ohio. Shears sharpener. 1,451,396; Apr. 10.
Kalmus Comstock & Wescott Incorporated. (See Wescott, William B., assignor.)
Kaplan, Victor, Brunn, Czechoslovakia. Water turbine. 1,451,263; Apr. 10.
Keegan, Francis W. (See Pokorny, Frank, jr., assignor.)
Keene, Walter E., Baltimore, Md. Brush holder. Des. 62,193; Apr. 10.
Kellogg Switchboard and Supply Company. (See Suckoff, Samuel, assignor.)
Kellogg, Sylvanus H., Los Angeles, Calif. Measuring apparatus. 1,451,512; Apr. 10.
Kelly, Andrew, assignor to Borax Consolidated Limited, London, England. Manufacture of borax and boric acid. 1,450,975; Apr. 10.
Kelsey Wheel Company. (See Winter, John R., assignor.)
Kendall, William G., Newark, N. J., assignor to Scovill Manufacturing Company, Waterbury, Conn. Vanity case. 1,451,617; Apr. 10.
Kent, Thomas F., New York, N. Y. Burner. 1,451,546; Apr. 10.
Kerrick Steam Motors Company. (See Kerrick, Walter B., assignor.)
Kerrick, Walter B., assignor to Kerrick Steam Motors Company, Los Angeles, Calif. Oil burner. 1,451,460; Apr. 10.
Kimball, A., Company. (See Marsh, Alonzo K., assignor.)
Kincaid, Harry B. (See Sweeney, Daniel, assignor.)
King, Clifford G., Providence, R. I. Collapsible tube. 1,451,461; Apr. 10.
Kintzele, Julius H., St. Louis, assignor to Ste. Genevieve Wash Machine Corporation, Ste. Genevieve, Mo. Washing machine. 1,451,547; Apr. 10.
Kinzie, Charles J. (See Barton, L. E., and Kinzie.)
Kirby Manufacturing Company, The. (See Otterbein, Arthur, assignor.)
Kissel Motor Car Company, The. (See Palmer, H. D., and Brhel, assignors.)
Kitto, William H., jr., and S. B. Molles, Detroit, Mich.; said Kitto assignor to said Molles. Gear-cutting machine. 1,451,097; Apr. 10.
Klein, Abraham A., and M. F. Beecher, assignors to Norton Company, Worcester, Mass. Non-slip tile. 1,451,462; Apr. 10.
Kleinschmidt, Henry F. A., Johnstown, Pa., assignor to The Lorain Steel Company. Mold or form. 1,451,264; Apr. 10.
Klemmer, Conrad, and W. P. Koechel, Bogota, N. J.; said Koechel assignor to said Klemmer. Combined rheostat and socket. 1,451,024; Apr. 10.
Koechel, Walter P. (See Klemmer, C., and Koechel.)
Koehring Company. (See Winkler, Henry O., assignor.)
Kopperl, Joseph I. (See Reilly, Frank C., assignor.)
Korrectolite Company, Inc. (See Oliver, Eben F., assignor.)
Koretzky, Harry M., New York, N. Y. Flash light. 1,451,618; Apr. 10.
Korten, Ernest, Sunbury, Pa., assignor to Susquehanna Silk Mills, New York, N. Y. Bunch builder. 1,451,073; Apr. 10.
Kottas, Arthur, Vienna, Austria. Magazine firearm. 1,451,339; Apr. 10.
Kowalsky, Rudolf A., assignor to American Wringer Company, Woonsocket, R. I. Waterboard for wringing machines. 1,451,664; Apr. 10.
Kraft, Henry P., Ridgewood, N. J. Vulcanizing valve. 1,451,025; Apr. 10.
Kraft, Henry P. (See Schweinert, M., and Kraft.)
Krause, Robert J., Japatul, Calif. Sealing ring. 1,451,225; Apr. 10.
Kreisheid, Henry, Mansfield, Ohio, assignor to Westinghouse Electric Products Company. Contact terminal. 1,451,548; Apr. 10.
Kroonen, Leo, Corona, assignor to C. Donlon, Oxnard, Calif. Building construction. 1,451,340; Apr. 10.
Kucewicz, Joseph C., Cleveland, Ohio. Hairpin. 1,451,397; Apr. 10.
Kupec, Joseph F., Lincoln, Nebr. Automobile radiator system. 1,451,364; Apr. 10.
Kurowski, Alfred G. F., Brooklyn, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,451,463; Apr. 10.
Kyger, Frank L., Streator, Ill. Soldering iron. 1,451,578; Apr. 10.
Kyle, Nicholas W., Colfax, Ill. Lifting device. 1,451,549; Apr. 10.
L-T-L Company. (See Thulander, Konstantine, assignor.)
Ladd, Earnest W., assignor of one-half to C. F. Herrmann, New York, N. Y. Speed regulator for phonographs. 1,451,665; Apr. 10.
Ladinsky, Stanley, Newark, N. J. Window-sash holder. 1,451,226; Apr. 10.
Lake Torpedo Company, The. (See Björklund, Eric G., assignor.)

Landing, William H., assignor of one-half to A. Lindsey, Santa Ana, Calif. Lock. 1,451,265; Apr. 10.
Lane, Daniel F., Painted Post, N. Y. Washing machine. 1,451,513; Apr. 10.
Langenau Manufacturing Company. (See Yemniker, Rudolph M., assignor.)
Lango, Charles H., assignor to The Noshok Co., Detroit, Mich. Rebound absorber. 1,451,227; Apr. 10.
Larson, Arvid G., assignor to Dodge Tool Company, Grinnell, Iowa. Fuel-feeding device for internal-combustion engines. 1,451,228; Apr. 10.
Larson, Edward, Lerdala, Sweden. Safety device for portable firearms. 1,450,976; Apr. 10.
Larsonneur, David L. A., Chicago, Ill. Governor. 1,451,365; Apr. 10.
Latrace, Septiamus, Saskatoon, Saskatchewan, Canada. Folding door for garages. 1,451,619; Apr. 10.
Lawler, James M., assignor of one-half to T. H. Cutsinger, Topeka, Kans. Optician's tool. 1,450,959; Apr. 10.
Lazara, Ignacio, Salem, Va. Web-feeding device. 1,451,579; Apr. 10.
Leach, Troy A. (See Harris, L. E., and Leach.)
Le Blanc, Joseph A., Salem, Mass. Nonskidding tire shoe. 1,451,074; Apr. 10.
Le Compte, Harry J., Oklahoma, Okla. Stovepipe fastener. 1,451,043; Apr. 10.
Lecuyer, Stanly, Detroit, Mich.. Lock. 1,451,464; Apr. 10.
Leech, John, Bridgeport, assignor to International Silver Company, Meriden, Conn. Fork or similar article. Des. 62,206; Apr. 10.
Leilich, Frank T., Baltimore, Md. Switch lock. 1,451,366; Apr. 10.
Leonard, Caswell L., Corinth, Miss. Vegetable slicer. 1,451,075; Apr. 10.
Leonard, Joseph P., Paterson, N. J. Device for detecting overheated bearings. 1,451,044; Apr. 10.
Leopold, Cassella & Co. Gesellschaft mit beschränkter Haftung. (See Haynn, R., and Münz, assignors.)
Lesh, Lawrence J., assignor to E. J. Simon, New York, N. Y. Spark-gas apparatus. 1,451,426; Apr. 10.
Lesh, Lawrence J., assignor to E. J. Simon, New York, N. Y. Spark-gas apparatus. 1,451,427; Apr. 10.
Lespinasse, Victor D., Chicago, Ill. Instrument for removing the testicles of birds. 1,451,398; Apr. 10.
Limoseth, Bernt, Westby, Wis. Draft attachment. 1,451,620; Apr. 10.
Lindenberg, Moritz T., Boston, Mass. Liquid motor. 1,451,580; Apr. 10.
Lindsey, Al. (See Landing, William H., assignor.)
Ljungstrom, Frederik, I. Broberg, and E. O. Ericksson, assignors to Aktiebolaget Ljungströms Angturbin, Stockholm, Sweden. Reversible gearing. 1,451,266; Apr. 10.
Locomobile Company, The. (See Church, Harold D., assignor.)
Locomobile Company, The. (See Rosner, Adolph, assignor.)
Loepfe, Louis H., St. Louis, Mo. Window-cleaner's seat. 1,451,076; Apr. 10.
London, Louis B., New York, N. Y. Bowl for lighting fixtures. Des. 62,207; Apr. 10.
Long, Claud L., assignor to The Crawford, McGregor and Canby Company, Dayton, Ohio. Cutter-head drive for last lathes. 1,451,665; Apr. 10.
Long, William H., New York, N. Y. Printing press. 1,451,045; Apr. 10.
Lontz, Harry R., Richmond, Ind. Resilient bearing sleeve. 1,451,428; Apr. 10.
Lontz, Harry R., Richmond, Ind. Making resilient bearing sleeves. 1,451,429; Apr. 10.
Lorain Steel Company, The. (See Kleinschmidt, Henry F. A., assignor.)
Lorig, Emanuel V., and U. G. Graham, Omaha, Nebr. Protective apparatus for safes and safety vaults. 1,451,581; Apr. 10.
Louden Machinery Company, The. (See Neller, Albert H., assignor.)
Loudenslager, Edgar L., Toledo, Ohio. Tile manufacture. 1,451,229; Apr. 10.
Loudon, Warren P., Edgewood Park, Pa., assignor to Westinghouse Electric and Manufacturing Company. Starting system for automobiles. 1,451,550; Apr. 10.
Low, Eugene P., Oneida Castle, N. Y. Attachment for headlights. 1,451,582; Apr. 10.
Low, Frank S., Niagara Falls, N. Y., assignor to Weaver Company, Madison, Wis. Producing halogen acids. 1,451,399; Apr. 10.
Lubac, Alfred, Paris, France. Printing-type-composing apparatus. 1,450,960; Apr. 10.
Luckett, William S., Chestnut Hill, Pa. Clear-vision rain guard for windshields. 1,450,977; Apr. 10.
Lunken, Edmund H., Cincinnati, Ohio. Window. 1,451,077; Apr. 10.
Lupton, William B., Windermere, England. Paperhanger's tool. 1,451,444; Apr. 10.
Lüske, Karl, Budapest, and A. Moussong and P. Moussong, Tolna-Hogyesz, Hungary. Stove. 1,450,978; Apr. 10.
Lyttleton, Henry T., Marshall, Tex. Sweet-potato-curing apparatus. 1,450,979; Apr. 10.
McCauley, Chester B., Palo Alto, Calif. Hydraulic-nossle construction. 1,451,165; Apr. 10.
McCardle, Samuel, Strathcona, Canada. Flypaper holder. 1,451,583; Apr. 10.
McCarthy, Daniel J., Elgin, assignor to Chicago Railway Signal and Supply Company, Chicago, Ill. Signal device. 1,451,166; Apr. 10.
McClintock, O. B., Company. (See Jones, Earle M., assignor.)
McDonell, William E., assignor to Shur-On Optical Company, Inc., Rochester, N. Y. Ophthalmic mounting. 1,451,098; Apr. 10.
McGregor, Alexander G., Warren, Ariz. Calcine car. 1,450,980; Apr. 10.
McLain, John D. (See Guynn, John M., assignor.)
McLaughlin, William C., Oakland, Calif. Amalgamator. 1,451,099; Apr. 10.
McLoughlin, Patrick, Worcester, Mass. Chain. 1,450,981; Apr. 10.
McRuer, Donald, and J. E. Sellers, Phoenix, Ariz. License plate. 1,451,621; Apr. 10.
Mabee, May C., Toledo, Ohio. Apparatus for treating materials. 1,451,168; Apr. 10.
MacDonald, Frank J., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Method and apparatus for forming straps and applying the same to articles. 1,451,167; Apr. 10.
Macpherson, Robert, Worthington, and W. E. Heys, Bushey, England. Antiseptic and insecticidal soap or composition. 1,451,670; Apr. 10.
Maddock Pottery Company. (See May, Charles A., assignor.)
Mahoney, Thomas J., Colorado Springs, Colo. Marble shooter. 1,451,230; Apr. 10.
Mansmith, Chauncy I. (See Staley, E. H., and Mansmith.)
Mantha, William L., Bayport, N. Y. Adjustable holder for turning crank shafts. 1,451,078; Apr. 10.
Mapes, James R., Canaseraga, N. Y. Gun sight. 1,451,584; Apr. 10.
Maranville, Harvey F., assignor to The Firestone Tire and Rubber Company, Akron, Ohio. Apparatus for the preparation of tire beads. 1,451,169; Apr. 10.
Marko, Stephan, Chicago, Ill. Treating shale. 1,451,367; Apr. 10.
Marlatt, George E., Pasadena, Calif. Typographic matrix and production of same. 1,451,170; Apr. 10.
Marquis, Alister W., Hollister, Calif. Boring machine. 1,451,585; Apr. 10.
Marsh, Alonzo K., assignor to A. Kimball Company, New York, N. Y. Marking ticket. 1,451,341; Apr. 10.
Marshall, Melville J., and G. S. Shaw, Shawinigan Falls, assignors to Shawinigan Laboratories, Limited, Montreal, Quebec, Canada. Removing destructive substances from non-aqueous media. 1,450,982; Apr. 10.
Marston, Howard F., Dayton, Ohio. Size-reducible box. 1,451,622; Apr. 10.
Mast, Matthew J. (See Erickson, C. E., and Mast.)
Masury, Alfred F., assignor to International Motor Company, New York, N. Y. Wheel mounting for motor-propelled railway cars. 1,451,267; Apr. 10.
Matheson, Howard W., assignor to Canadian Electro Products Company, Limited, Montreal, Quebec, Canada. Making condensation products of aliphatic aldehydes. 1,450,984; Apr. 10.
Matheson, Howard W., assignor to Shawinigan Laboratories, Limited, Montreal, Quebec, Canada. Manufacture of aldehyde-ammonia. 1,450,983; Apr. 10.
Mathews, Annie, et al., executors. (See Mathews, Thomas.)
Mathews, Thomas, deceased, Leicester, England; A. Mathews and H. W. Buckingham, executors. Cardboard and like toy. 1,451,301; Apr. 10.
Mattick, Victor A. (See Pelling, E. R., and Mattick.)
Mattson, Julius, Chicago, Ill. Silo. 1,451,171; Apr. 10.
Maxwell, Joseph M., Wichita, Kans. Regenerating beds of exchange silicates. 1,450,985; Apr. 10.
Maxwell, William, Revere, Mass. Scenic effect. 1,451,046; Apr. 10.
May, Charles A., assignor to Maddock Pottery Company, Trenton, N. J. Plate or similar article. Des. 62,208; Apr. 10.
May, Frederic, Vienna, Austria. Cutting device for copying machines. 1,451,445; Apr. 10.
Mayer, Grover C. F., Brooklyn, N. Y. Window guard. 1,451,172; Apr. 10.
Mead, Robert P., and R. B. Thompson, Chicago, Ill. Foldable stool. 1,451,047; Apr. 10.
Mendes, Prestiliano, Valmy, Nev. Food-preparing utensil. 1,451,342; Apr. 10.
Michot, Georges, Dromara, Ireland, assignor to Fibre Corporation Limited, London, England. Flax-pulling machine. 1,451,231; Apr. 10.
Mid-East Specialty Company. (See Eisenhart, George W., assignor.)
Miebach, Harry E., and A. S. Caughey, Lethbridge, Alberta, Canada. Transmission-case cover. 1,451,173; Apr. 10.
Mihalyi, Joseph, Washington, D. C. Optical testing and measuring instrument. 1,451,302; Apr. 10.
Miller, Charles M. (See Schroeder, E. R., and Miller.)
Miller, Edward C., Williamsport, Pa. Air-pressure indicator and gauge. 1,451,514; Apr. 10.
Miller, John O., assignor to The Brunswick-Balke-Collender Company, Chicago, Ill. Grille for phonograph cabinets. Des. 62,194; Apr. 10.
Miller, Leo O., Detroit, Mich. Lock for milk cabinets. 1,451,100; Apr. 10.

Miller, Richard E., Bay Village, Ohio. Automatic windshield-cleaning device. 1,451,368; Apr. 10.
Miller, Steve, San Antonio, Tex. Traffic signal. Des. 62,209; Apr. 10.
Miller, Stuart P., Philadelphia, Pa., assignor to The Barrett Company. Production of alpha-naphthylamine. 1,451,666; Apr. 10.
Milliner, Edgar, St. Louis, Mo. Soldering iron. 1,451,623; Apr. 10.
Mills Belt Company. (See Smith, Clarence E., assignor.)
Mills, James M., Helena, Mont. Grease gun. 1,451,446; Apr. 10.
Millsaps, Jefferson H., Chicago, Ill. Lumber-sawing implement. 1,451,070; Apr. 10.
Miner, William H. (See O'Connor, John F., assignor.)
Mintrop, Ludger, Hanover, Germany. Field seismograph. 1,451,080; Apr. 10.
Mirus, Charles H., Louisville, Ky. Adjustable cap. 1,451,174; Apr. 10.
Mitchell, Edward A., London, England. Gas-distributing system. 1,451,303; Apr. 10.
Mitchell, Mary P., Eaton, Ohio. Inner tube. 1,451,304; Apr. 10.
Mitchell Rail Anchor Company Inc. (See Runyan, William B., assignor.)
Moe, George, Saginaw, Mich. Brush construction. 1,451,400; Apr. 10.
Mohrmann, Paul, assignor to Friedley Voshardt Co., Chicago, Ill. Bracket back for lighting fixtures. Des. 62,210; Apr. 10.
Molles, Stanley B. (See Kitto, W. H., jr., and Molles.)
Momenee, Edward J., Lima, Ohio. Honeycomb-candy cutting and cooling machine. 1,451,081; Apr. 10.
Montague, William L., and B. Welser, assignors to Chain Belt Company, Milwaukee, Wis. Sprocket chain. 1,451,624; Apr. 10.
Montague, William L., and G. B. Welser, jr., assignors to Chain Belt Company, Milwaukee, Wis. Sprocket chain. 1,451,625; Apr. 10.
Moore, Harvey W., and C. H. Schumacher, Stockton, Calif. Electric jack. 1,451,048; Apr. 10.
Moore, James B., and G. D. Gallagher, Washington, D. C. Coin-controlled clock bank. 1,451,305; Apr. 10.
Morgan, Edmund C., Richmond Hill, N. Y. Apparatus for mining. 1,451,101; Apr. 10.
Morgan, Ralph L., W. S. Griffith, and E. Churchill, jr., Worcester, assignors, by mesne assignments, to Greenfield Tap and Die Corporation, Greenfield, Mass. Magnetic chuck. 1,451,268; Apr. 10.
Morrison, James, assignor to The Highland Body Manufacturing Company, Cincinnati, Ohio. Vehicle body and the like. 1,451,626; Apr. 10.
Morrison, James. (See Steiner, H. W., Shipley, and Morrison.)
Morrison, Robert A., and F. L. Oswald, Portland, Oreg. Ironing board. 1,450,986; Apr. 10.
Mosler Lock Company. (See Benham, William T., assignor.)
Moussong, Andor. (See Lüske, K., and Moussong.)
Moussong, Paul. (See Lüske, K., and Moussong.)
Muehleisen, Thomas, San Diego, assignor of one-third to C. Musch, Fullerton, Calif. Water-heater mechanism. 1,451,551; Apr. 10.
Munkel, Walter G., Anamosa, Iowa. Toilet hopper. 1,451,430; Apr. 10.
Munson, Sweney, Fowler, Colo. Tractor spreader. 1,451,627; Apr. 10.
Münz, Ferdinand. (See Haynn, R., and Münz.)
Murdock, Albert O., Fort Payne, Ala. Reserve oil tank and gauge for automobiles. 1,451,232; Apr. 10.
Murray, Thomas E. and T. E., jr., Brooklyn, N. Y. Axle housing and making same. 1,451,401; Apr. 10.
Murray, Thomas E., jr. (See Murray, Thomas E. and T. E., jr.)
Musch, Conrad. (See Muehleisen, Thomas, assignor.)
Muxen, Matthew B., Fort Wayne, Ind., assignor to Tokheim Oil Tank and Pump Company. Dispensing apparatus. 1,451,552; Apr. 10.
Myers, Wilson R., assignor of one-third to G. W. Burt and one-third to G. W. Weatherby, Portland, Oreg. Apparatus for positioning materials. 1,451,431; Apr. 10.
Nacke, Karl, assignor to United Spinning Co., Brooklyn, N. Y. Plate for lighting fixtures. Des. 62,211; Apr. 10.
Nakian, Reuben, West Hoboken, N. J. Figure toy. 1,451,628; Apr. 10.
Nannini, Cherubino, Manhattan, Nev. Hair clipper. 1,451,175; Apr. 10.
National Carbonator Manufacturing Company. (See Geddes, Charles A., assignor.)
Neale, Charles C., Toledo, Ohio, assignor of one-half to P. T. Ulmer, St. Paul, Minn. Nonvibratory tool guide. 1,451,102; Apr. 10.
Near, Wilmer M., New Era, Mich. Testing prod. 1,451,233; Apr. 10.
Neher, John S., North Manchester, Ind. Removable silo cover. 1,451,082; Apr. 10.
Neller, Albert H., assignor to The Louden Machinery Company, Fairfield, Iowa. Animal stanchion. 1,451,402; Apr. 10.
Nelson, Lawrence C., assignor to Stewart Manufacturing Corporation, Chicago, Ill. Carriage curtain window frame. 1,451,026; Apr. 10.
Nelson, Otto, Crystal Falls, Mich. Washing machine. 1,451,447; Apr. 10.
Neuland, Alfons H., assignor to Neuland Electrical Company, Inc., San Francisco, Calif. Power-transmission apparatus. 1,451,465; Apr. 10.
Neuland Electrical Company. (See Neuland, Alfons H., assignor.)
New England Electric Company, The. (See Wade, Jem R., assignor.)
Newman, Daniel C., Elyria, Ohio. Mechanism for molding concrete blocks. 1,451,049; Apr. 10.
Nic-Heater Corporation. (See Nichols, James S., assignor.)
Nichols, Harry J. (See Hustvedt, O. M., and Nichols.)
Nichols, James S., assignor to Nic-Heater Corporation, Atlanta, Ga. Fireplace heater. Re15,577; Apr. 10.
Nicholson, Stanley W., assignor to The Dura Company, Toledo, Ohio. Handle mounting for window regulators. 1,451,234; Apr. 10.
Niemczewski, Aloysius, Elmira, N. Y. Flower stand. 1,451,515; Apr. 10.
Niles-Bement-Pond Company. (See Draeseke, A. W., and Parkes, assignor.)
Nordblad, Gunnar F., assignor to R. M. Burns, Chicago, Ill. Weather strip. 1,451,466; Apr. 10.
Norton, Charles H., and A. Turner, assignors to Norton Company, Worcester, Mass. Work support for roll-grinding machines. 1,451,467; Apr. 10.
Norton Company. (See Booze, Macdonald C., assignor.)
Norton Company. (See Klein, A. A., and Beecher, assignors.)
Norton Company. (See Norton, C. H., and Turner, assignors.)
Noshok Co., The. (See Lango, Charles H., assignor.)
O'Connell, John E., Springfield, Mass. Picker or fiber-cleaning machine. 1,450,922; Apr. 10.
O'Connor, John F., Chicago, Ill., assignor to W. H. Miner, Chazy, N. Y. Friction shock-absorbing mechanism. 1,451,103; Apr. 10.
O'Connor, John F., Chicago, Ill., assignor to W. H. Miner, Chazy, N. Y. Friction shock-absorbing mechanism. 1,451,104; Apr. 10.
Odin Stove Manufacturing Company. (See Hoffsetter, Carl H., assignor.)
O'Donnell, William F., and C. Seybold, Chicago, Ill. Awning construction. 1,451,083; Apr. 10.
Oliver, Eben F., Jersey City, N. J., assignor to Korrectolite Company, Inc., New York, N. Y. Lighting fixture and producing same. 1,450,923; Apr. 10.
Olop, Stephen, Denver, Colo., assignor of one-third to A. L. Cunningham, St. Paul, Minn. Safety-pin. 1,451,105; Apr. 10.
Olsen, Haiften E., Chicago, Ill., assignor, by mesne assignments, to F. C. Austin Machinery Company. Snow-melting apparatus. 1,451,027; Apr. 10.
Olshan, Harry, Newark, N. J., assignor to Goldee Mfg. Co., Inc., Brooklyn, N. Y. Lunch box. 1,451,568; Apr. 10.
Olson, Richard A., Ironwood, Mich. Single-valve wall register. 1,451,586; Apr. 10.
Ord, Craven R., Guelph, Ontario, Canada. Runner attachment for wheeled carriages. 1,450,924; Apr. 10.
Osgood, Louis A., assignor to International Scale Company, Dayton, Ohio. Counting device for scales. 1,451,403; Apr. 10.
Oswald, Franklin L. (See Morrison, R. A., and Oswald.)
Otterbein, Arthur, assignor to The Kirby Manufacturing Company, Middletown, Conn. Mounting bells on toys or other articles. 1,450,961; Apr. 10.
Packard Motor Car Company. (See Gilson Ara, assignor.)
Packard Motor Car Company. (See Gulick, Edward J., assignor.)
Packard Motor Car Company. (See Vincent, Jesse G., assignor.)
Packard Motor Car Company. (See Woolson, Lionel M., assignor.)
Painter, William B., and E. A. Reeves, River Rouge, Mich. Attachment for ovens. 1,451,050; Apr. 10.
Palmer, Herman D., and J. W. Brhel, Hartford, Wis., assignors to The Kissel Motor Car Company, Hartford, Wis. Apparatus for measuring materials in concrete construction. 1,451,106; Apr. 10.
Palmer, Wayne F., Washington, D. C. Submarine mine. 1,451,107; Apr. 10.
Panagopolous, Nick, Muskogee, Okla. Mail receptacle. 1,451,343; Apr. 10.
Park, William H. (See Quin, F. J., and Park.)
Parke, Davis & Company. (See Aldrich, Thomas B., assignor.)
Parkes, Albert W. (See Draeseke, A. W., and Parks.)
Parks, Dennis, St. Louis, Mo. Heel-blank separator and former. 1,451,469; Apr. 10.
Parks, Joseph W., Altoona, Pa. Automobile floor-board clamp. 1,451,404; Apr. 10.
Parks, Joseph W. (See Gee, Norman E., assignor.)
Patch, Harry M., and R. R. Romney, assignors to Ellis Resilient Wheel Corporation, Seattle, Wash. Resilient wheel. 1,451,269; Apr. 10.
Patents Holding Corporation. (See Prouty, Theodore C., assignor.)
Pedersen, Anton, Dagmar, Mont., assignor of one-half to F. W. Berg, Grenora, N. Dak. Kitchen cabinet. 1,451,587; Apr. 10.
Pedersen, John E., Hillsboro, Ill., assignor to American Zinc, Lead & Smelting Compny, St. Louis, Mo. Machine for charging furnace retorts. 1,451,176; Apr. 10.

Peelle, Willis J., Chicago, Ill. Means for forming and securing gaskets to jar covers. 1,451,470; Apr. 10.
Pelling, Ernest R., Croydon, and V. A. Mattick, Beckenham, England. Motor tractor. 1,451,448; Apr. 10.
Pelser, Abraham P., Greenfield, Mass. Combustion-chamber carburetor. 1,451,629; Apr. 10.
Penn, Oscar S., Old Charlton, London, assignor to Roadless Traction, Limited, London, England. Flexible track and the like. 1,451,516; Apr. 10.
Pennsylvania Textile Mills Inc., The. (See Ericson, E., and Weiss, assignors.)
Perin, Charles P., et al. (See Eustis, F. A., Hayward, Schleicher, and Belcher, assignors.)
Perkins, Henry A., East Templeton, Mass. Vehicle brake. 1,451,630; Apr. 10.
Perry, Ray P., Upper Montclair, N. J., assignor to The Barrett Company. Strip shingle. 1,451,369; Apr. 10.
Peterman, Charles L., York, Pa. Collapsible crate. 1,451,449; Apr. 10.
Peters, Leonard C., Providence, R. I. Means for reducing the capacity of fire boxes. 1,451,405; Apr. 10.
Peterson, Ernest A., Oakland, Calif. Pipe wrench. 1,451,084; Apr. 10.
Pethoud, Edouard, Lausanne, Switzerland. Sparking plug. 1,450,987; Apr. 10.
Pierce, Frank M., assignor to Pierce Wrapping Machine Company, Chicago, Ill. Wrapping and unwrapping machine. 1,451,051; Apr. 10.
Pierce, James H., Shelburn, Ind. Traction wheel. 1,451,177; Apr. 10.
Pierce Wrapping Machine. (See Pierce, Frank M., assignor.)
Pokorny, Frank, jr., assignor of one-half to F. W. Keegan, New York, N. Y. Air heater. 1,451,471; Apr. 10.
Pomeroy, Ralph E. H., Canton, Ohio. Pulverizing mill. 1,451,472; Apr. 10.
Pope, William J., Holmesdale, Cambridge, assignor of one-half to Scottish Dyes Limited, Carlisle, Cumberland, England. Production of coloring matters. 1,451,270; Apr. 10.
Popper, Joseph, assignor of one-half to Baird-Daniels Co., Inc., New York, and one-half to R. H. Popper, Brooklyn, N. Y. Toy. 1,451,085; Apr. 10.
Popper, Ruby H., et al. (See Popper, Joseph, assignor.)
Post, Georgia A., Forest Hills, N. Y. Game. 1,451,108; Apr. 10.
Potash Reduction Company. (See Stevens, Truman E., assignor.)
Powell, Norris D., Chester, Pa., assignor, by mesne assignments, to Baldt Anchor & Chain Company. Anchor. 1,451,109; Apr. 10.
Powell, Norris D., Chester, Pa., assignor, by mesne assignments, to Baldt Anchor & Chain Company. Anchor. 1,451,370; Apr. 10.
Prahar, Robert L., Brooklyn, N. Y. Bag frame. 1,451,028; Apr. 10.
Prescott, William E., assignor to Joseph Baker & Sons, Limited, London, England. Charging of cocoa-butter presses and the like. 1,451,432; Apr. 10.
Proctor & Schwartz, Incorporated. (See Schwartz, W. M., and Ayres, assignors.)
Progress Press Brick and Machine Company. (See Stocke, Jacob, jr., assignor.)
Prouty, Theodore C., Elgin, assignor, by mesne assignments, to Patents Holding Corporation, Chicago, Ill. Needle valve. 1,451,371; Apr. 10.
Pulliam, Herbert A., assignor of one-half to L. J. Taylor, Eustis, Fla. Attachment for gatherers on sewing machines. 1,451,110; Apr. 10.
Pulverman, William E., Wilkes-Barre, Pa. Valve. 1,451,473; Apr. 10.
Purcell, Isaac T., Wakeeney, Kans. Making and exhibiting moving pictures. 1,451,086; Apr. 10.
Quicksafe Manufacturing Company. (See Waller, Robert H., assignor.)
Quin, Francis J., and W. H. Park, Belfast, Ireland. Automatic valve for pneumatic hose fittings. 1,451,372; Apr. 10.
Raje, Thor, Los Angeles, Calif. Cigarette holder. 1,451,235; Apr. 10.
Raphael, Reginald D. (See Wisroth, Ernst, assignor.)
Reed, Jesse O., Washington, D. C., assignor to Assistant Secretary of Agriculture of the United States of America. Pneumatic cleaning nozzle. 1,451,553; Apr. 10.
Reedy, John H., Hamilton, Ohio. Driving collar. 1,451,111; Apr. 10.
Reeves, Elizabeth A. (See Painter, W. B., and Reeves.)
Reid, Willard, et al. (See Smith, Hazor J., assignor.)
Reidt, Ulrich, Los Angeles, Calif. Hose valve. 1,451,588; Apr. 10.
Reilly, Frank C., assignor to J. I. Kopperl, New York, N. Y. Controller for electric signs. 1,451,112; Apr. 10.
Remy Electric Company, The. (See Rogers, Samuel, assignor.)
Rennie, Arthur L., Jamaica, N. Y. Brake-band lining. 1,450,925; Apr. 10.
Rentschler, Harvey C., Wilkinsburg, Pa., assignor to Westinghouse Lamp Company. Vapor arc lamp. 1,451,271; Apr. 10.
Research Corporation. (See Dillon, E. P., and Heimrod, assignors.)
Richardson, A. D., et al. (See Busby, Robert S., assignor.)
Richter, George A., assignor to Brown Company, Berlin, N. H. Producing catalytic material. 1,451,113; Apr. 10.
Ricksecker, Frederick K., Washington, D. C. Combined match and cigarette case. 1,451,433; Apr. 10.
Rinehart, Earl H. (See Davis, S. L., and Rinehart.)
Roadless Traction, Limited. (See Penn, Oscar S., assignor.)
Roberts, Clarence E., Hagerstown, Md. Loading cartridge for grease guns. 1,451,114; Apr. 10.
Roberts, Raney J., Detroit, Mich. Frame for sheet-metal tubs. 1,451,115; Apr. 10.
Robin, Jacob I., New York, N. Y. Gas burner. 1,451,116; Apr. 10.
Robinett, Winfield S., Seattle, Wash. Tire changer. 1,451,344; Apr. 10.
Robinson, Arthur W., Montreal, Quebec, Canada. Delivery pipe for hydraulic dredging machines. 1,451,272; Apr. 10.
Rockwell, Byrd C., Camden, Ark. Folding crate. 1,451,373; Apr. 10.
Rodgers, John, Jamaica, N. Y. Album. 1,451,474; Apr. 10.
Roedl, George C., Beaver Dam, Wis. Automobile perch. 1,450,988; Apr. 10.
Roesch, Daniel, Chicago, Ill. Priming device for internal-combustion engines. 1,451,434; Apr. 10.
Roessler & Hasslacher Chemical Company, The. (See Haas, Joseph, jr., assignor.)
Rogers, Samuel, Anderson, Ind., assignor to The Remy Electric Company. Construction of electrical windings. 1,451,374; Apr. 10.
Romney, Richard R. (See Patch, H. M., and Romney.)
Rosenberg, James, Cleveland, Ohio. Device for printing intersecting lines. 1,451,475; Apr. 10.
Rosenbluth, Edwin M., Wallingford, Pa. Signaling device. 1,451,345; Apr. 10.
Rosner, Adolph, assignor, by mesne assignments, to The Locomobile Company, Bridgeport, Conn. Fuel system for internal-combustion engines. 1,451,631; Apr. 10.
Ross, James, assignor to Advance Rumely Company, Laporte, Ind. Drive-wheel-locking device. 1,451,406; Apr. 10.
Rostin, Heliodor, Vallo, Norway. Treatment of hydrocarbons. 1,451,052; Apr. 10.
Rote, Charles V., assignor of one-half to E. W. Brown, Lancaster, Pa. Pull mechanism for railway cars. 1,451,178; Apr. 10.
Roth, Harry, Detroit, Mich. Photograph-display cabinet. 1,451,029; Apr. 10.
Rounds, Edward W., Washington, D. C. Landing gear for aeroplanes. 1,451,117; Apr. 10.
Royal Typewriter Company. (See Handley, George F., assignor.)
Ruan, John A., Beacon, Iowa. Signal. 1,451,053; Apr. 10.
Rubin, Herman, New York, N. Y. Loose-leaf binder. 1,451,273; Apr. 10.
Runyan, William B., assignor to Mitchell Rail Anchor Company, Inc., Dayton, Ohio. Rail anchor. 1,451,179; Apr. 10.
Russell, J. M. (See Clark, James H., assignor.)
Russell, Thomas F. (See Smith, A. L., and Russell.)
Rybicky, Antonina, New London, Conn. Sanitary cuspidor. 1,451,554; Apr. 10.
Santini, Battista, Roseville, Calif. Nonskid-tire protector. 1,451,054; Apr. 10.
Sargent, Charles E., Indianapolis, Ind. Internal-combustion engine. 1,451,407; Apr. 10.
Sawin, Lester M., Chicago, Ill. Display case. 1,451,055; Apr. 10.
Schember, Kornelius, Atzgersdorf, near Vienna, Austria, and R. Joksch, Prague Karolinenthal, Czechoslovakia. Electric steelyard weighing machine. 1,451,118; Apr. 10.
Schenstrom, William, Brooklyn, N. Y. Arc-welded truss. 1,451,555; Apr. 10.
Schieber, Robert E., Detroit, Mich. Push-button construction. 1,451,476; Apr. 10.
Schindler, Walter R., Los Angeles, Calif. Irrigation signal. 1,451,056; Apr. 10.
Schindler, Walter R., Los Angeles, Calif. Paper-cupping machine. 1,451,057; Apr. 10.
Schlatter, Rudolph, assignor to Busch-Sulzer Bros.-Diesel Engine Company, St. Louis, Mo. Piston-cooling device. 1,451,375; Apr. 10.
Schleicher, Henry M. (See Eustis, F. A., Hayward, Schleicher, and Belcher.)
Schless, Maurice J., New York, N. Y. Display tray. Des. 62,212; Apr. 10.
Schmelzer, Anton C., Springfield, assignor, by mesne assignments, to Century Machinery Corporation, Holyoke, Mass. Washing machine. 1,451,180; Apr. 10.
Schneider, Isidor, New York, N. Y. Portable container handle. 1,451,408; Apr. 10.
Schoenleber, John G. (See Bell, T. H., and Schoenleber.)
Schrader's, A., Son, Inc. (See Faries, Robert, assignor.)
Schrader's, A., Son, Incorporated. (See Hammond, William P., assignor.)
Schrader's, A., Son, Inc. (See Schweinert, M. C., and Kraft, assignors.)
Schroeder, Ernst H., and C. M. Miller, Alameda, Calif. Tube bracket. 1,451,119; Apr. 10.
Schulman, Louis. (See Hoffman, Clarence O., assignor.)
Schumacher, Charles H. (See Moore, H. W., and Schumacher.)

Schuster, Thomas, Phoenix, Ariz. Water gate. 1,450,989; Apr. 10.
Schuttig, Charles L., Ridgefield Park, N. J. Treating cotton fabric and product obtained thereby. 1,451,306; Apr. 10.
Schwartz, Walter M., and E. B. Ayres, assignors to Proctor & Schwartz, Incorporated, Philadelphia, Pa. Drier. 1,451,589; Apr. 10.
Schweder, Oscar F., Billings, Mont. Rake. 1,451,590; Apr. 10.
Schweinert, Maximilian C., West Hoboken, N. J., and H. P. Kraft, Brooklyn, N. Y., assignors to A. Schrader's Son, Inc., New York, N. Y. Pressure gauge. 1,451,307; Apr. 10.
Scott, La Forrest D., Los Angeles, Calif. Bed construction. 1,451,181; Apr. 10.
Scottish Dyes Limited. (See Pope, William J., assignor.)
Scovill Manufacturing Company. (See Hyde, Burdon P., assignor.)
Scovill Manufacturing Company. (See Kendall, William G., assignor.)
Searle, Robert M., Rochester, N. Y. Reading appliance. 1,451,182; Apr. 10.
Sears, Mary A., Los Angeles, Calif. Carpet-rag looper. 1,451,409; Apr. 10.
Seiger M., & Son. (See Seiger, Morres, assignor.)
Seiger, Morres, assignor to M. Seiger & Son, New York, N. Y. Watchcase or similar article of manufacture. Des. 62,195; Apr. 10.
Seiger, Morres, assignor to M. Seiger & Son, New York, N. Y. Watchcase or similar article of manufacture. Des. 62,196; Apr. 10.
Seiber, Charles F., Chicago, Ill. Wedding ring. Des. 62,197; Apr. 10.
Sellers, James E. (See McRuer, D., and Sellers.)
Seybold, Chancy. (See O'Donnell, W. F., and Seybold.)
Seybold, Charles, Dayton, Ohio. Paper-cutting machine. 1,451,120; Apr. 10.
Seydel, Adolf, Brooklyn, N. Y. Aerial vehicle. 1,451,346; Apr. 10.
Shader, Edmund G., Brockton, Mass. Automatic boiler control. 1,451,274; Apr. 10.
Shafer, Samuel, jr., assignor to Chain Belt Company, Milwaukee, Wis. Conveying and distributing apparatus. 1,451,308; Apr. 10.
Shaffer, Ellis B., et al. (See Hockman, Russel, assignor.)
Shaffer, Ernest J., Tulsa, Okla. Sucker-rod slip socket. 1,451,275; Apr. 10.
Shatzke, Reason P., Denver, Colo. Grid plate for electric-current storage batteries. 1,451,058; Apr. 10.
Shaw, George S. (See Marshall, M. J., and Shaw.)
Shawinigan Laboratories, Limited. (See Marshall, M. J., and Shaw, assignors.)
Shawinigan Laboratories, Limited. (See Matheson, Howard W., assignor.)
Sherow, Lindolph, M., Ossining, N. Y. Composition of matter for silver-plating metals. 1,450,926; Apr. 10.
Shipley, Caleb W. (See Steiner, H. W., Shipley, and Morrison.)
Shorey, Edmund C., Washington, D. C. Making 2-naphthol 3-carboxylic acid. 1,450,990; Apr. 10.
Short, Bladen M., Detroit, Mich., assignor to C. Girl, Kalamazoo, Mich. Automobile bumper. 1,451,477; Apr. 10.
Short, Hugh O., Rochester, England. Wing and like member constructed of metal for aeroplane flying machines and other aircraft. 1,451,059; Apr. 10.
Shoup, Samuel R., Weehawken, N. J. Sheathing board. 1,450,962; Apr. 10.
Shrock, John W., Akron, Ohio. Traction attachment for wheels. 1,451,183; Apr. 10.
Shur-On Optical Company. (See McDonell, William E., assignor.)
Sibiski, John C., Baltimore, Md. Adjustable socket wrench. 1,451,591; Apr. 10.
Sides, Charles E., Lexington, N. C. Gasoline dispenser. 1,451,592; Apr. 10.
Signal Gesellschaft m. b. H. (See Hahnemann, Walter, assignor.)
Simon, Emil J. (See Leah, Lawrence J., assignor.)
Simpson, Edith M., and J. H. Buckles, Nighthawk, Wash. Tire-repair device. 1,451,121; Apr. 10.
Skaar, Ole, Akron, Ohio. Box opener. 1,451,593; Apr. 10.
Skayef Ball Bearing Company, The. (See Benson, Carl N., assignor.)
Slater, Robert, Paterson, N. J. Covering for railway ties. 1,451,309; Apr. 10.
Sloan-Crockett Co. (See Crockett, Jesse G., assignor.)
Small, Hervey W., Small, Idaho. Wrench. 1,451,184; Apr. 10.
Smith, Aaron J., and F. T. Frederick, Chicago, Ill., said Smith assignor to said Frederick. Safety-pin. 1,451,478; Apr. 10.
Smith, Adam L., and T. F. Russell, Youngstown, Ohio. Doorstrip. 1,451,310; Apr. 10.
Smith, Alfred H., Chappaqua, N. Y. Compartment freight car. 1,451,632; Apr. 10.
Smith, Alfred H., Chappaqua, N. Y. Freight car. 1,451,633; Apr. 10.
Smith, Clarence E., assignor to Mills Belt Company, Worcester, Mass. Military equipment. 1,451,030; Apr. 10.
Smith, Guy W., Paonia, Colo. Ingrown-toenail appliance. 1,451,311; Apr. 10.
Smith, Hazor J., Chicago, Ill., assignor of one-fourth to W. Reid and one-half to A. H. Chapin, Springfield, Mass. Ice-block freezer. 1,451,376; Apr. 10.
Smith, Horace L., and H. L. Smith, jr., Petersburg, Va. Fertilizer and lime distributor. 1,451,312; Apr. 10.
Smith, Horace, L., jr. (See Smith, Horace L. and H. L., jr.)
Smith, Otto, Honolulu, Hawaii, assignor to California Packing Corporation, San Francisco, Calif. Can-feeding device. 1,451,450; Apr. 10.
Smith, Rosell, Lebanon, Ind. Chain sand dredge. 1,451,479; Apr. 10.
Smith, Walter L., New York, N. Y. Rain shield. 1,451,276; Apr. 10.
Smith, William H., Bridgeport, Conn. Spring wheel. 1,451,517; Apr. 10.
Smithson, Arthur. (See Bogie, G. M., and Smithson.)
Smookler, Harry, Los Angeles, Calif. Kitchen tool. 1,451,594; Apr. 10.
Societe Anonyme d'Horlogerie et Bijouterie de Geneve. (See Varaud, André, assignor.)
Soss, Charles J., assignor of one-third to H. Soss and one-third to S. Soss, New York, N. Y. Antirattling device. 1,450,927; Apr. 10.
Soss, Henry, et al. (See Soss, Charles J., assignor.)
Soss, Samuel, et al. (See Soss, Charles J., assignor.)
Speck, Clifford P., Oakland, Calif. Confection-making apparatus. 1,451,031; Apr. 10.
Sperry, Samuel E., Woodhaven, assignor to Intertype Corporation, New York, N. Y. Typographical machine. 1,451,595; Apr. 10.
Stafford, Lewis F., assignor to Stafford Spring Guard Co., Chicago, Ill. Automobile bumper. 1,450,928; Apr. 10.
Stafford Spring Guard Co. (See Stafford, Lewis F., assignor.)
Staggers, William F., Mannington, W. Va. Tongs for lifting batteries. 1,451,185; Apr. 10.
Stahl, Charles E., assignor to The Connecticut Telephone & Electric Co., Inc., Meriden, Conn. Electric-lamp socket. 1,451,122; Apr. 10.
Staley, Edwin H., Burt, and C. I. Mansmith, Algona, Iowa. Railway-crossing signal. 1,451,186; Apr. 10.
Stanfield, Earl E., Helena, Mont. Hair-dressing-mirror device. 1,451,236; Apr. 10.
Ste. Genevieve Wash Machine Corporation. (See Kintzele, Julius H., assignor.)
Stecher, Charles, Chicago, Ill. Soldering machine. 1,451,032; Apr. 10.
Stecher, Hans, Brooklyn, N. Y. Pencil-illuminating device. 1,450,991; Apr. 10.
Steese, Jay C., and C. A. Hoff, assignors to The Akron Lamp Company, Akron, Ohio. 1,451,123; Apr. 10.
Stehl, Conrad, Oakland, Calif. Pencil. Des. 62,198; Apr. 10.
Stein, Louis, Chicago, Ill. Temporary binder. 1,451,377; Apr. 10.
Steiner, Hubbard W., C. W. Shipley, and J. Morrison, assignors to The Trailmobile Company, Cincinnati, Ohio. Army field kitchen. 1,451,087; Apr. 10.
Stevens, George L., Long Beach, Calif. Circuit closer for soft-tire alarms. 1,451,596; Apr. 10.
Stevens, Truman E., Omaha, assignor to Potash Reduction Company, Holland, Nebr. Crystallizer. 1,450,992; Apr. 10.
Stevenson, Tilden B., Caroleen, N. C. Stop motion for spinning frames. 1,451,634; Apr. 10.
Stewart, Charles M., Denver, Colo. Safety-first reminder. 1,451,597; Apr. 10.
Stewart Manufacturing Corporation. (See Nelson, Lawrence C., assignor.)
Stewart-Warner Speedometer Corporation. (See Grant, Hugo B., assignor.)
Stickney, Burnham C., Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,451,277; Apr. 10.
Stickney, Burnham C., Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,451,278; Apr. 10.
Stocke, Jacob, jr., assignor to Progress Press Brick and Machine Company, St. Louis, Mo. Brick-surfacing machine. 1,451,187; Apr. 10.
Stolze, William O., Newport, R. I. Automatic device for fishing through ice. 1,451,124; Apr. 10.
Strietelmeier, John E., Cincinnati, Ohio. Ticket holder. 1,451,279; Apr. 10.
Stroud, William. (See Barr, A., and Stroud.)
Study, William A., Richmond, Ind. Milling machine. 1,451,188; Apr. 10.
Sturgeon, Harold M. (See Gill, David R., assignor.)
Stütting, Heinrich, Witten-on-the-Ruhr, Germany. Rolling mill. 1,451,060; Apr. 10.
Suekoff, Samuel, assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Calling device. 1,451,480; Apr. 10.
Summers, Bertrand S., Port Huron, Mich. Production of paper pulp and the like. 1,451,125; Apr. 10.
Sundh, August, Hastings-upon-Hudson, N. Y., and W. Westerman, Detroit, Mich. Indicator. 1,451,281; Apr. 10.
Sundh, August, Hastings-upon-Hudson, N. Y., and W. Westerman, Detroit, Mich. Mill. 1,451,280; Apr. 10.
Sundstrand Engineering Company. (See Sundstrand, Gustaf D., assignor.)

Sundstrand, Gustaf D., assignor to Sundstrand Engineering Company, Rockford, Ill. Heater. 1,451,126; Apr. 10.
Susquehanna Silk Mills. (See Korten, Ernest, assignor.)
Sutherland, Enos E., Los Angeles, Calif. Collapsible crate. 1,451,598; Apr. 10.
Svenson, John W. (See Graf, F., and Svenson.)
Sweeney, Daniel, assignor of one-half to H. B. Kincaid, Clarksburg, W. Va. Traffic signal. 1,451,227; Apr. 10.
Sweet, Frederick D., assignor to Instant Hot Primer Company, Cleveland, Ohio. Engine-priming device. 1,450,929; Apr. 10.
Szalai, Charles, Easton, Pa. Stove-lid lifter. 1,451,238; Apr. 10.
Szastalo, Stanley, New York, N. Y. Matchbox. 1,450,963; Apr. 10.
Taffee, Leo H. (See Johnson, A. E., and Taffee.)
Tayor, L. J. (See Pulliam, Herbert A., assignor.)
Taylor-Wharton Iron and Steel Company. (See Hanks, George R., assignor.)
Teague, Edward C., Kansas City, Mo. Brake shoe. 1,451,599; Apr. 10.
Technicolor Motion Picture Corporation. (See Comstock, D. F., and Ball, assignors.)
Terrell, Edgar A., Charlotte, N. C. Bobbin cleaner. 1,451,239; Apr. 10.
Thayer, Henry E., Portland, Oreg. Vehicle signal. 1,450,993; Apr. 10.
Thiele, Eltel W., Hoxter-on-the-Weser, Germany. Molding press. 1,451,378; Apr. 10.
Thiele, Rudolf, Hoxter-on-the-Weser, Germany. Continuous furnace for burning cement and the like. 1,451,379; Apr. 10.
Thomas & Betts Co., The. (See Church, L. H., and Thomas, assignors.)
Thomas, George C., jr. (See Church, L. H., and Thomas.)
Thomas, Joseph, Aberdeen, Wash. Last for shoes and sandals. 1,451,635; Apr. 10.
Thompson, Fuller W. (See Cartter, W. G., and Thompson.)
Thompson, Robert B. (See Mead, R. P., and Thompson.)
Thon, Louis J., Marshfield, Wis. Magazine phonograph. 1,451,282; Apr. 10.
Thornton, Frank, jr., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric percolator. 1,451,556; Apr. 10.
Thornton, Daniel N., Waitsburg, Wash. Truck and trailer carrier. 1,451,127; Apr. 10.
Thorpe, William H., Mount Vernon, N. Y. Storage battery. 1,451,347; Apr. 10.
Thorpe, William H., Mount Vernon, N. Y. Storage battery. 1,451,348; Apr. 10.
Thulander, Konstantine, assignor to L-T-L Company, Rockford, Ill. Carving tool. 1,451,128; Apr. 10.
Thum, Rudolf, Baldwin, assignor to The Weva Company Incorporated, New York, N. Y. Toothpick. 1,451,380; Apr. 10.
Titanium Alloy Manufacturing Company, The. (See Barton, L. E., and Kinzie, assignors.)
Todd, Samuel H., Detroit, Mich. Compressor. 1,451,033; Apr. 10.
Tokheim Oil Tank and Pump Company. (See Muxden, Matthew B., assignor.)
Tolson, Robert L., assignor to J. W. Farley, trustee, Memphis, Tenn. Brace for tractors. 1,451,088; Apr. 10.
Toth, Frank, and K. Gombos, Phoenixville, Pa. Clothesline. 1,451,557; Apr. 10.
Townsend, William S., and F. E. Douglass, Rochester, Pa. Visible display attachment for measuring pumps. 1,450,994; Apr. 10.
Towne, George S., San Francisco, Calif. Power-transmission belt. 1,451,349; Apr. 10.
Traitel Marble Company, The. (See Calkins, Seward H., assignor.)
Trailmobile Company, The. (See Steiner, H. W., Shipley, and Morrison, assignors.)
Trinkel, Andrew E., Jeffersonville, Ind. Wire stretcher. 1,451,410; Apr. 10.
Trosch, Alfred, assignor to A. H. Ingle, Rochester, N. Y. Feed mechanism for machine tools. 1,451,061; Apr. 10.
Tulley, William M., Corpus Christi, Tex. Liquid gauge. 1,451,240; Apr. 10.
Tunnell, Harry E., New York, N. Y. Assembling machine. 1,451,381; Apr. 10.
Turenne, Wilfred J., Danvers, Mass. Flatiron. 1,450,995; Apr. 10.
Turner, Albert. (See Norton, C. H., and Turner.)
Turner, George W., Cleveland, Ohio. Incandescent electric lamp. 1,450,964; Apr. 10.
Twesme, Albert T. (See Hurley, Roy F., assignor.)
Ulmer, Philip T. (See Neale, Charles C., assignor.)
Ullrich, Richard, Wels, Austria. Electric heater. 1,451,636; Apr. 10.
Underwood Typewriter Company. (See Doody, John E., assignor.)
Underwood Typewriter Company. (See Kurowski, Alfred G. F., assignor.)
Underwood Typewriter Company. (See Stickney, Burnham C., assignor.)
Underwood Typewriter Company. (See Waldheim, John, assignor.)
Unger, Benjamin V., New Haven, Conn. Tool for tire rims. 1,450,965; Apr. 10.
Unger, William, Wooster, Ohio. Constructing brushes. 1,451,350; Apr. 10.
Union Special Machine Company. (See Heap, Jesse J., assignor.)
United Metal Spinning Co. (See Macke, Karl, assignor.)
United Shoe Machinery Corporation. (See Glidden, Harvey L., assignor.)
United Shoe Machinery Corporation. (See Furber, Frederick M., assignor.)
U. S. Light & Heat Corporation. (See Engel, Frank, assignor.)
Upson, Ralph H., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Dirigible and the like. 1,451,667; Apr. 10.
Van Deusen, Henry M., Westfield, Mass. Mop holder. 1,451,600; Apr. 10.
Van Doren, Chester J., Oak Park, assignor of one-half to H. T. Dorrington, Chicago, Ill. Apparatus for bottling liquids. 1,451,351; Apr. 10.
Vanderpool, Albion A., Newark, N. J. Guide for T squares. 1,451,189; Apr. 10.
Van Dyke, John W., assignor to The Atlantic Refining Company, Philadelphia, Pa. Method of and apparatus for oil distillation. 1,451,129; Apr. 10.
Van Orstrand, Charles E., Washington, D. C. Apparatus for measuring depths of wells. 1,451,130; Apr. 10.
Van Santvoort, Constant, Waukegan, Ill. Gas heater. 1,451,241; Apr. 10.
Vaughn, Samuel C., Charlotte, N. C. Journal-box jack. 1,451,601; Apr. 10.
Varaud, André, assignor to Societe Anonyme, d'Horologerie et Bijouterie de Geneve, Geneva, Switzerland. Time indicator. 1,450,996; Apr. 10.
Vescuso, Frank, Providence, R. I. Receptacle for holding milk bottles. 1,450,997; Apr. 10.
Viberg, Ernest R., Montreal, Quebec, Canada. Nonfreezing waste outlet. 1,451,242; Apr. 10.
Viberg, Ernest R., Montreal, Quebec, Canada. Truck construction. 1,451,243; Apr. 10.
Vincent, Elbert S., assignor to The Deming Company, Salem, Ohio. Pressure regulator. 1,451,481; Apr. 10.
Vincent, Jesse G., assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 1,451,034; Apr. 10.
Vogel, Eugene W., Oak Park, assignor to Chicago Railway Signal and Supply Company, Carpentersville, Ill. Highway-crossing signal. 1,450,998; Apr. 10.
Voorhies, Frederick E., Tulsa, Okla. Gas condenser. 1,451,190; Apr. 10.
Voracek, Frank B., Portland, Oreg. Airplane. 1,451,352; Apr. 10.
Voreaux, Paul, and R. Babel, Paris, France. Rotary apparatus operating as pump or motor. 1,451,284; Apr. 10.
Wade, Edward J., St. John's Wood, London, and G. W. Jacobs, Furley, England. Variable-speed gearing for motor road and other vehicles. 1,450,999; Apr. 10.
Wade, Jem R., assignor of one-half to The New England Electric Company, Denver, Colo. Automatically-operating fabric clamping and gripping buckle. 1,451,191; Apr. 10.
Wagner, Charles F., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electropercussive welding system. 1,451,558; Apr. 10.
Wagner Electric Corporation. (See Fynn, Valère A., assignor.)
Wahlberg, Nils A., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Section insulator. 1,451,559; Apr. 10.
Waldheim, John, Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,451,482; Apr. 10.
Waldman, Herman C., St. Louis, Mo. Fire door. 1,451,353; Apr. 10.
Walker, Philip J. (See Walker, Thomas S. and P. J.)
Walker, Thomas S. and P. J., Birmingham, England. Ship's log. 1,451,602; Apr. 10.
Wallace, Harry, Newark, N. J. Wheel hub and axle construction. 1,451,244; Apr. 10.
Waller, Robert H., assignor to Quicksafe Manufacturing Company, Nashville, Tenn. Can opener. 1,451,192; Apr. 10.
Walter, John E., Waukegan, Ill. Direction signal for vehicles. 1,450,030; Apr. 10.
Wante, Vincent, Woonsocket, R. I. Stop motion. 1,450,931; Apr. 10.
Ward, De Witt C., Rochester, N. Y. Foldable nursery table. 1,451,285; Apr. 10.
Weatherby, George W., et al. (See Myers, Wilson R., assignor.)
Weatherwax, James L., Wilkinsburg, Pa., assignor to Westinghouse Lamp Company. Thermocell. 1,451,283; Apr. 10.
Weaver Company. (See Low, Frank S., assignor.)
Weaver, Floyd C., Washington, D. C. Grinding and lapping machine. 1,451,080; Apr. 10.
Weber, Henry, Chicago, Ill. Adjustable reel. 1,451,131; Apr. 10.
Weber, Henry C. P., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. Still. 1,451,603; Apr. 10.
Weber, Robert, Dresden, Germany. Shutting or fastening contrivance. 1,451,518; Apr. 10.
Weiss, Roger. (See Ericson, E., and Weiss.)
Welker, Henry C., Minneapolis, Minn., assignor to Deere & Company, Moline, Ill. Plowbrace. 1,451,560; Apr. 10.

Welser, Brinton. (See Montague, W. L., and Welser.)
Welser, George B., jr. (See Montague, W. L., and Welser.)
Wendling, Alexander, Detroit, Mich. Cycle handle. 1,451,411; Apr. 10.
Werner, Paul W., Niota, Ill. Pencil. 1,451,193; Apr. 10.
Wescott, William B., Wellesley, assignor to Kalmus Comstock & Wescott Incorporated, Boston, Mass. Apparatus for supporting cinematographic machines or the like. 1,451,382; Apr. 10.
Wesley, John W., Chicago, Ill. Automatic weighing mechanism. 1,450,932; Apr. 10.
Westergaard, Carl J., Minneapolis, Minn. Milk and cream pasteurizer. 1,451,132; Apr. 10.
Westerman, William. (See Sundh, A., and Westerman.)
Westinghouse Air Brake Company, The. (See Farmer, Clyde C., assignor.)
Westinghouse Electric & Manufacturing Company. (See Bouton, Edgar M., assignor.)
Westinghouse Electric & Manufacturing Company. (See Brackett, Quincy A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Frederick, Louis T., assignor.)
Westinghouse Electric & Manufacturing Company. (See Hellmund, Rudolf E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Houston, Harold A., assignor.)
Westinghouse Electric and Manufacturing Company. (See Loudon, Warren P., assignor.)
Westinghouse Electric & Manufacturing Company. (See Thornton, Frank, jr., assignor.)
Westinghouse Electric & Manufacturing Company. (See Wagner, Charles F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Wahlberg, Nils A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Weber, Henry C. P., assignor.)
Westinghouse Electric Products Company. (See Forshee, Frank F., assignor.)
Westinghouse Electric Products Company. (See Kreisheld, Henry, assignor.)
Westinghouse Lamp Company. (See Rentschler, Harvey C., assignor.)
Westinghouse Lamp Company. (See Weatherwax, James L., assignor.)
Weston, Alonzo H., Yonkers, N. Y., assignor to American Chain Company, Inc. Guard rail. 1,451,245; Apr. 10.
Weston, William S., Dallas, Tex. Anticreeper for railway rails. 1,451,637; Apr. 10.
Weston, William S., Dallas, Tex. Anticreeper for railway rails. 1,451,638; Apr. 10.
Wetzel, Emma A., Jamaica, N. Y. Sectional stove. 1,451,246; Apr. 10.
Weva Company Incorporated, The. (See Thum, Rudolf, assignor.)
Weymer, Benjamin F., Cedar Rapids, Iowa. Gate. 1,451,247; Apr. 10.
Wheeler, Harvey L., Fremont, Ohio. Washing machine. 1,451,604; Apr. 10.
White, Charles C., Ocean Springs, assignor of one-third to L. Braun, Biloxi, Miss. Clamp for roofs. 1,451,639; Apr. 10.
White, Charles H., assignor to Deere & Company, Moline, Ill. Marker device for planters. 1,451,669; Apr. 10.
White, Joseph A., Berkeley, Calif. Concrete structure. 1,451,000; Apr. 10.
Whitlock, E. D., et al. (See Whitlock, Ralph G., assignor.)
Whitlock, M. H., et al. (See Whitlock, Ralph G., assignor.)
Whitlock, Ralph G., Los Angeles, assignor to E. D. Whitlock and M. H. Whitlock, Los Angeles, Calif. Loose-leaf book. 1,451,451; Apr. 10.
Whyte, John, Chicago, Ill. Solenoid-controlled fuel injection and ignition valve. 1,451,384; Apr. 10.
Wickert, Elmer H., St. Paul, Minn. Pneumatic tire. 1,451,640; Apr. 10.
Williams, Hannah T., Seattle, Wash. Tiller lock. 1,451,452; Apr. 10.
Williams, William F., Chicago, Ill. Corrugated-plate wheel. 1,451,354; Apr. 10.
Will & Baumer Candle Co. (See Flannery, Martin A., assignor.)
Willis, Clifford, Salt Lick, Ky. Railway switch. 1,451,435; Apr. 10.
Wilcox, George L., Escalon, Calif. Earth scraper. 1,451,062; Apr. 10.
Wilks, Goeffrey L., Surbiton, London, England. Leather-finishing machine. 1,450,933; Apr. 10.
Wilmot Engineering Company. (See Wilmot, George W., assignor.)
Wilmot Engineering Company. (See Wilmot, G. W., and Blatch, assignors.)
Wilmot, George W., and F. H. Blatch, assignors to Wilmot Engineering Company, Hazleton, Pa. Coal jig. 1,451,287; Apr. 10.
Wilmot, George W., assignor to Wilmot Engineering Company, Hazleton, Pa. Drive chain. 1,451,286; Apr. 10.
Wilson, Clarence C., Bridgeport, Conn. Box for flat metal tableware. 1,451,383; Apr. 10.
Wilson, George H., Coleman, Alberta, Canada. Hog pincers. 1,451,133; Apr. 10.
Wilson, Harry H., et al. (See Hockman, Russel, assignor.)
Wilson, Henry W., Duluth, Minn. Rolling-mill coupling and spindle. 1,451,519; Apr. 10.
Wilson, Jesse E., Oxford Junction, Iowa. Air confining and releasing valve. 1,450,934; Apr. 10.
Wilson, John J., Columbia, Tenn. Cotton harvester. 1,451,090; Apr. 10.
Wine, William E., Toledo, Ohio. Car door. 1,451,001; Apr. 10.
Wine, William E., Toledo, Ohio. Car door. 1,451,002; Apr. 10.
Winkler, Henry O., Los Angeles, Calif., assignor to Koehring Company, Milwaukee, Wis. Batch mixer and meter. 1,451,483; Apr. 10.
Winter, John E., Lansing, assignor to Kelsey Wheel Company, Detroit, Mich. Wheel hub. 1,451,248; Apr. 10.
Wisniewski, Vincent, Berlin, Germany. Advertising signboard with movable reflecting and translucent inscriptions. 1,451,520; Apr. 10.
Wisroth, Ernst, assignor of one-half to R. D. Raphael, Los Angeles, Calif. Ice-cream-vending cabinet. 1,451,134; Apr. 10.
Witte, Gertrud, Berne, Switzerland. Hand loom with device for reading weaving drawings. 1,451,641; Apr. 10.
Woll, John M., Kittanning, Pa. Automobile hood. 1,451,642; Apr. 10.
Wood, Franz J., Des Moines, Iowa. Molding machine. 1,451,249; Apr. 10.
Wood, Herbert O., Saltaire, England. Wheel fork. 1,451,521; Apr. 10.
Wood, William H., South Euclid, Ohio. Storage battery. 1,451,003; Apr. 10.
Woodward, Irving C., Syracuse, N. Y. Screw thread. 1,451,484; Apr. 10.
Woody, Regina J., Chestnut Hill, Mass. Diaper, catamenial bandage, and the like. 1,451,643; Apr. 10.
Woolson, Lionel M., assignor to Packard Motor Car Company, Detroit, Mich. Hydrocarbon motor. 1,451,035; Apr. 10.
Wootton, William L., Brooklyn, N. Y. Composition for fireproofing and other purposes and preparing same. 1,451,485; Apr. 10.
Wren, Hugh C., Louisville, Ky. Tie form. 1,451,355; Apr. 10.
Wright, Elisabeth H. (See Wright, Albert W. and E. H.)
Wright, Albert W. and E. H., San Francisco, Calif. Food product and production. 1,451,135; Apr. 10.
Yemniker, Rudolph M., assignor to The Langenau Manufacturing Company, Cleveland, Ohio. Fastening device. 1,451,356; Apr. 10.
York, William X., Clinton, Ind. Adjustable window shade and curtain support. 1,451,453; Apr. 10.
Youkin, Galvin S. (See Franklin, S. B., and Youkin.)
Youngson, James, assignor of one-half to M. D. Gantt, Winston-Salem, N. C. Boat propulsion means. 1,451,412; Apr. 10.
Zachary, Charles E., Atlanta, Ga. Air-brake test valve. 1,451,644; Apr. 10.
Zeiss, Firm of Carl. (See Eppenstein, Otto, assignor.)

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 10TH DAY OF APRIL, 1923.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abdominal supporter. M. A. Fontaine. 1,450,953; Apr. 10.
Absorber, Rebound. C. H. Lango. 1,451,227; Apr. 10.
Acid esters of trihalogentertiary butyl-alcohol, Nitrobenzoic. T. B. Aldrich. 1,451,357; Apr. 10.
Acid, Making 2-naphthol 3-carboxylic. E. C. Shorey. 1,450,990; Apr. 10.
Acids, Producing halogen. F. S. Low. 1,451,399; Apr. 10.
Adjustable reel. H. Weber. 1,451,131; Apr. 10.
Aerial vehicle. A. Seydel. 1,451,346; Apr. 10.
Aeroplane. G. Bess. 1,451,415; Apr. 10.
Aeroplane flying machines and other aircraft, Wing and like member constructed of metal for. H. O. Short. 1,451,059; Apr. 10.
Aeroplane gun mounting. J. P. Ball. 1,451,197; Apr. 10.
Aeroplane race game. A. E. Jones. 1,451,511; Apr. 10.
Aeroplanes, dirigibles, balloons, and the like, Stopping and landing mechanism for. J. H. Cruickshank. 1,451,493; Apr. 10.
Aeroplanes, Landing gear for. E. W. Rounds. 1,451,117; Apr. 10.
Agricultural machine. A. T. Brown. 1,450,140; Apr. 10.
Air heater. F. Pokorny, jr. 1,451,471; Apr. 10.
Airplane. F. B. Voracek. 1,451,352; Apr. 10.
Airship, Dirigible. H. A. Goetz. 1,451,503; Apr. 10.
Alarm: *See*—
  Burglar alarm. Fire alarm.
Album. J. Rodgers. 1,451,474; Apr. 10.
Aldehyde ammonia, Manufacture of. H. W. Matheson. 1,450,983; Apr. 10.
Aldehydes, Making condensation products of aliphatic. H. W. Matheson. 1,450,984; Apr. 10.
Alpha-naphthylamine, Production of. S. P. Miller. 1,451,666; Apr. 10.
Amalgamator. W. C. McLaughlin. 1,451,099; Apr. 10.
Anchor. N. D. Powell. 1,451,109; Apr. 10.
Anchor. N. D. Powell. 1,451,370; Apr. 10.
Animal trap. R. G. Howard. 1,451,223; Apr. 10.
Antirattling device. C. J. Sosa. 1,450,927; Apr. 10.
Apple-preparing machine. E. E. Gay. 1,451,571; Apr. 10.
Apron. G. F. Greene. 1,451,095; Apr. 10.
Arm support. C. W. Allebrand and C. G. Guyatt. 1,451,561; Apr. 10.
Articles, Producing distinctive. B. P. Hyde. 1,451,041; Apr. 10.
Ash tray, match holder, and cigar cutter, Combined. J. Gossner. Des. 62,201; Apr. 10.
Assembling machine. H. E. Tunnell. 1,451,381; Apr. 10.
Automobile bumper. B. M. Short. 1,451,477; Apr. 10.
Automobile bumper. L. F. Stafford. 1,450,928; Apr. 10.
Automobile curtain. F. J. Drekmeier. 1,451,255; Apr. 10.
Automobile dash attachment. E. R. Bittler. 1,451,646; Apr. 10.
Automobile direction signal. H. K. Gilbert. 1,451,213; Apr. 10.
Automobile doors, Curtain-supporting means for. L. H. Feder. 1,451,147; Apr. 10.
Automobile floor-board clamp. J. W. Parks. 1,451,404; Apr. 10.
Automobile hood. J. M. Woll. 1,451,642; Apr. 10.
Automobile lock. G. W. Daniels. 1,450,943; Apr. 10.
Automobile locking device. J. H. Ford. 1,451,499; Apr. 10.
Automobile perch. G. C. Roedl. 1,450,988; Apr. 10.
Automobile radiator system. J. F. Kupec. 1,451,364; Apr. 10.
Automobile seat, Auxiliary. S. E. Gilley. 1,451,655; Apr. 10.
Automobile starting system. W. P. Loudon. 1,451,550; Apr. 10.
Automobile tool-box support. J. W. Brown. 1,451,202; Apr. 10.
Automobiles, Appliance for attaching bumpers adjustably to. W. G. Cox. 1,451,535; Apr. 10.
Automobiles, Convertible baby crib and seat for. L. B. Buchner. 1,451,532; Apr. 10.
Automobiles, Locking system for. R. E. Elmore. 1,451,209; Apr. 10.
Automobiles, Reserve oil tank and gauge for. A. O. Murdock. 1,451,232; Apr. 10.
Axle housing and making same. T. E. Murray and T. E. Murray, jr. 1,451,401; Apr. 10.
Azoxy, azo, hydrazo, and amino compounds, Manufacture of. O. W. Brown and C. O. Henke. 1,451,489; Apr. 10.
Awning construction. W. F. O'Donnell and C. Seybold. 1,451,083; Apr. 10.
Bag frame. R. L. Prahar. 1,451,028; Apr. 10.
Bag stiffening and closing device, Combined. F. Goerts. 1,451,504; Apr. 10.
Bank, Coin-controlled clock. J. B. Moore and G. D. Gallagher. 1,451,305; Apr. 10.
Barrel. C. O. Ewell. 1,451,068; Apr. 10.
Baskets, Cover cushion for fruit. R. P. Clark. 1,450,911; Apr. 10.
Batteries, Grid plate for electric-current storage. B. P. Shatzke. 1,451,058; Apr. 10.
Batteries, Process and means for removing corroded terminals from storage. G. E. Frohbieter. 1,451,500; Apr. 10.
Batteries, Tongs for lifting. W. F. Staggers. 1,451,185; Apr. 10.
Battery: *See*—
  Storage Battery.
Bearing. W. Holtorp. 1,451,222; Apr. 10.
Bearing, Adjustable. E. E. Johns. 1,451,224; Apr. 10.
Bearing mounting. C. N. Benson. 1,451,523; Apr. 10.
Bearing rings, Manufacturing antifriction. H. E. Brunner. 1,451,531; Apr. 10.
Bearing sleeve, Resilient. H. R. Lontz. 1,451,428; Apr. 10.
Bearing sleeves, Making resilient. H. R. Lontz. 1,451,429; Apr. 10.
Bearings, Crank shaft and connecting-rod. W. C. Bell. 1,451,608; Apr. 10.
Bearings, Device for detecting overheated. J. P. Leonard. 1,451,044; Apr. 10.
Bed bathing apparatus. L. E. Bernier. 1,451,437; Apr. 10.
Bed construction. L. D. Scott. 1,451,181; Apr. 10.
Belt for machinery driving. A. and M. A. Hendry. 1,451,373; Apr. 10.
Belt, Power-transmission. G. S. Towne. 1,451,349; Apr. 10.
Bicycle stand and carrier. G. F. Crysdale. 1,451,651; Apr. 10.
Binder, Loose-leaf. H. Rubin. 1,451,273; Apr. 10.
Binder, Temporary. L. Stein. 1,451,377; Apr. 10.
Binders, Flax-puller attachment for. J. A. Bartoss. 1,451,317; Apr. 10.
Birds, Instrument for removing the testicles of. V. D. Lespinasse. 1,451,398; Apr. 10.
Bloomers. I. Goodman. 1,451,421; Apr. 10.
Board: *See*—
  Game board. Sheathing board.
  Ironing board.
Boat-propelling means. C. J. Baer. 1,451,563; Apr. 10.
Boat propulsion means. J. Youngson. 1,451,412; Apr. 10.
Bobbin cleaner. E. A. Terrell. 1,451,239; Apr. 10.
Boiler control, Automatic. E. G. Shader. 1,451,274; Apr. 10.
Boilers, Cleaner for water-tube. P. G. Handoll. 1,450,957; Apr. 10.
Book, Loose-leaf. R. G. Whitlock. 1,451,451; Apr. 10.
Borax and boric acid, Manufacture of. A. Kelly. 1,450,975; Apr. 10.
Boring machine. A. W. Marquis. 1,451,585; Apr. 10.
Bottle attachment. W. W. Edmister. 1,451,564; Apr. 10.
Bottle holder. C. Cohen. 1,451,649; Apr. 10.
Bottles, Receptacle for holding milk. F. Vescuso. 1,450,997; Apr. 10.
Bouquet holder. A. Glassman. 1,450,955; Apr. 10.
Box: *See*—
  Lunch box. Outlet box.
  Match box. Size-reducible box.
Box opener. O. Skaar. 1,451,593; Apr. 10.
Brace: *See*—
  Tractor brace.
Bracket: *See*—
  Tube bracket.
Brake: *See*—
  Fluid-pressure brake. Vehicle brake.
Brake-band lining. A. L. Rennie. 1,450,925; Apr. 10.
Brake-clutch connector, Ford. J. C. Boyle. 1,451,488; Apr. 10.
Brake shoe. E. C. Teague. 1,451,599; Apr. 10.
Brake-shoe key. E. Emery. 1,451,332; Apr. 10.
Brick-surfacing machine. J. Stocke, jr. 1,451,187; Apr. 10.
Brush construction. G. Moe. 1,451,400; Apr. 10.
Brush holder. W. E. Keene. Des. 62,193; Apr. 10
Brush, Shoe-polish-applying E. B. Burrell. 1,451,322; Apr. 10.
Brushes, Constructing. W. Unger. 1,451,350; Apr. 10.

Buckle, Automatically-operating fabric clamping and gripping. J. R. Wade. 1,451,191; Apr. 10.
Buckle, Belt. J. Heberling. 1,451,160; Apr. 10.
Builder, Bunch. E. Korten. 1,451,073; Apr. 10.
Building construction. W. A. Benson. 1,451,198; Apr. 10.
Building construction. F. L. Decker. 1,451,144; Apr. 10.
Building construction. L. Kroonen. 1,451,340; Apr. 10.
Bumpers, Pivotal clamping device for. W. E. Dunston. 1,451,497; Apr. 10.
Burglar alarm. R. Barrett. 1,451,414; Apr. 10.
Burglar-alarm housing. E. M. Jones. Des. 62,205; Apr. 10.
Burner: *See*—
Gas burner. Oil burner.
Burner. A. R. Anthony. 1,451,063; Apr. 10.
Burner. C. H. Hoffstetter. 1,451,072; Apr. 10.
Burner. T. F. Kent. 1,451,546; Apr. 10.
Cabinet, Kitchen. A. Pedersen. 1,451,587; Apr. 10.
Cabinets, Lock for milk. L. O. Miller. 1,451,100; Apr. 10.
Calling device. S. Suekoff. 1,451,480; Apr. 10.
Can-feeding device. O. Smith. 1,451,450; Apr. 10.
Can opener. J. Bodnar. 1,451,320; Apr. 10.
Can opener. R. H. Waller. 1,451,192; Apr. 10.
Candle pointer. A. S. Hope. 1,451,164; Apr. 10.
Candy cutting and cooling machine, Honeycomb-. E. J. Momenee. 1,451,081; Apr. 10.
Cap, Adjustable. C. H. Mirus. 1,451,174; Apr. 10.
Car, Calcine. A. G. McGregor. 1,450,980; Apr. 10.
Car, Compartment freight. A. H. Smith. 1,451,632; Apr. 10.
Car door. W. E. Wine. 1,451,001–2; Apr. 10.
Car-door-control device. C. C. Farmer. 1,451,441; Apr. 10.
Car, Freight. A. H. Smith. 1,451,633; Apr. 10.
Cars, Pull mechanism for railway. C. V. Rote. 1,451,178; Apr. 10.
Cars, Wheel mounting for motor-propelled railway. A. F. Masury. 1,451,267; Apr. 10.
Carbonator and draft arm for soda water. C. A. Geddes. Re15,575; Apr. 10.
Carburetor, Combustion-chamber. A. P. Peiser. 1,451,629; Apr. 10.
Card indexes and the like, Tab of guide cards for. M. Goitre. 1,451,214; Apr. 10.
Carpet-rag looper. M. A. Sears. 1,451,409; Apr. 10.
Carriages, Runner attachment for wheeled. C. R. Ord. 1,450,024; Apr. 10.
Carrier: *See*—
Tire carrier.
Carrousel. P. and E. Adelson. 1,451,605; Apr. 10.
Carving tool. K. Thulander. 1,451,128; Apr. 10.
Case: *See*—
Display case. Vanity case.
Casing elevator. F. M. Blair. 1,451,199; Apr. 10.
Casket. F. H. Charlesworth. 1,451,009; Apr. 10.
Caster. L. M. Beebe. 1,451,250; Apr. 10.
Catalytic material, Producing. G. A. Richter. 1,451,113; Apr. 10.
Cellulose derivatives, Manufacturer of. H. Dreyfus. 1,451,330–1; Apr. 10.
Chain. P. McLaughlin. 1,450,981; Apr. 10.
Chain, Drive. G. W. Wilmot. 1,451,286; Apr. 10.
Chain-feed attachment, Automatic. P. W. Fleischer. 1,451,015; Apr. 10.
Chain, Sprocket. W. L. Montague and B. Welser. 1,451,624; Apr. 10.
Chain, Sprocket. W. L. Montague and G. B. Welser, jr. 1,451,625; Apr. 10.
Chloride, Making anhydrous magnesium. P. Cottringer and W. R. Collings. 1,450,912; Apr. 10.
Chuck, Magnetic. R. L. Morgan, W. S. Griffith, and E. Churchill, jr. 1,451,265; Apr. 10.
Cigar holder and ash receptacle. M. H. Bialick. 1,450,910; Apr. 10.
Cigarette holder. T. Rae. 1,451,235; Apr. 10.
Cinematographic film. D. F. Comstock and J. A. Ball. 1,451,325; Apr. 10.
Cinematographic machines or the like, Apparatus for supporting. W. B. Wescott. 1,451,382; Apr. 10.
Circuit breaker. B. G. Gerbig. 1,451,157; Apr. 10.
Clamp: *See*—
Automobile floor-board Clamp. Roof clamp.
Strainer-cloth clamp.
Door clamp.
Clamp. G. J. Dennis. 1,451,091; Apr. 10.
Clasp. L. R. Barnett. 1,451,316; Apr. 10.
Cleaner: *See*—
Bobbin cleaner.
Clothesline. F. Toth and K. Gombos. 1,451,557; Apr. 10.
Clutch, Self-acting friction. F. Graf and J. W. Svensson. 1,451,506; Apr. 10.
Coal jig. G. W. Wilmot and F. H. Blatch. 1,451,287; Apr. 10.
Collapsible tube. C. G. King. 1,451,461; Apr. 10.
Collar, Driving. J. H. Reedy. 1,451,111; Apr. 10.
Coloring matters, Production of. W. J. Pope. 1,451,270; Apr. 10.
Comb. H. W. Babcock. 1,451,562; Apr. 10.
Comb. H. T. Holland. 1,451,260; Apr. 10.
Combination lock. W. T. Benham. 1,451,636; Apr. 10.
Compressor. S. H. Todd. 1,451,033; Apr. 10.
Concrete blocks, Mechanism for molding. D. C. Newman. 1,451,049; Apr. 10.
Concrete structure. J. A. White. 1,451,000; Apr. 10.
Condenser, Surface. A. Ginabat. 1,451,334; Apr. 10.
Confection-making apparatus. C. P. Speck. 1,451,031; Apr. 10.
Contact terminal. H. Kreisheld. 1,451,548; Apr. 10.
Container. F. Goerts. 1,451,505; Apr. 10.
Container handle, Portable. I. Schneider. 1,451,408; Apr. 10.
Containers, Rack for stacked. J. L. Fate. 1,451,146; Apr. 10.
Control apparatus. R. E. Hellmund. 1,451,544; Apr. 10.
Control head. D. Breeding. 1,450,968; Apr. 10.
Conveyer. O. P. Fike. 1,450,952; Apr. 10.
Conveying and distributing apparatus. S. Shafer, jr. 1,451,308; Apr. 10.
Copying machines, Cutting device for. F. May. 1,451,445; Apr. 10.
Cord dispenser. C. C. Helman. 1,451,300; Apr. 10.
Corrugated-plate wheel. W. E. Williams. 1,451,354; Apr. 10.
Cotton fabric and product obtained thereby, Treating. C. L. Shuttig. 1,451,306; Apr. 10.
Counting disks, Casing for holding. F. A. Helfrecht. Des. 62,192; Apr. 10.
Coupling and spindle, Rolling-mill. H. W. Wilson. 1,451,519; Apr. 10.
Crank shafts, Adjustable holder for turning. W. L. Mantha. 1,451,078; Apr. 10.
Crate, Collapsible. C. L. Peterman. 1,451,449; Apr. 10.
Crate, Collapsible. E. E. Sutherland. 1,451,598; Apr. 10.
Crate, Folding. B. C. Rockwell. 1,451,373; Apr. 10.
Crushing and grinding, Machine for. G. H. Fraser. 1,451,154; Apr. 10.
Crushing and grinding machine. G. H. Fraser. 1,451,156; Apr. 10.
Crushing apparatus, Cane-. H. Hurter. 1,451,164; Apr. 10.
Crushing machine. G. H. Fraser. 1,451,149; Apr. 10.
Crushing or grinding machine. G. H. Fraser. 1,451,150–1; Apr. 10.
Crystallizer. T. E. Stevens. 1,450,992; Apr. 10.
Cultivator, Motor. T. Brown. 1,451,672; Apr. 10.
Currents, Receiving circuits for weak signal. J. R. Carson. 1,450,969; Apr. 10.
Curtain ring. J. A. Cund. 1,451,326; Apr. 10.
Curtain window frame, Carriage. L. C. Nelson. 1,451,026; Apr. 10.
Cuspidor, Sanitary. A. Rybicky. 1,451,554; Apr. 10.
Cutter and feeder, Band. J. B. Firestone. 1,451,442; Apr. 10.
Cycle handle. A. Wendling. 1,451,411; Apr. 10.
Dental radiography, Gravity angle meter for. L. E. Harris and T. A. Leach. 1,451,507; Apr. 10.
Denture. H. M. Carroll, sr. 1,451,533; Apr. 10.
Diaper, catamenial bandage, and the like. R. J. Woody. 1,451,643; Apr. 10.
Dirigible and the like. R. H. Upson. 1,451,667; Apr. 10.
Discharge mechanism. J. R. Gruetter. 1,451,216; Apr. 10.
Dispensing apparatus. M. B. Muxen. 1,451,552; Apr. 10.
Display case. L. M. Sawin. 1,451,055; Apr. 10.
Display device. W. L. Hopkins. 1,451,023; Apr. 10.
Display tray. M. J. Schloss. Des. 62,212; Apr. 10.
Doll. L. Boatright. Des. 62,189; Apr. 10.
Doll walker. R. W. Hendrix. 1,451,390; Apr. 10.
Door clamp. I. W. Cobb. 1,450,940; Apr. 10.
Doorstrip. A. L. Smith and T. F. Russell. 1,451,310; Apr. 10.
Draft attachment. B. Limoseth. 1,451,620; Apr. 10.
Drainpipe trap. C. H. Gottsch. 1,450,956; Apr. 10.
Drawer and locking means therefor, Sliding. J. Heotes. 1,450,974; Apr. 10.
Dredge, Chain sand. R. Smith. 1,451,479; Apr. 10.
Dredging machines, Delivery pipe for hydraulic. A. W. Robinson. 1,451,272; Apr. 10.
Dressing table. T. B. Draper. 1,451,207; Apr. 10.
Drier. E. T. Goldthorpe. 1,450,917; Apr. 10.
Drier. W. M. Schwartz and E. B. Ayres 1,451,589; Apr. 10.
Drills, Lug chuck for rock. C. C. Hansen. 1,451,363; Apr. 10.
Drum. W. Christian. 1,451,289; Apr. 10.
Duplicating machine. W. Chipperfield. 1,451,142; Apr. 10.
Dyeing, Production of shot effects, not to be stained in piece. R. Haynn. 1,451,299; Apr. 10.
Electric fixture. M. L. Haas. Des 62,204; Apr. 10.
Electric heater. M. D. Dominguez. 1,451,537; Apr. 10.
Electric heater. R. Ullrich. 1,451,636; Apr. 10.
Electric jack. H. W. Moore and C. H. Schumacher. 1,451,048; Apr. 10.
Electric knife switches, Contact for. W. J. Gibbons. 1,451,296; Apr. 10.
Electric machine, Dynamo-. P. H. H. Jantzen. 1,451,577; Apr. 10.
Electric precipitator. E. P. Dillon and A. A. Helmrod. 1,451,418; Apr. 10.
Electric switch. W. Broad. 1,451,008; Apr. 10.
Electric switch. F. P. Gates. 1,451,570; Apr. 10.
Electrical windings, Construction of. S. Rogers. 1,451,374; Apr. 10.
Electrode for electric-arc cutting or reducing. C. J. Holslag. 1,451,392; Apr. 10.
Electrolytic iron, Making. F. A. Eustis, C. R. Hayward, H. M. Schleicher, and D. Belcher. 1,451,333; Apr. 10.
Electromagnet. E. M. Bouton. 1,451,525; Apr. 10.

Elevating jack. J. G. Crockett. 1,451,661; Apr. 10.
Engine: *See*—
Internal-combustion engine. Steam engine.
Engine and electric generator plant, Air-cooled internal-combustion. A. T. and C. S. Brown. 1,451,201; Apr. 10.
Engine construction, Method of and apparatus for detecting faulty. T. J. Brooks. 1,451,386; Apr. 10.
Engine-priming device F. D. Sweet. 1,450,929; Apr. 10.
Engines, Air filter for. A. R. Dressler. 1,451,329; Apr. 10.
Engines, Electric starter for internal-combustion. O. Brisbois. 1,451,530; Apr. 10.
Engines, Fuel-feeding device for internal-combustion. A. G. Larson. 1,451,228; Apr. 10.
Engines, Fuel system for internal-combustion. A. Rosner. 1,451,631; Apr. 10.
Engines, Liquid-elevating device for motor-vehicle. H. B. Grant. 1,451,158; Apr. 10.
Engines, Priming device for internal-combustion. D. Roesch. 1,451,434; Apr. 10.
Fastening device. R. M. Yemniker. 1,451,356; Apr. 10.
Fastening elements, Attaching means for separable. B. Z. Hausner. 1,451,612; Apr. 10.
Feeding device, Web-. I. Lazaga. 1,451,579; Apr. 10.
Fertilizer and lime distributor. H. L. Smith and H. L. Smith, jr. 1,451,312; Apr. 10.
Filter screen, Wet-. L. C. Cruyt. 1,450,951; Apr. 10.
Fire boxes, Means for reducing the capacity of. L. C. Peters. 1,451,405; Apr. 10.
Fire door. H. C. Waldman. 1,451,353; Apr. 10.
Fire-nozzle support, Adjustable. J. B. Blaw. 1,451,006; Apr. 10.
Firearm for teaching or practicing the aiming thereof and for adapting the same for signalling. L. C. A. de B. Doucet. 1,451,294; Apr. 10.
Firearm, Magazine. A. Kottas. 1,451,339; Apr. 10.
Firearms, Safety device for portable. E. Larson. 1,450,976; Apr. 10.
Fireplace heater. J. S. Nichols. Re15,577; Apr. 10.
Fireproofing and other purposes and preparing same, Composition for. W. L. Wooton. 1,451,485; Apr. 10.
Fish screen. F. G. Hurst. 1,451,394; Apr. 10.
Fishhook holder. W. C. Gardner. 1,451,256; Apr. 10.
Fishing through ice, Automatic device for. W. O. Stolze. 1,451,124; Apr. 10.
Flash light. H. M. Koretzky. 1,451,618; Apr. 10.
Flatiron. W. J. Turenne. 1,450,995; Apr. 10.
Flax-pulling machine. G. Michot. 1,451,231; Apr. 10.
Floor waxer and polisher. A. S. Boyle. 1,451,200; Apr. 10.
Flower stand. A. Niemczewski. 1,451,515; Apr. 10.
Fluid clutch mechanism. W. Brother. 1,451,139; Apr. 10.
Fluid-pressure brake. C. C. Farmer. 1,451,440; Apr. 10.
Fly container, Artificial-. A. S. and S. R. Driver. 1,451,295; Apr. 10.
Fly hook and leader. P. F. Halferty. 1,451,656; Apr. 10.
Flying machine, Manually-propelled. J. Ardo. 1,451,385; Apr. 10.
Fly-paper holder. S. McCardle. 1,451,583; Apr. 10.
Flywheel and suction fan, Combined. R. W. Barton. 1,450,936; Apr. 10.
Food or other substances of a similar nature, Means for grinding or pulverizing. R. Head. 1,451,424; Apr. 10.
Food-preparing utensil. P. Mendez. 1,451,342; Apr. 10.
Food product and production. A. W. and E. H. Wright. 1,451,135; Apr. 10.
Forging press. D. R. Gill. 1,450,947; Apr. 10.
Fork: *See*—
Wheel fork.
Fork or similar article. J. Leech. Des. 62,206; Apr. 10.
Form tie and spacer, Adjustable. J. C. Buchenau. 1,451,457; Apr. 10.
Frame: *See*—
Bag frame. Curtain window frame.
Fruit, etc., Means for shipping. F. A. Higerd and G. Becker. 1,451,070; Apr. 10.
Fruit pitter. W. M. Cruzan. 1,451,254; Apr. 10.
Frying-pan-cover holder. F. Ingersoll. 1,451,545; Apr. 10.
Fuel injection and ignition valve, Solenoid-controlled. J. Whyte. 1,451,384; Apr. 10.
Furnace for burning cement and the like, Continuous. R. Thiele. 1,451,379; Apr. 10.
Game. G. A. Post. 1,451,108; Apr. 10.
Game board. C. A. Johannesen. 1,450,958; Apr. 10.
Garages, Folding door for. S. Latrace. 1,451,619; Apr. 10.
Gas burner. J. I. Robin. 1,451,116; Apr. 10.
Gas condenser. F. E. Voorhies. 1,451,190; Apr. 10.
Gas-distributing system. E. A. Mitchell. 1,451,303; Apr. 10.
Gas heater. C. Van Santvoort. 1,451,241; Apr. 10.
Gas producers, Regulator for. H. A. Dreffein. 1,451,011; Apr. 10.
Gas radiator. W. H. Cain. 1,451,609; Apr. 10.
Gasoline dispenser. C. E. Sides. 1,451,592; Apr. 10.
Gate: *See*—
Water gate.
Gate. B. F. Weymer. 1,451,247; Apr. 10.

Ophthalmic mounting. W. E. McDonell. 1,451,098; Apr. 10.
Outlet box. L. H. Church and G. C. Thomas, jr. 1,450,972; Apr. 10.
Ovens, Attachment for. W. B. Painter and E. A. Reeves. 1,451,050; Apr. 10.
Packages, Manufacture of moistureproof. H. G. Eckstein. 1,451,145; Apr. 10.
Paint, Cumaron. C. Ellis. 1,451,092; Apr. 10.
Pan lifter. J. R. Johnson. 1,451,042; Apr. 10.
Paper-bag handle construction. G. W. Eisenhart. 1,451,652; Apr. 10.
Paper, Boring machine for. I. Gestas. 1,451,610; Apr. 10.
Paper-cupping machine. W. R. Schindler. 1,451,057; Apr. 10.
Paper-cutting machine. C. Seybold. 1,451,120; Apr. 10.
Paper-hanger's tool. W. B. Lupton. 1,451,444; Apr. 10.
Paper-making machines, Automatic stock regulator for. R. Hockman. 1,451,659; Apr. 10.
Paper pulp and the like, Production of. B. S. Summers. 1,451,125; Apr. 10.
Paper stock, Mechanism for the recovery of. B. M. Baxter. 1,451,522; Apr. 10.
Pasteurizer, Milk and cream. C. J. Westergaard. 1,451,132; Apr. 10.
Pattern and guide strip. S. H. Calkins. 1,451,491; Apr. 10.
Pencil. C. Stehl. Des. 62,198; Apr. 10.
Pencil. P. W. Werner. 1,451,193; Apr. 10.
Pencil-illuminating device. H. Stecher. 1,450,991; Apr. 10.
Pen feeder, Fountain-. H. F. Austin. 1,451,314; Apr. 10.
Pen spring safely clip, Fountain-. G. P. Jallier. 1,451,261; Apr. 10.
Percolator, Electric. F. Thornton, jr. 1,451,556; Apr. 10.
Percussive tools, Independent rotation for. C. C. Hansen. 1,451,362; Apr. 10.
Permutation switch. R. Frederick. 1,451,569; Apr. 10.
Phonograph. J. F. Bergander. 1,451,358; Apr. 10.
Phonograph-cabinet grille. J. O. Miller. Des. 62,194; Apr. 10.
Phonographic doll. S. Haskell. 1,451,022; Apr. 10.
Phonograph, Magazine. L. J. Thon. 1,451,282; Apr. 10.
Phonographs, Speed regulator for. E. W. Ladd. 1,451,663; Apr. 10.
Photograph-display cabinet. H. Roth. 1,451,029; Apr. 10.
Photographic dark room. J. S. Greene. 1,451,159; Apr. 10.
Photographic-developing apparatus and method. G. M. Dye. 1,451,065; Apr. 10.
Photographic films, Method and device for handling. G. M. Dye. 1,451,066; Apr. 10.
Pictures, Making and exhibiting moving. I. T. Purcell. 1,451,086; Apr. 10.
Picker or fiber-cleaning machine. J. E. O'Connell. 1,450,922; Apr. 10.
Pin and clip, Pencil. P. Anderson. 1,451,413; Apr. 10.
Pinion, Flexible. H. A. Houston. 1,451,576; Apr. 10.
Pin: *See*—
Safety pin.
Pin, Safety. S. Olop. 1,451,105; Apr. 10.
Pipe wrench. E. A. Peterson. 1,451,084; Apr. 10.
Piston-cooling device. R. Schlatter. 1,451,375; Apr. 10.
Pistons, Core box for. D. W. Clark. 1,451,010; Apr. 10.
Planer. A. W. Draeseke and A. W. Parkes. 1,450,971; Apr. 10.
Planters, Marker-device for. C. H. White. 1,451,669; Apr. 10.
Plate or similar article. C. A. May. Des. 62,208; Apr. 10.
Plowbrace. H. C. Welker. 1,451,560; Apr. 10.
Plug, Sparking. E. Pethoud. 1,450,987; Apr. 10.
Pocket lock, Garment. J. C. Bahr. 1,451,196; Apr. 10.
Potato-curing apparatus, Sweet-. H. T. Lyttleton. 1,450,979; Apr. 10.
Power-transmission apparatus. A. H. Neuland. 1,451,465; Apr. 10.
Power-transmission mechanism. J. Impellizieri. 1,451,616; Apr. 10.
Precious metals, Process and apparatus for recovery of. F. A. Beauchamp. 1,451,454; Apr. 10.

Press: *See*—
Forging press. Printing press.
Molding press.
Presses, Charging of cocoa-butter. W. E. Prescott. 1,451,432; Apr. 10.
Pressing machine, Steam garment-. J. Dashew. 1,451,292; Apr. 10.
Pressure gauge. R. Faries. 1,451,038; Apr. 10.
Pressure gauge. W. P. Hammond. 1,451,257; Apr. 10.
Pressure gauge. M. C. Schweinert and H. P. Kraft. 1,451,307; Apr. 10.
Pressure indicator and gauge, Air-. E. C. Miller. 1,451,514; Apr. 10.
Pressure regulator. E. S. Vincent. 1,451,481; Apr. 10.
Printing form, Flexible. C. Chisholm. 1,451,204; Apr. 10.
Printing intersecting lines, Device for. J. Rosenberg. 1,451,475; Apr. 10.
Printing press. W. H. Long. 1,457,045; Apr. 10.
Printing-type-composing apparatus. A. Lubac. 1,450,960; Apr. 10.
Printing vulcanizer. C. B. Haughey. 1,451,611; Apr. 10.
Projectile, Spotting. O. M. Hustvedt and H. J. Nichols. 1,451,395; Apr. 10.
Propellers, Method of and apparatus for making. L. T. Frederick. 1,451,541; Apr. 10.
Puller: *See*—
Weed puller.
Pulverizing mill. G. H. Fraser. 1,451,152–3; Apr. 10.
Pulverizing mill. R. E. H. Pomeroy. 1,451,472; Apr. 10.
Pump or motor, Rotary apparatus operating as. P. Voreaux and R. Babel. 1,451,284; Apr. 10.
Pumps, Visible display attachment for measuring. W. S. Townsend and F. E. Douglass. 1,450,994; Apr. 10.
Punching device, Automatic. A. Hansen. 1,451,219; Apr. 10.
Purse and bill fold, Combined. A. de Clairmont. 1,451,205; Apr. 10.
Push button construction. R. E. Schieber. 1,451,476; Apr. 10.
Pyjamas. J. C. Ewing. 1,451,093; Apr. 10.
Rack: *See*—
Shoe rack.
Radiator guard. N. C. Huckestein. 1,451,337; Apr. 10.
Rail anchor. W. B. Runyan. 1,451,179; Apr. 10.
Rail, Guard. A. H. Weston. 1,451,245; Apr. 10.
Railway-crossing signal. E. H. Staley and C. I. Mansmith. 1,451,186; Apr. 10.
Railway rails, Anticreeper for. W. S. Weston. 1,451,637–8; Apr. 10.
Railway signal. S. M. Donaldson. 1,451,438; Apr. 10.
Railway switch. C. Wills. 1,451,435; Apr. 10.
Railway tie and chair, Metallic. R. R. Allshouse. 1,450,967; Apr. 10.
Railway ties, Covering for. R. Slater. 1,451,309; Apr. 10.
Rain shield. W. L. Smith. 1,451,276; Apr. 10.
Rake. Q. F. Schweder. 1,451,590; Apr. 10.
Range-finder operators, Apparatus for testing and recording the efficiency of. A. Barr and W. Stroud. 1,450,907; Apr. 10.
Ratchet wrench. G. A. Faitz. 1,451,498; Apr. 10.
Reading appliance. R. M. Searle. 1,451,182; Apr. 10.
Receptacles, Filling tube for liquid. B. F. Allnutt. 1,451,136; Apr. 10.
Reel: *See*—
Adjustable reel.
Refractory articles, Manufacture of self-hardening. W. A. France. 1,451,540; Apr. 10.
Refrigerator display. A. H. Ehrlich. 1,451,565; Apr. 10.
Refrigerator display counter. A. H. Ehrlich. 1,451,566; Apr. 10.
Regulator: *See*—
Pressure regulator.
Resilient wheel. H. M. Patch and R. R. Romney. 1,451,269; Apr. 10.
Resistor element. O. A. Brackett. 1,451,529; Apr. 10.
Retorts, Machine for charging furnace. J. E. Pedersen. 1,451,176; Apr. 10.
Rheostat. P. Harris. 1,450,919; Apr. 10.
Rheostat and socket, Combined. C. Klemmer and W. P. Koechel. 1,451,024; Apr. 10.
Ring: *See*—
Curtain ring. Sealing ring.
Rolling mill. H. Stülting. 1,451,060; Apr. 10.
Roof clamp. C. C. White. 1,451,639; Apr. 10.
Rubber heels, Mold for. L. Holmes. 1,451,510; Apr. 10.
Safes and safety vaults, Protective apparatus for. E. V. Lorig and U. G. Graham. 1,451,581; Apr. 10.
Safety-first reminder. C. M. Stewart. 1,451,597; Apr. 10.
Safety pin. A. J. Smith and F. T. Frederick. 1,451,478; Apr. 10.
Sash antirattler. J. E. Campbell. 1,451,359; Apr. 10.
Sashes, Suspension means for vertically-sliding. H. E. Campbell. 1,451,668; Apr. 10.
Sawing implement, Lumber-. J. H. Millsaps. 1,451,079; Apr. 10.
Saw tables and the like, Power control for. C. W. Anderson. 1,450,906; Apr. 10.
Scales, Counting device for. L. A. Osgood. 1,451,403; Apr. 10.
Scenic effect. W. Maxwell. 1,451,046; Apr. 10.
Scraper, Earth. G. L. Wilcox. 1,451,062; Apr. 10.
Screen: *See*—
Filter screen. Window screen.
Fish screen.
Screw thread. I. C. Woodward. 1,451,484; Apr. 10.
Seal case and ejector. J. A. Hanson. 1,451,069; Apr. 10.
Sealing ring. R. J. Krause. 1,451,225; Apr. 10.
Seat: *See*—
Automobile seat. Window-cleaner's seat.
Seismograph, Field. L. Mintrop. 1,451,080; Apr. 10.
Sewing machine. Book-. L. Egger. 1,450,914; Apr. 10.
Sewing machines, Attachment for gatherers on. H. A. Pulliam. 1,451,110; Apr. 10.
Sewing machines, Plait folder for. J. J. Heap. 1,451,220; Apr. 10.
Shade and curtain support, Adjustable window. W. X. York. 1,451,453; Apr. 10.
Shale, Treating. S. Marko. 1,451,367; Apr. 10.
Sharpener, Knife. B. E. Bowles. 1,451,526; Apr. 10.
Sharpener, Shears. W. Jones. 1,451,396; Apr. 10.
Sheathing board. S. R. Shoup. 1,450,962; Apr. 10.
Sheet material, Machine and method applicable in the cutting of. F. M. Furber. 1,450,945; Apr. 10.
Shingle, Strip. R. P. Perry. 1,451,369; Apr. 10.
Ship's log. T. S. and P. J. Walker. 1,451,602; Apr. 10.
Shock absorber. S. Gavel and E. Frost. 1,450,954; Apr. 10.
Shock absorber for automobiles. H. D. Hilliard. 1,451,509; Apr. 10.
Shock-absorbing mechanism, Friction. J. F. O'Connor. 1,451,103–4; Apr. 10.
Shoe lacing. O. Graff. 1,450,918; Apr. 10.
Shoe rack. H. L. Glidden. 1,450,948; Apr. 10.
Shoe tool. L. Bonelli. 1,451,288; Apr. 10.
Shovel, torch, and match holder, Combined. J. C. Bagley. 1,451,195; Apr. 10.
Shutting or fastening contrivance. R. Weber. 1,451,518; Apr. 10.

Trucks, Curtain mounting for. E. J. Hyland. 1,451,660; Apr. 10.
Truss, Arc-welded. W. Schenstrom. 1,451,555; Apr. 10.
T squares, Guide for. A. A. Vanderpool. 1,451,189; Apr. 10.
Tube: *See*—
Collapsible tube. Tire tube.
Inner tube.
Tube bracket. E. R. Schroeder and C. M. Miller. 1,451,119; Apr. 10.
Tubs, Frame for sheet-metal. R. J. Roberts. 1,451,115; Apr. 10.
Turbine, Water. V. Kaplan. 1,451,263; Apr. 10.
Turning irregular forms, Machine for. G. W. Duchemin. 1,451,496; Apr. 10.
Typewriting machine. C. U. Carpenter. 1,451,203; Apr. 10.
Typewriting machine. J. E. Doody. 1,451,293; Apr. 10.
Typewriting machine. G. F. Handley. 1,451,423; Apr. 10.
Typewriting machine A. G. F. Kurowski. 1,451,463; Apr. 10.
Typewriting machine. B. C. Stickney. 1,451,277–8; Apr. 10.
Typewriting machine. J. Waldheim. 1,451,482; Apr. 10.
Typographic matrix and production of same. G. E. Marlatt. 1,451,170; Apr. 10.
Typographical machine. S. E. Sperry. 1,451,595; Apr. 10.
Utensil, Combination. A. Ftyklo. 1,451,542; Apr. 10.
Vacuum massager. H. P. Graber. 1,451,019; Apr. 10.
Vacuum roll. B. B. Farnham. 1,451,568; Apr. 10.
Valve. W. N. Blanchard. 1,451,037; Apr. 10.
Valve. W. E. Pulverman. 1,451,473; Apr. 10.
Valve, Air-brake test. C. E. Zachary. 1,451,644; Apr. 10.
Valve, Air confining and releasing J. E. Wilson. 1,450,934; Apr. 10.
Valve for pneumatic-hose fittings, Automatic. F. J. Quin and W. H. Park. 1,451,372; Apr. 10.
Valve, Homogenizing. D. F. Hormann. 1,451,303; Apr. 10.
Valve, Hose. U. Reidt. 1,451,588; Apr. 10.
Valve, Needle. T. C. Prouty. 1,451,371; Apr. 10.
Valve-spring-lifting device. J. G. Fye. 1,451,212; Apr. 10.
Valve, Vulcanizing. H. P. Kraft. 1,451,025; Apr. 10.
Vanity case. T. W. Foster. Des. 62,200; Apr. 10.
Vanity case. W. G. Kendall. 1,451,617; Apr. 10.
Vegetable slicer. C. L. Leonard. 1,451,075; Apr. 10.
Vehicle body and the like J. Morrison. 1,451,626; Apr. 10.
Vehicle body, Convertible. W. C. Fowler. 1,451,016; Apr. 10.
Vehicle brake. H. A. Perkins. 1,451,630; Apr. 10.
Vehicle brake, Quick-stop emergency. J. Hochman. 1,451,336; Apr. 10.
Vehicle hoods, Fastening device for motor-. K. Forbes. 1,451,662; Apr. 10.
Vehicle, Motor. J. G. Vincent. 1,451,034; Apr. 10.
Vehicle, Motor-truck dumping. J. C. French. 1,451,018; Apr. 10.
Vehicle radiators, Temperature-indicating instrument for motor-. H. H. Boyce. 1,451,527; Apr. 10.
Vehicle signal. H. E. Thayer. 1,450,993; Apr. 10.
Vehicle spring. G. C. Casper. 1,451,492; Apr. 10.
Vehicle wheel. N. Cornfield. 1,451,252–3; Apr. 10.
Vehicle wheel. T. A. Boyer. 1,451,528; Apr. 10.
Vehicles, Clutch-pedal control for motor. F. H. Fioring. 1,451,148; Apr. 10.
Vehicles, Direction signal for. J. E. Walter. 1,450,930; Apr. 10.
Vehicles, Lock for motor. A. Olson. 1,451,030; Apr. 10.
Vehicles, Variable-speed gearing for motor road and other. E. J. Wade and G. W. Jacobs. 1,450,909; Apr. 10.
Ventilator. F. Engel. 1,451,538; Apr. 10.
Votive stand. M. A. Flannery. Des. 62,190; Apr. 10.
Wagon, Dumping. J. M. Guynn. 1,451,218; Apr. 10.
Wall, Hollow. F. Eckert. 1,451,430; Apr. 10.
Wall register, Single-valve. R. A. Olson. 1,451,586; Apr. 10.
Warps, Machine for operating upon. H. D. Colman. 1,450,942; Apr. 10.
Washing machine. J. H. Kintzele. 1,451,547; Apr. 10.
Washing machine. D. F. Lane. 1,451,513; Apr. 10.
Washing machine. O. Nelson. 1,451,447; Apr. 10.
Washing machine. A. C. Schmelzer. 1,451,180; Apr. 10.
Washing machine. H. L. Wheeler. 1,451,604; Apr. 10.
Waste outlet, Nonfreezing. E. R. Viberg. 1,451,242; Apr. 10.

Watchcase or similar article of manufacture. M. Seiger. Des. 62,195–6; Apr. 10.
Water gate. T. Schuster. 1,450,989; Apr. 10.
Water heater, Electric. W. G. Cartter and F. W. Thompson. 1,451,671; Apr. 10.
Water-heater mechanism. T. Muehleisen. 1,451,551; Apr. 10.
Weather strip. J. C. Dunham. Re15,574; Apr. 10.
Weather strip. W. C. Jarmer. 1,450,921; Apr. 10.
Weather strip. G. F. Nordblad. 1,451,466; Apr. 10.
Weather strip and sash fastener, Combined. C. Cooney. 1,451,650; Apr. 10.
Wedding ring. C. F. Selber. Des. 62,197; Apr. 10.
Weed puller. A. J. Beingessner. 1,451,455; Apr. 10.
Weighing mechanism, Automatic. J. W. Wesley. 1,450,932; Apr. 10.
Weighing machine, Electric steelyard. K. Schember and R. Joksch. 1,451,118; Apr. 10.
Welding system, Electropercussive. C. F. Wagner. 1,451,558; Apr. 10.
Wheel: *See*—
Corrugate-plate wheel. Traction wheel.
Resilient wheel. Vehicle wheel.
Spring wheel.
Wheel fork. H. O. Wood. 1,451,521; Apr. 10.
Wheel-locking device, Drive-. J. Ross. 1,451,406; Apr. 10.
Wheeled toy. G. G. Greger. Des. 62,202; Apr. 10.
Wheels, Traction attachment for. J. W. Shrock. 1,451,183; Apr. 10.
Whistle. J. J. Cornell. 1,451,459; Apr. 10.
Windmill. A. Greth. 1,451,298; Apr. 10.
Window. E. H. Lunken. 1,451,077; Apr. 10.
Window-cleaner's seat. L. H. Loepfe. 1,451,076; Apr. 10.
Window-cleaning device. C. O. Hoffman. 1,451,221; Apr. 10.
Window guard. G. C. F. Mayer. 1,451,172; Apr. 10.
Window or door stop. F. Armbroster. 1,451,487; Apr. 10.
Window regulators, Handle mounting for. S. W. Nicholson. 1,451,234; Apr. 10.
Window screen. W. M. Hutchinson. 1,450,920; Apr. 10.
Window-sash holder. S. Ladinsky. 1,451,226; Apr. 10.
Window shield, Bank-. J. W. Cleary. 1,451,360; Apr. 10.
Windows, doors, etc., Metallic frame for. E. H. Ellison. 1,451,012; Apr. 10.
Windows, Water drain for. J. Hanson. 1,451,021; Apr. 10.
Windowshield-cleaning device, Automatic. R. E. Miller. 1,451,368; Apr. 10.
Windowshields, Clear-vision rain guard for. W. S. Luckett. 1,450,977; Apr. 10.
Wire stretcher. A. E. Trinkel. 1,451,410; Apr. 10.
Wrapping and unwrapping machine. F. M. Pierce. 1,451,051; Apr. 10.
Wrench: *See*—
Pipe wrench. Socket wrench.
Ratchet wrench.
Wrench. W. H. Clopton, jr. 1,450,973; Apr. 10.
Wrench. H. W. Small. 1,451,184; Apr. 10.
Wringing machines, Waterboard for. R. A. Kowalsky 1,451,664; Apr. 10.
Zinc, Electroplating with. J. Haas, jr. 1,451,543; Apr. 10.
Zircon from undesirable substances, Separating. L. E. Barton and C. J. Kinzie. 1,451,004; Apr. 10.

CLASSIFICATION OF PATENTS

ISSUED APRIL 10, 1923.

NOTE.—First number—class, second number—subclass, third number—patent number.

2— 54: 1,451,095
106: 1,451,174
122: 1,451,093
1,451,421
188: 1,450,953
4— 17: 1,451,524
22: 1,451,430
27: 1,451,115
1,451,437
39: 1,451,551
5— 37: 1,451,181

Sanitary-napkin holders. S. A. Harrison. 175,491; Apr. 17.
Sheetings and drills, Unbleached. R. A. Suffern. 157,109; Apr. 17.
Shipping cases, Fiber. St. Regis Paper Co. 175,445; Apr. 17.
Shoes, Leather. McIanson Shoe Company. 175,259; Apr. 17.
Shoes, Leather. Edmonds Shoe Company. 174,514; Apr. 17.
Shortening. Brown Orcola Company. 167,598; Apr. 17.
Shovels, spades, and scoops. Ames Shovel & Tool Company. 174,986; Apr. 17.
Silk piece goods. H. R. Mallinson & Co. Inc. 174,020; Apr. 17.
Silk piece goods. Susquehanna Silk Mills. 174,868; Apr. 17.
Sprayers for medicinal use. Ostra Corporation. 172,954; Apr. 17.
Tank floats, Vacuum. J. H. Cohen. 167,840; Apr. 17.
Tea. Joannes Bros. Co. 172,743; Apr. 17.
Textile fabrics. Valentine & Bunker. 175,630; Apr. 17.
Textile fabrics, Manufactured. Associated Textile Manufacturers, Inc. 175,232; Apr. 17.
Tire casings, Automobile. Cord Tire Corporation. 167,712; Apr. 17.
Tire casings, Outer tires or coverings for pneumatic-. A. J. Stephens Rubber Co. 173,306; Apr. 17.
Tires, Pneumatic vehicle. Empire Tire & Rubber Corporation. 166,223; Apr. 17.
Tires, inner tubes, etc., Vehicle. Ideal Tire and Rubber Company. 155,968; Apr. 1.
Threads, Pure and artificial silk. H. K. H. Silk Co. 173,828; Apr. 17.
Toilet powders and handkerchief extracts. Perfumerie Gal, Sociedad Anonima. 169,418; Apr. 17.
Tonics, Medicinal. H. C. Brown. 173,589; Apr. 17.
Tools. Romer Axe and Tool Company. 155,070; Apr. 17.
Tools, agricultural implements, Carpenters'. Markt & Hammacher Company. 172,233; Apr. 17.
Toothbrushes. P. B. T. Williams. 176,389–91; Apr. 17.
Toothbrush containers. F. T. Conley. 175,771; Apr. 17.
Tractors and attachments and parts thereof. International Harvester Company. 173,649; Apr. 17.
Trucks, Floor. W. M. Nutting. 173,240; Apr. 17.
Tubes, pneumatic, cord, and fabric tires, Inner. Columbia Tire and Rubber Company. 171,751; Apr. 17.
Upholstery and drapery fabric. Henry Goldthorp Company. 170,003; Apr. 17.
Valves, Poppet. Toledo Steel Products Co. 168,991; Apr. 17.
Vaults, Burial. Con-O-Lite Corporation. 176,072; Apr. 17.
Wall or plaster board. S. A. Blair. 174,723; Apr. 17.
Wheat confection, Puffed-. E. F. Allingham Mfg. Co. 172,714; Apr. 17.
Whiting. Taintor Company. 175,171; Apr. 17.
Window glass. Mountain State Glass Co. 177,139; Apr. 17.
Wire, Base-metal. Page Steel & Wire Company. 162,646; Apr. 17.
Wires, Resistance. Henry Wiggin & Company Limited. 170,345; Apr. 17.
Wrenches. Gellman Wrench Corporation. 174,896; Apr. 17.
Yarn. Wm. H. Horstmann Company. 176,990; Apr. 17.
Zeolites and base-exchange water-softening agents. H. S. B. W. Cochrane Corporation. 173,888; Apr. 17.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 17TH DAY OF APRIL, 1923.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Abbott Laboratories, The. (See Young, Ferdinand H., assignor.)
Abrames, Harvey, Norfolk, Va. Hydraulic piling. 1,451,753; Apr. 17.
Ackermann, Frank B. (See Steffan, W. C., Ackermann, and Greiner.)
Adams, Ora L., Berkeley, Calif. Load-supporting connection for wheeled structures. 1,452,135; Apr. 17.
Agner, Raymond C., Burlington, Wis. Flexible conduit. 1,451,800; Apr. 17.
Akemann, Walther, Essen, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Fire-control apparatus especially for naval guns. 1,452,015; Apr. 17.
Aktiebolaget Ars. (See Hasait, Max, assignor.)
Alexander, Henry W., jr., Philadelphia, Pa. Candy mint. Des. 62,213; Apr. 17.
Allen, Broadus S., Gaffney, S. C., assignor, by mesne assignments, to M. B. Lipscomb. Folding crate. 1,452,404; Apr. 17.
Allen, Charles, El Paso, Tex. Slime-pulp thickener. 1,452,016; Apr. 17.
Allen, George P., Los Angeles, Calif. Spring suspension for motor vehicles, etc. 1,452,017; Apr. 17.
Allen, Malcolm O., Newport, Tenn. Cleaner for meter-dial guards. 1,462,018; Apr. 17.
Alter, Charles N., Alliance, Ohio. Electric switch. 1,452,333; Apr. 17.
American Can Company. (See De Land, Daniel B., assignor.)
American Can Company. (See Hothersall, John M., assignor.)
American Can Company. (See Leighton, George A., assignor.)
American Lacing Hook Co. (See Havener, Arthur R., assignor.)
American Metal Products Company. (See Zaiser, Carl J., assignor.)
American Optical Company. (See Kreissl, Frank N., assignor.)
American Potash Corporation. (See Charlton, H. W., and Shreve, assignors.)
American Radio & Research Corporation. (See Bush, Vannevar, assignor.)
American Stove Company. (See Blackford, Atwell J., assignor.)
American Sugar Refining Company, The. (See Niese, Henry E., assignor.)
American Telephone and Telegraph Company. (See Espenschied, Lloyd, assignor.)
American Telephone and Telegraph Company. (See Suitzer, Morton, assignor.)
American Type Founders Company. (See Kelly, William M., assignor.)
Ancidoni, Alfred, Newark, N. J. Tire construction. 1,462,136; Apr. 17.
Andelsen, Vigго W., assignor to Burson Knitting Company, Rockford, Ill. Pattern-control mechanism for knitting machines. 1,452,137; Apr. 17.
Anderson, Tom D., San Jose, Calif. Bed. 1,452,104; Apr. 17.
Andraska, Frank, Marshfield, Wis. Tire chain. 1,452,405; Apr. 17.
Andrews, Leslie G., and R. R. Theis, Lincoln, Nebr. Key holder. 1,451,802; Apr. 17.
Angell, Chester M., assignor to Vesta Battery Corporation, Chicago, Ill. Handling, drying, and forming pasted battery plates. 1,451,801; Apr. 17.
Angevine, G. U., Company, The. (See Angevine, Glenn U., assignor.)
Angevine, Glenn U., assignor to The G. U. Angevine Company, Chicago, Ill. Drapery hanger. 1,451,754; Apr. 17.
Angier, Edward H. (See Whelidon, William M., assignor.)
Ansley, Frederick C. R. (See Bedingfield, Charles H., assignor.)
Archer, Thomas P. (See Edgar, F. M., and Archer.)
Arm, Max, New York, N. Y. Lock. 1,452,406; Apr. 17.
Armstrong, Edward P. and H. W., Portland Oreg. Automatic saw-sharpening machine. 1,452,351; Apr. 17.
Armstrong, Edwin J., assignor of one-half to A. C. Vicary, Erie, Pa. Locking device for power shovels and the like. 1,451,803; Apr. 17.
Armstrong, Henry W. (See Armstrong, Edward P. and H. W.)
Arnold-Creager Company, The. (See Graham, Henry W. B., assignor.)
Arnold, Joseph, Ganshoren, near Brussels, Belgium. Device for the preservation and aseptic drawing off of liquids. 1,451,937; Apr. 17.
Aragose, Frank, North Adams, Mass. Spark plug. 1,452,177; Apr. 17.
Aske, Irving E., Duluth, Minn. Heater or vaporizer. 1,452,105; Apr. 17.
Aske, Leonard E., Duluth, Minn. Electric vaporizer. 1,451,673; Apr. 17.
Asselin, James H., San Francisco, Calif. Tongue switch and mate for railways. 1,452,019; Apr. 17.
Atkins, Frank, J., Davenport, Iowa. Oil burner. 1,452,020; Apr. 17.
Auld, Frederick H., Columbus, Ohio. Massaging device. 1,452,106; Apr. 17.
Austin, F. C., Machinery Company. (See French, James C., assignor.)
Automatic Electric Company. (See Keith, Alexander E., assignor.)
Automatic Electric Company. (See Nelson, Martin L., assignor.)
Automatic Electric Heater Company. (See Clark, Warren F., assignor.)
Ayres, John E. (See Spiker, T. A., and Ayres.)
B. G. Tertilwerke G. m. b. H. (See Trenckmann, Erich and B., assignors.)
Backer, Christian B., Bergen, Norway. Producing a protective coating on objects of magnesium or magnesium alloys. 1,451,755; Apr. 17.
Baddiley, James, J. B. Payman, and E. G. Bainbridge, assignors to British Dyestuffs Corporation Limited, Manchester, England. Manufacture of 1.4 naphthol sulphonic acid. 1,452,481; Apr. 17.
Baer, Carl J., St. Louis, Mo. Boat-propelling means. 1,452,059; Apr. 17.
Baer, Walter C., Toledo, Ohio. Lamp bracket. 1,452,138; Apr. 17.
Bahr, August T. J., Detroit, Mich., assignor of one-half to C. B. Kline, Dormont, Pa. Lug ring. 1,451,804; Apr. 17.
Bailey, James G., Delavan, assignor to Rotary Spreader, Mason City, Ill. Manure spreader. 1,452,139; Apr. 17.
Bainbridge, Ernest G. (See Baddiley, J., Payman, and Bainbridge.)
Baisley, Charles T., North Edgecomb, Me., assignor to Manhattan Electrical Supply Co. Inc., New York, N. Y. Telephone receiver. 1,452,334; Apr. 17.
Baker, Guy O., Atlantic, Iowa. Unloading device. 1,452,021; Apr. 17.
Baker, William H., Newton, Kans. Calendar. 1,452,407; Apr. 17.
Balcke, Walter H., Winchester, assignor to National Company, Cambridge, Mass. Dancing toy figure. 1,451,805; Apr. 17.
Balcker, Marten, assignor to J. Nelson, Chicago, Ill. Rotary compressor. 1,451,859; Apr. 17.
Baldridge, Joseph E., Avalon, Pa. Dental tool holder. 1,451,806. Apr. 17.
Baldwin, William H., Middletown, Conn. Tractor lawn mower. 1,451,807; Apr. 17.
Ball, John P., Chicago, Ill. Starting device for treating liquids. 1,452,335; Apr. 17.
Ballew, Elmer L., Chicago, Ill. Electric-sign-flashing apparatus. 1,452,178; Apr. 17.
Balls, William L., Manchester, England. Apparatus for grading or separating fibers according to their length. 1,452,352; Apr. 17.
Balls, William L., and F. Hutchins, Manchester, England. Apparatus for grading or separating fibers according to their length. 1,452,353; Apr. 17.
Barker Asphalt Paving Company, The. (See Monrath, Gustav, assignor.)
Barlow, Harry, and J. E. H. Mathies, East Moline, Ill. Mail-bag delivery and receiving crane. 1,452,234; Apr. 17.
Barnard, William F., Marion, Ind. Station stop device. 1,452,022; Apr. 17.
Baumgartner, John A., South Bend, Ind. Meat-cutting machine. 1,451,674; Apr. 17.
Baumgartner, John A., South Bend, Ind. Meat-cutting machine. 1,451,675; Apr. 17.
Baumhover, Herbert A., Dubuque, Iowa. Wall construction. 1,452,107; Apr. 17.

Bausch & Lomb Optical Company. (See Powell, John R., assignor.)
Baxter, Ernest A., St. Paul's, Ontario, Canada. Hen's nest. 1,452,141; Apr. 17.
Bayles, Lewis C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Air-feed control for rock drills. 1,452,140; Apr. 17.
Beckwith, Walter C., Fostoria, Ohio. Safe and vault protector. 1,451,974; Apr. 17.
Bedingfield, Charles H., Maple, assignor to F. C. R. Ansley, St. Catharines, Ontario, Canada. Combined spark intensifier and detector for internal-combustion engines. 1,451,808; Apr. 17.
Beere, Arthur W. (See Clews, C. E., and Beere.)
Belcher Aerial Manufacturing Company. (See Belcher, Osmond T., assignor.)
Belcher, Osmond T., Los Angeles, Calif., assignor to Belcher Aerial Manufacturing Company. Rudder and elevator assembly for aeroplanes. 1,452,060; Apr. 17
Belden, Edward H., assignor to The Willys-Overland Company, Toledo, Ohio. Tractor. 1,452,262; Apr. 17.
Belden, Edward H., assignor to The Willys-Overland Company, Toledo, Ohio. Steering means for tractors. 1,452,263; Apr. 17.
Bell, George G., Ashland, Ky. Dental tool. 1,451,809; Apr. 17.
Bell, Leslie G., and M. Grimm, Montreal, Quebec, Canada. Signal. 1,452,455; Apr. 17.
Berg, John, Pasadena, Calif. Steel eraser. 1,451,938; Apr. 17.
Berlien, Corwin M., Burkburnett, assignor of one-half to The Texhoma Oil & Refining Company, Wichita Falls, Tex. Standing valve. 1,451,676; Apr. 17.
Bertsch, John C., Tulsa, Okla. Gas expansion and absorption process and apparatus therefor. 1,452,061; Apr. 17.
Besly, Charles H., & Company. (See Miller, John, jr., assignor.)
Best, Frank E., assignor to Frank E. Best, Inc., Seattle, Wash. Padlock. 1,451,860; Apr. 17.
Best, Frank E., Inc. (See Best, Frank E., assignor.)
Bethlehem Steel Company. (See Fulda, Edward, assignor.)
Bindel, Friedrich W., Hamburg, Germany. Device for welding chain links, rings, and the like. 1,452,023; Apr. 17.
Binks, Harry D., River Forest, Ill. Adjustable spray nozzle. 1,452,264; Apr. 17.
Blackford, Atwell J., Cleveland, Ohio, assignor to American Stove Company, St. Louis, Mo. Wickless oil burner. 1,452,354; Apr. 17.
Blixt, Terry. (See Frosch, E. E., and Blixt.)
Blodgett, George R., M. E. Cheney, Brooklyn, and R. T. Hurley, New York, N. Y. Making spark plugs. 1,451,677; Apr. 17.
Bloom, Edgar J., Tiffin, Ohio. Force pump. 1,451,861; Apr. 17.
Blot, Lucien P., assignor to The Peck, Stow & Wilcox Co., Southington, Conn. Bench vise. 1,452,062; Apr. 17.
Böhle, Karl, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Swaging press. 1,451,756; Apr. 17.
Bolf, John, Miles, Tex. Animal trap. 1,452,355; Apr. 17.
Bolgár, Sándor, Vienna, Austria, assignor to J. Breyer, Nashville, Tenn. Chain and making same. 1,452,408; Apr. 17.
Bongirno, Andrew, Brooklyn, N. Y. Toy cat. Des. 62,214; Apr. 17.
Bonney, Bick R., assignor to Stroud and Company, Omaha, Nebr. Steering means for drawn vehicles. 1,421,757; Apr. 17.
Bostrom, Earnst A., assignor to Pomona Products Company, Griffin, Ga. Roasting machine. 1,452,409; Apr. 17.
Boucher, Pierre J., Kensington, London, England. Machine for capping bottles or the like. 1,452,410; Apr. 17.
Bourn, Stephen W., Providence, R. I. Machine for making flexible tubular armor. 1,452,356; Apr. 17.
Bower, Lyda S., Covington, Ga. Color-mixing device. 1,451,810; Apr. 17.
Boye Needle Company, The. (See Carlson, Gustav A., assignor.)
Bozard, Harrison B., Hamilton, Ontario, Canada, and C. W. Robinson, Auburn, N. Y., assignors, by mesne assignments, to International Harvester Company, Chicago, Ill. Power-lift drill. 1,452,286; Apr. 17.
Bradley, George R., Brooklyn, N. Y. Power declinkering apparatus. 1,452,336; Apr. 17.
Brandock, Andrew S., Pueblo, Colo. Wedgeless driving box. 1,452,235; Apr. 17.
Branson, Thomas, assignor to Sibson & Stern, Inc., Philadelphia, Pa. Reenforcing fabric for tires. 1,451,975; Apr. 17.
Brecel, Edward, assignor of one-fourth to P. Dzmitrowicz, Brooklyn, N. Y. Camper's combination utensil. 1,452,337; Apr. 17.
Brenizer, Orson W., assignor of one-fifth to A. V. Groupe, Philadelphia, Pa. Cable support. Re15,581; Apr. 17.
Brenner, Fredrick N., Tell City, Ind. Band-saw guide and guard. 1,452,179; Apr. 17.
Brewster, Oswald C. (See Porter, C. A., and Brewster.)
Breyer, Frank G., and W. H. Finkeldey, Palmerton, Pa., assignors to The New Jersey Zinc Company, New York, N. Y. Manufacture of dry-battery cans. 1,451,758; Apr. 17.
Breyer, Julius. (See Bolgár, Sándor, assignor.)
Bristol, Edgar H., assignor to The Foxboro Company, Foxboro, Mass. Liquid head gauge. 1,452,142; Apr. 17.
Bristol, William H., Waterbury, Conn. Synchronous operation of entertainment apparatus. 1,452,063; Apr. 17.
British Dyestuffs Corporation Limited. (See Baddiley, J., Payman, and Bainbridge, assignors.)
Brown & Bigelow. (See Kristofek, Frank J., assignor.)
Brown, Francis H., Glenolden, Pa., assignor to Petroleum Heat and Power Company, Boston, Mass. Burner. 1,451,811; Apr. 17.
Brown, Francis H., Glenolden, Pa., assignor to Petroleum Heat and Power Company, Boston, Mass. Burner. 1,451,812; Apr. 17.
Brubacker, Howard C., Rodney, Ontario, Canada. Inside pocket iron. 1,451,813; Apr. 17.
Bruhn, Gustav A., Harburg-on-the-Elbe, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Automatic weighing apparatus for loose materials. 1,451,750; Apr. 17.
Brunner, Harold E., Larchmont, N. Y., assignor to The Hess-Bright Manufacturing Company. Spinning spindle. 1,452,180; Apr. 17.
Bryant Electric Company, The. (See Stendahl, Ludwig, assignor.)
Bucks, David H., La Fayette, Ohio. Safety chick box. 1,451,760; Apr. 17.
Bunn, Orrice F., Bristol, Tenn. Life-saving garment. 1,452,411; Apr. 17.
Burke, Albert C., La Crosse, Wis. Can opener. 1,452,287; Apr. 17.
Burke Electric Company. (See Burke, James, assignor.)
Burke, James, Erie, Pa., assignor to Burke Electric Company. Dynamo frame and forming the same. 1,452,143; Apr. 17.
Burrows, Robert P., South Bend, Ind. Flashing fastening for concrete and other buildings. 1,452,412; Apr. 17.
Burson Knitting Company. (See Andelsen, Viggo W., assignor.)
Burson Knitting Company. (See Parker, W. S., and Jesperson, assignors.)
Burton, Jesse B., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn. Stop mechanism. 1,452,357; Apr. 17.
Busch, Auguste. (See Tommasi, C., Sandholm, Danneel, and Busch.)
Bush, Vannevar, Chelsea, assignor to American Radio & Research Corporation, Medford, Mass. Radiotransmitter. 1,452,064; Apr. 17.
Butler, Rollo J., Tonopah, Nev. Centrifugal amalgamator. 1,452,181; Apr. 17.
Butrum, Clarence A., Holton, Kans. Platform ladder jack. 1,452,182; Apr. 17.
By-Products Recovery Company. (See Mellott, Howard S., assignor.)
Bye, Karl, and P. Werle, Butte, Mont. Vehicle headlight. 1,451,862; Apr. 17.
Byor, Gustav A., Edgar, Nebr. Register. 1,451,761; Apr. 17.
Byrd, H. B., Manufacturing Company. (See Marshall, Stanmore P., assignor.)
Calabrese, Vincent, Brooklyn, N. Y. Camera. 1,452,413; Apr. 17.
Calahan, Harold A., New York, N. Y. Automobile lock protective device. 1,452,065; Apr. 17.
Cameron, Will J., Chicago, Ill. Variable-resistance unit. 1,451,678; Apr. 17.
Campbell, Henry A., Oakland, Calif. Rotary compressor. 1,452,024; Apr. 17.
Campbell, Henry A., Oakland, Calif. Two-stroke deep-well power head. 1,452,025; Apr. 17.
Campbell, Sterling H., St. Louis, Mo. Coupling-release rigging. 1,452,358; Apr. 17.
Caps, John E., Wilmette, Ill. Water-softening apparatus. 1,452,288; Apr. 17.
Carlin, Arvid F., New York, N. Y. Combined shelf and bracket. 1,452,144; Apr. 17.
Carlson, Gustav A., assignor to The Boye Needle Company, Chicago, Ill. Tatting shuttle. 1,452,183; Apr. 17.
Caron, Octave, Faribault, Minn. Clod crasher. 1,452,184; Apr. 17.
Carrau, Salvador, and W. R. Cobean, Buenos Aires, Argentina. Device for the use of carbon paper in typewriters. 1,452,414; Apr. 17.
Carter, Clark E., Montreal, Quebec, Canada. Chain link. 1,452,476; Apr. 17.
Carter, Donald M., trustee. (See Dahl, Conrad, assignor.)
Carter, Francis A., Chicago, Ill. Spark plug. 1,451,939; Apr. 17.
Carter, John H., Cohoes, N. Y. Toothbrush. 1,452,108; Apr. 17.
Casgrain, Louis A., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for operating upon the soles of shoes. 1,451,679; Apr. 17.
Caspary, Emil, Berlin, Germany. Ship's cabin. 1,452,026; Apr. 17.

Cass, Frank A., assignor to South Bend Bait Co., South Bend, Ind. Fishing lure. 1,452,359; Apr. 17.
Cave, Henry, Hartford, Conn. Drying apparatus for clothes. 1,452,066; Apr. 17.
Cederberg, Ivar W., Berlin, Germany. Apparatus and method for carrying out catalytic oxidation of ammonia with oxygen. 1,452,145; Apr. 17.
Cederberg, Ivar W., Lidingo-Brevik, near Stockholm, Sweden, assignor to Norsk Hydro-Elektrisk Kvaelstofaktieselskab, Christiania, Norway. Catalyzer for the synthetic manufacture of ammonia and producing same. 1,452,027; Apr. 17.
Centerbar, Lorenzo R., Fitchburg, Mass. Toy. 1,452,109; Apr. 17.
Chambers, William L., Eden, Utah. Wheel-rim adjuster. 1,451,976; Apr. 17.
Chapman, Norton W., assignor to The Guilford Mfg. Co., Guilford, Conn. Manicure buffer. 1,452,067; Apr. 17.
Chard, William H. (See Hills, W. F., and Chard.)
Charles, Edward S., Berwyn, Ill., assignor to International Harvester Company, Ensilage-cutter-knife adjustment. 1,452,289; Apr. 17.
Charlton, Harry W., and R. N. Shreve, assignors to American Potash Corporation, New York, N. Y. Accelerating agent in potash recovery. 1,452,186; Apr. 17.
Charlton, Harry W., and R. N. Shreve, assignors to American Potash Corporation, New York, N. Y. Alkali-metal product and producing the same. 1,452,185; Apr. 17.
Chemical Machinery Corporation. (See Field, Crosby, assignor.)
Chemische Fabrik Griesheim-Elektron. (See Laska, A. L., and Zitscher, assignors.)
Cheney, Moses E. (See Blodgett, G. R., Cheney, and Hurley.)
Cheramy, Inc. (See Miles, Frank J. M., assignor.)
Chiles, George S., Chicago, Ill. Car truck. 1,452,187; Apr. 17.
Chott, Edward L., Chicago, Ill. Dental articulator. 1,452,477; Apr. 17.
Christ, Benjamin F., Idagrove, Iowa. Lifter block for motor vehicles. 1,452,188; Apr. 17.
Christensen, Emil, Portland, Oreg. Automobile guard and bumper. 1,452,189; Apr. 17.
Chriswell, Frederick W., assignor to Pacific car and foundry company, Seattle, Wash. Logging car for short logs. 1,451,940; Apr. 17.
Clapp, E. H., Rubber Company. (See Pratt, William B., assignor.)
Clark, Warren F., assignor to Automatic Electric Heater Company, Warren, Pa. Liquid heater. 1,451,863; Apr. 17.
Clarke, Charles L., Fort Worth, Tex. Knee pad. 1,452,360; Apr. 17.
Clausen, Henry P., Mamaroneck, assignor to Western Electric Company, Incorporated, New York, N. Y. Phonographic apparatus. 1,452,361; Apr. 17.
Claussen, Herman H., San Antonio, Tex. Lock mechanism. 1,425,190; Apr. 17.
Cleveland, Benjamin L., assignor of one-fourth to S. C. Hutcheson, one-fourth to G. F. Meehan, and one-fourth to F. M. Hobbins, Chattanooga, Tenn. Anticreeper tie plate. 1,451,762; Apr. 17.
Cleveland Tractor Company, The. (See Savage, Edwin H., assignor.)
Cleveland Tractor Company, The. (See White, Rollin H., assignor.)
Clews, Charles E., and A. W. Beere, assignors to P. N. Kingswell, Auckland, New Zealand. Lifting jack and hauler. 1,452,236; Apr. 17.
Clifford, Curtis T., San Francisco, Calif. Dry-pipe mechanism for automatic springler systems. 1,452,191; Apr. 17.
Clifton-Ewart Construction Company, The. (See Clifton, W. E., and Ewart, assignors.)
Clifton, William E., and J. S. Ewart, assignors to The Clifton-Ewart Construction Company, Limited, Nottingham, England. Construction of concrete roofs. 1,452,362; Apr. 17.
Clinkinbeard, George W., St. Joseph, Mo. Attachment for mowing-machine sickle bars. 1,451,680; Apr. 17.
Cloud, John W., London, England, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Feed-valve device. 1,452,068; Apr. 17.
Clum, Frederick H., assignor of one-half to J. W. Donaldson, Detroit, Mich. Toothbrush and paste holder. 1,451,941; Apr. 17.
Cmejla, Ferdinand A., Milwaukee, Wis. Curtain stretcher. 1,452,415; Apr. 17.
Coats, Roy N., Renton, assignor to Pacific Car and Foundry Company, Seattle, Wash. Car brake. 1,451,942; Apr. 17.
Cobean, Warren R. (See Carrau, S., and Cobean.)
Coffey, Cullom W. (See Doty, C. C., and Coffey.)
Collins, Charles S., New York, and L. Roessel, Brooklyn, N. Y. Method and apparatus for proportionally regulating the flow of fluids. 1,452,265; Apr. 17.
Comerford, Patrick, Victoria, British Columbia, Canada. Railway-switch lock. 1,452,069; Apr. 17.
Conboy, William H., Cheboygan, Mich. Valve cap. 1,452,146; Apr. 17.
Congar, Reville S. (See Keller, J. W., and Congar.)
Connecticut Electric Manufacturing Company, The. (See McClatchie, Stanley, assignor.)
Conrad, Hermann, Neustadt, Haardt, Germany. Plan sifting machine. 1,452,290; Apr. 17.
Container Club, The. (See Webb, John W., assignor.)
Coogan, James J., New York, N. Y. Dispensing receptacle. 1,451,899; Apr. 17.
Cook, Albert, Holyoke, Mass. Band-tying gauge. 1,451,681; Apr. 17.
Cook, Albert, Holyoke, Mass. Band-tying gauge. 1,451,682; Apr. 17.
Cook, Albert. (See Curry, M., and Cook.)
Cook, Harmon J., assignor to The Torrington Company, Torrington, Conn. Handle-adjusting mechanism. 1,452,192; Apr. 17.
Coryell, Charles L., Neodesha, Kans. Valve. 1,452,416; Apr. 17.
Cosgitt, Malcolm L., Alameda, Calif., assignor to Manifold Impressions Corporation, Carson City, Nev. Manifolding attachment for typewriters. 1,451,864; Apr. 17.
Cosgitt, Malcolm L., Alameda, Calif., assignor to Manifold Impressions Corporation, Carson City, Nev. Manifolding attachment for typewriters. 1,451,865; Apr. 17.
Cosgitt, Malcolm L., Alameda, Calif., assignor to Manifold Impressions Corporation, Carson City, Nev. Manifolding attachment for typewriters. 1,451,866; Apr. 17.
Cosgitt, Malcolm L., Alameda, Calif., assignor to Manifold Impressions Corporation, Carson City, Nev. Manifolding attachment for typewriters. 1,452,193; Apr. 17.
Couser, Isaac, Manchester, N. H., assignor to Draper Corporation, Hopedale, Mass. Bobbin-supply box. 1,451,683; Apr. 17.
Crane, Frederick G., et al. (See Hammond, Grant, assignor.)
Crompton & Knowles Loom Works. (See Holmes, Elbridge R., assignor.)
Crompton & Knowles Loom Works. (See Wattie, William M., assignor.)
Crupain, Morris, Newark, N. J. Sanitary package. 1,452,456; Apr. 17.
Crupain, Morris, Newark, N. J. Toilet-article package. 1,452,363; Apr. 17.
Culbertson, Moses, Kelfield, Saskatchewan, Canada. Seeder boot and shoe. 1,452,417; Apr. 17.
Cullinan, John J., Bradford, Pa. Pump packing. 1,451,814; Apr. 17.
Cummer, Harry, Buffalo, N. Y. Weighing scale. 1,451,684; Apr. 17.
Cunneen, Peter, New Rochelle, N. Y. Dish rack. 1,452,418; Apr. 17.
Cunningham, James, Son & Company. (See Franquist, Gustave E., assignor.)
Curry, Malcolm, Scarsdale, N. Y., and A. Cook, Holyoke, Mass.; said Curry assignor to said Cook. Band-tying gauge. 1,451,685; Apr. 17.
Curtis, William E., Wyandotte, Mich. Tire. 1,451,977; Apr. 17.
Cutler-Hammer Mfg. Co. (See Lightfoot, Edwin N., assignor.)
Czaran, Otto, Long Island City, N. Y. Apparatus for making belting. 1,451,686; Apr. 17.
Dahl, Conrad, assignor to D. M. Carter, trustee, Chicago, Ill. Occupant-steered vehicle. 1,451,868; Apr. 17.
Dahl, Conrad, assignor to D. M. Carter, trustee, Chicago, Ill. Vehicle wheel. 1,451,867. Apr. 17.
Daimler-Motoren-Gesellschaft. (See Schwerdtfeger, Walter, assignor.)
Dake, Charles W., assignor to The Pyle-National Company, Chicago, Ill. Packing for steam turbines. 1,452,147; Apr. 17.
Danneel, Heinrich. (See Tommasi, C., Sandholm, Danneel, and Busch.)
Davenport, Ransom W., assignor to Jeffery-Dewitt Company, Detroit, Mich. Rapid decorating firing furnace or kiln. 1,451,815; Apr. 17.
David, Otto, Far Rockaway, N. Y. Girdle for women's apparel. 1,452,148; Apr. 17.
Davis, Harold S., Pittsburgh, Pa., assignor to Texas Gulf Sulfur Company, Bay City, Tex. Burning sulfur. 1,451,763; Apr. 17.
Davis, Sidney, Lankershim, Calif. Gopher trap. 1,452,028; Apr. 17.
Davis, Walter T., assignor to Wheeling Stamping Company, Wheeling, W. Va. Purifying molten metal. 1,452,364; Apr. 17.
Davy, Charles F., Syracuse, N. Y. Lowering device. 1,452,070; Apr. 17.
Dayton Steel Racquet Company, The. (See Larned, William A., assignor.)
Decker, Joseph T. (See Hampton, I. M., and Decker.)
Decker, Louis J. (See Hampton, I. M., and Decker.)
Deere & Company. (See White, Charles E., assignor.)
De Francisco, Marshall. (See Holbrook, J. K., and De Francisco.)
Dehouck, Joseph, Thielt, Belgium. Aeroplane assuring automatically the lateral and longitudinal stability. 1,452,071; Apr. 17.
De Land, Daniel B., Fairport, assignor to American Can Company, New York, N. Y. Key-opening can. 1,451,869; Apr. 17.
De Laval Separator Company, The. (See Hall, Selden H., assignor.)

Dentten, Walter E., Milwaukee, Wis. Shoe last. 1,452,237; Apr. 17.
Det Tekniske Forsøgsaktieselskab. (See Goldschmidt, Rudolf, assignor.)
Deuel, Sanford H., Oakland, Calif. Construction of coffins. 1,452,029; Apr. 17.
Dever, Henry L., assignor to Owensboro Ditcher & Grader Company, Owensboro, Ky. Road grader and ditcher. 1,452,365; Apr. 17.
De Voe, Albert H., Westfield, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Feeding mechanism for sewing machines. 1,452,072; Apr. 17.
De Wallace, Harry, Syracuse, N. Y., assignor to J. B. Wise Incorporated. Waste fitting for sinks. 1,451,943; Apr. 17.
Dick, Seward J., Clymer, Pa. Bracket. 1,451,764; Apr. 17.
Diegel, John M., Minneapolis, Minn. Electrical signaling and recording system. 1,451,900; Apr. 17.
Dobbin, Henry F., assignor to Western Electric Company, Incorporated, New York, N. Y. Centrifugal governor. 1,452,266; Apr. 17.
Doland, Samuel M. (See Van Duyne, Simeon, assignor.)
D'Ollier, William L. (See Geiger, Eugen, assignor.)
Dolphin, Mary C. R., Bloomfield, Nebr. Bodkin. 1,452,030; Apr. 17.
Donaldson, Joseph W. (See Clum, Frederick H., assignor.)
Donat, Joseph L., Chicago, Ill. Resilient tire. 1,452,293; Apr. 17.
Donat, Joseph L., Chicago, Ill. Resilient wheel. 1,452,294; Apr. 17.
Donat, Joseph L., Chicago, Ill. Resilient wheel for vehicles. 1,452,291; Apr. 17.
Donat, Joseph L., Chicago, Ill. Resilient wheel for vehicles. 1,452,292; Apr. 17.
Dooner, James J., Norristown, assignor of one-half to J. J. Farren, Philadelphia, Pa. Locking device for gas valves. 1,451,944; Apr. 17.
Doty, Chester C., Danville, and C. W. Coffey, Monticello, Ky. License plate. 1,451,765; Apr. 17.
Dow Chemical Company, The. (See Stewart, Leroy C., assignor.)
Dow, Harry E., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Electrically-heated burnishing machine. 1,451,687; Apr. 17.
Dowell, William. (See Stockton, William A., assignor.)
Draper Corporation. (See Couser, Isaac, assignor.)
Draper Corporation. (See Rhoades, Alonzo E., assignor.)
Driemeyer, Edward W., assignor to The K-D Lamp Company, Cincinnati, Ohio. Lock for lamp doors. 1,451,870; Apr. 17.
Dunford & Elliott (Sheffield) Limited. (See Watton, Harold E., assignor.)
Duplex Transmission Company. (See Stumpenhorst, John A., assignor.)
Durgin, Charles B. (See Ross, W. H., Durgin, and Jones.)
Duro Pump and Manufacturing Company, The. (See Larsh, Everett P., assignor.)
Dusinberre, George B., Elmira, N. Y. Electrical testing clip. 1,452,194; Apr. 17.
Dzmitrowicz, Peter. (See Brecel, Edward, assignor.)
Earl, Charles M., and B. F. Wheeler, Detroit, Mich. Beverage-dispensing device. 1,451,688; Apr. 17.
Eaton, James M., et al., trustees. (See Gifford, Richard T., assignor.)
Eckermann, Leo A., assignor to Kales Stamping Company, Detroit, Mich. Timer for internal-combustion engines. 1,452,419; Apr. 17.
Eddy, Edgar D., Toronto, Ontario, Canada. Apparatus for separating seeds. 1,452,457; Apr. 17.
Edgar, Frank M., and T. F. Archer, assignors to Ternstedt Manufacturing Company, Detroit, Mich. Windshield pivot. 1,451,978; Apr. 17.
Edwards, Jose S., Helper, Utah. Automobile rim. 1,452,073; Apr. 17.
Egan, Naomi, Redding, Calif. Collapsible roost. 1,452,366; Apr. 17.
Egry Register Company, The. (See Wimmers, August A., assignor.)
Ekberg, Lender, Vasteras, Sweden. Rail joint. 1,451,766; Apr. 17.
Eklund, Oscar F., Worcester, Mass. Belt shipper. 1,451,945; Apr. 17.
Electric Auto-Lite Company. (See Patterson, Harry R., assignor.)
Electric Auxiliaries Company. (See Herz, Alfred, assignor.)
Elektrizitatswerk Lonza. (See Gütlin, Hermann, assignor.)
Elektrizitatswerk Lonza. (See Tommasi, C., Sandholm, Danneel, and Busch, assignors.)
Elgin Street Sweeper Co. (See Martin, Elmer R., assignor.)
Ellingson, Hans, Hamilton, Ohio. Lock nut. 1,452,367; Apr. 17.
Elliott, Henry D., Tabor, N. C. Transplanting device. 1,452,110; Apr. 17.
Ellis, Carleton, Montclair, N. J. Making nickel formate. 1,452,478; Apr. 17.
Elrod, Henry E., Dallas, Tex. Incinerator. 1,452,031; Apr. 17.
Emerson-Brantingham Company. (See Waterman, L. E., Traphagen, and Waterman, assignors.)
Erb, Samuel, Tacoma, Wash. Log-carriage-offsetting mechanism. 1,452,149; Apr. 17.
Erickson, Frederic W., Tarrytown, N. Y. Coupling for pipes, conduits, etc. 1,452,268; Apr. 17.
Esche, Herbert E., Chemnitz, Germany. Machine-made seam for knitted materials and the like. 1,452,195; Apr. 17.
Esler Electric Manufacturing Company. (See Esler, Samuel M., assignor.)
Esler, Samuel M., Chicago, Ill., assignor to Esler Electric Manufacturing Company, Marion, Ind. Connecting device for electric circuits. 1,452,267; Apr. 17.
Espenschied, Lloyd, Hollis, N. Y., assignor to American Telephone and Telegraph Company. Composite ringer for multiplex transmission systems. 1,451,767; Apr. 17.
Evans, Guy J., Buffalo, N. Y. Stencil. 1,451,816; Apr. 17.
Evans, Guy J., Buffalo, N. Y. Stencil. 1,451,817. Apr. 17.
Evans, Thomas N., London, England. Loose-letter sign and the like. 1,452,074; Apr. 17.
Evenson, Oscar, Rio, Wis. Hot-water attachment for stoves. 1,452,368; Apr. 17.
Ewart, John S. (See Clifton, W. E., and Ewart.)
Fageol, Frank R., Oakland, Calif. Automobile body. 1,452,369; Apr. 17.
Falls, James M., Louisville, Ky. Container. 1,451,768; Apr. 17.
Farren, John J. (See Dooner, James J., assignor.)
Farrington, John F., assignor to Western Electric Company, Incorporated, New York, N. Y. Oscillation generator for signaling systems. 1,452,032; Apr. 17.
Faurot, Joseph A. (See Wolfe, C. L., and Faurot.)
Fauser, Gustave M., assignor to Tingue Manufacturing Company, New York, N. Y. Woven fabric. Des. 62,215; Apr. 17.
Fauser, Gustave M., assignor to Tingue Manufacturing Company, New York, N. Y. Woven fabric. Des. 62,216; Apr. 17.
Fauser, Gustave M., assignor to Tingue Manufacturing Company, New York, N. Y. Woven fabric. Des. 62,217; Apr. 17.
Fauser, Gustave M., assignor to Tingue Manufacturing Company, New York, N. Y. Woven fabric. Des. 62,218; Apr. 17.
Fauser, Gustave M., assignor to Tingue Manufacturing Company, New York, N. Y. Woven fabric. Des. 62,219; Apr. 17.
Fenby, Edgar B., Leamington Spa, England. Machine for use in the manufacture of linen collars and the like. 1,452,111; Apr. 17.
Fergusson, Alan R., Buffalo, N. Y. Toy railway. 1,452,370; Apr. 17.
Fenn, Thomas H., assignor of one-half to T. Foulkes, Cleveland, Ohio. Electric-conductor coupling. 1,451,979; Apr. 17.
Field, Crosby, Yonkers, assignor to Chemical Machinery Corporation, New York, N. Y. Apparatus for transferring heat. 1,451,901; Apr. 17.
Field, Crosby, Yonkers, assignor to Chemical Machinery Corporation, New York, N. Y. Heat-transferring apparatus. 1,451,903; Apr. 17.
Field, Crosby, Yonkers, assignor to Chemical Machinery Corporation, New York, N. Y. Heat-transferring apparatus. 1,451,904; Apr. 17.
Field, Crosby, assignor to Chemical Machinery Corporation, New York, N. Y. Separating a brittle product from a base. 1,451,902; Apr. 17.
Fifield, Albert F., Newark, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Thread-controlling device. 1,452,033; Apr. 17.
Filby, James C. (See Yoders, I. G., and Filby.)
Finkeldey, William H. (See Breyer, T. G., and Finkeldey.)
Finnigan, John J., Atlanta, Ga. Making flanged tank couplings. 1,452,238; Apr. 17.
Fisher Body Corporation. (See Rissmann, Paul, assignor.)
Fisher, George J. (See Fox, H. K., and Fisher.)
Fjord Company, The. (See Ross, Harry B., assignor.)
Fleming, James R., Scranton, Pa. Mining-car truck. 1,451,690; Apr. 17.
Fleming, James R., Scranton, Pa. Tight and loose wheel. 1,451,689; Apr. 17.
Flowers, William J., Complete, Miss. Rope and cable tie. 1,452,338; Apr. 17.
Ford, Ralph L., Chicago, Ill., assignor, by mesne assignments, to International Harvester Company. Latch mechanism. 1,452,479; Apr. 17.
Forkardt, Paul, Dusseldorf-Oberkassel, Germany. Centering device. 1,452,034; Apr. 17.
Forster, John C., Pittsburgh, Pa. Gyroscopic top and making same. 1,451,818; Apr. 17.
Foster, Charles J., Higby, and R. D. Simpson, Columbus, Ohio. Fastener for vehicle curtains. 1,452,150; Apr. 17.
Foulkes, Thomas. (See Fenn, Thomas H., assignor.)
Fowler, Lewis D., Oklahoma, Okla. Automobile radiator. 1,451,871; Apr. 17.
Fox, Harold K., Fresno, and G. J. Fisher, Big Creek, Calif. Concrete-mixing machine. 1,451,819; Apr. 17.
Foxboro Company, The. (See Bristol, Edgar H., assignor.)
Franklin, E. I., & Co. (See Willis, Warren E., assignor.)

Franquist, Gustave E., assignor to James Cunningham, Son & Company, Rochester, N. Y. Fastening device. 1,452,196; Apr. 17.
Franzengerle Company. (See Zengerle, Walter C., assignor.)
Frederick, Howard F., Detroit, Mich. Pump-actuating mechanism. 1,451,691; Apr. 17.
Freeman, Harold A., Los Angeles, Calif. Silencer. 1,452,035; Apr. 17.
French & Hecht. (See Hecht, Joseph L., assignor.)
French, Henry W., Chicago, Ill. Clamp. 1,451,692; Apr. 17.
French, James C., Chicago, Ill., assignor, by mesne assignments, to F. C. Austin Machinery Company. Tractor-wheel chain. 1,451,872; Apr. 17.
Frey, Herman A., Champaign, Ill. Horseshoe. 1,451,905; Apr. 17.
Fried. Krupp Aktiengesellschaft. (See Akemann, Walther, assignor.)
Fried. Krupp Aktiengesellschaft. (See Böhle, Karl, assignor.)
Fried. Krupp Aktiengesellschaft. (See Bruhn, Gustav A., assignor.)
Fried. Krupp Aktiengesellschaft. (See Lauer, Karl, assignor.)
Fried. Krupp Aktiengesellschaft. (See Lehmann, Karl A., assignor.)
Frozeth, Ernst E., and T. Blixt, Minneapolis, Minn. Fire arch for furnaces. 1,452,295; Apr. 17.
Fry, Harry M., Johnstown, Pa. Tire tread. 1,451,820; Apr. 17.
Fulda, Edward. (See Lachman, L. S., and Fulda.)
Fulda, Edward, New York, N. Y., assignor, by mesne assignments, to Bethlehem Steel Company, Bethlehem, Pa. Welded steel wheel. 1,452,036; Apr. 17.
Funnell, Harry M., Bloomfield, Conn. Universal joint. 1,451,946; Apr. 17.
Gaines, Edward C. (See Vaughan, H. H., and Gaines.)
Garceau, Harry J., assignor to Warner Gear Company, Muncie, Ind. Automobile lock. 1,451,821; Apr. 17.
Geiger, Eugen, Karlsruhe, Germany, assignor to W. L. D'Ollier, New York, N. Y. Cleaning brush. 1,452,458; Apr. 17.
Gellman, Israel C., Chicago, Ill. Adjustable socket wrench. 1,451,873; Apr. 17.
Gellman, Israel C., Chicago, Ill. Wrench. 1,451,906; Apr. 17.
General Engineering Company, The, et al. (See Genter, A. L., and Jones, assignors.)
Genter, Albert L., and G. C. Jones, assignors of one-half to The General Engineering Company and one-half to A. L. Genter, Salt Lake City, Utah. Continuous thickening process. 1,452,151; Apr. 17.
Genter, Albert L., et al. (See Genter, A. L., and Jones, assignors.)
Gifford, Richard T., Springfield, assignor to E. N. White, J. L. Wyckoff, and J. M. Eaton, trustees, Holyoke, Mass. Holding latch for truck steering handles. 1,451,907; Apr. 17.
Gilchrist Company, The. (See Gilchrist, Raymond B., assignor.)
Gilchrist, Raymond B., assignor to The Gilchrist Company, Newark, N. J. Drink mixer. 1,452,197; Apr. 17.
Gingerick, Kent S., Urbana, assignor to R. T. Parrish, Dayton, Ohio. Tractor wheel. 1,451,769; Apr. 17.
Ginther, Anthony E., Philadelphia, Pa. Truck or wagon body. 1,452,371; Apr. 17.
Glaholt, Carl, Union, N. Dak. Dirigible headlight. 1,451,698; Apr. 17.
Gleasner, William J., Kenmore, N. Y. Asphalt-cutting tool. 1,452,037; Apr. 17.
Gloub, John. (See Spitzer, C. S., and Gloub.)
Goldschmidt, Rudolf, Berlin, Germany, assignor to Det Tekniske Forsøgsaktieselskab, Ordrup, Charlottenlund, Denmark. Mechanism for converting rotary into oscillatory motion. 1,452,038; Apr. 17.
Gomez, Joaquin S., Washington, D. C. Surgical suturing device. 1,452,372; Apr. 17.
Gómez, Joaquin S., Washington, D. C. Surgical ligature and means for applying the same. 1,452,373; Apr. 17.
Goodman Manufacturing Company. (See Pray, Thomas E., assignor.)
Goodrich, B. F., Company, The. (See Haren, Urban, assignor.)
Goodrich, B. F., Company, The. (See Kepler, I. F., and Robb, assignors.)
Goodrich, B. F., Company, The. (See Tew, James D., assignor.)
Goodrum, Charles L., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. 1,452,269; Apr. 17.
Goolman, Fred R., Syracuse, N. Y., assignor, by mesne assignments, to Mimmo Toy Company, Inc. Toy player piano. 1,452,112; Apr. 17.
Gottlieb, Abraham. (See Simon, D., and Gottlieb.)
Gottschalk, Karl P., Dresden, assignor to H. Staier, Grunau, near Rosswein, Saxony, Germany. Apparatus for impregnating matches of wood, pasteboard, paper, or the like with paraffin. 1,452,374; Apr. 17.
Gottschalk, Karl P., Dresden, assignor to H. Staier, Grunau, near Rosswein, Saxony, Germany. Apparatus for adjusting and fixing the setting or straddling of partly-cut matches of paper, pasteboard, or the like and still connected in the shape of a continuous strip or band. 1,422,375; Apr. 17.
Gottschalk, Karl P., Dresden, assignor to H. Staier, Grunau, near Rosswein, Saxony, Germany. Filling apparatus for match-dipping machines. 1,452,376; Apr. 17.
Gould, Fred J., Springfield, Mass. Stone-surfacing machine. 1,452,113; Apr. 17.
Graham, Henry W. B., deceased, New London, Ohio; M. Graham, executrix; said Henry W. B. Graham assignor to The Arnold-Creager Company, New London, Ohio. Brick-making apparatus. 1,452,152; Apr. 17.
Graham, Margaret, executrix. (See Graham, Henry W. B.)
Gravell, James H., Elkins Park, Pa. Leakproof liquid container. 1,452,039; Apr. 17.
Gravely, Julian S., Wytheville, Va., assignor to Winchester Repeating Arms Co., New Haven, Conn. Paper shot shell. 1,452,040; Apr. 17.
Gray, William E., Chicago, Ill. Lemon squeezer. 1,452,270; Apr. 17.
Green, Charles F., Defiance, assignor to Industrial Research Corporation, Toledo, Ohio. Seat spring. 1,452,041; Apr. 17.
Greenfield, Joseph W., and W. Waller, St. Paul, Minn. Ball-throwing toy. 1,452,459; Apr. 17.
Greiner, Walter J. (See Steffan, W. C., Ackermann, and Greiner.)
Greuter, Henry J., Fairfield, Conn. Cue-tip fastener. 1,452,420; Apr. 17.
Grenier, John O., Vancouver, British Columbia, Canada. Direction indicator for automobiles and other vehicles. 1,452,114; Apr. 17.
Grignon, Robert. (See Oberley, C. G., and Grignon.)
Grimm, Morris. (See Bell, L. G., and Grimm.)
Groupe, Andrew V. (See Brenizer, Orson W., assignor.)
Gugliuzzi, Nicholas, Ansonia, Conn. Window shade fixture. 1,451,947; Apr. 17.
Guilford Mfg. Co., The. (See Chapman, Norton W., assignor.)
Gustafson, Adolph P., assignor to M. Schulz Company, Chicago, Ill. Pneumatic action. 1,451,980; Apr. 17.
Gütlin, Hermann, Basel, assignor to Elektrizitatswerk Lonza, Gampel, Switzerland. Utilizing solid fuel. 1,452,239; Apr. 17.
Gutsell, Hiram S., Ithaca, N. Y. Automobile buffer. 1,451,874; Apr. 17.
Gwyer, Herbert J., Yonkers, N. Y. Refrigerator construction. 1,452,271; Apr. 17.
Gwyer, Herbert J., Yonkers, N. Y. Refrigerator construction. 1,452,272; Apr. 17.
Haeberlein, Max, Maplewood, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Wicket gate-adjusting means. 1,451,694; Apr. 17.
Hagens, G. R., et al. (See Porter, C. A., and Brewster, assignors.)
Hagerty, Robert J., assignor of one-half to F. H. Hebron and one-half to T. C. Kelly, Philadelphia, Pa. Nursing bottle. 1,451,822; Apr. 17.
Hall, Selden H., Poughkeepsie, assignor to The De Laval Separator Company, New York, N. Y. Milking-machine relay. 1,452,153; Apr. 17.
Halvorsen, Olaf, and A. H. Johnson, Chicago, Ill.; said Johnson assignor to said Halvorsen. Leather-stamping machine. 1,452,421; Apr. 17.
Hamilton, Frank S., Boston, Mass. Lock nut. 1,452,422; Apr. 17.
Hammer, Hans O., Chicago, Ill. Tuning device for stringed musical instruments. 1,452,075; Apr. 17.
Hammond, Grant, New Haven, Conn., assignor of one-third to A. C. Washburne, Pittsfield, and one-third to F. G. Crane, Dalton, Mass. Magazine catch and release for firearms. 1,452,042; Apr. 17.
Hammond Typewriter Company, The. (See Noack, Carl O., assignor.)
Hamon, Marius A., Paris, France. Apparatus for preventing the stealing of motor cars. 1,452,240; Apr. 17.
Hampton, Isaac M., J. T. Decker, and L. J. Decker, Hartford, Ill. Portable refrigerator. 1,451,823; Apr. 17.
Hancock, George L., Geneva, N. Y. Dumping car. 1,452,198; Apr. 17.
Hanselman, Arthur H., St. Paul, Minn. Fishhook. 1,452,377; Apr. 17.
Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Automatic liquid valve. 1,452,155; Apr. 17.
Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, New York, N. Y. Rotation release for rock drills. 1,452,154; Apr. 17.
Hanson, Henry, assignor to Wilcox, Crittenden and Company, Incorporated, Middletown, Conn. Bilge pump. 1,452,378; Apr. 17.
Harburg, James E., assignor to Yerrick Manufacturing Co., Denver, Colo. Tool. 1,451,727; Apr. 17.
Hardy, F. A., & Company. (See Howe, Thomas M., assignor.)
Haren, Urban, Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Method and apparatus for building laminated strips. 1,452,379; Apr. 17.

Harley-Davidson Motor Co. (See Harley, William S., assignor.)
Harley, William S., assignor to Harley-Davidson Motor Co., Milwaukee, Wis. Combined engine shaft, clutch, and transmission. Re. 15,578; Apr. 17.
Harmon, James B., Helena, Mont. Vehicle wheel. 1,452,423; Apr. 17.
Harrington, Edwin, Son & Company. (See Scott, Robert F., assignor.)
Harris Automatic Press Company. (See Harrold, Charles W., assignor.)
Harris, Hu M., Chattanooga, Tenn., assignor to Lucey Manufacturing Corporation, New York, N. Y. Bull and calf wheel. 1,451,770; Apr. 17.
Harrold, Charles W., assignor to The Harris Automatic Press Company, Cleveland, Ohio. Inking mechanism. 1,452,043; Apr. 17.
Hart, Harry S., Chicago, Ill. Plate-metal car ends. 1,451,948; Apr. 17.
Hart, Thomas I., St. Louis, Mo. Tag. 1,452,460; Apr. 17.
Hasalt, Max, Dresden, Germany, assignor to Aktiebolaget Ars, Stockholm, Sweden. Adjustable scene portal in theaters. 1,452,424; Apr. 17.
Haseltine, William E., Ripon, Wis. Glove. 1,451,940; Apr. 17.
Haskell, Broderick, Franklin, Pa. Load-controlled air brake. 1,452,199; Apr. 17.
Hass, Martin F., Wilkes-Barre, Pa. Attachment for thread doubling and twisting machines. 1,451,771; Apr. 17.
Hatch, Frank E., Rutherford, N. J. Box-covering machine. 1,451,908; Apr. 17.
Hatfield, Andrew L., Hillside, N. J. Dishwashing machine. 1,452,156; Apr. 17.
Hatton, Thomas F., Indianapolis, Ind. Oil heater. 1,451,772; Apr. 17.
Hausman, George J., and A. J. Jones, Cincinnati, Ohio. Shifter for belts on cone pulleys. 1,452,044; Apr. 17.
Havener, Arthur R., Wayland, Mass., assignor to American Lacing Hook Co. Stop mechanism. 1,451,728; Apr. 17.
Hawley, Charles G., Chicago, Ill. Apparatus for furnace-slag disposal. 1,452,045; Apr. 17.
Hawley, Charles G., Chicago, Ill. Liquid-fuel furnace. 1,452,380; Apr. 17.
Heany, John A., New Haven, Conn., assignor to Rockbestos Products Corporation, New York, N. Y. Apparatus for making asbestos yarn. 1,451,824; Apr. 17.
Hebron, Frank H., et al. (See Hagerty, Robert J., assignor.)
Hecht, Joseph L., Davenport, assignor to G. W. French, J. L. Hecht, Davenport, Iowa, and W. H. Stackhouse, Springfield, Ohio, composing the Firm of French & Hecht. Making metal wheel hubs. 1,452,200; Apr. 17.
Helder, Henry J., Carroll, Iowa. Roller bearing. 1,451,825; Apr. 17.
Helsing, Raymond A., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Electrical discharge device. 1,452,339; Apr. 17.
Heller, Max, Berlin-Charlottenburg, Germany. Metal-scouring and ungreasing device. 1,451,981; Apr. 17.
Heller, Milton L., Brooklyn, N. Y. Waistband. 1,452,201; Apr. 17.
Hemingway, James T., Woonsocket, R. I. Cap-spindle washer. 1,452,425; Apr. 17.
Henry, Charles F., and J. M. Hulett, assignors to National Sewing Machine Company, Belvidere, Ill. Mechanical movement and base therefor. 1,452,273; Apr. 17.
Henry Furnace and Foundry Company, The. (See Novak, Joseph, assignor.)
Henry, Nelson B., Atlanta, Ga., assignor to The Murray Company, Dallas, Tex. Cooker. 1,451,729; Apr. 17.
Henry, Reeves, Forney, Tex. Cotton-chopping machine. 1,452,046; Apr. 17.
Henschel, Charles J., Brooklyn, N. Y. Indicator motor. 1,452,157; Apr. 17.
Hermann, Charles, Brooklyn, N. Y. Automobile signal device. 1,451,909; Apr. 17.
Herron, Wingo, and J. H. Jester, Augusta, Ga. Split hub head for cylinders for spinning frames, spoolers, and cylinders of like nature. 1,451,982; Apr. 17.
Herz, Alfred, Chicago, Ill., assignor to Electric Auxiliaries Company, Dover, Del. Dimming mechanism. 1,452,115; Apr. 17.
Hescock, Ethan N., Westfield, N. J., assignor to New Jersey Foundry and Machine Company. Portable elevator. 1,451,773; Apr. 17.
Heskett, Chris, Indianapolis, Ind. Nonpreheating oil burner. 1,451,950; Apr. 17.
Hess-Bright Manufacturing Company, The. (See Brunner, Harold E., assignor.)
Heue, Joseph H., Carroll, Iowa. Door and window buck. 1,452,116; Apr. 17.
Heyman, Laurence J. (See Neal, Robert A., assignor.)
Heys, John J., Lynn, Mass., assignor, by mesne assignments to United Shoe Machinery Corporation, Paterson, N. J. Method of and machine for measuring bodies. 1,451,730; Apr. 17.
Higdon, Robert W., Atlanta, Ga. Pipe joint. 1,451,731; Apr. 17.
Hildebrand, Walter S., Mount Union, Pa. Means for filling molds. 1,452,381; Apr. 17.
Hileman, George H. (See Leahy, F. C., and Hileman.)
Hill, Curtiss L., Dayton, Ohio. Refrigerating apparatus. 1,452,461; Apr. 17.
Hills, William F., Mountain View, and W. H. Chard, Palcines, Calif. Superheater. 1,452,382; Apr. 17.
Hipwood, George, New York, assignor to F. C. Mayle, Niagara Falls, N. Y. Fish-rod holder. 1,451,732; Apr. 17.
Hobart Manufacturing Company, The. (See Rataiczak, Thomas F., assignor.)
Hobbs, William N., Kensington, Kans. Device for weighing animals and for indicating dosage. 1,451,926; Apr. 17.
Hobson, Ota O., Vinton, Iowa. Resilient wheel. 1,451,827; Apr. 17.
Hodgson, Raymond, Freeport, N. Y. Safety plug for water-tube boilers. 1,452,047; Apr. 17.
Hoe, R., and Co. (See Zuckerman, Adolph M., assignor.)
Hoener, Frederick, assignor to W. Modra, St. Louis, Mo. Supporting bracket for automobile visors. 1,451,605; Apr. 17.
Hoffman, Rudolph, Kankakee, assignor to Sears, Roebuck and Co., Chicago, Ill. Portable oil heater. 1,451,910; Apr. 17.
Holbrook, John K., New York, N. Y., and M. De Francisco, Jersey City Heights, assignors to D. S. Pinnb, East Orange, N. J. Two-color photography. 1,451,774; Apr. 17.
Holmes, Edward. (See Lightner, A. D., and Holmes.)
Holmes, Elbridge R., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Dobby lever. 1,451,828; Apr. 17.
Holmes, Lora E., Moultrie, Ga. Convertible furniture. 1,452,117; Apr. 17.
Holworthy, Herbert F., Salop, England. Sparking plug for internal-combustion engines. 1,452,118; Apr. 17.
Horelick, Samuel, Pittsburgh, Pa., assignor to Pittsburgh Transformer Company. Transformer. 1,452,158; Apr. 17.
Horrocks, Williams A., Wilton, Me. Motor sleigh. 1,451,733; Apr. 17.
Hothersall, John M., Brooklyn, assignor to American Can Company, New York, N. Y. Vacuum hinge-cover container. 1,451,875; Apr. 17.
Houghton, Lewis T., Worcester, Mass. Quiller-wire holder. 1,452,119; Apr. 17.
Houseman, James A., York, Pa. Hedge trimmer. 1,452,402; Apr. 17.
Housekeeper, William G., assignor to Western Electric Company, Incorporated, New York, N. Y. Making leading-in conductors. 1,452,275; Apr. 17.
Housekeeper, William G., assignor to Western Electric Company, Incorporated, New York, N. Y. Pressure gauge. 1,452,274; Apr. 17.
Howard, Hasting P., Memphis, Tenn. Store ladder. 1,452,076; Apr. 17.
Howard, Otis W., assignor, by mesne assignments, to Moline Plow Company, Incorporated, Moline, Ill. Controlling mechanism for tractors. 1,452,296; Apr. 17.
Howard, Otis W. (See Shonts, L. C., and Howard.)
Howe, Thomas M., Louisville, Ky., assignor to F. A. Hardy & Company, Chicago, Ill. Ophthalmic mounting. 1,451,696; Apr. 17.
Howland, Henry P., and F. A. Wiley, Chicago, Ill., assignors, by mesne assignments, to International Harvester Company. Safety device for hot-blast stoves. 1,452,297; Apr. 17.
Hubbard, Gwendolen B. N. E., Hollywood, Calif. Educational toy. 1,452,340; Apr. 17.
Hubbard, William B., Smithboro, Ill. Spindle. 1,451,829; Apr. 17.
Huber, Frederick W., Riverside, Calif. Method and composition for cementing oil wells. 1,452,463; Apr. 17.
Huebner-Bleistein Patents Company. (See Huebner, William C., assignor.)
Huebner, William C., assignor to Huebner-Bleistein Patents Company, Buffalo, N. Y. Apparatus for positioning the printing plates on the plate holders of photographic-printing machines. 1,452,078; Apr. 17.
Huebner, William C., assignor to Huebner-Bleistein Patents Company, Buffalo, N. Y. Photographic-projection printing apparatus. 1,452,077; Apr. 17.
Huestis, Charles A., Elmhurst, N. Y. Tool holder. 1,452,241; Apr. 17.
Hulett, John M. (See Henry, C. F., and Hulettt.)
Hunt, Seth B., trustee. (See Mann, Matthew D., jr., assignor.)
Hurley, Roy T. (See Blodgett, G. R., Cheney, and Hurley.)
Husch, George S. (See Husch, S. B. and G. S.)
Husch, Sylvester B., New York, and G. S. Husch, Brooklyn, N. Y. Toothbrush. 1,451,775; Apr. 17.
Hutcheson, S. C., et al. (See Cleveland, Benjamin L., assignor.)
Hutchins, Frederick. (See Balls, W. L., and Hutchins.)
Ikerman, Frederick, et al. (See Ikerman, Wayne E., assignor.)
Ikerman, Wayne E., assignor of forty one-hundredths to B. Reinike and five one-hundredths to F. Ikerman, Long Beach, Miss. Aerial train. 1,451,830; Apr. 17.
Illinois Tool Works. (See Olson, Carl G., assignor.)
Independent Stove Co., The. (See Robinson, William V., assignor.)
Industrial Research Corporation. (See Green, Charles F., assignor.)

Ingersoll-Rand Company. (See Bayles, Lewis C., assignor.)
Ingersoll-Rand Company. (See Hansen, Charles C., assignor.)
International Harvester Company. (See Bozard, H. B., and Robinson, assignors.)
International Harvester Company. (See Charles, Edward S., assignor.)
International Harvester Company. (See Ford, Ralph L., assignor.)
International Harvester Company. (See Howland, H. P., and Wiley, assignors.)
International Harvester Company. (See Kaspari, Mathias J., assignor.)
International Harvester Company. (See Lindgren, Alexus C., assignor.)
International Harvester Company. (See Pearson, Charles, assignor.)
Irving, Joseph, Bisbee, Ariz. Leaching of copper ores and recovery of copper. 1,451,734; Apr. 17.
Irwin, Robert U., Oshawa, Ontario, Canada. Sharpening device. 1,451,831; Apr. 17.
Irwin, Roy H., Seattle, Wash. Building construction. 1,452,426; Apr. 17.
Isaacs, Sebright B., Kansas City, Mo. Spoon. 1,452,464; Apr. 17.
J. H. & F. A. Sells Company, The. (See Woodward, John H., assignor.)
Jacquemin, Victor, St. Louis, Mo. Combined paper clip and envelope opener. 1,452,341; Apr. 17.
Jaeger, Carl W., Westby, Wis. Time indicator. 1,451,983; Apr. 17.
Jaquette, Grantham, Philadelphia, Pa. Meat-slicing machine. 1,451,776; Apr. 17.
Jeanblanc, Abel F. (See Sandberg, S. A., and Jeanblanc.)
Jeffery-Dewitt Company. (See Davenport, Ransom W., assignor.)
Jeffres, Lynn, Greeley, Nebr. Cultivator attachment. 1,451,697; Apr. 17.
Jensen, Thomas P., Racine, Wis. Counter. 1,452,242; Apr. 17.
Jerdone, Francis, jr., assignor to The Willys-Overland Company, Toledo, Ohio. Automatic take-up device. 1,452,276; Apr. 17.
Jerome, George C., Chicago, Ill. Packaging rod packing in combustible material for unsweating the same. 1,452,159; Apr. 17.
Jesperson, Joseph. (See Parker, W. S., and Jesperson.)
Jester, Joseph H. (See Herron, W., and Jester.)
Jewett, John R., jr., Wood River, Nebr. Rural mail box. 1,451,876; Apr. 17.
Jobst, Gerhard, Wilmersdorf, Germany. Device for readily fastening together loose leaves of paper. 1,451,777; Apr. 17.
Johnson, Albion H. (See Halvorsen, O., and Johnson.)
Johnson, Kenneth S., Jersey City, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone substation set. 1,452,277; Apr. 17.
Johnson, Nels, Racine, Wis. Bicycle rim. 1,451,911; Apr. 17.
Johnson, Tomlinson F., jr., Atlanta, Ga. Manipulating stick for clamps, switches, etc., in electric distributing systems. 1,451,832; Apr. 17.
Johnston, Millard L., Utica, N. Y. Actuator for machine guns. 1,452,465; Apr. 17.
Jones, Albert J. (See Hausman, G. J., and Jones.)
Jones, Clayton M., Jamestown, N. Y. Wrench. 1,452,079; Apr. 17.
Jones, George C. (See Genter, A. L., and Jones.)
Jones, Grayson, Nashville, Tenn. Pipe bender or elbow former. 1,452,383; Apr. 17.
Jones, James T., Maidenhead, England. Resilient-tired wheel. 1,452,342; Apr. 17.
Jones, Russell M. (See Ross, W. H., Durgin, and Jones.)
Jones, William T., Omar, W. Va. Loader. 1,452,080; Apr. 17.
Jones, Willis O., Louisville, Ky. Chair desk. 1,452,343; Apr. 17.
Jordan, Francis R., Boone, Iowa. Glue container and brush holder. 1,451,984; Apr. 17.
Jory, William E., Martinez, Calif. Internal-combustion engine. 1,452,202; Apr. 17.
Juengling, Karl F., Lakewood, Ohio. Automatic stoker. 1,452,081; Apr. 17.
K-D Barrel & Hamper Co., The. (See Walker, Joseph L., assignor.)
K-D Lamp Company, The. (See Driemeyer, Edward W., assignor.)
Kaelble, Herman F., Egg Harbor City, N. J. Transmission lock. 1,452,203; Apr. 17.
Kahlow, Arthur, Mayville, Wis. Handle for traveling bags. 1,452,243; Apr. 17.
Kales Stamping Company. (See Eckermann, Leo A., assignor.)
Kaniuk, Michael, Boyerton, Pa. Dish or vessel cover. Des. 62,227; Apr. 17.
Kaniuk, Michael, Boyertown, Pa. Milk boiler. 1,452,344; Apr. 17.
Kaspari, Mathias J., Chicago, Ill., assignor, by mesne assignments, to International Harvester Company. Controlling mechanism for balling machines. 1,452,298; Apr. 17.
Katzick, Oscar S., Bridgeport, Conn. Ice-cream cone. Des. 62,220; Apr. 17.
Kauffmann, Ferdinand E., Rahway, N. J. Hat-clipping machine. 1,452,048; Apr. 17.
Kauffmann, Ferdinand E., Rahway, N. J. Machine for finishing the edges of hat brims. 1,452,049; Apr. 17.
Kaurich, John, Milwaukee, Wis. Accident-proof automobile fender. 1,451,833; Apr. 17.
Keith, Alexander E., Hinsdale, assignor, by mesne assignments, to Automatic Electric Company, Chicago, Ill. Telephone trunking system. 1,451,912; Apr. 17.
Kelber, Edward, Harriman, Pa. Windshield cleaner. 1,451,698; Apr. 17.
Keller, John W., and R. S. Congar, Lorimore, Iowa. Damper. 1,451,985; Apr. 17.
Kelley, George B. (See Scruby, George E., assignor.)
Kellogg, Carl A., Brooklyn, N. Y. Inking mechanism for printing presses. 1,452,050; Apr. 17.
Kellogg, Carl A., Brooklyn, N. Y. Inking mechanism for printing presses. 1,452,051; Apr. 17.
Kelly Springfield Tire Co. (See McClenathen, Robert, assignor.)
Kelly, Thomas C., et al. (See Hagerty, Robert J., assignor.)
Kelly, William M., assignor to American Type Founders Company, Jersey City, N. J. Printing press. 1,452,466; Apr. 17.
Kent, Orion E., Reed City, Mich. Mandrel. 1,451,699; Apr. 17.
Kepler, Irwin F., and A. A. Robb, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y. Tire structure for tractors. 1,452,345; Apr. 17.
Kettlitz, Edward W., New York, and G. Kuhn, St. Albans, N. Y. Automobile bumper. 1,452,427; Apr. 17.
Keystone Steel & Wire Company. (See Sommer, Henry G., assignor.)
Keystone Steel & Wire Company. (See Sommer, John, assignor.)
Kildow, Pickett G., Iowa Park, Tex. Sucker-rod-elevating device. 1,451,700; Apr. 17.
Kilpatrick, Robert L., Hempstead, Tex. Variable sign. 1,451,986; Apr. 17.
Kind, Hermann, Stapleton, N. Y. Display container and holder. 1,452,278; Apr. 17.
Kingswell, Percy N. (See Clews, C. E., and Beere, assignors.)
Kinney, Andrew S., Redwood Falls, Minn. Slot-closure mat for automobiles. 1,451,987; Apr. 17.
Kissendorfer, Karl, assignor to Waffenfabrik Mauser, A. G., Oberndorf-on-the-Neckar, Germany. Screw clamp. 1,452,384; Apr. 17.
Klein, Bernat M., and S. Wald, New York, N. Y. Shoestring fastener. 1,451,988; Apr. 17.
Kline, Clarie B. (See Bahr, August T. J., assignor.)
Kline, Everett C., assignor to The Laminated Metal Products Company, Cincinnati, Ohio. Lock and lock mounting. 1,452,471; Apr. 17.
Knowlton, Eugene W., assignor to John E. Smith's Sons Company, Buffalo, N. Y. Butter-blocking machine. 1,452,160; Apr. 17.
Kochler, John E., and R. Paul, Chicago, Ill. Advertising device. 1,451,877; Apr. 17.
Kokke, Evert, Duluth, Minn. Vehicle wheel. 1,451,913; Apr. 17.
Kollar, George J., Whiting, Ind. Bath device. 1,451,878; Apr. 17.
Kongsrud, Ole, Minneapolis, Minn. Brake head and shoe for railway cars. 1,451,914; Apr. 17.
Kreimer, William J., St. Louis, Mo. Air compressor. 1,451,834; Apr. 17.
Kreissl, Frank N., Chicago, Ill., assignor to American Optical Company, Southbridge, Mass. Ophthalmic mounting. 1,451,735; Apr. 17.
Kress, Claude W., New York, N. Y. Display window. 1,451,778; Apr. 17.
Kristofek, Frank J., assignor to Brown & Bigelow, St. Paul, Minn. Pen or pencil case. Des. 62,221; Apr. 17.
Kryzanowsky, Constant J. (See Taylor, Samuel W., assignor.)
Kuhn, George. (See Ketilitz, E. W., and Kuhn.)
Kuenneth, George W., assignor, by mesne assignments, to J. Kuenneth Paterson, N. J. Tension-controlling means for beaming machines. 1,452,161; Apr. 17.
Kuenneth, Jeanette. (See Kuenneth, George W., assignor.)
Kupetz, Adolph G., New Rochelle, assignor to Underwood Computing Machine Company, New York, N. Y. Combined typewriting and computing machine. 1,452,162; Apr. 17.
Kuster, Charles E., administrator. (See Kuster, Frederick E., assignor.)
Kuster, Frederick E., deceased, Evansville, Ind.; C. E. Kuster, administrator. Tray-making machine. 1,452,346; Apr. 17.
Kyle, George B., assignor to The Measuregraph Company, St. Louis, Mo. Fabric measuring and cost computing machine. 1,452,279; Apr. 17.
La Belle, William E., St. Paul, assignor of one-half to T. Schadegg, Minneapolis, Minn. Folding veneer container. 1,451,980; Apr. 17.
La Chapelle, Frank, Pittsfield, Mass. Roll cleaner. 1,451,990; Apr. 17.
Lachman, Laurence S., and E. Fulda, New York, N. Y. Reel. 1,451,835; Apr. 17.
Lacke, William A., Chicago, Ill. Mechanism for stamping large hot-metal sheets. 1,451,879; Apr. 17.

Ladd-Davis, Clarence, assignor to himself and J. A. Taylor, joint trustees, Brooklyn, N. Y. Automatic fire extinguisher. 1,451,915; Apr. 17.

Ladd-Davis, Clarence, assignor to himself and J. A. Taylor, joint trustees, Brooklyn, N. Y. Automatic fire extinguisher for distributing aqueouslike fluent material. 1,451,916; Apr. 17.

Lamb, Richard, deceased, New York, N. Y.; S. E. Lamb, executrix, assignor to S. E. Lamb. Compensating filler for block paving. 1,452,120; Apr. 17.

Lamb, Sarah E. (See Lamb, Richard, assignor.)

Lamb, Sarah E., executrix. (See Lamb, Richard.)

Lambert, Byron J., Iowa City, Iowa. Grand-stand construction. 1,452,467; Apr. 17.

Laminated Metal Products Company, The. (See Kline, Everett C., assignor.)

Landroth, Henry M. (See Sterner, L. H., Landroth, and Sterner.)

Langdon-Meyer Laboratories. (See Meyer, Emanuel M., assignor.)

Lapham, Ralph E., Oakland, Calif. Centrifugal separator. 1,451,779; Apr. 17.

Larned, William A., Summit, N. J., assignor to The Dayton Steel Racquet Company, Dayton, Ohio. Racket for tennis and similar games. 1,451,836; Apr. 17.

Larsh, Everett P., assignor, by mesne assignments, to The Duro Pump and Manufacturing Company, Dayton, Ohio. Lubricating apparatus. 1,451,701; Apr. 17.

Larsson, Gustaf H., Svedala, Sweden. Adjustable tool holder. 1,452,082; Apr. 17.

Laska, August L., and A. Zitscher, Offenbach-on-the-Main, assignors to Chemische Fabrik Griesheim-Elektron, Frankfort-on-the-Main, Germany. Black azo dyestuffs and making same. 1,452,083; Apr. 17.

Lauer, Karl, Essen, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Internal gauge. 1,451,736; Apr. 17.

Laughery, Mrs. E. A. (See Schultz, Edward, assignor.)

Leahy, Frank C., and G. H. Hileman, Detroit, Mich. Antiseptic container. 1,452,299; Apr. 17.

Lee, Leif, Youngstown, Ohio. Roll-balancing mechanism. 1,452,347; Apr. 17.

Lee, Ralston T., Marietta, Ohio. Drive-wheel rim. 1,451,991; Apr. 17.

Lee, Ross, Chaffee, Mo. Tool for inserting piston rings. 1,452,468; Apr. 17.

Lee, Thomas L., assignor to North East Electric Company, Rochester, N. Y. Test bench. 1,451,992; Apr. 17.

Lehmann, Karl A., Essen, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Case-shift mechanism. 1,451,737; Apr. 17.

Leighton, George A., Roslindale, Mass., assignor to American Can Company, New York, N. Y. Blacking-box cover. 1,451,702; Apr. 17.

Leisge, William L., Atkinson, Nebr. Meter for milking apparatus. 1,451,738; Apr. 17.

Leissner, Harry F., Sodertalje, Sweden. Fuel-supply pump for internal-combustion engines. 1,452,428; Apr. 17.

Lemelin, George T., assignor of one-half to E. A. Menard, Springfield, Mass. Spring oiler. 1,452,429; Apr. 17.

Levy, Arthur B. (See Singer, J. B., and Levy.)

Levy, Henri G., San Francisco, Calif. Curling-iron heater. 1,452,163; Apr. 17.

Lewis, Frank M., London, England. Apparatus for cutting toothed gears. 1,452,121; Apr. 17.

Lightfoot, Edwin N., New York, N. Y., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Electric heating appliance. 1,451,880; Apr. 17.

Lightner, Arthur D., and E. Holmes, assignor to The Willys-Overland Company, Toledo, Ohio. Elevating truck. 1,452,300; Apr. 17.

Lindgren, Alexus C., Evanston, Ill., assignor to International Harvester Company. Sulky plow. 1,452,301; Apr. 17.

Lipscomb, May B. (See Allen, Broadus S., assignor.)

Lloyd, Richard A. (See Miller, D. J. G., and Lloyd.)

Lockhart, Harold J., assignor to The Parkersburg Rig & Reel Company, Parkersburg, W. Va. Control mechanism for well-drilling machines. 1,452,244; Apr. 17.

Locomobile Company, The. (See Roos, Delmar G., assignor.)

Long Furniture Company. (See Weeks, John B., assignor.)

Loomis, Evarts G., assignor to St. Mungo Manufacturing Company of America, Newark, N. J. Ball-winding machine. 1,452,469; Apr. 17.

Loven, Carl, Portland, Oreg. Stocking. 1,452,302; Apr. 17.

Lucey Manufacturing Corporation. (See Harris, Hu M., assignor.)

Luckett, William S., Chestnut Hill, Pa. Golfing outfit. 1,452,084; Apr. 17.

Ludlow, George M., assignor to Sanitary Scale Company, Chicago, Ill. Computing scale with interchangable charts. 1,451,703; Apr. 17.

Luebker, Henry E., Plum City, Wis. Milking stool. 1,452,303; Apr. 17.

Luetcher, Oliver P., Peru, Ill. Separator for gaseous fluids. 1,452,204; Apr. 17.

Lumen Bearing Company. (See Patch, Nathaniel K. B., assignor.)

Lutkins, Beatrice C., Montclair, N. J. Earring. Des. 62,222; Apr. 17.

Lyon, George A., Philadelphia, Pa. Separable multiple unit bumper package. 1,451,780; Apr. 17.

Lyon, George A., Philadelphia, Pa. Bumper package. 1,451,781; Apr. 17.

McCann, George F., Jersey City, N. J. Doll. Des. 62,223; Apr. 17.

McCauley, James, New York, N. Y. Combined gas heat and light burner. 1,451,951; Apr. 17.

McClatchie, Stanley, Cambridge, Mass., assignor to The Connecticut Electric Manufacturing Company, Bridgeport, Conn. Attachment plug. 1,451,704; Apr. 17.

McClenathen, Robert, Cuyahoga Falls, Ohio, assignor to Kelly Springfield Tire Co. Bead-making machine. 1,451,837; Apr. 17.

McConnel, William N., Milner, Idaho. Recorder. 1,452,122; Apr. 17.

McCormack, Edward J., San Francisco, Calif. Collapsible electric heater. 1,452,304; Apr. 17.

McCray, Cuge L., Norton, Va. Rail fastener. 1,451,838; Apr. 17.

McCrudden, John C. R., Hurstville, near Sydney, New South Wales, Australia. Machine gun. 1,452,123; Apr. 17.

McFarland, James, Tilin, Tex. Train stop. 1,451,952; Apr. 17.

McGrath, Hiram, McConnelsville, Ohio. Fan attachment for swings. 1,452,385; Apr. 17.

McLellan, Charles, Sioux City, Iowa. Rotary toothbrush. 1,451,993; Apr. 17.

McMullen, Joseph B., Catonsville, Md. Adjustable supporting bracket. 1,451,881; Apr. 17.

Macdonald, David B., Davenport, Iowa. Match box. 1,451,882; Apr. 17.

Macdonald, David B., Davenport, Iowa. Match box. 1,451,953; Apr. 17.

Machol, David J., West New Brighton, N. J. Dental syringe. 1,452,085; Apr. 17.

Mackenzie, Daniel, Pomona, Calif. Device for preventing frost in orchards. 1,451,994; Apr. 17.

Maclaren, James G., Mamaroneck, N. Y. Pneumatic-dispatch system. 1,452,280; Apr. 17.

MacMillan, Alexander. (See Wright, Edward, assignor.)

Madsen, Peder C., Granada, Minn. Post puller. 1,452,205; Apr. 17.

Madsen, Sern, Clinton, Iowa. Cutting device for wood-working tools. 1,451,995; Apr. 17.

Maehler, Arthur, Chicago, Ill. Means for ventilating drying ovens. 1,451,883; Apr. 17.

Magee, William H., Wheeling, W. Va. Glass dish. Des. 62,228; Apr. 17.

Magee, William H., Wheeling, W. Va. Fruit dish. Des. 62,229; Apr. 17.

Maguin, Abel, Paris, France, assignor to Societe Nouvelle des Etablissements Alfred Maguin, Aubervilliers, Seine, France. Drum root cutter with a horizontal axis. 1,452,124; Apr. 17.

Mahony, William F., Washington, D. C. Eye shade. 1,452,305; Apr. 17.

Maillard, Joseph E. B., Coulombs, France. Powder puff. 1,452,470; Apr. 17.

Mandeville, Paul, Chicago, Ill. Storage building. 1,452,306; Apr. 17.

Manhattan Electrical Supply Co. Inc. (See Baisley, Charles T., assignor.)

Manifold Impressions Corporation. (See Cossitt, Malcolm L., assignor.)

Mann, Matthew D., jr., Roselle, N. J., assignor, by mesne assignments, to S. B. Hunt, trustee, Mount Kisco, N. Y. Means for dehydrating alcoholic liquids. 1,452,206; Apr. 17.

Margelis, Anthony, Grand Rapids, Mich. Furniture clamp. 1,452,164; Apr. 17.

Maries, Francis G., Kingston-on-Thames, England. Manufacture of solid plastic material from casein. 1,452,086; Apr. 17.

Marino, Quintin, Hampstead, London, England. Metallizing articles. 1,452,281; Apr. 17.

Mark Patent Company. (See Mark, W., and Parker, assignors.)

Mark, William, Wetheral, near Carlisle, and F. J. Parker, Carlisle, England, assignors to The Mark Patent Company, Limited, Weston, Bath, England. Trap for mice, rats, or other vermin. 1,452,087; Apr. 17.

Marshall, Stanmore P., Cincinnati, Ohio, assignor to H. B. Byrd Manufacturing Company, Incorporated, Washington, D. C. Apparatus for casting articles of metal. 1,452,245; Apr. 17.

Marshall, Stanmore P., assignor to H. B. Byrd Manufacturing Company, Incorporated, Washington, D. C. Art of and apparatus for casting metals. 1,452,246; Apr. 17.

Martin, Elmer R., assignor to Elgin Street Sweeper Co., Elgin, Ill. Gutter-broom arrangement for street sweepers. 1,452,307; Apr. 17.

Martin, Frank J., Turners Falls, Mass., assignor to Martin Machine Company, Inc. Tool holder. 1,451,705; Apr. 17.

Martin Machine Company. (See Martin, Frank J., assignor.)

Mathies, John E. H. (See Barlow, H., and Mathies.)

Matoushek, Frank J., Prairie du Sac, Wis. Aeroplane safety appliance. 1,452,348; Apr. 17.

Mayberry, Thomas A., Los Angeles, assignor of four-fifths to W. E. Winfield, La Verne, and one-fifth to M. Thompson, Pomona, Calif. Mold for making cementitious products. 1,452,247; Apr. 17.

Mayes, John, Wichita, Kans. Apparatus for refining crude oil. 1,451,739; Apr. 17.

Mayle, Francis C. (See Hipwood, George, assignor.)

Measuregraph Company, The. (See Kyle, George B., assignor.)

Meehan, G. F., et al. (See Cleveland, Benjamin L., assignor.)

Mellott, Howard S., Morenci, Mich., assignor to By-Products Recovery Company, Toledo, Ohio. Evaporating apparatus. 1,451,839; Apr. 17.

Memo Manufacturing Company. (See Platz, Henry T., assignor.)

Menard, Edward A. (See Lemelin, George T., assignor.)

Mercer, Charles G., New York, N. Y. Automobile license box. 1,452,430; Apr. 17.

Meredith, Wynn, Alameda, assignor to Petroleum Rectifying Company, San Francisco, Calif. Dehydrator. 1,452,207; Apr. 17.

Merkel, George H., Bluefield, W. Va. Combined piano bench and music cabinet. 1,451,996; Apr. 17.

Meyer, Emanuel M., assignor to Langdon-Meyer Laboratories, Cincinnati, Ohio. Refrigerator. 1,451,917; Apr. 17.

Meyer, William C., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Tension device. 1,451,918; Apr. 17.

Meyer, William C., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Tension device. 1,451,919; Apr. 17.

Michael, John B., Selma, Ala. Locomotive-wheel-hub liner. 1,452,165; Apr. 17.

Michell, Anthony G. M., Melbourne, Victoria, Australia. Hydraulic mechanism for the transmission of power. 1,451,997; Apr. 17.

Milarch, Alfred E., assignor to I. A. Milarch, Atlanta, Ga. Automobile transmission. 1,452,248; Apr. 17.

Milarch, Isabel A. (See Milarch, Alfred E., assignor.)

Miles, Frank J. M., assignor to Cheramy, Inc., New York, N. Y. Holders for compacts. 1,451,740; Apr. 17.

Milkie, George A., Brooklyn, N. Y. Automobile pedal attachment. 1,452,431; Apr. 17.

Miller, Anthony, Burlingame, Calif. Cooking device. 1,452,208; Apr. 17.

Miller, Dana O., Reading, Mass. Combination heater. 1,452,249; Apr. 17.

Miller, Donald J. G., Bootle, and R. A. Lloyd, Liverpool, England. Grinding or crushing machine. 1,452,088; Apr. 17.

Miller, Ewell B., Cicero, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Material-blanking operation. 1,452,308; Apr. 17.

Miller, James F., Minden, La. Resilient wheel. 1,451,706; Apr. 17.

Miller, John, jr., Beloit, Wis., assignor to Charles H. Besly & Company, Chicago, Ill. Disk grinder. 1,452,209; Apr. 17.

Miller, Paul, Philadelphia, Pa. Expanding reamer. 1,451,741; Apr. 17.

Miller, Paul, Philadelphia, Pa. Expanding reamer. 1,451,742; Apr. 17.

Miller, Vernon J., East Orange, N. J. Material building unit. 1,452,432; Apr. 17.

Miller, William J., Swissvale, Pa. Process and apparatus for feeding glass. 1,451,707; Apr. 17.

Milton, John K., Chicago, Ill. Manually-operated boat. 1,452,433; Apr. 17.

Mimmo Toy Company, Inc. (See Goolman, Fred R., assignor.)

Mitchell, Howard B., Tacoma, Wash. Assembling tool for interrupter arms. 1,451,708; Apr. 17.

Modra, William. (See Hoener, Frederick, assignor.)

Moen, Thorey I., Beloit, Wis. Ventilator. 1,451,884; Apr. 17.

Moline Plow Company. (See Howard, Otis W., assignor.)

Moline Plow Company. (See Shonts, L. C., and Howard, assignors.)

Monrath, Gustav, New York, N. Y., assignor, by mesne assignments, to The Barber Asphalt Paving Company, Philadelphia, Pa. Asphalt composition. 1,452,310; Apr. 17.

Monrath, Gustav, New York, N. Y., assignor, by mesne assignments, to The Barber Asphalt Paving Company, Philadelphia, Pa. Asphalt structure and composition. 1,452,309; Apr. 17.

Moore, Lawrence L., and F. W. Radcliffe, Los Angeles, Calif.; said Moore assignor to said Radcliffe. Tag. 1,452,250; Apr. 17.

Moreno, Manuel J., San Francisco, Calif. Shoe-polishing device. 1,452,386; Apr. 17.

Morley, Denys W., Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Marking machine. 1,451,709; Apr. 17.

Morris, Edward D., Chicago, Ill. Seam presser for shoe uppers. 1,452,251; Apr. 17.

Morton, Dudley J., Milford, Conn. Statuette. Des. 62,230; Apr. 17.

Mukai, Kichimatsu, San Francisco, Calif. Wood-splitting machine. 1,452,387; Apr. 17.

Müller, Joseph, Dayton, N. J.. Automatic safety expansion valve. 1,452,252; Apr. 17.

Murray Company, The. (See Henry, Nelson R., assignor.)

Murray, Thomas E. (See Rypinski, Albert B., assignor.)

Myers, Edmund T. D., jr., Richmond, Va. Locomotive combustion regulator. 1,452,210; Apr. 17.

Myers, William L., Industry, Ill. Latch. 1,452,211; Apr. 17.

Nalle, Charles R., Richmond, Va. Detachable button. 1,452,052; Apr. 17.

National Brass Manufacturing Company, The. (See Wray, Charles F., assignor.)

National Carbon Company. (See Wells, Alfred A., assignor.)

National Company. (See Balcke, Walter H., assignor.)

National Company. (See Ready, William A., assignor.)

National Sewing Machine Company. (See Henry, C. F., and Hulett, assignors.)

Neal, Robert A., assignor of one-half to L. J. Heyman, Lexington, Ky. Brake-actuating mechanism. 1,452,212; Apr. 17.

Nell, Arthur L., Brooklyn, N. Y. Combination furniture. 1,452,434; Apr. 17.

Nelson, Andrew, Milwaukee, Wis. Extension manifold. 1,452,213; Apr. 17.

Nelson, John. (See Balcker, Marten, assignor.)

Nelson, Martin L., assignor to Automatic Electric Company, Chicago, Ill. Private-branch-exchange system. 1,451,885; Apr. 17.

Nelson, Martin L., assignor to Automatic Electric Company, Chicago, Ill. Signaling apparatus for telephone systems. 1,451,886; Apr. 17.

Neubauer, Curt, Mecklenburg, Germany. Process of and device for drawing bellied objects of sheet metal. 1,451,998; Apr. 17.

Nevitt, Henry G., Tampico, Mexico. Liquid and vapor separator. 1,452,253; Apr. 17.

New Jersey Foundry and Machine Company. (See Hescock, Ethan N., assignor.)

New Jersey Zinc Company, The. (See Breyer, F. G., and Finkeldey, assignors.)

Nicholson, Frank H., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,452,214; Apr. 17.

Niese, Henry E., Morristown, N. J., assignor to The American Sugar Refining Company, New York, N. Y. Apparatus for drying char. 1,452,166; Apr. 17.

Nitsch, Charles H., and W. A. Weightman, Logan, Philadelphia, and W. H. Streeper, Frankford, Philadelphia, Pa., assignors to Stokes & Smith Company, Summerdale, Philadelphia, Pa. Stay or tab applying machine. 1,451,782; Apr. 17.

Noack, Carl O., Stamford, Conn., assignor to The Hammond Typewriter Company. Folding typewriter. 1,452,254; Apr. 17.

Nolan, Francis A., St. Paul, Minn. Resilient tread for footwear. 1,452,089; Apr. 17.

Norsk Hydro-Elektrisk Kvaelstofaktieselskab. (See Cederberg, Ivar W., assignor.)

North East Electric Company. (See Lee, Thomas L., assignor.)

Novak, Joseph, assignor to The Henry Furnace and Foundry Company, Cleveland, Ohio. Hot-air conduit. 1,451,887; Apr. 17.

Novotny, Emil E., Logan, Philadelphia, assignor to J. S. Stokes, Philadelphia, Pa. Molded sound-reproduction article. 1,451,783; Apr. 17.

Novotny, Rudolf, Portage, Pa. Arch support for mines. 1,451,840; Apr. 17.

Null, Jesse, Arcadia, Calif. Chicken feeder. 1,452,215; Apr. 17.

Nussbaum, Bert A. (See Spencer, Madison A., assignor.)

Nutt, Buell W., assignor to The Safety Equipment Service Company, Cleveland, Ohio. Lantern support. 1,451,920; Apr. 17.

Oberley, Charles G., and R. Grignon, Munising, Mich. Friction clutch. 1,452,349; Apr. 17.

O'Harrow, Fred, Rockwell, Iowa. Pulley-shield device. 1,451,743; Apr. 17.

O'Kelly, James, Onconta, N. Y. Combination lock. 1,451,954; Apr. 17.

Olin, Louis B., Chicago, Ill. Refrigerator vehicle. 1,452,090; Apr. 17.

Oliver, Ralph W., Toledo, Ohio. Powder box. 1,451,955; Apr. 17.

Olsen, Albert A., Ranger, Tex. Oil-well pump. 1,451,784; Apr. 17.

Olson, Carl G., assignor to Illinois Tool Works, Chicago, Ill. Mechanism for testing gear-cutting machines. 1,451,921; Apr. 17.

Ostenberg, Pontus, San Jose, Calif. Pump mechanism, 1,452,091; Apr. 17.

Owensboro Ditcher & Grader Company. (See Dever, Henry L., assignor.)

Pacific Car and Foundry Company. (See Chriswell, Frederick W., assignor.)

Pacific Car and Foundry Company. (See Coats, Roy N., assignor.)

Paquette, Napoléon, Detroit, Mich., assignor of one-fourth to M. C. Sampson, Ottawa, Kans. Lubricator. 1,451,710; Apr. 17.

Paranteau, George R., Oxnard, Calif. Fruit-pitting machine. Re15,579; Apr. 17.

Parker, Charles, Company, The. (See Walker, P. H. D., and Turner, assignors.)

Parker, Frederic J. (See Mark, W., and Parker.)

Parker, John S., Earlville, N. Y. Paper or cardboard berry basket. 1,451,888; Apr. 17.
Parker, William S., and J. Jesperson, assignors to Burson Knitting Company, Rockford, Ill. Fashioning indices and knitting the same. 1,451,841; Apr. 17.
Parkersburg Rig & Reel Company, The. (See Lockhart, Harold J., assignor.)
Parkhurst, Charles E., Somerville, Mass. Heating device for liquids. 1,452,311; Apr. 17.
Parrish, Rial T. (See Gingerick, Kent S., assignor.)
Patch, Nathaniel K. B., assignor to Lumen Bearing Company, Buffalo, N. Y. Apparatus for casting metals. 1,452,480; Apr. 17.
Patterson, Harry R., assignor to The Electric Auto-Lite Company, Toledo, Ohio. Ignition coil. 1,452,167; Apr. 17.
Paul, Raymond. (See Koehler, J. E., and Paul.)
Payman, Joseph B. (See Baddiley, J., Payman, and Bainbridge.)
Payne, Arlie, Paragould, Ark. Camera attachment. 1,451,956; Apr. 17.
Payson, John H., Rockford, Ill. Razor stropper. 1,451,844; Apr. 17.
Pearson, Charles, Chicago, Ill., assignor to International Harvester Company. Controlling mechanism for harvesters. 1,452,282; Apr. 17.
Peck, Stow & Wilcox Co., The. (See Blot, Lucien P., assignor.)
Peffer, Lloyd T. and T. E., Waukesha, Wis. Tire boot. 1,421,712; Apr. 17.
Peffer, Thomas E. (See Peffer, Lloyd T. and T. E.)
Peirce, William B., North Tonawanda, N. Y. Self-feeding machine and method. 1,452,053; Apr. 17.
People of the United States (See Ross, W. H., Durgin, and Jones, assignors.)
Perna, Joseph, Philadelphia, Pa. Duplex sheet-pile driver. 1,451,922; Apr. 17.
Perry, George R., Washington, D. C. Furniture-leveling device. 1,451,909; Apr. 17.
Peterka, James V., Indiana Harbor, Ind. Regenerator. 1,452,216; Apr. 17.
Petroleum Heat and Power Company. (See Brown, Francis H., assignor.)
Petroleum Rectifying Company. (See Meredith, Wynn, assignor.)
Pfeiffer, Fred B., Akron, Ohio. Tire. 1,452,217; Apr. 17.
Pieper, Nicolas, Liege, Belgium. Disjointing device for automatic pistols. 1,452,000; Apr. 17.
Pierce, Winslow S., jr., Berville, N. Y. Velocity indicator. 1,451,923; Apr. 17.
Pierson, William D., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn. Die holder. 1,452,312; Apr. 17.
Pittman, Reinhart W., New York, N. Y. Magazine for slug machines. 1,451,842; Apr. 17.
Pittsburgh Transformer Company. (See Horelick, Samuel, assignor.)
Platt Brothers and Company. (See Wilkinson, Henry, assignor.)
Platz, Henry T., Ashland, Ohio, assignor to Memo Manufacturing Company, Detroit, Mich. Desk memorandum pad. 1,452,092; Apr. 17.
Plauson, Hermann, Hamburg, Germany. Manufacture of resinous condensation products. 1,451,843; Apr. 17.
Plehaty, Carl W., assignor of one-half to F. R. White, White Plains, N. Y. Controller for motors. 1,452,472; Apr. 17.
Plumb, D. S. (See Holbrook, J. K., and De Francisco, assignors.)
Pollack, Israel, Dorchester, Mass. Cleansing. 1,452,093; Apr. 17.
Pomeroy, Ralph E. H., Canton, Ohio. Pulverizing mill. 1,452,218; Apr. 17.
Pomona Products Company (See Bostrom, Earust A., assignor.)
Pont, José Fons, Barcelona, Spain. Internal-combustion engine. 1,452,125; Apr. 17.
Porter, Clovis A., and O. C. Brewster, Casper, Wyo., assignors of one-half to P. Sullivan and G. R. Hagens, Casper, Wyo. Process and apparatus for centrifugal separation. 1,452,388; Apr. 17.
Powell, John R., assignor to Bausch & Lomb Optical Company, Rochester, N. Y. Apparatus for the manufacture of bifocal lens blanks. 1,451,957; Apr. 17.
Pozdech, Adolph F., Newark, N. J. Enamel composition. 1,452,219; Apr. 17.
Pratt, William B., Wellesley, assignor to E. H. Clapp Rubber Company, Boston, Mass. Vulcanized-rubber solution and producing it. 1,451,711; Apr. 17.
Pray, Thomas E., assignor to Goodman Manufacturing Company, Chicago, Ill. Locomotive. 1,451,889; Apr. 17.
Price, John C., Olcott, W. Va. Wheel grinding and truing machine. 1,451,958; Apr. 17.
Price, Mitchell D., Miami, Fla. Garter. 1,452,001; Apr. 17.
Priebe, Herman C., Blue Island, Ill. Draft gear. 1,451,959; Apr. 17.
Priebe, Herman C., Blue Island, Ill. Car door. 1,451,960; Apr. 17.
Priebe, Herman C., Blue Island, Ill. Draft gear. 1,451,961; Apr. 17.
Propst, Christy A., Longview, Tex. Spark plug. 1,452,054; Apr. 17.
Proulx, Charles A., Woonsocket, R. I. Spindle. 1,451,744; Apr. 17.
Pullen, Frank L., Oldtown, Me. Paper waxing and sizing composition. 1,452,389; Apr. 17.
Pullin, Cyril G., Isleworth, England. Exhaust silencer for internal-combustion engines. 1,452,435; Apr. 17.
Pullin, Cyril G., Isleworth, England. Front fork for velocipedes. 1,452,436; Apr. 17.
Pursel, Marshall A., West Haven, Conn. Calculating device. 1,451,890; Apr. 17.
Pyle-National Company, The. (See Dake, Charles W., assignor.)
Radcliffe, Frederick W. (See Moore, L. L., and Radcliffe.)
Rasmussen, Hans E., Graettinger, Iowa. Trousers holder and press. 1,452,437; Apr. 17.
Rataiczak, Thomas F., assignor to The Hobart Manufacturing Company, Troy, Ohio. Meat chopper and making same. 1,451,891; Apr. 17.
Ready, William A., Brookline, assignor to National Company, Cambridge, Mass. Pressure gauge. 1,452,126; Apr. 71.
Rector, Harlan S., Chicago, Ill. Pneumatic tire. 1,452,168; Apr. 17.
Rehn, Albert B., Philadelphia, Pa. Phonograph reproducer. 1,452,094; Apr. 17.
Reidenbach, Herman O., assignor to L. A. Young Industries, Inc., Detroit, Mich. Spring structure. 1,451,924; Apr. 17.
Reimche, George W., Moorhead, Minn. Articulator. 1,451,892; Apr. 17.
Reinike, Bernard, et al. (See Ikerman, Wayne E., assignor.)
Reiter, Gustaf A., San Diego, Calif. Safety razor. 1,452,002; Apr. 17.
Reizenstein, Emile, Brookline, Mass. Pressing device. 1,452,095; Apr. 17.
Rhein, Lloyd R., assignor to C. R. Wilson Body Company, Detroit, Mich. Vehicle door lock. 1,451,785; Apr. 17.
Rhoades, Alonzo E., assignor to Draper Corporation, Hopedale, Mass. Cushion stop for picker sticks. 1,451,845; Apr. 17.
Richardson, De Soto E., Riverside, Wash. Implement support and carriage. 1,452,003; Apr. 17.
Rise, Carl H., Rapid City, S. Dak. Device for straightening photographic prints. 1,452,438; Apr. 17.
Rissmann, Paul, assignor to Fisher Body Corporation, Detroit, Mich. Machine for stitching covers on cores. 1,451,962; Apr. 17.
Ritter, Elmer R., assignor to S. A. Wuestefeld, Cincinnati, Ohio. Attachable brake. 1,452,439; Apr. 17.
Robb, Arthur A. (See Kepler, I. F., and Robb.)
Robbins, F. M., et al. (See Cleveland, Benjamin L., assignor.)
Robinson, Charles O., Bismarck, N. Dak. Collapsible supporting device. 1,451,846; Apr. 17.
Robinson, Charles W. (See Bozard, H. B., and Robinson.)
Robinson, William V., assignor to The Independent Stove Co., Owosso, Mich. Gas burner. 1,452,440; Apr. 17.
Rockbestos Products Corporation. (See Heany, John A., assignor.)
Rodda, Bertie N. (See Rodda, Thomas H. and B. N.)
Rodda, Thomas H., Joslin, and B. N. Rodda, Torrensville, South Australia, Australia. Auxiliary spring or shock absorber for vehicles, particularly motor vehicles. 1,452,441; Apr. 17.
Rodenhizer, Bernard C., Lynchburg, Va. Water-gauge glass for steam boilers. 1,452,390; Apr. 17.
Rodrigues, Manuel R., Brooklyn, N. Y. Cartridge fuse. 1,452,255; Apr. 17.
Roessel, Louis. (See Collins, C. S., and Roessel.)
Roos, Delmar G., assignor, by mesne assignments, to the Locomobile Company, Bridgeport, Conn. Ventilating system. 1,452,313; Apr. 17.
Rosenbluth, Edwin M. (See Scoville, Royal L., assignor.)
Ross, Harry B., Denver, Colo. Washing machine. 1,452,097; Apr. 17.
Ross, Harry B., assignor to the Fjord Company, Denver, Colo. Washing and drying machine. 1,452,096; Apr. 17.
Ross, William H., C. B. Durgin, and R. M. Jones, Washington, D. C.; dedicated, by mesne assignments, to the People of the United States. Purification of commercial phosphoric acid by crystallization. 1,451,786; Apr. 17.
Rotary Spreader. (See Bailey, James G., assignor.)
Roush, Eli S., Lynchburg, Ohio. Cultivator. 1,452,442; Apr. 17.
Rowe, William H., Jacksonville, Fla. Electrically heated and controlled steam boiler. 1,451,847; Apr. 17.
Rowley, Edward G., assignor of one-half to Sun Typewriter Company, Newark, N. J. Percolator. 1,452,256; Apr. 17.
Ruff, William J., Quincy, Ill. Live-bait bucket. 1,451,925; Apr. 17.
Ruggles, Gilbert W., Youngstown, Ohio. Extension grate apparatus. 1,452,314; Apr. 17.
Rupert, Louis, Decatur, Ill. Closure. 1,452,391; Apr. 17.
Russell, Robert C., Pittsburgh, Pa. Index. Re15,582; Apr. 17.

Rutter, John, Edmonton, Alberta, Canada. Apparatus for delivering messages to moving trains and the like. 1,452,443; Apr. 17.
Ryan, Frederick J., Toronto, Ontario, Canada. Auto signal. 1,452,392; Apr. 17.
Ryan, Walter D., Schenectady, N. Y. Headlight. 1,451,983; Apr. 17.
Rypinski, Albert B., Laurelton, N. Y., assignor to T. E. Murray, Long Island, N. Y. Electric riveting machine and process. 1,451,894; Apr. 17.
Safety Equipment Service Company, The. (See Nutt, Buell W., assignor.)
Saffert, George J., New Ulm, Minn. Concrete door-frame construction. 1,451,713; Apr. 17.
Saffert, George J., New Ulm, Minn. Means for molding concrete blocks. 1,451,714; Apr. 17.
Sampson, Archibald T., assignor to Sampson Axcess System, Inc., Lynn, Mass. System of electrical construction. 1,452,169; Apr. 17.
Sampson Axcess System, Inc. (See Sampson, Archibald T., assignor.)
Sampson, May C. (See Paquette, Napoléon, assignor.)
Samuell, Charles A., Hedgesville, Mont. Well tool. 1,452,444; Apr. 17.
Sandberg, Swan A., and A. F. Jeanblanc, Lee Center, Ill. Lever control for clutch pedals. 1,452,170; Apr. 17.
Sandholm, John. (See Tommasi, C., Sandholm, Daneel, and Busch.)
Saudlands, James, Toronto, Ontario, Canada. Automatic valves. 1,451,895; Apr. 17.
Sanitary Scale Company. (See Ludlow, George M., assignor.)
Sardeson, Robert, Minneapolis, Minn. Relining motor-vehicle brake bands. 1,452,475; Apr. 17.
Sargent, Allan C., Westford, Mass., assignor to C. G. Sargent's Sons Corporation. Rake tooth for carbonizing acid bowls. 1,451,926; Apr. 17.
Sargent's Sons Corporation. (See Sargent, Allan C., assignor.)
Savage, Edwin H., Cleveland, assignor to The Cleveland Tractor Company, Euclid, Ohio. Track-laying tractor. 1,452,171; Apr. 17.
Savidge, Clinton, L., Callaway, Nebr. Valve coupling for tubular wells. 1,452,004; Apr. 17.
Schact, Gustav A., Plainville, Ohio. Transmission mechanism. 1,452,220; Apr. 17.
Schadegg, Theophilus. (See La Belle, William E., assignor.)
Schenck, Paul W. (See Utter, P., and Schenck.)
Scheuer, Joseph B., Lanett, Ala. Bleaching barytes. 1,452,315; Apr. 17.
Schneider & Cie. (See Schneider, Eugène, assignor.)
Schneider, Eugène, assignor to Schneider & Cie., Paris, France. Wheeled gun carriage having divergible trail. 1,451,848; Apr. 17.
Schultz, Edward, Maywood, assignor, by mesne assignments, to Mrs. E. A. Laughery, Chicago, Ill. Coin-operated vending machine. 1,451,787; Apr. 17.
Schulz, M. Company. (See Gustafson, Adolph P., assignor.)
Schwerdtfeger, Walter, assignor to Daimler-Motoren-Gesellschaft, Unterturkeim, Germany. Device for indicating the oil circulation and oil pressure. 1,451,849; Apr. 17.
Scott, Henry L., & Company. (See Valentine, Frank A., assignor.)
Scott, Robert F., assignor to Edwin Harrington, Son & Company, Inc., Philadelphia, Pa. Drill-spindle-adjusting mechanism. 1,452,172; Apr. 17.
Scoville, Royal L., New York, N. Y., assignor to E. M. Rosenbluth, Wallingford, Pa. Low-water indicator. 1,452,173; Apr. 17.
Scruby, George E., assignor to G. B. Kelley, Birmingham, Ala. Box cover. 1,451,963; Apr. 17.
Sears, Roebuck and Co. (See Hoffman, Rudolph, assignor.)
Seldeman, Léon, New York, N. Y. Silicate composition. 1,452,445; Apr. 17.
Seppmann, Alfred B., Lake Crystal, Minn. Valve cage vise and spring remover. 1,451,715; Apr. 17.
Seydel Chemical Company. (See Spencer, Hugh M., assignor.)
Sharpe, George E., Steubenville, Ohio. Gas burner. 1,451,716; Apr. 17.
Sheiman, Morris, New York, assignor to Wilson Rohannan, Inc., Brooklyn, N. Y. Lock. 1,451,788; Apr. 17.
Shek, Frank P., Brooklyn, N. Y. Lock. 1,452,393; Apr. 17.
Shirley, William M., Aliceville, Ala. Differential gear. 1,452,316; Apr. 17.
Shonts, Leroy C., and O. W. Howard, assignors, by mesne assignments, to Moline Plow Company, Incorporated, Moline, Ill. Tractor. 1,452,283; Apr. 17.
Short, Lillie A., Washington, D. C. Meat-tendering machine. 1,452,098; Apr. 17.
Shreve, Randolph N. (See Charlton, H. W., and Shreve.)
Shultz, Albert B., Buffalo, N. Y. Ball joint. 1,451,964; Apr. 17.
Shultz, Albert B., Buffalo, N. Y. Liquid-level gauge. 1,451,965; Apr. 17.
Sibson & Stern, Inc. (See Branson, Thomas, assignor.)
Simon, Dezsö, and A. Gottlieb, New York, N. Y. Hoof-protecting horseshoe. 1,452,317; Apr. 17.
Simon, Lewis, Gary, Ind. Extension body for automobiles. 1,452,394; Apr. 17.
Simpson, Robert D. (See Foster, C. J., and Simpson.)
Singer, Joseph B., Brooklyn, and A. B. Levy, New York, N. Y. Display container and advertising in connection therewith. 1,452,257; Apr. 17.
Singer Manufacturing Company, The. (See De Voe, Albert H., assignor.)
Singer Manufacturing Company, The. (See Fifield, Albert F., assignor.)
Sipe, John F., New York, N. Y. Elastic tire and making same. 1,452,099; Apr. 17.
Sitzman, Charles E., Taft, Calif. Rod elevator. 1,452,127; Apr. 17.
Sleeper & Hartley, Inc. (See Sleeper, Frank H., assignor.)
Sleeper, Frank H., assignor to Sleeper & Hartley, Inc., Worcester, Mass. Spring-coiling machine. 1,452,128; Apr. 17.
Slider, George, Baltimore, Md. Gearing. 1,452,222; Apr. 17.
Slider, George, Baltimore, Md. Mechanical movement. 1,452,221; Apr. 17.
Smallwood, Robert F., New York, N. Y. Cutting tool. 1,451,966; Apr. 17.
Smith, Alexander, Dykehead, and W. M. Wood, Montrose, Scotland. Machine for raising or digging turnips and other like roots. 1,452,395; Apr. 17.
Smith, A. O., Corporation. (See Smith, Reuben S., assignor.)
Smith, Carl J., Indiana Harbor, Ind. Differential governor for boiler feed pumps. 1,452,228; Apr. 17.
Smith, Clarence E., Peoria, Ill. Stropping machine. 1,451,789; Apr. 17.
Smith, Clarence E., Peoria, Ill. Blade holder for stropping machines. 1,451,790; Apr. 17.
Smith, Elmer H., Minneapolis, Minn. Welding-torch tip. 1,452,258; Apr. 17.
Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Manifolding pack and holder. 1,451,791; Apr. 17.
Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,451,792; Apr. 17.
Smith, Reuben S., assignor to A. O. Smith Corporation, Milwaukee, Wis. Punching press and die therefor. 1,452,224; Apr. 17.
Smith, Reuben S., assignor to A. O. Smith Corporation, Milwaukee, Wis. Forming curved flanged bars. 1,452,225; Apr. 17.
Smith, Winfield D., Newark, N. J. Reversible driving gear. 1,451,793; Apr. 17.
Smith's John E., Sons Company. (See Knowlton, Eugene W., assignor.)
Snell, Lyle K., assignor to The Willys-Overland Company, Toledo, Ohio. Breather tube. 1,452,259; Apr. 17.
Societe Nouvelle des Etablissements Alfred Maguin. (See Maguin, Abel, assignor.)
Sommer, Henry G., Peoria, Ill., assignor, by mesne assignments, to Keystone Steel & Wire Company, Peoria, Ill. Hand tool. 1,451,717; Apr. 17.
Sommer, John, Peoria, assignor to Keystone Steel & Wire Company, Bartonville, Ill. Reel. 1,451,745; Apr. 17.
South Bend Bait Co. (See Cass, Frank A., assignor.)
Spencer, Hugh M., Newark, N. J., assignor, by mesne assignments, to Seydel Chemical Company, New York, N. Y. Mercurial composition. 1,451,850; Apr. 17.
Spencer, Madison A., Yonkers, N. Y., assignor of one-half to B. E. Nussbaum, Muskogee, Okla. Boll-weevil destroyer. 1,452,226; Apr. 17.
Sperry, Elmer A., assignor to Sperry Gyroscope Company, Brooklyn, N. Y. Means for governing the rolling of ships. 1,452,482; Apr. 17.
Sperry, Elmer A., jr., Brooklyn, N. Y. Horizontal bearing for gyroscopes. 1,452,483; Apr. 17.
Sperry, Elmer A., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y. Gunfire control for battleships. 1,452,484; Apr. 17.
Sperry Gyroscope Company. (See Sperry, Elmer A., assignor.)
Sperry Gyroscope Company, The. (See Tanner, Harry L., assignor.)
Spiker, Thomas A., Pittsburgh, and J. E. Ayres, McDonald, Pa. Pump. 1,452,318; Apr. 17.
Spitzer, Charles S., and J. Gioub, Chicago, Ill. Sound box. 1,452,319; Apr. 17.
Sprague, Frank D., Newport, R. I. Automatic angle cock. 1,452,473; Apr. 17.
Spuhler, Victor, Zug, Switzerland. Two-stroke-cycle internal-combustion engine. 1,452,005; Apr. 17.
Staempfli, Joseph, New Orleans, La. Portable boring machine. 1,452,320; Apr. 17.
Staier, Henry. (See Gottschalk, Karl P., assignor.)
Staley, Joseph H., Columbus, Ind. Engine-bearing burning-in and running-in machine. 1,452,446; Apr. 17.
Starclough, William H., Parkersburg, W. Va. Tank. 1,451,987; Apr. 17.
Steffan, William C., F. B. Ackermann, and W. J. Greiner, Chicago, Ill. Pencil. Des. 62,224; Apr. 17.
Stehmann, Harry, Berlin-Hohenschonhausen, Germany. Grate for shaft furnaces. 1,452,006; Apr. 17.
Steinberger, Louis, Brooklyn, N. Y. Insulator. 1,451,968; Apr. 17.
Steinberger, Louis, Brooklyn, N. Y. Insulated connector. 1,451,969; Apr. 17.
Steinmetz, Joseph A., Philadelphia, Pa. Tire-inflating attachment for disk wheels. 1,452,284; Apr. 17.

Stelter, Francis C. W., Astoria, N. Y. Dyeing machine. 1,452,129; Apr. 17.
Stendahl, Ludwig, Fairfield, assignor to The Bryant Electric Company, Bridgeport, Conn. Adapter. 1,452,321; Apr. 17.
Stephens, Thomas J., Spokane, Wash. Dust cap for tire valves. 1,451,719; Apr. 17.
Sternad, Andrew F., Chicago, Ill. Feeding machine. 1,451,897; Apr. 17.
Stern, Isidore, New York, N. Y. Adjustable attachment for removable bridgework. 1,451,718; Apr. 17.
Sterner, Lloyd H., H. M. Landroth, and M. E. Sterner, Fremont, Nebr. Advertising device. 1,452,396; Apr. 17.
Sterner, Minnie E. (See Sterner, L. H., Landroth, and Sterner.)
Stevens, Harry P., New York, N. Y. Battery steamer. 1,452,397; Apr. 17.
Stewart, Leroy C., assignor to The Dow Chemical Company, Midland, Mich. Segregating olefines. 1,452,322; Apr. 17.
Stimson, Ralph J., Rogersville, Mich. Controlling means for tractors. 1,451,925; Apr. 17.
St. Mungo Manufacturing Company of America. (See Loomis, Evarts G., assignor.)
Stockton, Charles G., Ocean Grove, N. J. Exhaust muffler. 1,452,056; Apr. 17.
Stockton, William A., assignor of two-thirds to W. Dowell, Pleasant Hill, La. Cultivator. 1,452,398; Apr. 17.
Stoffel, Martin, McHenry, Ill. Road drag. 1,452,260; Apr. 17.
Stokely, Ray L., Floral Park, assignor to Western Electric Company, Incorporated, New York, N. Y. Toll trunking circuits for machine-switching telephone systems. 1,452,323; Apr. 17.
Stokes & Smith Company. (See Nitsch, C. H., Weightman, and Streeper, assignors.)
Stokes, Henry C., Sumter, S. C. Valve for air-brake safety appliances. 1,452,055; Apr. 17.
Stokes, John C., Shreveport, La. Drill. 1,451,794; Apr. 17.
Stokes, John S. (See Novotny, Emil E., assignor.)
Straubel, Louis A., Green Bay, Wis. Paper-cutting machine. 1,452,227; Apr. 17.
Straubel, Louis A., assignor to Straubel Machine Company, Green Bay, Wis. Rewinding machine. 1,452,228; Apr. 17.
Strauss, Louis, Brooklyn, N. Y. Sweater. Des. 62,225; Apr. 17.
Streeper, William H. (See Nitsch, C. H., Weightman, and Streeper.)
Straubel Machine Company. (See Straubel, Louis A., assignor.)
Stroud and Company. (See Bonney, Bick R., assignor.)
Strutz, Louis P., Corning, N. Y. Tire valve. 1,452,324; Apr. 17.
Stumpenhorst, John A., Wilkinsburg, Pa., assignor to Duplex Transmission Company. Motor-vehicle transmission mechanism. 1,451,851; Apr. 17.
Sullivan, Patrick, et al. (See Porter, C. A., and Brewster, assignors.)
Sultzer, Morton, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Multiplex selecting circuits. 1,451,746; Apr. 17.
Sun Typewriter Company. (See Rowley, Edward G., assignor.)
Swank, Christian J., Topeka, Kans. Exterminator trap. 1,451,720; Apr. 17.
Tanner, Harry L., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y. Gyroscopic compass. 1,452,485; Apr. 17.
Tanner, Harry L., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y. Magnetic gyroscopic navigation device. 1,451,928; Apr. 17.
Taylor, James A., et al., joint trustees. (See Ladd-Davis, Clarence, assignor.)
Taylor, Samuel W., Baltimore, assignor to C. J. Kryzanowsky, Ruxton, Md. Temporary fastening. 1,451,970; Apr. 17.
Ternstedt Manufacturing Company. (See Edgar, F. M., and Archer, assignors.)
Ternes, Henry, Albion, Nebr. Stock waterer. 1,452,325; Apr. 17.
Terrey, Arthur, Hayes, England. Rotary printing press. 1,451,721; Apr. 17.
Texas Gulf Sulfur Company. (See Davis, Harold S., assignor.)
Texhoma Oil & Refining Company, The. (See Berlien, Corwin M., assignor.)
Tew, James D., Hudson, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Prolonging the life of expansible vulcanizing cores. 1,452,326; Apr. 17.
Thatcher, Emerson B., Marine City, Mich. Water separator for air tanks. 1,452,447; Apr. 17.
Theis, Raymon R. (See Andrews, L. G., and Theis.)
Thelen, Rolf. (See Tiemann, H. D., and Thelen.)
Thompson, Charles, Hamilton, Ontario, Canada. Direction signal for automobiles. 1,451,795; Apr. 17.
Thompson, Clarence W., assignor to Thompson Spring Company, Wilmington, Del. Support for vehicle springs. 1,452,448; Apr. 17.
Thompson, M., et al. (See Mayberry, Thomas A., assignor.)
Thompson, Milton E., Ridgway, Pa. Power-transmission arrangement. 1,452,327; Apr. 17.
Thompson Spring Company. (See Thompson, Clarence W., assignor.)
Thouviot, Jean C., Paris-L'Hopital, France. Apparatus for heaping or piling up packages, bags, and the like. 1,452,449; Apr. 17.
Tiemann, Harry D., and R. Thelen, Madison, Wis. Reversing blower kiln. 1,451,747; Apr. 17.
Tingue Manufacturing Company. (See Fauser, Gustave M., assignor.)
Tocchio, Michele, Hammersmith, London, England. Cooking grill. 1,451,971; Apr. 17.
Tompkins, Hermann W., Greensburg, Pa. Radio variable rheostat. 1,452,399; Apr. 17.
Tommasi, Carlo, J. Sandholm, H. Danneel, and A. Busch, Basel, Switzerland, assignors to Elektrizitatswerk Lonza, Gampel, Canton of Valais, Switzerland. Burner for burning metaldehyde. 1,452,450; Apr. 17.
Torbron, Orin F., Ardmore, Okla. Swimming shoe. 1,452,400; Apr. 17.
Torrington Company, The. (See Cook, Harmon J., assignor.)
Towns, Eugene S., Austin, Tex. Boring machine. 1,452,007; Apr. 17.
Towers, Arthur A., Cleveland, Ohio. Vehicle top. 1,452,328; Apr. 17.
Traphagen, Harry R. (See Waterman, L. E., Traphagen, and Waterman.)
Trenckmann, Bruno. (See Trenckmann, Erich and B.)
Trenckmann, Erich and Bruno, assignors to B. G. Tertilwerke G. m. b. H., Berlin-Tempelhof, Germany. Balloon envelope material and manufacturing the same. 1,452,229; Apr. 17.
Trumble Gas Trap Co. (See Trumble, Milon J., assignor.)
Trumble, Milon J., Alhambra, Calif., assignor to Trumble Gas Trap Co., Los Angeles, Calif. Gas-trap float. Re. 15,580; Apr. 17.
Tunstall, William B., Worcester, Mass. Player piano. 1,452,174; Apr. 17.
Turgeon, Edward, Minneapolis, Minn. Couch bed. 1,451,929; Apr. 17.
Turner, Hubert S., San Diego, Calif. Telephony. 1,451,896; Apr. 17.
Turner, Lewis L. (See Walker, P. H. D., and Turner.)
Underwood Computing Machine Company. (See Kupetz, Adolph G., assignor.)
Underwood Typewriter Company. (See Smith, Jesse A. B., assignor.)
Union Switch & Signal Company, The. (See Nicholson, Frank H., assignor.)
United Shoe Machinery Corporation. (See Casgrain, Louis A., assignor.)
United Shoe Machinery Corporation. (See Dow, Harry E., assignor.)
United Shoe Machinery Corporation. (See Heys, John J., assignor.)
United Shoe Machinery Corporation. (See Meyer, William C., assignor.)
United Shoe Machinery Corporation. (See Morley, Denys W., assignor.)
Upton, Joseph C., Pelzer, S. C. Loom. 1,452,057; Apr. 17.
Utter, Phil, and P. W. Schenck, Los Angeles, Calif. Prop or brace. 1,452,329; Apr. 17.
Valentine, Frank A., Apponaug, assignor to Henry L. Scott & Company, Providence, R. I. Speed-changing mechanism. 1,451,722; Apr. 17.
Vallier, Orvis W., assignor to J. B. Wise Incorporated, Watertown, N. Y. Waste-operating mechanism. 1,451,930; Apr. 17.
Vallier, Orvis W., Watertown, N. Y., assignor to J. B. Wise Incorporated. Waste fitting for sinks. 1,451,931; Apr. 17.
Vandevender, Adam S. (See Vandevender, George W., assignor.)
Vandevender, George W., Mill Creek, W. Va., assignor of one-half to A. S. Vandevender, Mingo, W. Va. Folding coop. 1,451,972; Apr. 17.
Van Duyne, Simeon, assignor to S. M. Doland, Boonton, N. J. Fruit picker. 1,452,175; Apr. 17.
Vaughan, Henry H., and E. C. Gaines, Montreal, Quebec, Canada. Apparatus for loading and unloading railway cars. 1,451,748; Apr. 17.
Verdoorn, Neal, assignor of one-half to J. Zylstra, Sheldon, Iowa. Clutch-spring remover. 1,451,852; Apr. 17.
Vesta Battery Corporation. (See Angell, Chester M., assignor.)
Vicary, Arthur C. (See Armstrong, Edwin J., assignor.)
Vietor, William A., Eureka, Calif. Grate bar. 1,452,130; Apr. 17.
Volkman, Stanley, Minneapolis, Minn. Attachment for woodworking machines. 1,452,008; Apr. 17.
Vollmann, Carl W., Montreal, Quebec, Canada. Compressor. 1,451,723; Apr. 17.
Waffenfabrik Mauser, A. G. (See Kissendorfer, Karl, assignor.)
Wagner, Paul A., Jersey City, N. J. Pile-cutting device. 1,452,285; Apr. 17.
Wait, Justin F., New York, N. Y. Utilization of ammonia. 1,452,009; Apr. 17.
Wakefield, Frank T., Pittsburgh, Pa. Outdoor gaming apparatus. 1,452,350; Apr. 17.
Walden, Frederick E., deceased, Worcester, Mass., G. E. Walden, executrix. Auto jack. 1,452,131; Apr. 17.

Walden, Grace E., executrix. (See Walden, Frederick E.)
Wald, Samuel. (See Klein, B. M., and Wald.)
Walker, Cyril T., Secunderabad, Deccan, India. Apparatus for sharpening the blades of safety razors. 1,452,401; Apr. 17.
Walker, Joseph L., assignor to The K-D Barrel & Hamper Co., Baton Rouge, La. Machine for making barrel heads. 1,452,010; Apr. 17.
Walker, Percy H. D., Meriden, and L. L. Turner, South Meriden, Conn., assignors to The Charles Parker Company, Meriden, Conn. Quick-action vise. 1,451,724; Apr. 17.
Waller, William. (See Greenfield, J. W., and Waller.)
Warner Gear Company. (See Garceau, Harry J., assignor.)
Warner, William E., Linden, N. J. Cooking and wash utensil. 1,452,261; Apr. 17.
Washburne, Alva C., et al. (See Hammond, Grant, assignor.)
Waterbury Farrel Foundry and Machine Company, The. (See Burton, Jesse B., assignor.)
Waterbury Farrel Foundry and Machine Company, The. (See Pierson, William D., assignor.)
Waterman, Howard L. (See Waterman, L. E., Traphagen, and Waterman.)
Waterman, Lewis E., H. R. Traphagen, and H. L. Waterman, assignors to Emerson-Brantingham Company, Rockford, Ill. Tractor. 1,451,796; Apr. 17.
Wattel, Achille L. F., Sevres, France. Brake mechanism for automobiles. 1,452,402; Apr. 17.
Wattie, William M., Worcester, Mass., assignor to Crompton & Knowles Loom Works. Vibrator lever for looms. (1,451,797; Apr. 17.
Watton, Harold E., Birmingham, England, assignor to Dunford & Elliott (Sheffield) Limited, Attercliffe, Sheffield, England. Internal-combustion engine. 1,452,011; Apr. 17.
Webber, Arthur H., Boston, Mass. Carburetor. 1,452,451; Apr. 17.
Webb, John W., assignor to The Container Club, Chicago, Ill. Paper-testing machine. 1,451,932; Apr. 17.
Weeks, John B., assignor to Long Furniture Company, Hanover, Pa. Phonograph cabinet. 1,452,132; Apr. 17.
Weguelin, George C. L., Chertsey, England. Bureau. 1,451,973; Apr. 17.
Weig, Herman, Chicago, Ill. Eraser holder. 1,451,933; Apr. 17.
Weig, Herman, Chicago, Ill. Eraser holder. 1,451,934; Apr. 17.
Weightman, William A. (See Nitsch, C. H., Weightman, and Streeper.)
Wells, Alfred A., Montclair, N. J., assignor to National Carbon Company, Inc., New York, N. Y. High-power dry battery. 1,452,230; Apr. 17.
Wells, Jacob L., Minneapolis, Minn. Air-washing attachment for carburetors. 1,452,231; Apr. 17.
Werle, Philip. (See Bye, K., and Werle.)
West, John W., Camberwell, London, England. Binding case for holding sheet music and the like. 1,452,452; Apr. 17.
Western Electric Company. (See Clausen, Henry P., assignor.)
Western Electric Company. (See Dobbin, Henry F., assignor.)
Western Electric Company. (See Farrington, John F., assignor.)
Western Electric Company. (See Goodrum, Charles L., assignor.)
Western Electric Company. (See Heising, Raymond A., assignor.)
Western Electric Company. (See Houskeeper, William G., assignor.)
Western Electric Company. (See Johnson, Kenneth S., assignor.)
Western Electric Company. (See Miller, Ewell B., assignor.)
Western Electric Company. (See Stokely, Ray L., assignor.)
Western Maryland Railway Company. (See Wieseckel, George F., assignor.)
Westinghouse Air Brake Company. (See Cloud, John W., assignor.)
Weston, William S., Dallas, Tex. Anti-creeper for railway rails. 1,451,808; Apr. 17.
Wheeler, Benjamin F. (See Earl, C. M., and Wheeler.)
Wheeling Stamping Company. (See Davis, Walter T., assignor.)
Wheildon, William M., Ashland, assignor to E. H. Angier, Framingham, Mass. Package. 1,452,100; Apr. 17.
White, Charles E., assignor to Deere & Company, Moline, Ill. Beet puller. 1,451,725; Apr. 17.
White, Edward N., et al, trustees. (See Gifford, Richard T., assignor.)
White, Francis R. (See Plehaty, Carl W., assignor.)
Whiting, Jasper, Boston, Mass. Bread slicer. 1,452,474; Apr. 17.
White, Rollin H., Cleveland Heights, assignor to The Cleveland Tractor Company, Euclid, Ohio. Track belt and unit therefor. 1,452,176; Apr. 17.
Wieseckel, George F., Hagerstown, Md., assignor to Western Maryland Railway Company. Coal trimmer. 1,452,012; Apr. 17.
Wike, Reginald E., Springfield, Ohio. Bottle-disk extractor. 1,451,853; Apr. 17.
Wilcox, Crittenden and Company. (See Hanson, Henry, assignor.)
Wiley, Frank A. (See Howland, H. P., and Wiley.)
Wilkinson, Henry, assignor of one-half to Platt Brothers and Company Limited, Oldham, England. Machine for opening and cleaning cotton and other fibrous materials. 1,452,133; Apr. 17.
Williams, Frank, Hot Springs, S. Dak. Combined pencil sharpener and guard. 1,452,013; Apr. 17.
Williams, Harry C., Fulton, Ky. Motion-picture apparatus. 1,452,101; Apr. 17.
Williams, Walter W., Bloomington, Ill. Liquid-fuel-atomizing device. 1,451,798; Apr. 17.
Willis, Warren E., assignor to E. I. Franklin & Co., North Attleboro, Mass. Box-link chain. 1,452,058; Apr. 17.
Willys-Overland Company, The. (See Belden, Edward H., assignor.)
Willys-Overland Company, The. (See Jerdone, Francis, jr., assignor.)
Willys-Overland Company, The. (See Lightner, A. D., and Holmes, assignors.)
Willys-Overland Company, The. (See Snell, Lyle K., assignor.)
Wilson Bohannan, Inc. (See Sheinman, Morris, assignor.)
Wilson, C. R., Body Company. (See Rhein, Lloyd R., assignor.)
Wilson, Verney A., Atalla, Ala. Compressed-air ice machine. 1,452,403; Apr. 17.
Wiltrout, Alton J., Warsaw, Ind. Oar. 1,451,749; Apr. 17.
Wimmers, August A., assignor to The Egry Register Company, Dayton, Ohio. Autographic register. 1,452,453; Apr. 17.
Wimmers, August A., assignor to The Egry Register Company, Dayton, Ohio. Autographic register. 1,452,454; Apr. 17.
Winchester Repeating Arms Co. (See Gravely, Julian S., assignor.)
Winfield, Walter E., et al. (See Mayberry, Thomas A., assignor.)
Winters, Edward B., Coffeyville, Kans. Earth loader. 1,452,330; Apr. 17.
Wise, J. B., Incorporated. (See De Wallace, Harry, assignor.)
Wise, J. B., Incorporated. (See Vallier, Orvis W., assignor.)
Wodiska, Julius, New York, N. Y. Finger ring, pin, brooch, or similar article. Des. 62,226; Apr. 17.
Wood, William M. (See Smith, A., and Wood.)
Woodward, John H., assignor to The J. H. & F. A. Sells Company, Columbus, Ohio. Horse collar. 1,451,750; Apr. 17.
Wolfe, Clinton L., Brooklyn, and J. A. Faurot, New York, N. Y. Electric lock and door-control device. 1,452,014; Apr. 17.
Wolff, Franklyn J., Trenton, N. J. Blank-transfer mechanism for sagger-making machines. 1,452,331; Apr. 17.
Worthington Pump and Machinery Corporation. (See Haeberlein, Max, assignor.)
Wotton, Edward, Edgewater, N. J. Display sign for passenger vehicles. 1,452,332; Apr. 17.
Wray, Charles F., assignor to The National Brass Manufacturing Company, Rochester, N. Y. Lubricator cup. 1,451,854; Apr. 17.
Wright, Edward, assignor of one-half to A. MacMillan, Hamilton, Ontario, Canada. Wedge. 1,451,855; Apr. 17.
Wuestefeld, Steve A. (See Ritter, Elmer R., assignor.)
Wyckoff, J. Lewis, et al., trustees. (See Gifford, Richard T., assignor.)
Yamamoto, Takejiro, Nishinari-gun, Osaka, Japan. Interlocking splice for threads of two strands. 1,452,102; Apr. 17.
Yerrick Manufacturing Co. (See Harburg, James E., assignor.)
Yerxa, Winslow, Delburne, Alberta, Canada. Reaming tool. 1,452,103; Apr. 17.
Yoders, Irvin G., and J. C. Filby, Washington, Pa. Connector link for tire chains. 1,451,856; Apr. 17.
Young, Ferdinand H., assignor to The Abbott Laboratories, Chicago, Ill. Solution of di-chloramine-T. 1,451,857; Apr. 17.
Young, L. A., Industries, Inc. (See Reidenbach, Herman O., assignor.)
Young, Leonard A., Detroit, Mich. Forming compound springs. 1,451,936; Apr. 17.
Young, Leonard A., Highland Park, Mich. Spring-seat construction. 1,451,935; Apr. 17.
Youngblood, James A., Dallas, Tex. Method of and means for reenforcing wall foundations. 1,451,799; Apr. 17.
Zaiden, David, East Orange, N. J. Mechanical doll. 1,452,134; Apr. 17.
Zaiser, Carl J., assignor to American Metal Products Company, Milwaukee, Wis. Alloy. 1,452,232; Apr. 17.

Zengerle, Walter C., assignor to Franzengerle Company, Cleveland, Ohio. Cradle or creeper for automobile work. 1,451,858; Apr. 17.
Ziebold, Henry, sr., Woodlawn, Ohio. Burner. 1,451,751; Apr. 17.
Ziebold, Henry, sr., Lockland, Ohio. Burner. 1,451,752; Apr. 17.
Zitscher, Arthur. (See Laska, A. L., and Zitscher.)
Zsuffa, Louis, New York, N. Y. Combined molding-setting device for circular saws. 1,452,233; Apr. 17.
Zuckerman, Adolph M., assignor to R. Hoe and Co., New York, N. Y. Bearing and fountain adjustment for intaglio machines. 1,451,726; Apr. 17.
Zylstra, Joseph. (See Verdoorn, Neal, assignor.)

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 17TH DAY OF APRIL, 1923.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Acid bowls, Rake tooth for carbonizing. A. C. Sargent. 1,451,926; Apr. 17.
Acid by crystallization, Purification of commercial phosphoric. W. H. Ross, C. B. Durgin, and R. M. Jones. 1,451,786; Apr. 17.
Acid, Manufacture of 1.4 naphthol sulphonic. J. Baddiley, J. B. Payman, and E. G. Bainbridge. 1,452,481; Apr. 17.
Adapter. L. Stendahl. 1,452,321; Apr. 17.
Advertising device. J. E. Koehler and R. Paul. 1,451,877; Apr. 17.
Advertising device. L. H. Sterner, H. M. Landroth, and M. E. Sterner. 1,452,396; Apr. 17.
Aerial train. W. E. Ikerman. 1,451,830; Apr. 17.
Aeroplane assuring automatically the lateral and longitudinal stability. J. Dehouck. 1,452,071; Apr. 17.
Aeroplane safety appliance. F. J. Matoushek. 1,452,348; Apr. 17.
Aeroplanes, Rudder and elevator assembly for. O. T. Belcher. 1,452,060; Apr. 17.
Air brake, Load-controlled. R. Haskell. 1,452,199; Apr. 17.
Air compressor. W. J. Kreimer. 1,451,834; Apr. 17.
Alkali-metal product and producing the same. H. W. Charlton and R. N. Shreve. 1,452,185; Apr. 17.
Alloy. C. J. Zaiser. 1,452,232; Apr. 17.
Alloys, Producing a protective coating on objects of magnesium or magnesium. C. B. Backer. 1,451,755; Apr. 17.
Amalgamator, Centrifugal. R. J. Butler. 1,452,181; Apr. 17.
Ammonia and producing same, Catalyzer for the synthetic manufacture of. I. W. Cederberg. 1,452,027; Apr. 17.
Ammonia, Utilization of. J. F. Wait. 1,452,009; Apr. 17.
Ammonia with oxygen, Apparatus and method for carrying out catalytic oxidation of. I. W. Cederberg. 1,452,145; Apr. 17.
Animal trap. J. Bolf. 1,452,355; Apr. 17.
Armor, Machine for making flexible tubular. S. W. Bourn. 1,452,356; Apr. 17.
Articulator. G. W. Reimche. 1,451,892; Apr. 17.
Asphalt composition. G. Monrath. 1,452,310; Apr. 17.
Asphalt-cutting tool. W. J. Gleasner. 1,452,037; Apr. 17.
Asphalt structure and composition. G. Monrath. 1,452,309; Apr. 17.
Assembling tool for interrupter arms. H. B. Mitchell. 1,451,708; Apr. 17.
Attachable brake. E. R. Ritter. 1,452,439; Apr. 17.
Auto jack. F. E. Walden. 1,452,131; Apr. 17.
Auto signal. F. J. Ryan. 1,452,392; Apr. 17.
Autographic register. A. A. Wimmers. 1,452,453–4; Apr. 17.
Automobile body. F. R. Fageol. 1,452,369; Apr. 17.
Automobile brake mechanism. A. L. F. Wattel. 1,452,402; Apr. 17.
Automobile buffer. H. S. Gutsell. 1,451,874; Apr. 17.
Automobile bumper. E. W. Kettlitz and G. Kuhn. 1,452,427; Apr. 17.
Automobile extension body. L. Simon. 1,452,394; Apr. 17.
Automobile fender, Accident-proof. J. Kaurich. 1,451,833; Apr. 17.
Automobile guard and bumper. E. Christensen. 1,452,189; Apr. 17.
Automobile license box. C. G. Mercer. 1,452,430; Apr. 17.
Automobile lock. H. J. Garceau. 1,451,821; Apr. 17.
Automobile lock protective device. H. A. Calahan. 1,452,065; Apr. 17.
Automobile pedal attachment. G. A. Milkie. 1,452,431; Apr. 17.
Automobile radiator. L. D. Fowler. 1,451,871; Apr. 17.
Automobile rim. J. S. Edwards. 1,452,073; Apr. 17.
Automobile signal device. C. Hermann. 1,451,909; Apr. 17.
Automobile transmission. A. E. Milarch. 1,452,248; Apr. 17.
Automobile visors, Supporting bracket for. F. Hoener. 1,451,695; Apr. 17.
Automobile work, Cradle or creeper for. W. C. Zengerle. 1,451,858; Apr. 17.
Automobiles and other vehicles, Direction indicator for. J. O. Grenier. 1,452,114; Apr. 17.
Automobiles, Direction signal for. C. Thompson. 1,451,795; Apr. 17.
Automobiles, Slot-closure mat for. A. S. Kinney. 1,451,987; Apr. 17.
Bags, Handle for traveling. A. Kahlow. 1,452,243; Apr. 17.
Ball joint. A. B. Shultz. 1,451,964; Apr. 17.
Ball-winding machine. E. G. Loomis. 1,452,469; Apr. 17.
Balling machines, Controlling mechanism for. M. J. Kaspari. 1,452,298; Apr. 17.
Balloon envelope material and manufacturing the same. E. and B. Trenckmann. 1,452,229; Apr. 17.
Band-tying gauge. A. Cook. 1,451,681–2; Apr. 17.
Band-tying gauge. M. Curry and A. Cook. 1,451,685; Apr. 17.
Bar: *See*—
Grate bar.
Barrel heads, Machine for making. J. L. Walker. 1,452,010; Apr. 17.
Bars, Forming curved flanged. R. S. Smith. 1,452,225; Apr. 17.
Barytes, Bleaching. J. B. Scheuer. 1,452,315; Apr. 17.
Basket, Paper or cardboard berry. J. S. Parker. 1,451,888; Apr. 17.
Bath device. G. J. Kollar. 1,451,878; Apr. 17.
Battery: *See*—
High-power dry battery.
Battery cans, Manufacture of dry-. F. G. Breyer and W. H. Finkeldey. 1,451,758; Apr. 17.
Battery plates, Handling, drying, and forming pasted. C. M. Angell. 1,451,801; Apr. 17.
Battery steamer. H. P. Stevens. 1,422,397; Apr. 17.
Battleships, Gunfire control for. E. A. Sperry. 1,452,484; Apr. 17.
Bead-making machine. R. McClenathen. 1,451,837; Apr. 17.
Beaming machines, Tension-controlling means for. G. W. Kuenneth. 1,452,161; Apr. 17.
Bearing burning-in and running in machine, Engine-. J. H. Staley. 1,452,446; Apr. 17.
Bearing, Roller. H. J. Heider. 1,451,825; Apr. 17.
Bed. T. D. Anderson. 1,452,104; Apr. 17.
Bed, Couch. E. Turgeon. 1,451,829; Apr. 17.
Beet puller. C. E. White. 1,451,725; Apr. 17.
Belt shipper. O. F. Eklund. 1,451,945; Apr. 17.
Belts on cone pulleys, Shifter for. G. J. Hausman and A. J. Jones. 1,452,044; Apr. 17.
Belting, Apparatus for making. O. Czaran. 1,451,686; Apr. 17.
Bench: *See*—
Test bench.
Beverage-dispensing device. C. M. Earl and B. F. Wheeler 1,451,688; Apr. 17.
Bicycle rim. N. Johnson. 1,451,911; Apr. 17.
Blacking-box cover. G. A. Leighton. 1,451,702; Apr. 17.
Blanking operation, Material-. E. B. Miller. 1,452,308; Apr. 17.
Boat, Manually-operated. J. K. Milton. 1,452,433; Apr. 17.
Boat-propelling means. C. J. Baer. 1,452,059; Apr. 17.
Bobbin supply box. I. Couser. 1,451,683; Apr. 17.
Bodkin. M. C. R. Dolphin. 1,452,030; Apr. 17.
Boiler: *See*—
Milk boiler.
Boiler, Electrically heated and controlled steam. W. H. Rowe. 1,451,847; Apr. 17.
Boilers, Water-gauge glass for steam. B. C. Rodenhizer. 1,452,390; Apr. 17.
Boll-weevil destroyer. M. A. Spencer. 1,452,226; Apr. 17.
Boring machine. E. S. Towns. 1,452,007; Apr. 17.
Boring machine, Portable. J. Staempfl. 1,452,320; Apr. 17.
Bottle-disk extractor. R. E. Wike. 1,451,853; Apr. 17.
Bottle, Nursing. R. J. Hagerty. 1,451,822; Apr. 17.
Bottles or the like, Machine for capping. P. J. Boucher. 1,452,410; Apr. 17.
Box: *See*—
Automobile license box.
Bobbin supply box.
Match box.
Powder box.
Rural mail box.
Safety chick box.
Box cover. G. E. Scruby. 1,451,963; Apr. 17.
Box-covering machine. F. E. Hatch. 1,451,908; Apr. 17.
Bracket: *See*—
Lamp bracket.
Bracket. S. J. Dick. 1,451,764; Apr. 17.
Brake: *See*—
Attachable brake.
Car brake.
Load-controlled air brake.

Brake-actuating mechanism. R. A. Neal. 1,452,212; Apr. 17.
Brake bands, Relining motor-vehicle. R. Sardeson. 1,452,475; Apr. 17.
Bread slicer. J. Whiting. 1,452,474; Apr. 17.
Breather tube. L. K. Snell. 1,452,259; Apr. 17.
Brickmaking apparatus. H. W. B. Graham. 1,452,152; Apr. 17.
Bridgework, Adjustable attachment for removable. I. Stern. 1,451,718; Apr. 17.
Brittle product from a base, Separating a. C. Field. 1,451,902; Apr. 17.
Brush, Cleaning. E. Geiger. 1,452,458; Apr. 17.
Bucket, Live-bait. W. J. Ruff. 1,451,925; Apr. 17.
Building construction. R. H. Irwin. 1,452,426; Apr. 17.
Building laminated strips, Method and apparatus for. U. Haren. 1,452,379; Apr. 17.
Building, Storage. P. Mandeville. 1,452,306; Apr. 17.
Building unit, Material. V. J. Miller. 1,452,432; Apr. 17.
Bull and calf wheel. H. M. Harris. 1,451,770; Apr. 17.
Bureau. G. C. L. Wegueln. 1,451,973; Apr. 17.
Burner: *See*—
Gas burner.
Nonpreheating oil burner.
Oil burner.
Wickless oil burner.
Burner. F. H. Brown. 1,451,811–2; Apr. 17.
Burner. H. Ziebold, sr. 1,451,751–2; Apr. 17.
Burnishing machine. Electrically-heated. H. E. Dow. 1,451,687; Apr. 17.
Butter-blocking machine. E. W. Knowlton. 1,452,160; Apr. 17.
Button, Detachable. C. R. Nalle. 1,452,052; Apr. 17.
Cable support. O. W. Brenizer. Re15,581; Apr. 17.
Calculating device. M. A. Pursel. 1,451,890; Apr. 17.
Calendar. W. H. Baker. 1,452,407; Apr. 17.
Camera. V. Calabrese. 1,452,413; Apr. 17.
Camera attachment. A. Payne. 1,451,956; Apr. 17.
Camper's combination utensil. E. Brecel. 1,452,337; Apr. 17.
Can: *See*—
Key-opening can.
Can opener. A. C. Burke. 1,452,287; Apr. 17.
Candy mint. H. W. Alexander, jr. Des. 62,213; Apr. 17.
Car brake. R. N. Coats. 1,451,942; Apr. 17.
Car door. H. C. Priebe. 1,451,960; Apr 17.
Car, Dumping. G. L. Hancock. 1,452,198; Apr. 17.
Car end, Plate-metal. O. S. Hart. 1,451,948; Apr 17.
Car for short logs, Logging. F. W. Chriswell. 1,451,940; Apr. 17.
Car truck. G. S. Chiles. 1,452,187; Apr. 17.
Car truck, Mining-. J. R. Fleming. 1,451,690; Apr. 17.
Cars, Apparatus for loading and unloading railway. H. H. Baughan and E. C. Gaines. 1,451,748; Apr. 17.
Cars, Apparatus for preventing the stealing of motor. M. A. Hamon. 1,452,240; Apr. 17.
Cars, Brake head and shoe for railway. O. Kongsrud. 1,451,914; Apr. 17.
Carburetor. A. H. Webber. 1,452,451; Apr. 17.
Carburetors, Air-washing attachment for. J. L. Wells. 1,452,231; Apr. 17.
Casting articles of metal, Apparatus for. S. P. Marshall. 1,452,245; Apr. 17.
Casting metals, Apparatus for. N. K. B. Patch. 1,452,480; Apr. 17.
Casting metals, Art of and apparatus for. S. P. Marshall. 1,452,246; Apr. 17.
Cementitious products, Mold for making. T. A. Mayberry. 1,452,247; Apr. 17.
Centering device. P. Forkardt. 1,452,034; Apr. 17.
Centrifugal separation, Process and apparatus for. C. A. Porter and O. C. Brewster. 1,452,388; Apr. 17.
Centrifugal separator. R. E. Lapham. 1,451,779; Apr. 17.
Chain and making same. S. Bolgár. 1,452,408; Apr. 17.
Chain, Box-link. W. E. Willis. 1,452,058; Apr. 17.
Chain link. C. E. Carter. 1,452,476; Apr. 17.
Chain, Tractor-wheel. J. C. French. 1,451,872; Apr. 17.
Char, Apparatus for drying. H. E. Niese. 1,452,166; Apr. 17.
Chick box, Safety. D. H. Bucks. 1,451,760; Apr. 17.
Circuits, Multiplex selecting. M. Suitzer. 1,451,746; Apr. 17.
Clamp: *See*—
Furniture clamp.
Screw clamp.
Clamp. H. W. French. 1,451,692; Apr. 17.
Clamps, switches, etc., in electric distributing systems, Manipulating stick for. T. F. Johnson, jr. 1,451,832; Apr. 17.
Cleaner: *See*—
Roll cleaner.
Windshield cleaner.
Cleansing. I. Pollack. 1,452,093; Apr. 17.
Clip: *See*—
Electrical testing clip.
Clod crusher. O. Carom. 1,452,184; Apr. 17.
Closure. L. Rupert. 1,452,391; Apr. 17.
Clothes-drying apparatus. H. Cave. 1,452,066; Apr. 17.
Clutch, Friction. C. G. Oberley and R. Grignon. 1,452,349; Apr. 17.
Clutch pedals, Lever control for. S. A. Sandberg and A. F. Jeanblanc. 1,452,170; Apr. 17.
Clutch-spring remover. N. Verdoorn. 1,451,852; Apr. 17.
Coal trimmer. G. F. Wieseckel. 1,452,012; Apr. 17.
Cock, Automatic angle. F. D. Sprague. 1,452,473; Apr. 17.
Coffin construction. S. H. Deuel. 1,452,029; Apr. 17.
Collar, Horse. J. H. Woodward. 1,451,750; Apr. 17.
Collars and the like, Machine for use in the manufacture of linen. E. B. Fenby. 1,452,111; Apr. 17.
Color-mixing device. L. S. Bower. 1,451,810; Apr. 17.
Combination heater. D. O. Miller. 1,452,249; Apr. 17.
Combination lock. J. O'Kelly. 1,451,954; Apr. 17.
Compacts, Holder for. F. J. M. Miles. 1,451,740; Apr. 17.
Compass, Gyroscopic. H. L. Tanner. 1,452,485; Apr. 17.
Compressor. C. W. Vollmann. 1,451,723; Apr. 17.
Compressor, Rotary. M. Balcker. 1,451,859; Apr. 17.
Compressor, Rotary. H. A. Campbell. 1,452,024; Apr. 17.
Computing scale with interchangeable charts. G. M. Ludlow. 1,451,703; Apr. 17.
Concrete and other buildings, Flashing fastening for. R. P. Burrows. 1,452,412; Apr. 17.
Concrete blocks, Means for molding. G. J. Saffert. 1,451,714; Apr. 17.
Concrete door-frame construction. G. J. Saffert. 1,451,713; Apr. 17.
Concrete-mixing machine. H. K. Fox and G. J. Fisher. 1,451,819; Apr. 17.
Concrete roofs, Construction of. W. E. Clifton and J. S. Ewart. 1,452,362; Apr. 17.
Conductors, Making leading-in. W. G. Housekeeper. 1,452,275; Apr. 17.
Conduit, Flexible. R. C. Agner. 1,451,800; Apr. 17.
Conduit, Hot-air. J. Novak. 1,451,887; Apr. 17.
Container. J. M. Falls. 1,451,768; Apr. 17.

Measuring bodies, Method of and machine for. J. J. Heys. 1,451,730; Apr. 17.
Meat-cutting machine. J. A. Baumgartner. 1,451,674–5; Apr. 17.
Meat chopper and making same. T. F. Ratalczak. 1,451,891; Apr. 17.
Meat-tendering machine. L. A. Short. 1,452,098; 1,452,098; Apr. 17.
Mechanical movement. G. Slider. 1,452,221; Apr. 17.
Memorandum pad, Desk. H. T. Platz. 1,452,092; Apr. 17.
Mercurial composition. H. M. Spencer. 1,451,850; Apr. 17.
Messages to moving trains and the like, Apparatus for delivering. J. Rutter. 1,452,443; Apr. 17.
Metaldehyde, Burner for burning. C. Tommasi, J. Sandholm, H. Danneel, and A. Busch. 1,452,450; Apr. 17.
Metallizing articles. Q. Marino. 1,452,281; Apr. 17.
Metal, Purifying molten. W. T. Davis. 1,452,364; Apr. 17.
Metal scouring and ungreasing device. M. Heller. 1,451,981; Apr. 17.
Metal sheets, Mechanism for stamping large hot. W. A. Lacke. 1,451,879; Apr. 17.
Meter-dial guards, Cleaner for. M. O. Allen. 1,452,018; Apr. 17.
Mice, rat, or other vermin trap. W. Mark and F. J. Parker. 1,452,087; Apr. 17.
Milk boiler. M. Kaniuk. 1,452,344; Apr. 17.
Milking apparatus, Meter for. W. L. Leisge. 1,451,738; Apr. 17.
Milking-machine relay. S. H. Hall. 1,452,153; Apr. 17.
Mill: *See*—
Pulverizing mill.
Mines, Arch support for. R. Novotny. 1,451,840; Apr. 17.
Mixer: *See*—
Drink mixer.
Molds, Means for filling. W. S. Hildebrand. 1,452,381; Apr. 17.
Motion, Mechanism for converting rotary into oscillatory. R. Goldschmidt. 1,452,038; Apr. 17.
Motors, Controller for. C. W. Plehaty. 1,452,472; Apr. 17.
Movement and base therefor, Mechanical. C. F. Henry and J. M. Hulett. 1,452,273; Apr. 17.
Mower, Tractor lawn. W. H. Baldwin. 1,451,807; Apr. 17.
Mowing-machine sickle bars, Attachment for. G. W. Clinkinbeard. 1,451,680; Apr. 17.
Muffler, Exhaust. C. G. Stockton. 1,452,056; Apr. 17.
Musical instruments, Tuning device for stringed. H. O. Hammer. 1,452,075; Apr. 17.
Navigation device, Magnetic gyroscopic. H. L. Tanner. 1,451,928; Apr. 17.
Nest, Hen's. E. A. Baxter. 1,452,141; Apr. 17.
Nickel formate. C. Ellis. 1,452,478; Apr. 17.
Nozzle, Adjustable spray. H. D. Binks. 1,452,264; Apr. 17.
Nut. Lock. H. Ellingson. 1,452,367; Apr. 17.
Nut. Lock. F. S. Hamilton. 1,452,422; Apr. 17.
Oar. A. J. Wiltrout. 1,451,749; Apr. 17.
Oil. Apparatus for refining crude. J. Mayes. 1,451,739; Apr. 17.

Oil burner. F. J. Atkins. 1,452,020; Apr. 17.
Oil burner, Wickless. A. J. Blackford. 1,452,354; Apr. 17.
Oil burner, Nonpreheating. C. Heskett. 1,451,950; Apr. 17.
Oil circulation and oil pressure, Device for indicating the. W. Schwerdtfeger. 1,451,849; Apr. 17.
Oil heater. T. F. Hatton. 1,451,772; Apr. 17.
Oil heater, Portable. R. Hoffman. 1,451,910; Apr. 17.
Oiler, Spring. G. T. Lemelin. 1,452,429; Apr. 17.
Olefines, Segregating. L. C. Stewart. 1,452,322; Apr. 17
Ophthalmic mounting. T. M. Howe. 1,451,696; Apr. 17.
Ophthalmic mounting. F. N. Kreisel. 1,451,785; Apr. 17.
Orchards, Device for preventing frost in. D. Mackenzie. 1,451,994; Apr. 17.
Ores and recovery of copper, Leaching of copper. J. Irving. 1,451,734; Apr. 17.
Ovens, Means for ventilating drying. A. Maehler. 1,451,883; Apr. 17.
Package. W. M. Wheildon. 1,452,100; Apr. 17.
Package, Bumper. G. A. Lyon. 1,451,781; Apr. 17.
Package, Sanitary. M. Crupain. 1,452,456; Apr. 17.
Package, Separable multiple unit bumper. G. A. Lyon. 1,451,780; Apr. 17.
Package, Toilet-article. M. Crupain. 1,452,363; Apr. 17.
Packages, bags, and the like, Apparatus for heaping or piling up. J. C. Thouviot. 1,452,449; Apr. 17.
Packing for steam turbines. C. W. Dake. 1,452,147; Apr. 17.
Packing in combustible material for unsweating the same, Packaging rod. G. C. Jerome. 1,452,159; Apr. 17.
Packing pump. J. J. Cullinan. 1,451,814; Apr. 17.
Pad: *See*—
Desk memorandum pad. Knee pad.
Padlock. F. E. Best. 1,451,860; Apr. 17.
Paper clip and envelope opener, Combined. V. Jacquemin. 1,452,341; Apr. 17.
Paper-cutting machine. L. A. Straubel. 1,452,227; Apr. 17.
Paper, Device for readily fastening together loose leaves of. G. Jobst. 1,451,777; Apr. 17.
Paper shot shell. J. S. Gravely. 1,452,040; Apr. 17.
Paper-testing machine. J. W. Webb. 1,451,932; Apr. 17.
Paper waxing and sizing composition. F. L. Pullen. 1,452,389; Apr. 17.
Paving, Compensating filler for block. R. Lamb. 1,452,120; Apr. 17.
Pen or pencil case. F. J. Kristofek. Des. 62,221; Apr. 17.
Pencil. W. C. Steffen, F. B. Ackermann, and W. J. Greiner. Des. 62,224; Apr. 17.
Pencil sharpener and guard, Combined. F. Williams. 1,452,013; Apr. 17.
Percolator. E. G. Rowley. 1,452,256; Apr. 17.
Phonograph cabinet. J. B. Weeks. 1,452,132; Apr. 17.
Phonograph reproducer. A. B. Rehn. 1,452,004; Apr. 17.
Phonographic apparatus. H. P. Clausen. 1,452,361; Apr. 17.
Photographic-printing machines, Apparatus for positioning the printing plates on the plate holders of. W. C. Huebner. 1,452,078; Apr. 17.
Photographic prints, Device for straightening. C. H. Rise. 1,452,438; Apr. 17.
Photographic-projection printing apparatus. W. C. Huebner. 1,452,077; Apr. 17.
Photography, Two-color. J. K. Holbrook and M. De Francisco. 1,451,774; Apr. 17.
Piano bench and music cabinet, Combined. G. H. Merkel. 1,451,996; Apr. 17.
Piano, Player. W. B. Tunstall. 1,452,174; Apr. 17.
Picker: *See*—
Fruit picker.
Picker sticks, Cushion stop for. A. E. Rhoades. 1,451,845; Apr. 17.
Picture apparatus, Motion-. H. C. Williams. 1,422,101; Apr. 17.
Pile-cutting device. P. A. Wagner. 1,452,285; Apr. 17.
Pile driver, Duplex sheet-. J. Perna. 1,451,922; Apr. 17.
Piling, Hydraulic. H. Abrames. 1,451,753; Apr. 17.
Pipe joint. R. W. Higdon. 1,451,731; Apr. 17.
Pipe bender or elbow former. G. Jones. 1,452,383; Apr. 17.
Pipes, conduits, etc., Coupling for. F. W. Erickson. 1,452,268; Apr. 17.
Pistols, Disjointing device for automatic. N. Pieper. 1,452,000; Apr. 17.
Piston rings, Tool for inserting. R. Lee. 1,452,468; Apr. 17.
Plastic material from casein, Manufacture of solid. F. G. Maries. 1,452,086; Apr. 17.
Plow, Sulky. A. C. Lindgren. 1,452,301; Apr. 17.
Plug for water tube boilers, Safety. B. Hodgson. 1,452,047; Apr. 17.
Plug, Attachment. S. McClatchie. 1,451,704; Apr. 17.
Pneumatic action. A. P. Gustafson. 1,451,980; Apr. 17. Apr. 17.
Pocket iron, Inside. H. C. Brubacker. 1,451,813;
Portable elevator. E. N. Hescock. 1,451,773; Apr. 17.
Post puller. P. C. Madsen. 1,452,205; Apr. 17.
Potash recovery, Accelerating agent in. H. W. Charlton and R. N. Shreve. 1,452,186; Apr. 17.
Powder box. R. W. Oliver. 1,451,955; Apr. 17.
Powder puff. J. E. B. Maillard. 1,452,470; Apr. 17.
Powder-lift drill. H. B. Bozard and C. W. Robinson. 1,452,286; Apr. 17.
Power-transmission arrangement. M. E. Thompson. 1,452,327; Apr. 17.
Press: *See*—
Printing press. Swaging press.
Rotary printing press.
Pressing device. E. Reizenstein. 1,452,095; Apr. 17.
Pressure gauze. W. G. Housekeeper. 1,452,274; Apr. 17.
Pressure gauge. W. A. Ready. 1,452,126; Apr. 17.
Printing press. W. M. Kelly. 1,452,466; Apr. 17.
Printing presses, Inking mechanism for. C. A. Kellogg. 1,452,050–1; Apr. 17.
Printing press, Rotary. A. Terrey. 1,451,721; Apr. 17.
Prop or brace. P. Utter and P. W. Schenck. 1,452,329; Apr. 17.
Puller: *See*—
Beet puller. Post puller.
Pulley-shield device. F. O'Harrow. 1,451,743; Apr. 17.
Pulp thickener, Slime-. C. Allen. 1,452,016; Apr. 17.
Pulverizing mill. R. E. H. Pomeroy. 1,452,218; Apr. 17.
Pump. T. A. Spiker and J. E. Ayres. 1,452,318; Apr. 17.
Pump-actuating mechanism. H. F. Frederick. 1,451,691; Apr. 17.
Pump, Bilge. H. Hanson. 1,452,378; Apr. 17.
Pump, Force. E. J. Bloom. 1,451,861; Apr. 17.
Pump mechanism. P. Ostenberg. 1,452,091; Apr. 17.
Pump, Oil-well. A. A. Olsen. 1,451,784; Apr. 17.
Pumps, Differential governor for boiler feed. C. J. Smith. 1,452,223; Apr. 17.
Punching press and die therefor. B. S. Smith. 1,452,224; Apr. 17.
Rack: *See*—
Dish rack.
Radiotransmitter. V. Bush. 1,452,064; Apr. 17.
Radio variable rheostat. H. W. Tompkins. 1,452,399; Apr. 17.
Rail fastener. C. L. McCray. 1,451,838; Apr. 17.
Rail joint. L. Ekberg. 1,451,766; Apr. 17.
Railway rails, Anticreeper for. W. S. Weston. 1,451,898; Apr. 17.
Railways, Tongue switch and mate for. J. H. Asselin. 1,452,019; Apr. 17.
Railway-traffic-controlling apparatus. F. H. Nicholson. 1,452,214; Apr. 17.
Razor, Safety. G. A. Reiter. 1,452,002; Apr. 17.
Razor stropper. J. H. Payson. 1,451,844; Apr. 17.
Reamer, Expanding. P. Miller. 1,451,741–2; Apr. 17.
Reaming tool. W. Yerxa. 1,452,103; Apr. 17.
Receptacle, Dispensing. J. J. Coogan. 1,451,899; Apr. 17.
Recorder. W. N. McConnel. 1,452,122; Apr. 17.
Refrigerator. E. M. Meyer. 1,451,917; Apr. 17.
Refrigerator construction. H. J. Gwyer. 1,452,271–2; Apr. 17.
Refrigerator, Portable. I. M. Hampton, J. T. and L. J. Decker 1,451,823; Apr. 17.
Refrigerator vehicle. L. B. Olin. 1,452,090; Apr. 17.
Refrigerating apparatus. C. L. Hill. 1,452,461; Apr. 17.
Reel. L. S. Lachman and E. Fulda. 1,451,835; Apr. 17.
Reel. J. Sommer. 1,451,745; Apr. 17.
Regenerator. J. V. Peterka. 1,452,216; Apr. 17.
Register: *See*—
Autographic register.
Register. G. A. Byor. 1,451,761; Apr. 17.
Regulator: *See*—
Locomotive combustion regulator.
Resilient wheel. O. O. Hobson. 1,451,827; Apr. 17.
Resilient wheel. J. L. Donat. 1,452,294; Apr. 17.
Resilient wheel. J. F. Miller. 1,451,706; Apr. 17.
Resinous condensation products, Manufacture of. H. Plauson. 1,451,843; Apr. 17.
Resistance unit, Variable-. W. J. Cameron. 1,451,678; Apr. 17.
Reversing blower kiln. H. D. Tiemann and R. Theien. 1,451,747; Apr. 17.
Rewinding machine. L. A. Straubel. 1,452,228; Apr. 17.
Ring: *See*—
Lug ring.
Road drag. M. Stoffel. 1,452,260; Apr. 17.
Roasting machine. E. A. Bostrom. 1,452,409; Apr. 17.
Rod elevator. C. E. Sitzman. 1,452,127; Apr. 17.
Roll-balancing mechanism. L. Lee. 1,452,347; Apr. 17.
Roll cleaner. F. La Chapelle. 1,451,990; Apr. 17.
Roost, Collapsible. N. Egan. 1,452,366; Apr. 17.
Rope and cable tie. W. J. Flowers. 1,452,338; Apr. 17.
Rubber solution and producing it, Vulcanized-. W. B. Pratt. 1,451,711; Apr. 17.
Sagger-making machines, Blank-transfer mechanism for. F. J. Wolff. 1,452,331; Apr. 17.
Safe and vault protector. W. C. Beckwith. 1,451,974; Apr. 17.
Saw guide and guard, Band-. F. N. Brenner. 1,452,179; Apr. 17.
Saws, Combined molding-setting device for circular. L. Zeuffa. 1,452,233; Apr. 17.
Scale, Weighing. H. Cummer. 1,451,684; Apr. 17.
Screw clamp. K. Kissendorfer. 1,452,384; Apr. 17.
Seat spring. C. F. Green. 1,452,041; Apr. 17.
Seeder boot and shoe. M. Culbertson. 1,452,417; Apr. 17.
Seeds, Apparatus for separating. E. D. Eddy. 1,452,457; Apr. 17.
Separator: *See*—
Centrifugal separator.
Liquid and vapor separator.

Sewing-machine feeding mechanism. A. H. De Voe. 1,452,072; Apr. 17.
Shade fixture, Window-. N. Gugliuzzi. 1,451,947; Apr. 17.
Sharpening device. R. U. Irwin. 1,451,831; Apr. 17.
Sharpening machine, Automatic saw-. E. P. and H. W. Armstrong. 1,452,351; Apr. 17.
Sharpening the blades of safety razors, Apparatus for. C. T. Walker. 1,452,401; Apr. 17.
Sheet metal, Process of and device for drawing bellied objects of. C. Neubeauer. 1,451,998; Apr. 17.
Sheet music and the like, Binding case for holding. J. W. West. 1,452,452; Apr. 17.
Shelf and bracket, Combined. A. F. Carlin. 1,452,144; Apr. 17.
Shift mechanism, Case-. K. A. Lehmann. 1,451,737; Apr. 17.
Ship's cabin. E. Caspary. 1,452,026; Apr. 17.
Ships, Means for governing the rolling of. E. A. Sperry. 1,452,482; Apr. 17.
Shoe last. W. E. Deuttes. 1,452,237; Apr. 17.
Shoe-polishing device. M. J. Moreno. 1,452,386; Apr. 17.
Shoe, Swimming. O. F. Toebron. 1,452,400; Apr. 17.
Shoe uppers, Seam presser for. E. D. Morris. 1,452,251; Apr. 17.
Shoes, Machine for operating upon the soles of. L. A. Casgrain. 1,451,679; Apr. 17.
Shoestring fastener. B. M. Kleim and S. Wald. 1,451,988; Apr. 17.
Shovels and the like, Locking device for power. E. J. Armstrong. 1,451,803; Apr. 17.
Shuttle, Tatting. G. A. Carlson. 1,452,183; Apr. 17.
Sifting machine, Plan. H. Conrad. 1,452,290; Apr. 17.
Sign-flashing apparatus, Electric-. E. L. Ballew. 1,452,178; Apr. 17.
Sign, Variable. R. L. Kilpatrick. 1,451,986; Apr. 17.
Signal: *See*—
Auto signal.
Signal. L. G. Bell and M. Grimm. 1,452,455; Apr. 17.
Signaling systems, Oscillation generator for. J. F. Farrington. 1,452,032; Apr. 17.
Silicate composition. L. Seideman. 1,452,445; Apr. 17.
Silencer. H. A. Freeman. 1,452,035; Apr. 17.
Sinks, Waste fitting for. O. W. Vallier. 1,451,931; Apr. 17.
Sinks, Waste fitting for. H. De Wallace. 1,451,943; Apr. 17.
Slag disposal, Apparatus for furnace. C. G. Hawley. 1,452,045; Apr. 17.
Slicing machine, Meat-. G. Jaquette. 1,451,776; Apr. 17.
Sleigh, Motor. W. A. Horrocks. 1,451,733; Apr. 17.
Socket wrench, Adjustable. I. C. Gellman. 1,451,873; Apr. 17.
Sound box. C. S. Spitzer and J. Gloub. 1,452,319; Apr. 17.
Sound-reproduction article, Molded. E. E. Novotny. 1,451,783; Apr. 17.
Spark plug. F. Aragose. 1,452,177; Apr. 17.
Spark plug. C. A. Propst. 1,452,054; Apr. 17.
Spark plug. F. A. Carter. 1,451,939; Apr. 17.
Spark plugs, Making. G. R. Blodgett, M. E. Cheney and R. T. Hurley. 1,451,677; Apr. 17.
Speed-changing mechanism. F. A. Valentine. 1,451,722; Apr. 17.
Spindle. W. B. Hubbard. 1,451,829; Apr. 17.
Spindle. C. A. Proulx. 1,451,744; Apr. 17.
Spindle-adjusting mechanism, Drill-. R. F. Scott. 1,452,172; Apr. 17.
Spindle, Spinning. H. E. Brunner. 1,452,180; Apr. 17.
Spindle washer, Cap. J. T. Hemingway. 1,452,425; Apr. 17.
Spoon. S. B. Isaacs. 1,452,464; Apr. 17.
Spring: *See*—
Seat spring.
Spring-coiling machine. F. H. Sleeper. 1,452,128; Apr. 17.
Spring-seat construction. L. A. Young. 1,451,935; Apr. 17.
Spring structure. H. O. Heidenbach. 1,451,924; Apr. 17.
Springs, Forming compound. L. A. Young. 1,451,936; Apr. 17.
Springs, Support for vehicle. C. W. Thompson. 1,452,448; Apr. 17.
Sprinkler systems, Dry pipe mechanism for automatic. C. T. Clifford. 1,452,191; Apr. 17.
Stamping machine, Leather-. O. Halvorsen and A. H. Johnson. 1,452,421; Apr. 17.
Station stop device. W. F. Barnard. 1,452,022; Apr. 17.
Statuette. D. J. Morton. Des. 62,230; Apr. 17.
Stay or tab applying machine. C. H. Nitsch, W. A. Weightman, and W. H. Streeper. 1,451,782; Apr. 17.
Stencil. G. J. Evans. 1,451,816–7; Apr. 17.
Stock waterer. H. Terres. 1,452,325; Apr. 17.
Stocking. C. Loven. 1,452,302; Apr. 17.
Stoker, Automatic. R. F. Juengling. 1,452,081; Apr. 17.
Stool, Milking. H. E. Luebker. 1,452,303; Apr. 17.
Stone-surfacing machine. F. J. Gould. 1,452,113; Apr. 17.
Stop mechanism. J. B. Burton. 1,452,357; Apr. 17.
Stop mechanism. A. R. Havener. 1,451,728; Apr. 17.
Stoves, Hot-water attachment for. O. Evenson. 1,452,368; Apr. 17.
Stoves, Safety device for hot-blast. H. P. Howland and F. A. Wiley. 1,452,297; Apr. 17.
Stropper: *See*—
Razor stropper.
Stropping machine. C. E. Smith. 1,451,789; Apr. 17.
Stropping machines, Blade holder for. C. E. Smith. 1,451,790; Apr. 17.
Structures, Load-supporting connection for wheeled. O. L. Adams. 1,452,135; Apr. 17.
Sucker-rod-elevating device. P. G. Kildow. 1,451,700; Apr. 17.
Sulphur, Burning. H. S. Davis. 1,451,763; Apr. 17.
Superheater. W. F. Hills and W. H. Chard. 1,452,382; Apr. 17.
Supporting bracket, Adjustable. J. B. McMullen. 1,451,881; Apr. 17.
Supporting device, Collapsible. C. O. Robinson. 1,451,846; Apr. 17.
Surgical ligature and means for applying the same. J. S. Gómez. 1,452,373; Apr. 17.
Surgical suturing device. J. S. Gómez. 1,452,372; Apr. 17.
Swaging press. K. Böhle. 1,451,756; Apr. 17.
Sweater. L. Strauss. Des. 62,225; Apr. 17.
Sweepers, Gutter-broom arrangement for street. E. R. Martin. 1,452,307; Apr. 17.
Swings, Fan attachment for. H. McGrath. 1,452,385; Apr. 17.
Switch: *See*—
Electric switch.
Switch lock, Railway-. P. Comerford. 1,452,069; Apr. 17.
Syringe, Dental. D. J. Machol. 1,452,085; Apr. 17.
Tag. L. L. Moore and F. W. Radcliffe. 1,452,250; Apr. 17.
Tag. T. I. Hart. 1,452,460; Apr. 17.

Tank. W. H. Starclough. 1,451,967; Apr. 17.
Tank couplings, Making flanged. J. J. Finnigan. 1,452,238; Apr. 17.
Tanks, Water separator for air. E. B. Thatcher. 1,452,447; Apr. 17.
Telephone-exchange system. C. L. Goodrum. 1,452,269; Apr. 17.
Telephone receiver. C. T. Baisley. 1,452,334; Apr. 17.
Telephone substation set. K. S. Johnson. 1,452,277; Apr. 17.
Telephone systems, Signalling apparatus for. M. L. Nelson. 1,451,886; Apr. 17.
Telephone systems, Toll trunking circuits for machine-switching. R. L. Stokely. 1,452,323; Apr. 17.
Telephone trunking system. A. E. Keith. 1,451,912; Apr. 17.
Telephony. H. S. Turner. 1,451,896; Apr. 17.
Tension device. W. C. Meyer. 1,451,918–9; Apr. 17.
Test bench. T. L. Lee. 1,451,992; Apr. 17.
Theaters, Adjustable scene portal in. M. Hasait. 1,452,424; Apr. 17.
Thickening process, Continuous. A. L. Genter and G. C. Jones. 1,452,151; Apr. 17.
Thread-controlling device. A. F. Fifield. 1,452,033; Apr. 17.
Thread doubling and twisting machine, Attachment for. M. F. Hass. 1,451,771; Apr. 17.
Threads of two strands, Interlocking splice for. T. Yamamoto. 1,452,102; Apr. 17.
Tie: *See*—
Rope and cable tie.
Tie plate, Anticreeper. B. L. Cleveland. 1,451,762; Apr. 17.
Tight and loose wheel. J. R. Fleming. 1,451,689; Apr. 17.
Time indicator. C. W. Jaeger. 1,451,983; Apr. 17.
Tire. W. E. Curtis. 1,451,977; Apr. 17.
Tire. F. B. Pfeiffer. 1,452,217; Apr. 17.
Tire and making same, Elastic. J. F. Sipe. 1,452,099; Apr. 17.
Tire boot. L. T. and T. E. Peffer. 1,451,712; Apr. 17.
Tire chain. F. Andraska. 1,452,405; Apr. 17.
Tire chains, Connector link for. I. G. Yoders and J. C. Filby. 1,451,856; Apr. 17.
Tire construction. A. Ancidoni. 1,452,136; Apr. 17.
Tire, Pneumatic. H. S. Rector. 1,452,168; Apr. 17.
Tire, Resilient. J. L. Donat. 1,452,293; Apr. 17.
Tire tread. H. M. Fry. 1,451,820; Apr. 17.
Tire valve. L. P. Strutz. 1,452,324; Apr. 17.
Tire-valve dust cap. T. J. Stephens. 1,451,719; Apr. 17.
Tires, Reenforcing fabric for. T. Branson. 1,451,975; Apr. 17.
Tired wheel, Resilient-. J. T. Jones. 1,452,342; Apr. 17.
Tool. J. E. Harburg. 1,451,727; Apr. 17.
Tool, Hand. H. G. Sommer. 1,451,717; Apr. 17.
Tool holder. C. A. Huestis. 1,452,241; Apr. 17.
Tool holder. F. J. Martin. 1,451,705; Apr. 17.
Tool holder, Adjustable. G. H. Larsson. 1,452,082; Apr. 17.
Toothbrush. J. H. Carter. 1,452,108; Apr. 17.
Toothbrush. S. B. and G. S. Husch. 1,451,775; Apr. 17.
Toothbrush and paste holder. F. H. Clum. 1,451,941; Apr. 17.
Toothbrush, Rotary. C. McLellan. 1,451,993; Apr. 17.
Toy. L. R. Centerbar. 1,452,109; Apr. 17.
Toy, Ball-throwing. J. W. Greenfield and W. Waller. 1,452,459; Apr. 17.
Toy cat. A. Bongirno. Des. 62,214; Apr. 17.

Toy, Educational. G. B. N. E. Hubbard. 1,452,340; Apr. 17.
Toy figure, Dancing. W. H. Balcke. 1,451,805; Apr. 17.
Toy player piano. F. R. Goolman. 1,452,112; Apr. 17.
Toy railway. A. R. Fergusson. 1,452,370; Apr. 17.
Track belt and unit therefor. R. H. White. 1,452,176; Apr. 17.
Tractor. E. H. Belden. 1,452,262; Apr. 17.
Tractor. L. C. Shonts and O. W. Howard. 1,452,283; Apr. 17.
Tractor. L. E. Waterman, H. R. Traphagen, and H. L. Waterman. 1,451,796; Apr. 17.
Tractor, Tracklaying. E. H. Savage. 1,452,171; Apr. 17.
Tractor wheel. K. S. Gingerick. 1,451,769; Apr. 17.
Tractors, Controlling means for. R. J. Stimson. 1,451,927; Apr. 17.
Tractors, Controlling mechanism for. O. W. Howard. 1,452,296; Apr. 17.
Tractors, Steering means for. E. H. Belden. 1,452,263; Apr. 17.
Tractors, Tire structure for. I. F. Kepler and A. A. Robb. 1,452,345; Apr. 17.
Train stop. J. McFarland. 1,451,952; Apr. 17.
Transformer. S. Horelick. 1,452,158; Apr. 17.
Transmission of power, Hydraulic mechanism for the. A. G. M. Michell. 1,451,997; Apr. 17.
Transmission mechanism. G. A. Schacht. 1,452,220; Apr. 17.
Transmission lock. H. F. Kaelble. 1,452,203; Apr. 17.
Transmission systems, Composite ringer for multiplex. L. Espenschied. 1,451,767; Apr. 17.
Transplanting device. H. D. Elliott. 1,452,110; Apr. 17.
Trap: *See*—
Animal trap.
Exterminator trap.
Gopher trap.
Tray-making machine. F. E. Kuster. 1,452,346; Apr. 17.
Trimmer: *See*—
Coal trimmer.
Hedge trimmer.
Trousers holder and press. H. E. Rasmussen. 1,452,437; Apr. 17.
Truck, Elevating. A. D. Lightner and E. Holmes. 1,452,300; Apr. 17.
Truck or wagon body. A. E. Ginther. 1,452,371; Apr. 17.
Truck-steering handles, Holding latch for. R. T. Gifford. 1,451,907; Apr. 17.
Tube: *See*—
Breather tube.
Turnips and other like roots, Machine for raising or digging. A. Smith and W. M. Wood. 1,452,395; Apr. 17.
Typewriter, Folding. C. O. Noack. 1,452,254; Apr. 17.
Typewriters, Device for the use of carbon paper in. S. Carrau and W. R. Cohean. 1,452,414; Apr. 17.
Typewriters, Manifolding attachment for. M. L. Cossitt. 1,451,864–6; Apr. 17.
Typewriters, Manifolding attachment for. M. L. Cossitt. 1,452,193; Apr. 17.
Typewriting and computing machine, Combined. A. G. Kupetz. 1,452,162; Apr. 17.
Typewriting machine. J. A. B. Smith. 1,451,792; Apr. 17.
Universal joint. H. M. Funnell. 1,451,946; Apr. 17.
Unloading device. G. O. Baker. 1,452,021; Apr. 17.
Valve. C. L. Coryell. 1,452,416; Apr. 17.
Valve, Automatic. J. Sandilands. 1,451,895; Apr. 17.
Valve, Automatic liquid. C. C. Hansen. 1,452,155; Apr. 17.
Valve, Automatic safety expansion. J. Müller. 1,452,252; Apr. 17.
Valve cage vise and spring remover. A. B. Seppmann. 1,451,715; Apr. 17.
Valve cap. W. H. Conboy. 1,452,146; Apr. 17.
Valve device, Feed-. J. W. Cloud. 1,452,068; Apr. 17.
Valve for air-brake safety appliances. H. C. Stokes. 1,452,035; Apr. 17.
Valve, Standing. C. M. Berlien. 1,451,676; Apr. 17.
Valves, Locking device for gas. J. J. Dooner. 1,451,944; Apr. 17.
Vaporizer, Electric. L. E. Aske. 1,451,673; Apr. 17.
Vehicle door lock. L. R. Rhein. 1,451,785; Apr. 17.
Vehicle, Occupant-steered. C. Dahl. 1,451,868; Apr. 17.
Vehicle top. A. A. Towers. 1,452,328; Apr. 17.
Vehicle transmission mechanism, Motor-. J. A. Stumpenhorst. 1,451,851; Apr. 17.
Vehicle wheel. C. Dahl. 1,451,867; Apr. 17.
Vehicle wheel. J. B. Harmon. 1,452,423; Apr. 17.
Vehicle wheel. E. Kokko. 1,451,913; Apr. 17.
Vehicles, Display sign for passenger. E. Wotton. 1,452,332; Apr. 17.
Vehicles, etc., Spring suspension for motor. G. P. Allen. 1,452,017; Apr. 17.
Vehicles, Lifter block for motor. B. F. Christ. 1,452,188; Apr. 17.
Vehicles, particularly motor vehicles, Auxiliary spring or shock absorber for. T. H. and B. N. Rodda. 1,452,441; Apr. 17.
Vehicles, Resilient wheels for. J. L. Donat. 1,452,291–2; Apr. 17.
Vehicles, Steering means for drawn. B. R. Bonney, 1,451,757; Apr. 17.
Velocipedes, Front fork for. C. G. Pullin. 1,452,436; Apr. 17.
Velocity indicator. W. S. Pierce, jr. 1,451,923; Apr. 17.
Vending machine, Coin-operated. E. Schultz. 1,451,787; Apr. 17.
Ventilating system. D. G. Roos. 1,452,313; Apr. 17.
Ventilator. T. I. Moen. 1,451,884; Apr. 17.
Vise, Bench. L. P. Biot. 1,452,062; Apr. 17.
Vise, Quick-action. P. H. D. Walker and L. L. Turner. 1,451,724; Apr. 17.
Waistband. M. L. Heller. 1,452,201; Apr. 17.
Wall construction. H. A. Baumhover. 1,452,107; Apr. 17.
Wall foundations, Method of and means for reenforcing. J. A. Youngblood. 1,451,799; Apr. 17.
Washer: *See*—
Cap spindle washer.
Washing and drying machine. H. B. Ross. 1,452,096; Apr. 17.
Washing machine. H. B. Ross. 1,452,097; Apr. 17.
Waste-operating mechanism. O. W. Vallier. 1,451,930; Apr. 17.
Water indicator, Low-. R. L. Scoville. 1,452,173; Apr. 17.
Water-softening apparatus. J. E. Caps. 1,452,288; Apr. 17.
Wedge. E. Wright. 1,451,855; Apr. 17.
Weighing apparatus for loose material, Automatic. G. A. Bruhn. 1,451,759; Apr. 17.
Weighing animals and for indicating dosage, Device for. W. N. Hobbs. 1,451,826; Apr. 17.
Welded steel wheel. E. Fuida. 1,452,036; Apr. 17.
Welding chain links, rings, and the like, Device for. F. W. Bindel. 1,452,023; Apr. 17.
Welding-torch top. E. H. Smith. 1,452,258; Apr. 17.
Well power head, Two-stroke deep-. H. A. Campbell. 1,452,025; Apr. 17.
Well tool. C. A. Samuell. 1,452,444; Apr. 17.
Wells, Method and composition for cementing oil. F. W. Huber. 1,452,463; Apr. 17.
Wells, Valve coupling for tubular. C. L. Savidge. 1,452,004; Apr. 17.
Wheel: *See*—
Bull and calf wheel.
Resilient-tired wheel.
Resilient wheel.
Tight and loose wheel.
Tractor wheel.
Vehicle wheel.
Welded-steel wheel.
Wheel-rim adjuster. W. L. Chambers. 1,451,976. Apr. 17.
Wheel rim, Drive. R. T. Lee. 1,451,991; Apr. 17.
Wheels, Tire-inflating attachment for disk. J. A. Steinmetz. 1,452,284; Apr. 17.
Windshield cleaner. E. Kelber. 1,451,698; Apr. 17.
Windshield pivot. F. M. Edgar, and T. P. Archer. 1,451,978; Apr. 17.
Wire holder, Quiller-. L. T. Houghton. 1,452,119; Apr. 17.
Wood-splitting machine. K. Muksi. 1,452,387; Apr. 17.
Woodworking machines, Attachment for. S. Volkman. 1,452,008; Apr. 17.
Woodworking tools, cutting device for. S. Madsen. 1,451,995; Apr. 17.
Wrench. I. C. Gellman. 1,451,906; Apr. 17.
Wrench. C. M. Jones. 1,452,079; Apr. 17.
Yarn, Apparatus for making asbestos. J. A. Heany 1,451,824; Apr. 17.

CLASSIFICATION OF PATENTS

ISSUED APRIL 17, 1923.

NOTE.—First number=class, second number=subclass, third number=patent number.

2— 9: 1,451,949
23: 1,452,302
130: 1,452,360
142: 1,452,201
149: 1,452,305
4— 24: 1,451,930
35: 1,451,931
1,451,943
5— 16: 1,451,929
29: 1,451,924
1,451,935
112: 1,452,104
8— 19: 1,452,129
9— 17: 1,452,411
21: 1,452,400
25: 1,451,749
10— 79: 1,452,053
12— 32: 1,451,679
141: 1,452,237
15— 21: 1,452,458
23: 1,452,386
25: 1,451,993
87: 1,452,307
167: 1,452,108
194: 1,451,775
222: 1,451,878
255: 1,451,998
17— 14: 1,451,776
24: 1,451,674
1,451,675
18— 53: 1,451,711
1,452,326
19— 65: 1,452,352
1,452,353
95: 1,452,133
139: 1,451,990
145: 1,451,824
20— 1.13: 1,452,426
19: 1,452,306
40: 1,451,778
22— 13: 1,452,245
60: 1,452,490
69: 1,452,246
23— 1: 1,451,763
1,451,786
1,452,145
22: 1,452,185
1,452,186
28: 1,452,027
24— 66: 1,451,777
69: 1,451,856
81: 1,452,415
90: 1,452,052
121: 1,451,998
130: 1,452,338
211: 1,452,150
237: 1,452,405
250: 1,452,341
25— 2: 1,452,331
48: 1,452,152
70: 1,452,438
103: 1,452,381
121: 1,451,714
1,452,247
28— 35: 1,452,161
29— 1: 1,452,446
86.3: 1,451,715
86.4: 1,452,468
87.1: 1,451,708
1,451,852
96: 1,452,062
1,452,241
98: 1,451,705
148: 1,451,891
148.2: 1,452,238
152: 1,452,225
173: 1,451,936
174: 1,452,200
30— 11: 1,452,462
12: 1,452,002
31— 13: 1,452,303
65: 1,452,160
101: 1,452,153
32— 1: 1,451,892

Yeast food. Ward Baking Company. 173,586; Apr. 24.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 24TH DAY OF APRIL, 1923.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

A. P. W. Paper Co. (See Crandell, Willis S. assignor.)
Abbott, Cecil C., Harbor Springs, and W. E., B. L., and I. L. Bassett, Detroit, Mich. Fire escape. 1,452,543; Apr. 24.
Abel, Theodore, Cleveland, Ohio. Furnace-grate structure. 1,452,584; Apr. 24.
Acme Cement Plaster Company. (See Pipe, Edward H., assignor.)
Actien Gesellschaft für Anilin Fabrikation. (See Onnertz, Paul, assignor.)
Adams & Westlake Co., The. (See Hamm, William S., assignor.)
Adams, Benjamin F., Tenafly, N. J., assignor to American Machinery Company, Philadelphia, Pa. Feed for powder in automatic packaging machines. 1,452,585; Apr. 24.
Adkinson, William, Providence, assignor to H. & B. American Machine Company, Pawtucket, R. I. Combined doffer guard and oil-well cover. 1,452,678; Apr. 24.
Advance Machine Company. (See Antoine, Alfred D., assignor.)
Aktiebolaget Kvafveindustri. (See Thorssell, C. T., and Lundén, assignors.)
Aktiengese Uschaft vorm, Adolf Finze & Co. (See Förster, Paul, assignor.)
Aktieselskapet Zink, et. al. (See Ræder, Björn, assignor.)
Allen Manufacturing and Welding Corporation, The. (See Schuman, Frank J., assignor.)
Allen, Will D., Farmington, N. H. Enameling rack. 1,452,821; Apr. 24.
Almquist, Leopold, assignor to American Car and Foundry Company, New York, N. Y. Cane car. 1,452,486; Apr. 24.
Aluminum Manufacturers, Incorporated. (See Norton, Allen B., assignor.)
Aman, Josephine. (See Hartenstein, Willy, assignor.)
American Arch Company. (See Willett, Alfred H., assignor.)
American Can Company. (See Widell, M. E., and Jahr, assignors.)
American Car and Foundry Company. (See Almquist, Leopold, assignor.)
American Car and Foundry Company. (See Auchincloss, William K., assignor.)
American Car and Foundry Company. (See Fischer, Charles C., assignor.)
American Car and Foundry Company. (See Flinn, Christopher, assignor.)
American Car and Foundry Company. (See Hervig, Richard, assignor.)
American Car and Foundry Company. (See Johnson, W. S., and Sheffer, assignors.)
American Car and Foundry Company. (See Ostrander, Allen E., assignor.)
American Car and Foundry Company. (See Rohling, John M., assignor.)
American Car and Foundry Company. (See Scheibli, Robert J., jr., assignor.)
American Car and Foundry Company. (See Willoughby, Victor, assignor.)
American Dan Bottle Seal Corporation. (See Nordstrom, Elof, assignor.)
American District Telegraph Company. (See Hopkins, Richard M., assignor.)
American Machinery Company. (See Adams, Benjamin F., assignor.)
American Radium Appliance Company. (See Savoye, Herbert F., assignor.)
American Telephone and Telegraph Company. (See Conlee, Carlton N., assignor.)
American Telephone and Telegraph Company. (See Potts, Louis M., assignor.)
Amores, Rosa M., Washington, D. C. Detachable and foldable lamp shade. 1,452,773; Apr. 24.
Amsler, Walter O., Pittsburgh, Pa. Annealing furnace or leer. 1,453,116; Apr. 24.
Anaconda Lead Products Company. (See Sperry, Elmer A., assignor.)
Anson, John H., Stirling, N. J. Attachment for typewriting machines. 1,452,822; Apr. 24.
Anderson, George W., St. Louis, Mo. Adjustable droplight support. 1,452,950; Apr. 24.
Anderson, Leonard, H., Bridgeport, Conn. Draw-chuck attachment. 1,453,117; Apr. 24.
Andrea, Agnes L., New York, N. Y., assignor to Nichols Dehydrator Corporation. Apparatus for desiccating food. 1,452,586; Apr. 24.
Andrews, Frederick A., Brooklyn, assignor to The Esmond Mills, New York, N. Y. Blanket or similar article. Des. 62,252; Apr. 24.
Anschutz & Co. (See Schuler, Max, assignor.)
Antoine, Alfred D., assignor to Advance Machine Company, Chicago, Ill. Check-controlled machine. 1,452,721; Apr. 24.
Appel, Fred, et al. (See Webb, Benjamin F., assignor.)
Apple, Vincent G., Dayton, Ohio. Tool for forming insulators. 1,453,118; Apr. 24.
Arvidson, Herman, Minneapolis, Minn. Necktie holder. 1,452,722; Apr. 24.
Atack, Frederick W., Manchester, England, and C. W. Boutar, St. Andrews, Scotland. Intermediates and dyestuffs of the anthraquinone series. 1,452,774; Apr. 24.
Atkins, Charles H., Palmer, assignor to Phoenix Sprinkler Company, Springfield, Mass. Thermostatic valve. 1,452,723; Apr. 24.
Atlas Powder Company. (See Mitscherling, Waldemar O., assignor.)
Atwood, Francis C., Newton, assignor to Kalmus, Comstock & Wescott, Inc., Boston, Mass. Cannula and clamp. 1,452,863; Apr. 24.
Auchincloss, William K., New York, N. Y., assignor to American Car and Foundry Company, St. Louis, Mo. Tank car. 1,452,487; Apr. 24.
Austin Manufacturing Co. (See Liddell, Moses V., assignor.)
Auto Mail Distributer, Inc., The. (See Briggs, Arthur J., assignor.)
Axle Lock Corporation. (See Siegel, Ernest, assignor.)
Bachman, Joseph E. and R. A., Bethlehem, Pa. Chain link. 1,453,088; Apr. 24.
Bachman, Ray A. (See Bachman, Joseph E. and R. A.)
Bacon Bros. Co., The. (See Bacon, Charles F., assignor.)
Bacon, Charles F., assignor to The Bacon Bros. Co., Toledo, Ohio. Rug manufacture. 1,452,776; Apr. 24.
Bacon, Charles J. (See Kraft, F. G., and Bacon.)
Bacon, Chester A., assignor to Bowen Products Corporation, Auburn, N. Y. Lubricating device. 1,452,775; Apr. 24.
Badische Anilin & Soda Fabrik. (See Bosch, C., Dehnel, and Kircher, assignors.)
Badische Anilin & Soda-Fabrik. (See Gaus, W., Meiser, and Eberhardt, assignors.)
Baker, Fenner B., assignor, by mesne assignments, to Superior Hand Embroiderer Corporation, New York, N. Y. Embroidery needle. 1,452,544; Apr. 24.
Baker, John R. (See Neal, George D., assignor.)
Baker, Norman G., Muscatine, Iowa. Holder for photographic paper. 1,452,996; Apr. 24.
Bakken, Ole K., Northwood, N. Dak. Station selector. 1,452,903; Apr. 24.
Balcom, Raymond A., Akron, Ohio. Heating apparatus. 1,452,864; Apr. 24.
Baldwin, Frederic E., Philadelphia, Pa. Carburetor. 1,452,488; Apr. 24.
Balhorn, Hans. (See Herz, R., and Balhorn.)
Ball, Charles M., jr., Loveland, Colo. Coupling for electric-light fixtures. 1,453,233; Apr. 24.
Ball, H. A. (See Salter, Horace E., assignor.)
Band, Stephen W., San Francisco, assignor of one half to W. Hackett, Oakland, Calif. Locking bolt. 1,452,777; Apr. 24.
Banzhaf, Edwin J. (See Wenderhold, William, assignor.)
Barber Asphalt Company, The. (See Miller, John S., jr., assignor.)
Barbet, Emile A., Paris, France. Process and apparatus for the recovery of the vapors of volatile liquids from aeriform mixtures. 1,452,778; Apr. 24.
Barker, George E., Aberdeen, S. Dak. Decoy. 1,452,631; Apr. 24.
Barker, George R., Joliet, assignor to W. E. Pratt, Chicago, Ill. Wrench. 1,452,951; Apr. 24.
Barnes, Albert E., assignor, by mesne assignments, to Kritikson Bros., Inc., Chicago, Ill. Check protector. 1,452,674; Apr. 24.
Barnett, L. C. (See Phelps, Frank, assignor.)
Barnett, William H., Knoxville, Tenn. Sewing machine. 1,452,632; Apr. 24.
Barnett, William H., Knoxville, Tenn. Sewing machine. 1,452,633; Apr. 24.
Barnhurst, Henry G., Allentown, Pa., assignor to Fuller Engineering Company. Pulverized-fuel Furnace. 1,452,952; Apr. 24.

Barr and Stroud, Limited. (See Barr, A., and Stroud, assignors.)
Barr, Archibald, and W. Stroud, assignors to Barr and Stroud, Limited, Glasgow, Scotland. Speed-controlling device. 1,453,119; Apr. 24.
Barry Company. (See Barry, Nicholas, assignor.)
Barry, Nicholas, assignor to Barry Company, Muscatine, Iowa. Water-jet head attachment for button-blank-cutting machines. 1,452,779; Apr. 24.
Basilio, Gennaro, New Haven, Conn. Combined window-shade bracket and curtain-pole support. 1,452,865; Apr. 24.
Bassett, Bert L. (See Abbott, C. C., and Bassett.)
Bassett, Irvin L. (See Abbott, C. C., and Bassett.)
Bassett, Willard E. (See Abbott, C. C., and Bassett.)
Bates, Roy, Nevada, Mo. Bank check and check book. 1,453,234; Apr. 24.
Bates, Roy, Nevada, Mo. Check perforator. 1,453,235; Apr. 24.
Bauer, Carl E., Hammond, Ind. Producing fulcrums. 1,452,489; Apr. 24.
Bauert, William H., Roseville, near Sydney, New South Wales, Australia. Automatic additional air valve for combustion engines. 1,453,236; Apr. 24.
Beard, Lawrence O., Lancaster, Pa. Micrometer calipers. 1,452,780; Apr. 24.
Beaver, Hermann L., Philadelphia, Pa. Steel peb. 1,453,120; Apr. 24.
Becker, Max, Los Angeles, Calif. Auto-windshield attachment. 1,452,904; Apr. 24.
Becket, Frederick M., Niagara Falls, N. Y., assignor to Union Carbide & Carbon Research Laboratories, Inc. Welding rod. 1,452,781; Apr. 24.
Beehler, Elmer G., Yuma, Colo. Automotive test unit. 1,452,905; Apr. 24.
Beisel, William J., Port Richmond, N. Y. Spring wheel. 1,452,782; Apr. 24.
Bell, Benjamin F. T., Taunton, Mass. Wire-insulation cutter and stripper. 1,452,634; Apr. 24.
Bemisderfer, Harvey O., Hammond, Ind., assignor to Central Railway Signal Company, Pittsburgh, Pa. Railway signal torpedo. 1,452,907; Apr. 24.
Beneke & Kropf Mfg. Co. (See Hain, Benjamin T., assignor.)
Benner, Arthur M., Olympia, Wash. Drawer. 1,453,121; Apr. 24.
Benson, Leon C., Philadelphia, Pa. Trombone attachment. 1,453,122; Apr. 24.
Bercioux, Eugene, New York, N. Y. Machine for facing mouthpieces of musical wind instruments. 1,452,953; Apr. 24.
Berninghaus, Eugene, Cincinnati, Ohio. Enameling. 1,452,635; Apr. 24.
Besser, Herman and J. H., Alpena, Mich. Door for mixing machines. 1,452,824; Apr. 24.
Besser, Jesse H. (See Besser, Herman and J. H.)
Beuc, Jacob. (See Mesker, F. Smith, and Beuc.)
Bickett, Leroy M., Watertown, Wis. Mold for rubber mats, etc. 1,453,123; Apr. 24.
Binns, Edward H. and R. H., Pittsburgh, Pa. Shoe-string-holding cuff. 1,453,036; Apr. 24.
Binns, Ralph H. (See Binns, Edward H. and R. H.)
Bishop, Joseph T., Toledo, Ohio. Automobile testing apparatus. 1,452,783; Apr. 24.
Blackall, Robert H., Pittsburgh, Pa., assignor to Ratchet Brake Company. Ratchet-brake mechanism. 1,452,784; Apr. 24.
Blake, Eli J., Buffalo, N. Y., assignor to Gould Coupler Company. Regulating and circuit-controlling apparatus. 1,452,587; Apr. 24.
Blanco, Jose M., Newark, N. J. Vegetable slicer. 1,452,724; Apr. 24.
Blass, Carl J., assignor to The Lakewood Engineering Company, Lakewood, Ohio. Coupling. 1,453,059; Apr. 24.
Bliss, E. W., Company. (See Klocke, William, assignor.)
Bliss, Herbert R., Niagara Falls, N. Y. Sealing fiber shipping cases. 1,452,588; Apr. 24.
Boller, George C. and W. B., Loomis, Calif. Fruit-press crate and cleat-positioning machine. 1,452,866; Apr. 24.
Boller, Warren B. (See Boller, George C. and W. B.)
Borden Company, The. (See Hopkins, Archibald E., assignor.)
Bosch, Carl, Ludwigshafen-on-the-Rhine, E. Dehnel, Rossen, near Marseburg, and C. Kircher, assignors, by mesne assignments, to Badische Anilin & Soda Fabrik, Ludwigshafen-on-the-Rhine, Bavaria, Germany. Conversion of ammonia into ammonium chloride. 1,453,060; Apr. 24.
Bosworth, William G., New York, N. Y. Roller. 1,452,824; Apr. 24.
Bowden, Thomas, Forest City, Pa. Toy vehicle. 1,452,636; Apr. 24.
Bowe, Elbert I., Huron, S. Dak. Fan control for motor vehicles. 1,453,124; Apr. 24.
Bowen Products Corporation. (See Bacon, Chester A., assignor.)
Bowers, Sallie B., Kansas City, Mo. Elbow cuff. 1,452,998; Apr. 24.
Bowie, Clifford P., Berkeley, Calif., and M. J. Gavin, Boulder, Colo. Apparatus for the treatment of naturally-occurring hydrocarbon-containing materials. 1,453,037; Apr. 24.
Boyce, John E., Yonkers, N. Y., assignor to Otis Elevator Company, Jersey City, N. J. Correcting device for floor controllers. 1,452,490; Apr. 24.
Boyd, Charles T., and G. S. Hershey, Columbus, Ohio. Powder puff. 1,453,038; Apr. 24.
Boyd, F. L. (See Minney, Arthur W., assignor.)
Boyle, Elizabeth F. (See Ferris, Nunez C., assignor.)
Brading, Dennis A., Chicago, Ill. Electrolytic cell. 1,452,589; Apr. 24.
Bradley, Joseph B., Miami, Fla. Nail puller. 1,452,545; Apr. 24.
Brandenberger, Jaques E., assignor to La Societe La Cellophane, Paris, France. Production of sensitive films for photographic purposes. 1,452,785; Apr. 24.
Brandt, Harold G. (See McHewitt, W., and Brandt.)
Branston, George W. (See Brewer, F. A., and Branston.)
Brantford Computing Scales Ltd. (See McGregor, James D., assignor.)
Braun, William A., Dover, Ohio, assignor to Dover Manufacturing Company. Pack for electrical heating elements. 1,452,954; Apr. 24.
Bretnayder, Ferdinand C., St. Louis, Mo. Oil burner. 1,453,257; Apr. 24.
Brewer, Frank A., and G. W. Branston; said Brewer assignor of his entire right to F. A. Brewer, jr., Vancouver, British Columbia, Canada. Ball-pulverizing mill. 1,452,786; Apr. 24.
Brewer, Frank A., jr. (See Brewer, F. A., and Branston, assignors.)
Brewer, Frank G., Hunter, N. Dak. Vegetable cutter. 1,452,546; Apr. 24.
Brier, Henry, Dartford, England. Receiver of refrigerating apparatus. 1,452,999; Apr. 24.
Briggs, Arthur J., assignor to The Auto Mail Distributer, Inc., Syracuse, N. Y. Feeding and imprinting mechanism for mail and other units. 1,452,867; Apr. 24.
Briggs, Arthur J., assignor to The Auto Mail Distributer, Inc., Syracuse, N. Y. Mail-distributing apparatus. 1,453,125; Apr. 24.
Brindley, Joseph F., assignor to Hodges Finishing Company, East Dedham, Mass. Cloth-piling machine. 1,452,825; Apr. 24.
Brinkman, Carl F., Milwaukee, Wis. Collapsible coat hanger. 1,453,000; Apr. 24.
Brogger, Ivar W., Newark, N. J., assignor to Standard Electric Manufacturing Company. Electrical measuring instrument. 1,452,590; Apr. 24.
Brogger, Ivar W., Newark, N. J., assignor to Standard Electric Manufacturing Company. Electrical measuring instrument. 1,452,591; Apr. 24.
Brooks, Chester K., Mentor, assignor to The National Malleable Castings Company, Cleveland, Ohio. Shock-absorbing mechanism. 1,452,725; Apr. 24.
Brown, Isaac M., Youngstown, Ohio. Direction indicator. 1,453,237; Apr. 24.
Brown, Max. (See Gleason, Frederick J., assignor.)
Brown, Theodore P., assignor to Simplex Player Action Company, Worcester, Mass. Automatic musical instrument. 1,452,491; Apr. 24.
Brundige, Edward, Chicago, Ill. Vehicle spring. 1,453,061; Apr. 24.
Brunk, Oscar E. W., assignor to J. J. Marx, St. Louis, Mo. Pad for pressing machines. 1,452,726; Apr. 24.
Bryan, William G., Sydney, assignor to T. S. Gurr, P. B. Sheather, Mosman, near Sydney, and C. R. Sweetman, Randwick, near Sydney, New South Wales, Australia. Hub brake for motor vehicles. 1,453,126; Apr. 24.
Bryant, Ralph. (See Richardson, Wilber D., assignor.)
Bryant, Stanley C., Chicago, Ill. Electric-circuit controller. 1,453,089; Apr. 24.
Bundy, Harry W. (See Snell, Samuel A., assignor.)
Bureau d'Organisation Économique. (See Toulon, Pierre M. G., assignor.)
Burt, William H., assignor to The Chase Companies Inc., Waterbury, Conn. Visible spark plug. 1,452,868; Apr. 24.
Busch-Sulzer Bros.-Diesel Engine Company. (See Kägi, Emil, assignor.)
Busch-Sulzer Bros.-Diesel Engine Co. (See Pfeffer, Oscar W., assignor.)
Busenbark, William R., Akron, Ohio. Pneumatic tire. 1,452,787; Apr. 24.
Butler, Obadiah, and A. Morin, Killingly, Conn. Splicing apparatus. 1,452,906; Apr. 24.
Butterworth, Arthur, A. B., jr., and H., Rochdale, England. Multispeed gear for machine tools. 1,453,127; Apr. 24.
Butterworth, Arthur, jr. (See Butterworth, Arthur A., jr., and H.)
Butterworth, Harold. (See Butterworth, Arthur A., jr., and H.)
Buxton, Incorporated. (See Buxton, Warner R., assignor.)
Buxton, Warner R., Longmeadow, Mass., assignor to Buxton, Incorporated. Key-case holder. 1,452,727; Apr. 24.
C. G. Haubold Aktien-Gesellschaft. (See Schnoeckel, Richard, assignor.)
Cable, Elbert E., Portland, Oreg. Surgical table. 1,453,062; Apr. 24.
Calderwood, Earl B., Oakland, Calif. Combination door-knob and ringing device. 1,452,788; Apr. 24.

Call, Ira A. and J. C., New York, N. Y., assignors, by mesne assignments, to The Ideal Automatic Train Control Company, Dover, N. J. Insulated wheel structure. 1,452,547; Apr. 24.
Call, Joseph C. (See Call, Ira A. and J. C.)
Callan, William H., and T. P. Kimman, Cleveland, Ohio, assignors to Chicago Pneumatic Tool Company, New York, N. Y. Piston and crank connection for engines. 1,452,955; Apr. 24.
Camp, William E., Canton, Ohio. Cable connector. 1,453,001; Apr. 24.
Campbell, Robert J., assignor to W. H. Smith, Denver, Colo. Steam cabinet for foods. 1,452,907; Apr. 24.
Campbell, Robert L. (See Mock, George R., assignor.)
Campbell, Sterling H., St. Louis, Mo. Coupling-release rigging. 1,453,002; Apr. 24.
Canter, Vernon C. (See Voress, C. L., and Canter.)
Capouch, Emil, Cicero, Ill. Engine-cranking device. 1,452,592; Apr. 24.
Carek, Charles C., Touhy, Nebr. Portable air-storage tank. 1,452,780; Apr. 24.
Carey, Philip Manufacturing Company, The. (See Kleeman, William, assignor.)
Carithers, James V., and H. J. Williamson, Pomeroy, Wash. Drink mixer. 1,453,128; Apr. 24.
Carol, Charles W., Globe, Ariz. Chicken coop or brooder. 1,452,728; Apr. 24.
Carpenter, Edgar H., Yoakum, Tex. Washer. 1,452,492; Apr. 24.
Caresow, Felix H., Vallejo, Calif. Optical instrument. 1,452,675; Apr. 24.
Carter, William H., et al. (See Webb, Benjamin F., assignor.)
Cash, Arthur W., assignor to H. A. Sellers, Decatur, Ill. Kite. 1,452,956; Apr. 24.
Cattier, Raymond E., Paris, France. Portable folding seat. 1,452,869; Apr. 24.
Central Railway Signal Company. (See Bemisderfer, Harvey O., assignor.)
Century Machinery Corporation. (See Schmelzer, Anton C., assignor.)
Chalmers, John, Vancouver, British Columbia, Canada. Hot-air furnace. 1,453,063; Apr. 24.
Chase Companies Inc., The. (See Burt, William H., assignor.)
Chase, Horace B., jr., Paris, France. Fly for fly fishing and similar uses. 1,452,593; Apr. 24.
Chemical Machinery Corporation. (See Field, Crosby, assignor.)
Chicago Manufacturing and Distributing Co. (See Sultemeyer, Charles F., assignor.)
Chicago Pneumatic Tool Company. (See Callan, W. H., and Kimman, assignors.)
Chicago Pneumatic Tool Company. (See Pritchard, Charles A. G., assignor.)
Chinsky, Harry H., and E. Honstetter, Brooklyn, N. Y. Spark plug. 1,453,039; Apr. 24.
Clark, John. (See Hood, J. J., and Clark.)
Clark, Percy G. (See Hood, J. J., and Clark.)
Claude, Georges, assignor to Societe l'Air Liquide Societe Anonyme pour l'Etude et l'Exploitation des Procedes Georges Claude, Paris, France. Thermally-insulated apparatus and insulating the same. 1,452,594; Apr. 24.
Claupin, Wilhelm F., Attleboro, Mass. Swimming device. 1,452,790; Apr. 24.
Cleveland Tractor Company, The. (See Savage, Edwin H., assignor.)
Cole, Clifford E., Birmingham, Ala. Hot-water-tank heater. 1,452,676; Apr. 24.
Colette, George A., Blanchard, Wash. Automobile polish. 1,453,003; Apr. 24.
Collins, Charles H., West Albany, N. Y. Tube frame for Axminster looms. 1,452,791; Apr. 24.
Collion, Nicholas, Milwaukee, Wis. Gear-shift lock. 1,453,004; Apr. 24.
Colpitts, Edwin H., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. High-frequency signaling. 1,452,957; Apr. 24.
Columbian Rope Company. (See Kinney, John J., assignor.)
Colvin, Milton N., Komoka, Ontario, Canada. Spoke grip. 1,452,908; Apr. 24.
Commonwealth Steel Company. (See Pflager, Harry M., assignor.)
Commonwealth Steel Company. (See Westlake, Charles T., assignor.)
Comlee, Carlton N., Chicago, Ill., assignor to American Telephone and Telegraph Company. Manhole-platform support. 1,452,548; Apr. 24.
Conlon, Walter J., Oak Park, Ill. Clutch for washing machines. 1,453,129; Apr. 24.
Connelly, Joseph I., Chicago, Ill. Burglar alarm. 1,452,595; Apr. 24.
Conner, Ralph L., Wilmington, Del. Floor planers. 1,452,493; Apr. 24.
Conrader, Rudolph, Erie, Pa. Apparatus for treating oils from flowing wells. 1,452,549; Apr. 24.
Considine, Daniel T., Watertown, Mass. Crate. 1,453,005; Apr. 24.
Coolidge, Karl R. (See Whitcomb, R. F., and Coolidge.)
Cooper, Thomas S., jr., Charleston, W. Va., assignor to Kooper Damper Co., Philadelphia, Pa. Automatic damper. 1,452,792; Apr. 24.
Corwin, Howard D. (See Fox, W. R., and Corwin.)
Court, Frank T., Walker, Iowa. Distant control for tractors. 1,453,130; Apr. 24.
Covelle, Albert E., West Medford, Mass. Adjusting glasses, spectacles, and the like. 1,452,909; Apr. 24.
Cowles, C., and Company. (See Hart, Franklin H., assignor.)
Crandell, Willis S., Elsmere, assignor to A. P. W. Paper Co., Albany, N. Y. Paper-making machine. 1,453,090; Apr. 24.
Crawford, McGregor and Canby Company, The. (See Mattern, George W., assignor.)
Creed, Frederick G., Croydon, England. Telegraphic receiving apparatus. 1,452,793; Apr. 24.
Creed, Frederick G., Croydon, England. Telegraphic receiving apparatus. 1,452,794; Apr. 24.
Crouse-Hinds Company. (See Olley, Edwin A., assignor.)
Crozier, Alfred O., assignor to Crozier-Straub, Inc., New York, N. Y. Machine for making cementitious articles. 1,453,040; Apr. 24.
Crozier-Strab, Inc. (See Crozier, Alfred O., assignor.)
Crucet, Joseph M., New York, N. Y. Electric-lamp shade. Des. 62,231; Apr. 24.
Curran, Edward T., Detroit, Mich. Radiator for airplane engines. 1,452,958; Apr. 24.
Cutler-Hammer Mfg. Co., The. (See Stevens, William C., assignor.)
Cutler-Hammer M'f'g Co., The. (See Yerger, Charles W., assignor.)
Czarnecki, Wladyslaw. (See Murphy, T. W., and Czarnecki.)
Dahl, Thure, New York, N. Y. Light receptacle for lighting fixtures. Des. 62,232; Apr. 24.
Dalits, Harry, Cleveland, Ohio. Sink strainer. 1,452,494; Apr. 24.
Daniels, Eugene O., Toledo, Ohio. Gas and vapor burner. 1,452,826; Apr. 24.
Danson, Willa, San Leandro, Calif. Statuette. Des. 62,253; Apr. 24.
Danziger, Abraham, New York, N. Y. Sheet guard for platen presses. 1,453,064; Apr. 24.
Davidson, Louis, New York, N. Y. Reenforcement for reenforced-concrete flat-slab construction. 1,452,677; Apr. 24.
Davies, Thomas M., Llanelly, Wales. Tire-inflating pump. 1,452,870; Apr. 24.
Day, Emory C., Laguna Beach, Calif. Lighting means for surgical and other purposes. 1,453,006; Apr. 24.
Daylight Film Corporation. (See John, Robert, assignor.)
Dayton-Wright Company. (See Jacobs, James M. H., assignor.)
De Boer, Ralph, Sheldon, Iowa. Four-horse evener. 1,452,729; Apr. 24.
De Fernelmont, Leon, Paterson, N. J. Tire tool. 1,452,596; Apr. 24.
De Forest, Lee, New York, N. Y. Telephone device. 1,452,827; Apr. 24.
Dehnel, Erich. (See Bosch, C., Dehnel, and Kircher.)
De Hooydonck, Henry, Biarritz, France. Wheel with improved pneumatic tire for motor vehicles. 1,452,795; Apr. 24.
Deitz, Frank W., Cleveland, Ohio. Adjustable spacing tool. 1,452,828; Apr. 24.
De La Mare, Thomas, Tooele, Utah. Culvert. 1,452,796; Apr. 24.
De Laval Separator Company, The. (See Hapgood, Cyrus H., assignor.)
Delbare, Hector E., Chicago, Ill. Means for extinguishing fire. 1,453,091; Apr. 24.
Detroit Hoist and Machine Company. (See Martin, Henry F., assignor.)
Detroit Stamping Company. (See Roberts, William H., assignor.)
Deutsche Werke Aktiengesellschaft. (See Retterath, Valentin, assignor.)
De Vries, John, assignor to Phillips & Clark Stove Co., Inc., Geneva, N. Y. Convertible one-pipe furnace. 1,452,637; Apr. 24.
Di Dio, Giuseppe, New York, N. Y. Shoe heel. 1,452,959; Apr. 24.
Diebold Safe & Lock Company, The. (See Miller, C. H., and Scott, assignors.)
Dienst, Karl, Charlottenburg, near Berlin, Germany. Sterilizing flour and grits made from cereals. 1,452,871; Apr. 24.
Dilas, Harry, Bay City, Mich. Apparatus for removing the division plate from ice-cream receptacles. 1,452,678; Apr. 24.
Ditcham, William T., Twickenham, England, assignor to Radio Corporation of America, New York, N. Y. Wireless transmitter. 1,452,960; Apr. 24.
Dodge Brothers. (See Goddard, George E., assignor.)
Donaldson, George A., Girard, Ill. Display easel. 1,453,238; Apr. 24.
Donauer, Max, assignor to The Elyria Enameled Products Company, Elyria, Ohio. Condenser. 1,453,041; Apr. 24.
Dornier, Claudius, Friedrichshafen, near Berlin, assignor of one-half to Dornier-Metallbauten, Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Gutiform section. 1,452,961; Apr. 24.
Dornier-Metallbauten, Gesellschaft mit beschränkter Haftung. (See Dornier, Claudius, assignor.)
Dorsey, Philip H., Algiers, La. Cushion wheel. 1,453,092; Apr. 24.

Dostal, Leo, Kladno, Czechoslovakia. Pedestal. 1,453,239; Apr. 24.
Dover Manufacturing Company. (See Braun, William A., assignor.)
Dowd, Patrick, Brooklyn, N. Y. Motor-vehicle alarm. 1,453,240; Apr. 24.
Draper Corporation. (See Rhoades, Alonzo E., assignor.)
Drees, Andrew A., assignor of one-half to P. B. Rohner, Lewistown, Mont. Air-brake-release valve. 1,452,495; Apr. 24.
Dremel, Albert J., Racine, Wis. Motor-driven lawn mower. 1,452,730; Apr. 24.
Dudley, William H. C., Americano, Ga. Stereopticon device. 1,452,797; Apr. 24.
Duffield, Archibald. Derby, Conn. Toy furniture. 1,453,241; Apr. 24.
Dugan, John F., assignor to Laird, Schober and Co., Philadelphia, Pa. Process and machine for making rands. 1,453,042; Apr. 24.
Duncan, David C., Duluth, Minn. Portable gas generator. 1,452,731; Apr. 24.
Du Pont, E. I., de Nemours & Company. (See Kraft, F. G., and Bacon, assignors.)
Dutcher, Frank, Los Angeles, Calif. Window construction. 1,452,732; Apr. 24.
Dyer, Robert J., Oakland, Calif. Kiln. 1,452,638; Apr. 24.
Eaton, Fred A., South Stukely, Quebec, Canada. Mop wringer. 1,452,798; Apr. 24.
Eberhardt, Ernst. (See Gaus, W., Meiser, and Eberhardt.)
Edison, Thomas A., jr., Orange, N. J. Air auxiliary supply means for internal-combustion engines. 1,452,829; Apr. 24.
Ehrbar, George C., Cleveland, Ohio. Furnace grate. 1,453,093; Apr. 24.
Eichenberger, Walter O., Gray, Saskatchewan, Canada. Grain-shocking machine. 1,453,242; Apr. 24.
Eichhorn, Joseph, Columbia, Pa. Adjustable garment. 1,453,243; Apr. 24.
Ellis, Robert H., and F. Simper, Fremantle, Western Australia, Australia. Packing case. 1,453,094; Apr. 24.
Elyria Enameled Products Company. (See Donauer, Max, assignor.)
Emerson, Victor H., New York, N. Y., assignor, by mesne assignments, to Metal Recording Disc Company, Inc. Producing phonograph records. 1,452,872; Apr. 24.
Emmons, Harry H., Alliance, Ohio. Valve. 1,452,962; Apr. 24.
Engle, Paul, et al. (See Webb, Benjamin F., assignor.)
Engstrand, John C., Chicago, Ill. Piston pin. 1,453,095; Apr. 24.
Erhardt, Joseph, Chicago, Ill. Hydraulic lifting jack. 1,453,043; Apr. 24.
Erickson, Edward, Fresno, Calif. Letter file. 1,453,096; Apr. 24
Ericson, Emile, Pelham, and R. Weiss, New York, N. Y., assignors to The Pennsylvania Textile Mills Inc., Glen Riddle, Pa. Textile fabric. Des. 62,254; Apr. 24.
Erpenbeck, Theodore C., Chicago, Ill. Belt buckle. 1,452,799; Apr. 24.
Eschholz, Otto H., Williamsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company. Circuit interrupter. 1,452,530; Apr. 24.
Esmond Mills, The. (See Andrews, Frederick A., assignor.)
Euphrat, Theophile, Mount Vernon, N. Y. Shade holder. 1,453,099; Apr. 24.
Eve, Percy N. (See Harris, Arthur, assignor.)
Eyr Klean Seat Pad Co. (See Loesch, John J., assignor.)
Fairbanks, Morse & Co. (See Heath, William C., assignor.)
Fairchild, Roland J., assignor to National Water Lift Co., Kalamazoo, Mich. Power pump. 1,452,963; Apr. 24.
Falkenau, Arthur, assignor to Gillis & Geoghegan, New York, N. Y. Hoisting mechanism. 1,452,964; Apr. 24.
Fargo, Charles R., assignor to Wilson-Jones Loose Leaf Company, Chicago, Ill. Combined stand and binder and method of use. 1,453,065; Apr. 24.
Fargo, Charles R., assignor to Wilson-Jones Loose Leaf Company, Chicago, Ill. Binder-locking mechanism. 1,453,066; Apr. 24.
Feiske, Gustave H., Cleveland, Ohio. Universal taper protractor. 1,453,067; Apr. 24.
Ferguson, Milford B., and E. Haas, Brooklyn, N. Y. Label-affixing apparatus. 1,452,830; Apr. 24.
Ferrara, Vincent, Watertown, S. Dak. Apparatus for drying clothes. 1,452,496; Apr. 24.
Ferris, Nunez C., assignor to E. F. Boyle, Brooklyn, N. Y. Apparatus for winding music rolls. 1,452,965; Apr. 24.
Field, Crosby, Yonkers, assignor to Chemical Machinery Corporation, New York, N. Y. Agitator. 1,452,966; Apr. 24.
Fischer, Charles C., Bloomfield, N. J., assignor to American Car and Foundry Company, N. Y. Pipe clamp for steam coils. 1,452,497; Apr. 24.
Fisher, Henry W., Perth Amboy, N. J. Retriever for golf balls. 1,452,679; Apr. 24.
Fitz Gerald, Harold G., Los Angeles, Calif. Lamp. 1,453,044; Apr. 24.
Flagler, Louis B., Butte, Mont. Saw clamp. 1,452,551; Apr. 24.
Flegal, Lorin. Mount Williams, Va. Manifold heater. 1,453,007; Apr. 24.
Fletcher, Elmer, assignor to Fletcher-Wickes Co., Chicago, Ill. Sound box. 1,452,498; Apr. 24.
Fletcher-Wickes Co. (See Fletcher, Elmer, assignor.)
Flinn, Christopher, Milton, Pa., assignor to American Car and Foundry Company, New York, N. Y. Straightening sheet metal. 1,452,499; Apr. 24.
Foley, Charles B., Bristol, Conn., assignor to Charles B. Foley, Inc., New York, N. Y. Multiple-unit induction furnace. 1,453,097; Apr. 24.
Foley, Charles B., Inc. (See Foley, Charles B., assignor.)
Foote, Leonard, Pedro Miguel, Canal Zone, Panama. Gauge. 1,453,222; Apr. 24.
Forsman, Stanton W., Los Angeles, assignor to The Paraffine Companies, Inc., San Francisco, Calif. Croze ring for barrels. 1,453,068; Apr. 24.
Förster, Paul, assignor to Aktiengesellschaft vorm. Adolf Finze & Co., Nuremberg, Germany. Chuck jaw. 1,453,045; Apr. 24.
Fourniaud, Léon J. B., Marseille, France. Rim for wheels of vehicles. 1,452,831; Apr. 24.
Fourniaud, Léon J. B., Marseille, France. Rim for wheels of vehicles. 1,452,832; Apr. 24.
Fowler, Adele. (See Riethmiller, O. C., and Fowler.)
Fox Machine Company. (See Fox, W. R., and Corwin, assignors.)
Fox, William R., and H. D. Corwin, assignors to Fox Machine Company, Jackson, Mich. Multiple-drilling machine. 1,453,008; Apr. 24.
Foxon, Horace M., Brockton, assignor to Lapworth Webbing Company, Stoughton, Mass. Spiral puttee. 1,452,680; Apr. 24.
Franklin Railway Supply Company. (See Woodard, William E., assignor.)
Frear, Leo J., Ithaca, N. Y. Sanitary seat cover. 1,452,552; Apr. 24.
Freedman, Louis A., New York, N. Y. Closure for tubes. 1,452,967; Apr. 24.
Freeman Manufacturing Co. (See Freeman, Michael N., assignor.)
Freeman, Michael N., assignor to Freeman Manufacturing Co., Racine, Wis. Pump-operating mechanism. 1,452,968; Apr. 24.
French, George M., Chicago, Ill. Boat-hull construction. 1,453,223; Apr. 24.
Fried. Krupp Aktiengesellschaft. (See Schön, Ludwig, assignor.)
Fried. Krupp Aktiengesellschaft. (See Thun, Hermann, assignor.)
Fritsche, Wenzel, New York, N. Y. Apparatus for automatically focusing multiple-exposure cameras. 1,452,833; Apr. 24.
Frock, Oscar J., Wilmington, Del. Pressure equaliser for hydraulic brakes. 1,453,098; Apr. 24.
Fuchs, Ernest, Paris, assignor to L. Renault, Billancourt, Department of Seine, France. Measuring instrument. 1,452,834; Apr. 24.
Fujimoto, Motozo, and T. Okawa, Portland, Oreg. Auto signal. 1,452,681; Apr. 24.
Fulgora, Fred, Pittsburgh, Pa. Calculating device. 1,453,100; Apr. 24.
Fuller Engineering Company. (See Barnhurst, Henry G., assignor.)
Gabke, John S., Wilmington, Del. Toy vehicle. 1,453,046; Apr. 24.
Gable, Charley, et al. (See Richards, Jesse D., assignor.)
Galerman, Benjamin, Philadelphia, Pa. Burglar-alarm apparatus. 1,452,500; Apr. 24.
Galoppa, Jerry. (See Ugnon, C., Galoppa, and Saldarini.)
Ganz, William, Chicago, Ill. Lock for steering gears. 1,453,256; Apr. 24.
Gardner, Henry A., Washington, D. C. Dechlorinated chlorinated-glycerides and derivatives therefrom. 1,452,553; Apr. 24.
Gardner, Samuel L., Cedar Rapids, Iowa. Auxiliary tie rod. 1,452,554; Apr. 24.
Garlock, William H., Seattle, Wash. Surgical apparatus. 1,452,733; Apr. 24.
Garrigue, William, & Company. (See Sanger, Walter E., assignor.)
Gasoline Recovery Corporation. (See Voress, C. L., and Canter, assignors.)
Gasser, Joseph, Trenton, N. J. Combined high-hoist and dump wagon. 1,452,501; Apr. 24.
Gaus, Wilhelm, W. Meiser, and E. Eberhardt, assignors to Badische Anilin- & Soda-Fabrik, Ludwigshafen-on-the-Rhine, Germany. Manufacture of urea. 1,453,069; Apr. 24.
Gavin, Martin J. (See Bowie, C. P., and Gavin.)
Gewerkschaft Hausbach II. (See Weber, Wilhelm, assignor.)
Geyer, Edgar, Silver Creek, Nebr. Detachable, swinging, washboiler apron. 1,452,682; Apr. 24.
Gifford, Xenas A., Lockport, N. Y. Sign exhibit. 1,452,873; Apr. 24.
Giles, John W., Greenville, S. C. Yarn let-off connection. 1,453,101; Apr. 24.
Gillenwater, Jesse D., et al. (See Richards, Jesse D., assignor.)
Gillis & Geoghegan. (See Falkenau, Arthur, assignor.)
Ginger, Henry, Waltham Cross, England. Heating and lighting radiator. 1,452,800; Apr. 24.
Gissler, August, New York, N. Y. Brush. 1,452,502; Apr. 24.

Gleason, Frederick J., Cambridge, assignor of one-half to M. Brown, Boston, Mass. Making brake linings and the like. 1,452,555; Apr. 24.
Goddard, George E., assignor to Dodge Brothers, Detroit, Mich. Demountable wheel. 1,452,597; Apr. 24.
Goldman, William L., Los Angeles, Calif. Mechanical toy. 1,452,835; Apr. 24.
Good Inventions Co. (See Good, John, assignor.)
Good, John, assignor to Good Inventions Co., Brooklyn, N. Y. Engine-fuel vaporizer. 1,452,683; Apr. 24.
Goodchild, Walter, Oakland, assignor to "Nipa" Incorporated, Hoboken, N. J. Manufacture of capillary containers and dispensers. 1,452,801; Apr. 24.
Goode, William W., Arlington, Ala. Powder duster. 1,453,102; Apr. 24.
Goodman Manufacturing Company. (See Packer, Glenn W., assignor.)
Goodrich, B. F., Company, The. (See Pigeon, Ernest A., assignor.)
Gorendo, Oscar W., Buffalo, N. Y. Chatterless lug and pedal-shaft support. 1,452,910; Apr. 24.
Gott, Arthur E., Southall, England. Gyroscopic compass. 1,453,103; Apr. 24.
Gould Coupler Company. (See Blake, Eli J., assignor.)
Gray, Hiram C., Bucyrus, Ohio. Sash fastener. 1,452,596; Apr. 24.
Gray, Malcolm E., assignor to Rochester Can Company, Rochester, N. Y. Pail. Des. 62,233; Apr. 24.
Gray, Percy W., assignor to Vickers Limited, Westminster, London, England. Apparatus for use in the laying or sighting of ordnance. 1,453,104; Apr. 24.
Gregg, William H. (See Hachmann, Frederick, assignor.)
Gresczsuk, Joseph, Brooklyn, N. Y. Automobile tire. 1,453,224; Apr. 24.
Grid-Iron-Grip Company. (See Slauson, Louis E., assignor.)
Grieger, Edward, Philadelphia, Pa. Stop device for talking machines. 1,453,131; Apr. 24.
Griesche, Gustav, Berkeley, Calif. Rock drill. 1,452,734; Apr. 24.
Griggs, Victor R. (See Morton, William R., assignor.)
Gronsdahl, Martin, Congress, Saskatchewan, Canada. High chair. 1,452,911; Apr. 24.
Grove, Elias H. (See Jenness, Frank C., assignor.)
Grubb, William B., Philadelphia, Pa. Lock. 1,452,503; Apr. 24.
Gruss, Walter C., Pittsburgh, Pa. Bootjack. 1,453,105; Apr. 24.
Guckert, Edward N., Toledo, Ohio. Stringed musical instrument. Des. 62,235; Apr. 24.
Gumz, Johann H. (See Mackey, F. C., and Gumz.)
Gurr, Thomas S., et al. (See Bryan, William G., assignor.)
H. & B. American Machine Company. (See Adkinson, William, assignor.)
Haas, Edward. (See Ferguson, M. B., and Haas.)
Hachmann, Frederick, assignor to W. H. Gregg, St. Louis, Mo. Metal book cover. 1,452,802; Apr. 24.
Hackett, William. (See Band, Stephen W., assignor.)
Hackworth, Alfred and J., Ironton, Ohio. Car-controlling mechanism. 1,452,556; Apr. 24.
Hackworth, Jesse. (See Hackworth, Alfred and J.)
Hadley, Carrie B. (See Hadley, Walter B., assignor.)
Hadley, Walter B., assignor to C. B. Hadley, Grand Rapids, Mich. Baker's implement. 1,452,504; Apr. 24.
Hain, Benjamin T., Chicago, Ill., assignor to Beneke & Kropf Mfg. Co. Hinge. 1,453,106; Apr. 24.
Hames, Harry C., assignor to F. O. Schoedinger, Columbus, Ohio. Roof lug. 1,452,599; Apr. 24.
Hamilton, David, Greensburg, Pa. Glass facing. 1,452,684; Apr. 24.
Hamm, Wesley, Dolgeville, N. Y. Handle for baskets, satchels, and like containers. 1,453,107; Apr. 24.
Hamm, William S., Hubbard Woods, Ill., assignor to The Adams & Westlake Co. Door. 1,452,685; Apr. 24.
Hammond, Myron B. (See Taylor, H. H., and Hammond.)
Hamre, Henry O. (See Starks, Ray S., assignor.)
Hapgood, Cyrus H., Nutley, N. J., assignor to The De Laval Separator Company, New York, N. Y. Actuating means for milking-machine pulsators. 1,452,600; Apr. 24.
Hardie, James, and Company Limited. (See Newman, John G., assignor.)
Harklow, Hans H. H., Freeport, N. Y. Derrick. 1,453,108; Apr. 24.
Harman, Ferrin C. (See Harman, Henry and F. C.)
Harman, Henry, and F. C., Custer City, Okla. Antidrip pump. 1,452,686; Apr. 24.
Harmer, Joseph P. (See Hussey, Lindley M., assignor.)
Harpham, Julius C., Lincoln, Nebr. Harness rosette. Des. 62,255; Apr. 24.
Harpham, Julius C., Lincoln, Nebr. Harness rosette. Des. 62,256; Apr. 24.
Harris & Wolfrey. (See Harris, Luther E., assignor.)
Harris, Arthur, Romford, assignor of one-half to P. N. Eve, Upminster, England. Racket for tennis and like games. 1,452,803; Apr. 24.
Harris, Luther E., Philadelphia, Pa., assignor to Harris & Wolfrey. Buffer block. 1,453,225; Apr. 24.
Harroun, Ray, Detroit, Mich. Tractor. 1,452,557; Apr. 24.
Hart, Franklin H., assignor to C. Cowles and Company, New Haven, Conn. Curtain roller. 1,422,874; Apr. 24.
Hartenstein, Willy, Darmstadt, Germany, assignor to J. Aman, Rutherford, N. J. Plow for planting potatoes. 1,452,912; Apr. 24.
Hartup, Frank E., assignor of one-half to W. M. Kunkel, Indianapolis, Ind. Device for turning music. 1,452,804; Apr. 24.
Harvey, Gerald H., Cincinnati, Ohio. Vehicle lighting device. 1,453,226; Apr. 24.
Hathaway, Robert W., assignor of one-half to H. Powell, Springfield, Ohio. Cistern. 1,453,109; Apr. 24.
Hawley, James H., Stockbridge, Mich. Transmission control. 1,452,505; Apr. 24.
Haworth, Henry G., assignor of one-half to B. F. Samuels, Leavenworth, Kans. Street-sweeping machine. 1,452,735; Apr. 24.
Healy, George E., Buffalo, N. Y. Street safety zone. 1,452,875; Apr. 24.
Heath, William C., Beloit, Wis., assignor to Fairbanks, Morse & Co., Chicago, Ill. Ignition system for combustion engines. 1,452,601; Apr. 24.
Hebbard, Charles C., assignor of one-third to E. H. Shackelford and one-third to O. Ruhl, Joplin, Mo. Concentrating table. 1,452,969; Apr. 24.
Heinemann, Karl, Heidenau, Germany. Recovery of pure alkalies from impure lyes. 1,453,132; Apr. 24.
Heinse, John O., Lakeland, Fla. Lathe tool. 1,453,133; Apr. 24.
Heinse, John O., Lakeland, Fla. Tractor. 1,453,134; Apr. 24.
Hemleb, Martin, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Embroidering attachment for sewing machines. 1,452,687; Apr. 24.
Hemsley, George T., Lawrence, Mass. Top screw for gill-drawing frames. 1,453,009; Apr. 24.
Hemsley, George T., Lawrence, Mass. Cam for gill boxes. 1,453,010; Apr. 24.
Henry, Rutherford M. (See Smith, George M., assignor.)
Henting, Charles J., Milwaukee, Wis. Luggage carrier and tire rack. 1,452,970; Apr. 24.
Herman Pneumatic Machine Company. (See Ringle, Robert F., assignor.)
Hermanson, August L., Nome, Alaska. Floating fish trap. 1,453,135; Apr. 24.
Herr, Herbert T. Merion, Pa., assignor to Westinghouse Electric and Manufacturing Company. Turbine-blade fastening. 1,452,602; Apr. 24.
Hershey, George S. (See Boyd, C. T., and Hershey.)
Hervig, Richard, Chicago, Ill., assignor to American Car and Foundry Company, New York, N. Y. Cam chuck for centering valves. 1,452,506; Apr. 24.
Hervig, Richard, Chicago, Ill., assignor to American Car and Foundry Company, New York, N. Y. Rivet sets. 1,452,507; Apr. 24.
Hervig, Richard, Chicago, Ill., assignor to American Car and Foundry Company, New York, N. Y. Machine for grinding valves. 1,452,508; Apr. 24.
Hervig, Richard, Chicago, Ill., assignor to American Car and Foundry Company, New York, N. Y. Grinding machine. 1,452,509; Apr. 24.
Herz, Richard, Frankfort-on-the-Main, and H. Balhorn, Hochst-on-the-Main, Germany, assignors to Leopold Cassella & Co., Gesellschaft mit beschränkter Haftung. Dyestuffs containing sulphur and dyeing vegetable fibers without a mordant and making same. 1,452,805; Apr. 24.
Heydt, Johannes. (See Ruperti, Henri, assignor.)
Heyser, John A., Los Angeles, Calif. Brake. 1,452,736; Apr. 24.
Hird, Charles, Hartford, Conn., assignor to S. K. F. Ball Bearing Company. Chuck. 1,453,110; Apr. 24.
Hill, Frederick M., Chicago, Ill. Signaling device. 1,452,737; Apr. 24.
Hill, W. A. (See Kaufmann, Florence A., assignor.)
Himes, Howard P., Detroit, Mich. Bearing. 1,452,603; Apr. 24.
Hitchcock, Walter E., Blanchard, Iowa. Culvert. 1,453,136; Apr. 24.
Hoberg, William J., Jersey City, N. J. Abrasive device. 1,452,738; Apr. 24.
Hobson, Bennett D., Richmond, Va. Device for extricating mud-stalled vehicles. 1,453,011; Apr. 24.
Hockins, Charles C., Rochester, N. Y. Humidifier. 1,453,137; Apr. 24.
Hodes, Frank E., Denver, Colo. Carboy. 1,452,971; Apr. 24.
Hodges Finishing Company. (See Brindley, Joseph F., assignor.)
Hollenbeck, Paul V., New York, N. Y., assignor to International Paper Company. Mechanism for measuring cubic contents of bodies. 1,453,112; Apr. 24.
Hollenbeck, Paul V., New York, N. Y., assignor to International Paper Company. Mechanism for measuring the cubic contents of bodies. 1,453,111; Apr. 24.
Holliday, Custer B., Charleston, W. Va. Socket. 1,453,138; Apr. 24.
Holway, Orlando G., Chippewa Falls, Wis. Vehicle trunk rack. 1,452,639; Apr. 24.
Honstetter, Emil. (See Chinsky, H. H., and Honstetter.)
Hood, John J., London, J. Clark, Hutton, and P. G. Clark, London, England. Decolorising and purification of saccharine materials. 1,452,739; Apr. 24.
Hood Rubber Company. (See Perrault, Joseph E., assignor.)
Hoover, Austin W., and R. Winter, jr., Irwin, Pa. Tone arm. Des. 62,257; Apr. 24.

Hoover, Austin W., and R. Winter, jr., Irwin, Pa. Tone arm. Des. 62,258; Apr. 24.
Hopkins, Archibald E., Middletown, assignor to The Borden Company, New York, N. Y. Wrapping machine. 1,452,604; Apr. 24.
Hopkins, Nevil M., New York, N. Y., assignor to National Carbon Co. Inc. Storage-battery vent. 1,452,806; Apr. 24.
Hopkins, Richard M., Rutherford, assignor to American District Telegraph Company, Jersey City, N. J. Signal system and transmitter therefor. 1,452,972; Apr. 24.
Hormel, August. (See Wagner, C., and Hormel.)
Howland, Chester S., New Bedford, Mass. Film holder. 1,453,244; Apr. 24.
Hoyt, Homer J., Detroit, Mich., assignor to Morgan & Wright. Conveyer system. 1,452,836; Apr. 24.
Hrib, George. (See Lyeso, George, assignor.)
Hubble, Grover C., Bonners Ferry, Idaho. Voltage-controlling device for dynamos. 1,452,688; Apr. 24.
Huffman, Reuel L., Brookfield, Mo. Button. 1,453,245; Apr. 24.
Hughes, Earl V., Andrews, Ind., assignor to Wasmuth-Endicott Company. Cabinet door. 1,452,913; Apr. 24.
Hughes, William B., Newcastle, Ind. Vehicle tongue. 1,452,876; Apr. 24.
Hulick, Samuel C., Spokane, Wash. Camp cooker. 1,452,640; Apr. 24.
Hulse, George E., Newark, N. J., assignor to Safety Car Heating & Lighting Company. System of distribution. 1,452,877; Apr. 24.
Hultquist, Charles A., Los Angeles, Calif. Fluid-operated drill. 1,452,689; Apr. 24.
Hussey, Lindley M., assignor to J. P. Harmer, Philadelphia, Pa. Arsenical compound. 1,452,605; Apr. 24.
Huston, John L., Boston, Mass., assignor to The Miller Lock Company, Philadelphia, Pa. Tire lock. 1,453,139; Apr. 24.
Hutchins, Edward, New York, N. Y., assignor to International Paper Company. Drying cylinder. 1,453,113; Apr. 24.
Hyman & Oppenheim. (See Oppenheim, Jesse, assignor.)
Ideal Automatic Train Control Company, The. (See Call, Ira A. and J. C., assignors.)
Inland Steel Company. (See Stefan, Jacob, jr., assignor.)
International Paper Company. (See Hollenbeck, Paul V., assignor.)
International Paper Company. (See Hutchins, Edward, assignor.)
Isidor, Joseph S., Newark, N. J., assignor to The R. Neumann Hardware Co. Bag-frame fastener. 1,452,837; Apr. 24.
Jackson, Crusselle B., Hartsells, Ala. Tire protector. 1,453,140; Apr. 24.
Jackson, Harry L., Palo Alto, Calif. Handwheel grip. 1,453,012; Apr. 24.
Jackson, Whitnell H., Bowling Green, Ky. Cover for food receptacles. 1,452,558; Apr. 24.
Jacobs, Clare S., assignor to Tube Products Company, Detroit, Mich. Feed mechanism for swaging machines. 1,452,740; Apr. 24.
Jacobs, James M. H., assignor, by mesne assignments, to Dayton-Wright Company, Dayton, Ohio. Aeroplane wing. 1,452,641; Apr. 24.
Jacoby, Henry C. E. (See Mossay, P. A. H., and Jacoby.)
Jahr, Arthur A. (See Widell, M. E., and Jahr.)
James, William E., St. Louis, Mo. Buckle. 1,452,914; Apr. 24.
Jantz, Edmund F., Chicago, Ill. Collar wrapper. 1,453,070; Apr. 24.
Jardine, Robert, assignor to Rich Tool Company, Chicago, Ill. Apparatus for making motor valves. 1,452,510; Apr. 24.
Jenckes Knitting Machine Company. (See Miller, Max C., assignor.)
Jenkins, Thomas B., assignor to Jenkins Vulcan Spring Company, Richmond, Ind. Shock-absorber spring. 1,452,973; Apr. 24.
Jenkins Vulcan Spring Company. (See Jenkins, Thomas B., assignor.)
Jenness, Frank C., assignor of one-half to E. H. Grove, Los Angeles, Calif. Stylus guide for psychic games. 1,452,741; Apr. 24.
Jennings, John D., Charleston, S. C. Burial apparatus. 1,453,141; Apr. 24.
Jewett Refrigerator Company, The. (See Statler, William J., assignor.)
John, Robert, New York, N. Y., assignor to Daylight Film Corporation. Making a contact transfer printing surface with a colored emulsion. 1,453,258; Apr. 24.
John, Robert, New York, N. Y. Printing plate and process and composition of matter for forming the same and printing. 1,453,259; Apr. 24.
Johnson, Charles E., assignor to The Piston Ring Company, Muskegon, Mich. Piston. 1,452,807; Apr. 24.
Johnson, Edwin, Osnabrock, N. Dak. Automatic stop for windmill pumps. 1,453,142; Apr. 24.
Johnson, Harry L. (See Kearney, J. R., and Johnson.)
Johnson, Henry E., Milwaukie, Oreg. Concrete mixer. 1,453,047; Apr. 24.
Johnson, Jesse C., San Francisco, Calif. Oil-burner construction. 1,452,559; Apr. 24.
Johnson, Jesse C., San Francisco, Calif. Pressure-control valve. 1,452,560; Apr. 24.
Johnson, Oscar H., and H. F. Webb, assignors to The Mine & Smelter Supply Company, Denver, Colo. Drum feeder. 1,453,143; Apr. 24.
Johnson, William S., and J. W. Sheffer, Berwick, Pa., assignors to American Car and Foundry Company, St. Louis, Mo. Electric rivet heater. 1,452,511; Apr. 24.
Johnson, William S., and J. W. Sheffer, Berwick, Pa., assignors to American Car and Foundry Company, St. Louis, Mo. Electric rivet heater. 1,452,512; Apr. 24.
Johnson, William S., and J. W. Sheffer, Berwick, Pa., assignors to American Car and Foundry Company, St. Louis, Mo. Electric rivet heater. 1,452,513; Apr. 24.
Johnston, Robert J., Kansas City, assignor of one-half to G. F. Rogge, Corder, Mo. Apparatus for manufacture of wall board. 1,452,742; Apr. 24.
Jones, Emily, Brooklyn, N. Y. Scissors sharpener. 1,453,246; Apr. 24.
Jones, Milton D., Cleveland, Ohio. Car-dumping machine. 1,452,606; Apr. 24.
Juer, George, Hopewell, Va., assignor to Tubize Artificial Silk Company of America, Wilmington, Del. Artificial-silk-spinning machine. 1,452,607; Apr. 24.
Kägi, Emil, Winterthur, Switzerland, assignor to Busch-Sulzer Bros.-Diesel Engine Company, St. Louis, Mo. Controlling means for internal-combustion-engine plants. 1,452,561; Apr. 24.
Kalmus, Comstock & Wescott, Inc. (See Atwood, Francis C., assignor.)
Kane, Edmund J., Chicago, Ill. Power-operated crane. 1,452,690; Apr. 24.
Karitzky, John, Garwood, assignor, by mesne assignments, to H. B. Newhall, Plainfield, N. J. Bolt anchor. 1,452,514; Apr. 24.
Karl, Andrew J., et al. (See Webb, Benjamin F., assignor.)
Karmann, Michael, Highland Park, Mich. Artificial tooth. 1,452,878; Apr. 24.
Kartzmark, Otto, West Haven, Conn. Dispensing receptacle. 1,452,691; Apr. 24.
Kaufmann, Florence A., assignor to W. A. Hill, Kansas City, Mo. Soft-collar supporter. 1,453,144; Apr. 24.
Kearney, James R., and H. L. Johnson, Kansas City, Mo. Wall bracket. 1,452,515; Apr. 24.
Keating, Frank J., Rochester, N. Y. Combination pliers. 1,452,642; Apr. 24.
Kell, Morris, New Orleans, La. Separable fastener. 1,452,743; Apr. 24.
Keller, Cora E., Springfield, Mo. Suspenders for children's clothes. 1,452,643; Apr. 24.
Kellogg Switchboard and Supply Company. (See Sparks, C., and Shull, assignors.)
Kennedy Car Liner & Bag Co., The. (See Kennedy, Frederick W., assignor.)
Kennedy, Frederick W., Shelbyville, Ind., assignor to The Kennedy Car Liner & Bag Co. Garment bag. 1,452,644; Apr. 24.
Kennedy, George, Covington, La. Support for invalids. 1,452,915; Apr. 24.
Kennedy, Howard A., Latonia, Ky. Combined ratchet wrench and tool holder. 1,453,145; Apr. 24.
Kern, Isidor. (See Newman, I., and Kern.)
Kern, Mamie. (See Newman, I., and Kern.)
Kiggins, Charles A., Weskan, Kans. Spring wheel. 1,453,247; Apr. 24.
Killefer Manufacturing Company. (See Watters, Daniel M., assignor.)
Kimman, Theodore P. (See Callan, W. H., and Kimman.)
King, James D., Chicago, Ill. Automobile lock. 1,452,879; Apr. 24.
Kinney, John J., assignor to Columbian Rope Company, Auburn, N. Y. Spinning-jenny nipper. 1,453,146; Apr. 24.
Kippenhan, William, Alleton, Wis. Motor-driven land roller. 1,452,974; Apr. 24.
Kircher, Carl. (See Bosch, C., Dehnel, and Kircher.)
Kirst, John P., Ohio, Ill. Toy elevator. 1,452,608; Apr. 24.
Kistner, Charles E., Cincinnati, Ohio. Dirigible automobile lamp device. 1,452,916; Apr. 24.
Kleeman, William, Hartwell, Cincinnati, Ohio, assignor to The Philip Carey Manufacturing Company. Forming and form-retaining means for plastic, or semi-plastic, or similar materials. 1,453,071; Apr. 24.
Klein, Paul M., Cedarhurst, N. Y. Piston ring and making same. 1,452,645; Apr. 24.
Kleinfield, Irving L., Brooklyn, N. Y. Electric-lamp stand. Des. 62,236; Apr. 24.
Kleinfield, Irving L., Brooklyn, N. Y. Electric-lamp stand. Des. 62,237; Apr. 24.
Kleinfield, Irving L., Brooklyn, N. Y. Electric lamp stand. Des. 62,238; Apr. 24.
Klocke, William, Woodhaven, assignor to E. W. Bliss Company, Brooklyn, N. Y. Friction clutch. 1,452,609; Apr. 24.
Klosner, Morris, New York, N. Y. Electrical condenser. 1,452,610; Apr. 24.
Knapp Brothers Manufacturing Company. (See Knapp, George A., assignor.)
Knapp, George A., Chicago, Ill., assignor to Knapp Brothers Manufacturing Company. Metallic baseboard structure. 1,453,072; Apr. 24.

Knapp, Horace G., assignor to Knapp Plow Co., Inc., San Jose, Calif. Plowlift. 1,452,744; Apr. 24.
Knapp Plow Co. (See Knapp, Horace G., assignor.)
Koenigkramer, Frank, Cincinnati, Ohio, assignor to J. V. McManis, Kirksville, Mo. Treatment table. 1,453,013; Apr. 24.
Kohn, Koby, New York, N. Y., assignor to Victory Sparkler & Specialty Co., Elkton, Md. Combined razor and brush. 1,453,014; Apr. 24.
Kooper Damper Co. (See Cooper, Thomas S., jr., assignor.)
Kornblum, Morris, Brooklyn, N. Y. Combined lamp shade and stand. Des. 62,239; Apr. 24.
Kovacs, Joseph J., Orange, N. J. Lens-grinder attachment. 1,452,917; Apr. 24.
Kraft, Frederick G., and C. J. Bacon, assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Spinneret. 1,453,048; Apr. 24.
Krauss, Charles A., Philadelphia, Pa. Bail for receptacles. 1,452,562; Apr. 24.
Kritikson Bros., Inc. (See Barnes, Albert E., assignor.)
Kunkel, William M. (See Hartup, Frank E., assignor.)
Kuns, Alphonse M., St. Louis, Mo. Necktie display and illuminating stand. 1,453,147; Apr. 24.
Kurtis, Angel (now by judicial change of name Angelos Kurtis), Boston, Mass. Metallic heel for shoes and the like. 1,453,253; Apr. 24.
Kurtis, Angelos. (See Kurtis, Angel.)
La Croix, Cicero H., Bannister, Tex. Insect destroyer. 1,452,918; Apr. 24.
Laird, Schober and Co. (See Dugan, John F., assignor.)
Lakewood Engineering Company. (See Blass, Carl J., assignor.)
Lambert, Victor, Brooklyn, N. Y. Can opener. 1,452,516; Apr. 24.
Landau, John A., New York, N. Y. Garment hanger. 1,452,745; Apr. 24.
Landry, Walter A. (See Rumford, Harry R., assignor.)
Lang, Philip G., jr. (See Parks, E. F., jr., and Lang.)
Lange, William C., temporary administrator. (See Rapp, J. W., and Vanorio.)
Lapworth Webbing Company. (See Foxon, Horace M., assignor.)
La Societe La Cellophane. (See Brandenberger, Jaques E., assignor.)
Laureyns, Gustave G., Newark, N. J. Safety mechanism for elevator shaft doors. 1,453,073; Apr. 24.
Laureyns, Gustave G., Newark, N. J. Safety appliance for elevator-car gates and elevator-shaft doors. 1,453,074; Apr. 24.
Lavigne, Joseph W., Worcester, Mass. Drinking cup. 1,453,015; Apr. 24.
Lazaga, Ignacio, Salem, Va. Machine for packaging articles. 1,452,692; Apr. 24.
Lee, Frederick C., Toronto, Ontario, Canada. Fishing-rod handle. 1,452,808; Apr. 24.
Lee, Henry J., Fountain Run, Ky. Collapsible crate. 1,453,148; Apr. 24.
Le Fevre, George A., Richmond Hill, assignor to Paxfiat Barrel & Crate Corporation, New York, N. Y. Knock-down barrel. 1,452,880; Apr. 24.
Leidy, Norman J., Philadelphia, Pa. Ornamental casing for automobile headlights. 1,453,075; Apr. 24.
Leister, William H., assignor to The United Machinery Company, Westminster, Md. Green-corn-debutting machine. 1,453,248; Apr. 24.
Lenief, André, Paris, France. Toothbrush. 1,453,149; Apr. 24.
Leopold Cassella & Co. Gesellschaft mit beschränkter Haftung. (See Herz, R., and Balhorn, assignors.)
Lepow, Eva, Philadelphia, Pa. Stocking. 1,452,517; Apr. 24.
Levine, Arthur H., New York, N. Y. Ornamenting surfaces. 1,453,076; Apr. 24.
Lewis, Fred K., Ashtabula, Ohio. Top for vehicles and the like. 1,452,975; Apr. 24.
Lewis, Frederick O., Dayton, assignor of one-half to O. B. Reemelin, Oakwood, Ohio. Thermostatic valve for carburetors. 1,453,016; Apr. 24.
Lewis, Leland J., assignor of one-half to R. H. McKee, New York, N. Y. Fat-splitting reagent and making the same. 1,452,881; Apr. 24.
Lewis, William K., Omaha, Nebr. Oil burner. 1,452,563; Apr. 24.
Libbey, C. A., Company. (See Rasmussen, Robert F., assignor.)
Lichtenstein, Edward N., Baltimore, Md. Fountain bath brush. 1,452,976; Apr. 24.
Liddell, Moses V., Harvey, assignor to Austin Manufacturing Co., Chicago, Ill. Street sweeper. 1,453,049; Apr. 24.
Lincoln, William W., Washington, D. C. Direction signal for automobiles. Re15,584; Apr. 24.
Lindelof, Gustaf H., De Kalb, Ill. Wall bridge for switches. 1,453,017; Apr. 24.
Lininger, William. (See White, H. W., and Lininger.)
Link, Vincent, Detroit, Mich., assignor to Studebaker Corporation. Braking mechanism. 1,453,050; Apr. 24.
Loehler, Martial J., Asnieres, France. Rotary mold for molding milling cutters by centrifugal force. 1,452,838; Apr. 24.
Loesch, John J., assignor to Evr Klean Seat Pad Co., St. Louis, Mo. Seat cover. 1,452,882; Apr. 24.
Loesch, Milton C., assignor of one-half to W. F. Ryan, Cincinnati, Ohio. Vaporizer for combustion engines. 1,452,883; Apr. 24.
Logue, John, Philadelphia, Pa. Workholding and positioning device for rule and border type or slug-cutting machines. 1,452,809; Apr. 24.
Lord, Hugh C., Erie, Pa. Oscillating joint. 1,452,693; Apr. 24.
Lotz, William A., Newark, N. J., assignor to The R. Neumann Hardware Co. Bag-frame fastener. 1,452,839; Apr. 24.
Loveland, Clyde B., Buffalo, N. Y. Key fastener. 1,452,646; Apr. 24.
Lowenstein, M., & Sons, Inc. (See Reimann, Paul, assignor.)
Lowenstein, M., & Sons, Inc. (See Sonntag, Eugene, jr., assignor.)
Lund, Andrew G., St. Paul, Minn. Record-sheet holder and protector. 1,452,694; Apr. 24.
Lunden, Harald L. R. (See Thorssell, C. T., and Lunden.)
Lunken, Edmund H., Cincinnati, Ohio. Window shade. 1,452,611; Apr. 24.
Lyding, Peter R., Sacramento, Calif. Poultry house. 1,452,746; Apr. 24.
Lyeso, George, assignor of one-half to G. Hrib, Simpson, W. Va. Slicing machine. 1,452,564; Apr. 24.
McBee Binder Company, The. (See McBee, Charles F., assignor.)
McBee, Charles F., assignor to The McBee Binder Company, Athens, Ohio. Binding machine. 1,452,565; Apr. 24.
McCloud, John M., Brooklyn, N. Y. Mount for vehicle curtain window panes. 1,452,612; Apr. 24.
McCormick, Joseph H., South Pittsburg, Tenn. Vehicle tire. 1,453,150; Apr. 24.
McCulloch, Albert P., Dorchester, Mass. Timer. 1,452,884; Apr. 24.
McDonnell, Alexander J. V., London, England. Pocket sterilizing case for clinical thermometers. 1,453,151; Apr. 24.
McGraw, William T., Detroit, Mich. Account-filing cabinet. 1,452,919; Apr. 24.
McGregor, James D., assignor to Brantford Computing Scales, Ltd., Brantford, Ontario, Canada. Price-scale cabing. Des. 62,234; Apr. 24.
McHewitt, William, and H. G. Brandt, Burlington, Iowa. Tool. 1,453,018; Apr. 24.
McKee, Ralph H. (See Lewis, Leland J., assignor.)
McLellan, John, Providence, R. I., assignor, by mesne assignments, to Multiple Drilling Machine Company. Multiple-drill machine. 1,452,920; Apr. 24.
McLellan, John, Providence, R. I., assignor, by mesne assignments, to Multiple Drilling Machine Company. Multiple-drill machine. 1,452,921; Apr. 24.
McManis, John V. (See Koenigkramer, Frank, assignor.)
McVicker, Robert J., New York, N. Y. Fountain pen. 1,453,152; Apr. 24.
MacIntosh, George P., Wakefield, Mass. Felly-engaging antiskid-chain-anchoring means. 1,452,885; Apr. 24.
MacIntosh, George P., Wakefield, Mass. Spoke-engaging antiskid-chain-anchoring means. 1,452,886; Apr. 24.
Mackey, Frederic C., and J. H. Gumz, Chicago, Ill. Enameling furnace. 1,453,051; Apr. 24.
Macomic, Chester A. (See Webster, Bester R., assignor.)
Mainwaring, John W., Brooklyn, N. Y. Piston-ring holder. 1,452,518; Apr. 24.
Mallory, Harry C., Bellport, N. Y. Automatic temperature-controlling means. 1,452,748; Apr. 24.
Malovich, Franjo, Chicago, Ill. Cabinet. Des. 62,240; Apr. 24.
Manville, E. J., Machine Company, The. (See Smith, Henry L., assignor.)
Marciniak, Michael, assignor of one-half to M. W. Olszewski, Duluth, Minn. Occupant-steered sled. 1,453,153; Apr. 24.
Markos, Gus W., Columbus, Ohio. Safety pin. 1,452,747; Apr. 24.
Marlow, John H., Stoke-upon-Trent, England. Gas-fired oven or kiln. 1,452,887; Apr. 24.
Marsh, Clifford W., Bridgeport, Conn. Gluing machine. 1,452,888; Apr. 24.
Martin, Harvey A., Brady, Tex. Drill-bit swelling and dressing apparatus. 1,453,154; Apr. 24.
Martin, Henry F., assignor to Detroit Hoist and Machine Company, Detroit, Mich. Lifting truck. 1,452,566; Apr. 24.
Martinez, Matias B., Guasti, Calif. Combination tool. 1,453,155; Apr. 24.
Marx, Joseph J. (See Brunk, Oscar E. W., assignor.)
Mason, John, Philadelphia, Pa. Dispensing device. 1,452,922; Apr. 24.
Mason, Wesley W., Baltimore, Md. Closure for containers. 1,453,077; Apr. 24.
Mather, Richard. (See Moore, H., and Mather.)
Mattern, George W., assignor to The Crawford, McGregor and Canby Company, Dayton, Ohio. Sole plate for golf clubs. 1,452,695; Apr. 24.
May, George W., Akron, Ohio. Horseshoe for pitching contests. 1,453,156; Apr. 24.
Mayberry, James D., Minneapolis, Minn. Convertible chair, ironing board, and table. 1,452,749; Apr. 24.
Mead, Charles M., Los Angeles, Calif. Safety signal for vehicles. 1,452,647; Apr. 24.

Mead, James S., Cincinnati, Ohio. Necktie holder. 1,452,648; Apr. 24.
Medeiros, Antone B. (See Medeiros, Ernest B. and A. B.)
Medeiros, Ernest B. and A. B., New Bedford, Mass. Torch holder for musical instruments. 1,452,977; Apr. 24.
Mein, Stewart, B., Philadelphia, Pa. Holder for desk or memorandum pads. 1,453,052; Apr. 24.
Meiser, Wilhelm. (See Gans, W., Meiser, and Eberhardt.)
Mesker Brothers Iron Company. (See Mesker, F., Smith, and Beuc, assignors.)
Mesker, Frank, C. E. Smith, and J. Beuc, assignors to Mesker Brothers Iron Company, St. Louis, Mo. Metal window construction. 1,452,519; Apr. 24.
Metal Recording Disc Company. (See Emerson, Victor H., assignor.)
Meyer, August H., Plauen, Germany. Device for the production of crochet seams and patterns in embroidery machines. 1,452,840; Apr. 24.
Meyer, Waldemar, Woodhaven, N. Y. Magnetic holder-on. 1,452,841; Apr. 24.
Miessner, John, Cleveland, Ohio. Clothesline reel. 1,453,157; Apr. 24.
Miller, Charles H., and A. N. Scott, assignors to The Diebold Safe & Lock Company, Canton, Ohio. Auxiliary locking bolt. 1,452,567; Apr. 24.
Miller, John P., Duryea, assignor of one-half to H. S. Woodward, Carbondale, Pa. Locking device for mine cars. 1,452,923; Apr. 24.
Miller, John S., jr., Rahway, N. J., assignor to The Barber Asphalt Company, Philadelphia, Pa. Making parti-colored bituminous roofing shingles. 1,452,978; Apr. 24.
Miller, Joseph N., Brainerd, Minn. Combined settee and table. 1,452,613; Apr. 24.
Miller Lock Company, The. (See Huston, John L., assignor.)
Miller, Max C., Cumberland Hill, assignor to Jenckes Knitting Machine Company, Pawtucket, R. I. Needle-controlling mechanism for knitting machines. 1,452,842; Apr. 24.
Miller Rubber Company, The. (See Riley, Ralph, assignor.)
Mills, Frank W., Chicago, Ill. Coin detector. 1,452,979; Apr. 24.
Mills, Frank W., Chicago, Ill. Ball-bearing coin detector. 1,452,980; Apr. 24.
Milwaukee Manufacturing Co. (See Strauss, Norbert F., assignor.)
Mine & Smelter Supply Company, The. (See Johnson, O. H., and Webb, assignors.)
Minney, Arthur W., assignor of one-half to F. L. Boyd, Stockton, Calif. Car-wheel boxing and oiling device. 1,453,158; Apr. 24.
Mitscherling, Waldemar O., assignor to Atlas Powder Company, Wilmington, Del. Carrying out continuous fusions. 1,452,520; Apr. 24.
Mock, George R., assignor of one-third to R. L. Campbell, Chicago, Ill. Supplemental work support for portable sewing machines. 1,452,696; Apr. 24.
Molins, Walter E., London, England. Sheet feeder. 1,453,019; Apr. 24.
Montgomery, Charles H., Fredericksburg, Va. Unloading mechanism for freight cars. 1,452,649; Apr. 24.
Moon Brothers Manufacturing Company. (See Snell, Samuel A., assignor.)
Moore, Harold and R. Mather, Woolwich, England. Apparatus for testing the hardness of metals and other materials. 1,452,510; Apr. 24.
Morgan & Wright. (See Hoyt, Homer J., assignor.)
Morin, Amos. (See Butler, O., and Morin.)
Morrill, Richard R., Palo Alto, Calif., assignor to Oliver Oil-Gas Burner and Machine Company, St. Louis, Mo. Oil burner. 1,452,521; Apr. 24.
Morrisey, William J., Los Angeles, Calif. Toy. Des. 62,241; Apr. 24.
Morton, William R., assignor of one-half to V. R. Griggs, Havre, Mont. Shock absorber. 1,452,568; Apr. 24.
Moses, William S., Onamia, Minn. Instrument for the survey and solution of plane triangles in field work. 1,453,078; Apr. 24.
Mossay, Paul A. H. and H. C. E. Jacoby, London, England. Cooling of dynamo-electric machines. 1,453,159; Apr. 24.
Muehie, Herman, Cleveland, Ohio. Fastening device. 1,452,981; Apr. 24.
Mueller, Adolph, trustee. (See Mueller, Philip, assignor.)
Mueller, Philip, assignor to A. Mueller, trustee, Decatur, Ill. Compression cock. 1,452,811; Apr. 24.
Mullen, John E., New Duluth, Minn. Agricultural machine. 1,452,697; Apr. 24.
Müller, Emil, Berlin, Germany. Central buffer for short couplings of railway vehicles. 1,453,160; Apr. 24.
Mulligan, Arthur de W., London, England. Readily-fusible alloy. 1,422,750; Apr. 24.
Multiple Drilling Machine Company. (See McLellan, John, assignor.)
Mummery, Clyde W., Richmond, Mich. Burner. 1,452,650; Apr. 24.
Murmann, Eugene O., Glendale, Calif. Lock. 1,452,812; Apr. 24.
Murphy Iron Works. (See Riley, Robert S., assignor.)
Murphy, Thomas W. and W. Csarnecki, Philadelphia, Pa. Spray nozzle. 1,453,161; Apr. 24.
Murray, William J., Mamaroneck, N. Y. Scaffold. 1,453,227; Apr. 24.
Musiar, Nelson, Worcester, Mass., assignor, by mesne assignments, to Royal Labeling Machine Company, Incorporated. Labeling machine. 1,453,020; Apr. 24.
Myers, John W., Quincy, Ill. Ventilating means for chicken hovers and brooders. 1,453,162; Apr. 24.
Nacey, Harry M., Chicago, Ill. Fusible link. 1,452,522; Apr. 24.
Nakashima, Soichi, Livingston, Calif. Fruit-pitting machine. 1,452,889; Apr. 24.
Nathanson, Philip, Allentown, Pa. Stop motion for bobbin winders. 1,452,924; Apr. 24.
National Carbon Co. Inc. (See Hopkins, Nevil M., assignor.)
National Lead Company. (See Simpkins, Louis D., assignor.)
National Malleable Castings Company, The. (See Brooks, Chester K., assignor.)
National Water Lift Co. (See Fairchild, Roland J., assignor.)
Neal, George D., assignor of one-half to J. R. Baker, Little Rock, Ark. Shock-absorber top coupling. 1,453,163; Apr. 24.
Nealley, Henry A., Newton, Mass. Lubricant demonstrator. 1,452,569; Apr. 24.
Nelson, Axel H., Turlock, Calif. Concrete wall construction. 1,452,751; Apr. 24.
Neumann, R., Hardware Co., The. (See Isidor, Joseph S., assignor.)
Neumann, R., Hardware Co., The. (See Lots, William A., assignor.)
Newby, William, Youngstown, Ohio. Opening sheet and tin-plate packs. 1,452,890; Apr. 24.
Newcomb, Edward C., North Scituate, Mass. Internal-combustion engine. 1,453,164; Apr. 24.
Newell, Robert E., Irwin, Pa. Safety valve. 1,453,079; Apr. 24.
Newhall, Henry B. (See Karitzky, John, assignor.)
Newman, John G., North Sydney, assignor to James Hardie and Company Limited, Sydney, New South Wales, Australia. Process and apparatus for manufacturing matches. 1,453,228; Apr. 24.
Newman, John G., North Sydney, assignor to James Hardie and Company Limited, Sydney, New South Wales, Australia. Match. 1,453,229; Apr. 24.
Newman, Isaac, I. Kern, and M. Kern, New York, N. Y. Catamenial appliance. 1,453,053; Apr. 24.
Newman, Leopold, Pittsburgh, Pa. Trousers. 1,453,165; Apr. 24.
Nichols Dehydrator Corporation. (See Andrea, Agnes L., assignor.)
"Nipa" Incorporated. (See Goodchild, Walter, assignor.)
Nobuhara, Kantaro, Muko-gun, Hyogo-ken, Japan. Rotary electric machine. 1,453,166; Apr. 24.
Nordenstam, Johan K., Strathcona, Minn. Trap. 1,453,167; Apr. 24.
Nordquist, Louis, Galeton, Pa. Aeroplane. 1,453,230; Apr. 24.
Nordsarom, Elof, Newark, N. J., assignor, by mesne assignments, to American Dan Bottle Seal Corporation. Machine for feeding vessels. 1,452,843; Apr. 24.
Nordstrom, Gustave P., Chicago, Ill. False bottom for cooking utensils. 1,453,054; Apr. 24.
Nordstrom, William A., Jamestown, N. Y. Accelerator for motor-car engines. 1,452,982; Apr. 24.
Norrlin, Charles H., New York, N. Y. Target finder for firearms. 1,452,651; Apr. 24.
Northwood, H., Company. (See Taylor, Morgan O., assignor.)
Norton, Allen B., assignor to Aluminum Manufacturers, Incorporated, Cleveland, Ohio. Alloy and making the same. 1,453,254; Apr. 24.
Nottage, William H., and T. D. Parkin, Chelmsford, England, assignors to The Radio Corporation of America, New York, N. Y. Wireless telegraph calling device. 1,452,925; Apr. 24.
Nube, Curd. (See Wetzer, R., and Nube.)
Nygaard, Oscar O., Milton, Mass. Driving mechanism. 1,452,570; Apr. 24.
Oakley, Clifford H. (See Oakley, Laurence M., assignor.)
Oakley, Clifford H., Trenton, N. J. Rubber heel lift. 1,452,891; Apr. 24.
Oakley, Laurence M., assignor to C. H. Oakley, Trenton, N. J. Resilient heel lift. 1,452,892; Apr. 24.
Oberwarth, Leo L., Frankfort, Ky. Collapsible drawing board. 1,453,171; Apr. 24.
Ogburn, John S., Lindale, Tex. Berry and fruit washing machine. 1,452,844; Apr. 24.
Okawa, Tetsuji. (See Fujimoto, M., and Okawa.)
Okoniewski, Ludwik. (See Zukowski, Stefan, assignor.)
Oliver Oil-Gas Burner and Machine Company. (See Morrill, Richard R., assignor.)
Olley, Edwin A., assignor to Crouse-Hinds Company, Syracuse, N. Y. Panel-board construction. 1,452,752; Apr. 24.
Olsen, Julius H. T., New York, N. Y. Shoe polish. 1,452,614; Apr. 24.
Olson, Ole K., Oakdale, N. Dak. Trap nest for hens. 1,453,172; Apr. 24.
Olszewski, Michael W. (See Marciniak, Michael, assignor.)
O'Neill, William L., assignor to Stromberg Motor Devices Company, Chicago, Ill. Carbureting apparatus for internal-combustion engines. 1,452,698; Apr. 24.

Onnerts, Paul, Berlin-Wilmersdorf, assignor to Actien Gesellschaft für Anilin Fabrikation, Berlin, Germany. Preparation for dyeing furs, hairs, and the like. 1,453,021; Apr. 24.
Oppenheim, Jesse, assignor to Hyman & Oppenheim, New York, N. Y. Hair net. 1,453,168; Apr. 24.
Orlando, Anthony, Chattanooga, Tenn. Polishing machine. 1,452,926; Apr. 24.
Osborn, Alden E., New York, N. Y. Motor vehicle. 1,452,698; Apr. 24.
Ostrander, Allen E., Ridgewood, N. J., assignor to American Car and Foundry Company, St. Louis, Mo. Making welded and riveted joints. 1,452,523; Apr. 24.
Otis Elevator Company. (See Boyce, John E., assignor.)
Otto, William H., and W. Ulrich, Cincinnati, Ohio. Clamp. 1,452,753; Apr. 24.
Packer, Glenn W., assignor to Goodman Manufacturing Company, Chicago, Ill. Gathering reel. 1,452,927; Apr. 24.
Packer, John H., Liberty, Mo. Filtering tank. 1,453,169; Apr. 24.
Paedersen, Fred, Oakland, Minn. Sliding-gear transmission for Ford automobiles. 1,452,754; Apr. 24.
Pairard, Pierre, Paris, France. Electric-wire clamp. 1,453,173; Apr. 24.
Paiste, H. T., Company. (See Paiste, Henry T., assignor.)
Paiste, Henry T., assignor to H. T. Paiste Company, Philadelphia, Pa. Fuse plug. 1,453,170; Apr. 24.
Pallady, Harry A., Seattle, Wash. Soldering flux. 1,453,080; Apr. 24.
Palmore, Roam, Bison, Ark. Hame. 1,453,081; Apr. 24.
Paraffine Companies, The. (See Forsman, Stanton W., assignor.)
Parkin, Thomas D. (See Nottage, W. H., and Parkin.)
Parks, Elisha F., jr., Timonium, and P. G. Lang, jr., Baltimore, Md. Trimmer-belt attachment. 1,452,524; Apr. 24.
Parsons, Irving R., Chicago, Ill. Envelope. Des. 62,259; Apr. 24.
Patent Button Company, The. (See White, Franklin R., assignor.)
Patent Novelty Company. (See Reimer, George H., assignor.)
Patmor, Edward E., Santa Ana, Calif. Concrete form. 1,453,174; Apr. 24.
Patterson-Williams Mfg. Co. (See Williams, Winfield, assignor.)
Pauling, Harry, Berlin-Grunewald, Germany. Decomposing mixed metal-salt solutions. 1,452,813; Apr. 24.
Pauling, Martin W., Dover, Mo. Grease retainer. 1,452,755; Apr. 24.
Paxfiat Barrel & Crate Corporation. (See Le Fevre, George A., assignor.)
Peck, Stow & Wilcox Company, The. (See Quinlan, James A., assignor.)
Pendleton, Virginia H., New York, N. Y. Carrying bag. Des. 62,242; Apr. 24.
Pennsylvania Textile Mills Inc., The. (See Ericson, E., and Weiss, assignors.)
Perkins, Elmer E., Chicago, Ill. Drying kiln. 1,452,928; Apr. 24.
Perrault, Joseph E., assignor to Hood Rubber Company, Watertown, Mass. Grinding machine. 1,453,175; Apr. 24.
Perrine, Lester, Detroit, Mich. Compensating jaw for chucks and the like. 1,453,176; Apr. 24.
Peterson, Peter A., Pocatello, Idaho. Anchor. 1,453,177; Apr. 24.
Petry, Nicholas A., Philadelphia, Pa. Air pump. 1,453,178; Apr. 24.
Peyer, Rudolf, St. Gallen, Switzerland. Device for storing and displaying smokers' articles. 1,452,700; Apr. 24.
Pfeffer, Oscar W., assignor to Busch-Sulzer Bros.-Diesel Engine Co., St. Louis, Mo. Means for checking the wear of shaft bearings. 1,452,571; Apr. 24.
Pfeifer, John, assignor to The Springfield Auto Lock Company, Springfield, Ohio. Permutation locking mechanism for gear-shifting levers. 1,452,652; Apr. 24.
Pflager, Harry M., assignor to Commonwealth Steel Company, St. Louis, Mo. Articulated car. 1,452,526; Apr. 24.
Pflager, Harry M., assignor to Commonwealth Steel Car Company, St. Louis, Mo. Articulated car underframe. 1,452,525; Apr. 24.
Phelps, Frank, Little Rock, Ark, assignor to L. C. Barnett, Duluth, Minn. Centrifugal fan. 1,453,055; Apr. 24.
Phoenix Sprinkler Company. (See Atkins, Charles H., assignor.)
Philips, William D., Brooklyn, N. Y. Magnetic drying apparatus. 1,453,022; Apr. 24.
Phillips & Clark Stove Co. (See De Vries, John, assignor.)
Phillips, Darius T., assignor of one-half to C. G. Williams, Chicago, Ill. Corn harvester and shocker. 1,452,929; Apr. 24.
Phleger, John B., Dayton, Ohio. Vehicle signal. 1,453,179; Apr. 24.
Pigeon, Ernest A., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Wire-assembling machine. 1,452,615; Apr. 24.
Pike, Seneca M., assignor to Wilder-Pike Thermometer Co., Inc., Troy, N. Y. Thermometer. 1,452,701; Apr. 24.
Pipe, Edward H., assignor to Acme Cement Plaster Company, St. Louis, Mo. Stucco-mixing machine. 1,452,702; Apr. 24.
Piston Ring Company, The. (See Johnson, Charles E., assignor.)
Platt, Clarence D., Bridgeport, Conn. Inclosed-switch construction. 1,452,814; Apr. 24
Polk, Ralph, Greenwood, Ind. Means for peeling citrus fruit. 1,452,930; Apr. 24.
Pollard, Henry V., Somerville, Mass. Threshold eliminator. 1,452,703; Apr. 24.
Poole, Arthur F., Kenilworth, and G. B. Vernier, jr., Chicago, Ill., assignor to The Wahl Company, Wilmington, Del. Fountain pen. 1,452,653; Apr. 24.
Poppert, Henry A., & Son Company. (See Poppert, Henry A., assignor.)
Poppert, Henry A., assignor to Henry A. Poppert & Son Company, Milwaukee, Wis. Steam-pressure cooker. 1,453,255; Apr. 24.
Porth, Harry W. L., assignor to Swift & Company, Chicago, Ill. Attachment for skinning knives. 1,452,893; Apr. 24.
Potts, Louis M., Baltimore, Md., assignor, by mesne assignments, to American Telephone and Telegraph Company, New York, N. Y. Transmitting apparatus for electrical telegraphs. 1,452,527; Apr. 24.
Pouk, John B., assignor of one-half to B. D. Roberts, Streator, Ill. Tread for auto tires. 1,452,894; Apr. 24.
Poulin, Hector L. and U. A., Anthony, R. I., assignors to The Rosella Mills Inc. Belt and making same. 1,452,704; Apr. 24.
Poulin, Uiric A. (See Poulin, Hector L. and U. A.)
Powell, Homer. (See Hathaway, Robert W., assignor.)
Powers, James F., Linwood, Pa. Hot-air heating apparatus. 1,453,180; Apr. 24.
Pratt, William E. (See Barker, George R., assignor.)
Price, Charles S., Rutherford, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Electric switch. 1,452,931; Apr. 24.
Pritchard, Charles A. G., Cleveland, Ohio, assignor to Chicago Pneumatic Tool Company, New York, N. Y. Connecting rod for pistons. 1,452,932; Apr. 24.
Prosser, Harold T., Chicopee Falls, Mass. Engine. 1,452,572; Apr. 24.
Pryde, Robert D., Orange, Conn. Golf club. 1,452,845; Apr. 24.
Pullman, George, New York, N. Y. Time recorder for locks. 1,452,846; Apr. 24.
Pupin, Michael I., Norfolk, Conn., assignor to Westinghouse Electric and Manufacturing Company, East Pittsburgh, Pa. Selective amplifying apparatus. 1,452,833; Apr. 24.
Quinlan, James A., assignor to The Peck, Stow & Wilcox Company, Southington, Conn. Bench vise. 1,452,847; Apr. 24.
Rabenold, Charles F., Philadelphia, Pa. Lamp casing. Des. 62,243; Apr. 24.
Radiotive Corporation. (See Schmidt, Lambert, assignor.)
Radio Corporation of America. (See Ditcham, William T., assignor.)
Radio Corporation of America, The. (See Nottage, W. H., and Parkin, assignors.)
Radio Corporation of America. (See Round, Henry J., assignor.)
Ræder, Björn, assignor to himself and Aktieselskapet Zink, Kykkelsrud, Askim Station, Norway. Zinc smelting furnace. 1,452,934; Apr. 24.
Rapp, John W., deceased, Flushing, and J. Vanorio, Brooklyn, N. Y.; said Vanorio assignor to said Rapp; W. C. Lange, temporary administrator. Airplane-rib construction. 1,453,114; Apr. 24.
Rapp, William M., San Francisco, Calif., assignor to Vapo Corporation. Refrigerator. 1,452,756; Apr. 24.
Rapp, William M., San Francisco, Calif., assignor to Vapo Corporation. Cooler. 1,452,757; Apr. 24.
Rasmussen, Robert F., assignor to C. A. Libbey Company, Oshkosh, Wis. Stock-watering device. 1,452,705; Apr. 24.
Ratchet Brake Company. (See Blackall, Robert H., assignor.)
Rath, Emil. (See Rath, Herman, assignor.)
Rath, Herman, assignor of one-half to E. Rath, Indianapolis, Ind. Form for concrete. 1,452,983; Apr. 24.
Rauch, George F., Pukwana, S. Dak. Safety crank for automobiles. 1,452,758; Apr. 24.
Rawdon, Edward W., Akron, Ohio. Locomotive driving box. 1,452,895; Apr. 24.
Rawdon, Edward W., Akron, Ohio. Locomotive driving box. 1,452,896; Apr. 24.
Raymond Concrete Pile Company. (See Schroeder, F. A., and Smith, assignors.)
Reed, Charles J., Glenside, Pa. Process of and apparatus for grading solid materials. 1,452,815; Apr. 24.
Reeks, Albert H., Toronto, Ontario, Canada. Automobile lamp. 1,452,654; Apr. 24.
Reemelin, Oscar B. (See Lewis, Frederick O., assignor.)
Reimann, Paul, assignor to M. Lowenstein & Sons, Inc., New York, N. Y. Textile fabric. Des. 62,260; Apr. 24.
Reimann, Paul, assignor to M. Lowenstein & Sons, Inc., New York, N. Y. Textile fabric. Des. 62,261; Apr. 24.
Reimann, Paul, assignor to M. Lowenstein & Sons, Inc., New York, N. Y. Textile fabric. Des. 62,262; Apr. 24

Reimann, Paul, assignor to M. Lowenstein & Sons, Inc., New York, N. Y. Textile fabric. Des. 62,263; Apr. 24.
Reimer, George H., assignor to Patent Novelty Company, Fulton, Ill. Holding device. 1,452,816; Apr. 24.
Reinhold, John J., Marietta, Pa. Foot lever. 1,452,759; Apr. 24.
Renault, Louis. (See Fuchs, Ernest, assignor.)
Retterath, Valentin, Dresden-Cossebaude, assignor to the Firm: Deutsche Werke Aktiengesellschaft, Berlin, Germany. Link. 1,452,817; Apr. 24.
Reynolds, R. J., Tobacco Company. (See Strickland, Charles V., assignor.)
Rhoades, Alonzo E., assignor to Draper Corporation, Hopedale, Mass. Filling-carrier support for looms. 1,452,655; Apr. 24.
Rich Tool Company. (See Jardine, Robert, assignor.)
Richards, Jesse D., La Fontaine, assignor of one-third to J. D. Gillenwater, Wabash, and one-third to C. Gable, Peru, Ind. Self-cleaning rake. 1,422,984; Apr. 24.
Richardson, Wilber D., Rosedale, Kans., assignor of one-half to R. Bryant, Kansas City, Mo. Steering mechanism stabilizing device. 1,452,656; Apr. 24.
Rickert, Fred D., Reading, Pa. Sock. Des. 62,264; Apr. 24.
Ridge, William F., Akron, Ohio. Steering-wheel cover. 1,453,181; Apr. 24.
Riethmiller, Oliver C., and A. Fowler, Philadelphia, Pa. Sewing cabinet. Des. 62,244; Apr. 24.
Riggs, Fletcher S., Marshall, Tex. Sign. 1,452,760; Apr. 24.
Riker, Samuel M., Chester, N. J. Belt buckle. 1,452,818; Apr. 24.
Riley, Ralph, assignor to The Miller Rubber Company, Akron, Ohio. Doll. Des. 62,265; Apr. 24.
Riley, Robert S., Worcester, Mass., assignor to Murphy Iron Works, Detroit, Mich. Furnace stoker. 1,452,706; Apr. 24.
Ringle, Robert F., assignor to Herman Pneumatic Machine Company, Zelienople, Pa. Control valve. 1,452,848; Apr. 24.
Risser, George P., and A. P. Williams, Seattle, Wash. Tractor. 1,453,056; Apr. 24.
Riverside Engineering Co., Inc. (See Ugnon, C., Galoppa, and Saldarini assignors.)
Rivetta, Giovanni, Paris, France. Centrifugal-force governor. 1,453,182; Apr. 24.
Roberts, Benjamin D. (See Pouk, John B., assignor.)
Roberts, William H., assignor to Detroit Stamping Company, Detroit, Mich. Collapsible-tube holder. 1,452,761; Apr. 24.
Robinson, Archie D., Westfield, Mass. Holder for memorandum pads and the like. 1,452,707; Apr. 24.
Robinson, George. (See Sturdevant, Ceylon, assignor.)
Robinson, Luther, Eldorado, Kans. Fire extinguisher. 1,452,657; Apr. 24.
Robison, James E., Denver, Colo. Ground-gripping chain for automobile tires. 1,453,183; Apr. 24.
Rochester Can Company. (See Gray, Malcolm E., assignor.)
Rogge, George F. (See Johnston, Robert J., assignor.)
Rohling, John M., Plainfield, N. J., assignor to American Car and Foundry Company, New York, N. Y. Brake. 1,452,528; Apr. 24.
Rohner, Philip B. (See Drees, Andrew A., assignor.)
Rope, Arthur E., Brooklyn, N. Y. Association vanity box. 1,453,249; Apr. 24.
Rorimer, Louis, Cleveland, Ohio, assignor to Simmons Company, Kenosha, Wis. Bedstead frame. Des. 62,245; Apr. 24.
Rorive, Leopold, Brussels, Belgium. Automatic stopping device for pneumatic tools. 1,453,252; Apr. 24.
Rose, John F., Moline, Ill. Automatic bearing adjuster. 1,453,184; Apr. 24.
Rosella Mills Inc., The. (See Poulin, Hector L. and U. A., assignors.)
Rosenberg, Heyman, New York, N. Y. Tool handle. 1,453,082; Apr. 24.
Roth, Louis, assignor to Sterling Bronze Company, New York, N. Y. Operating means for sash adjusters. 1,452,616; Apr. 24.
Round, Henry J., London, England, assignor to Radio Corporation of America. Wireless transmitting station. 1,452,849; Apr. 24.
Roussan, Paul E. H., Paris, France. Application of the bark (suber) of melaleuca leucadendron to thermic, hydraulic, and dielectric devices. 1,453,185; Apr. 24.
Rowe, John, Casey, Iowa. Steering-gear stop device. 1,452,985; Apr. 24.
Royal Labeling Machine Company. (See Muslar, Nelson, assignor.)
Ruffin, Robert, jr., Como, Miss. Table. 1,453,186; Apr. 24.
Ruffin, Robert, jr., Senatobia, Miss. Drafting instrument. 1,453,023; Apr. 24.
Ruhl, Otto, et al. (See Hebbard, Charles C., assignor.)
Rumford, Harry R., assignor of one-half to W. A. Landry, Chester, Pa. Means for vaporizing hydrocarbon fuels. 1,453,187; Apr. 24.
Ruperti, Henri, Hamburg, assignor to J. Heydt, Albrechts, Germany. Device for cleaning pipes. 1,452,708; Apr. 24.
Ruppe, Cecil P., Oakley, Kans. Detachable handle. 1,453,188; Apr. 24.
Ryan, William F. (See Loesch, Milton C., assignor.)
Ryon, Tracy B., Waltham, Mass. Switching mechanism. 1,453,024; Apr. 24.
S. K. F. Ball Bearing Company. (See Hird, Charles, assignor.)
Safety Car Heating & Lighting Company. (See Hulse, George E., assignor.)
Saldarini, Charles. (See Ugnon, C., Galoppa, and Saldarini.)
Salm, John, Torrance, Calif. Handle for a toilet article. Des. 62,246; Apr. 24.
Salm, John, Torrance, Calif. Handle for a manicure article. Des. 62,247; Apr. 24.
Salm, John, Torrance, Calif. Handle for a manicure article. Des. 62,248; Apr. 24.
Salm, John, Torrance, Calif. Handle for a manicure article. Des. 62,249; Apr. 24.
Salter, Horace E., assignor of one-half to H. A. Ball, Grafton, N. Dak. Envelope. 1,453,189; Apr. 24.
Samuels, Benjamin F. (See Haworth, Henry G., assignor.)
Sands, Filandro H., Nassau, Bahama Islands. Horse-drawn cycle. 1,453,190; Apr. 24.
Sanger, Walter E., assignor to William Garrigue & Company, Inc., New York, N. Y. Process of and apparatus for distilling liquids. 1,452,617; Apr. 24.
Sauereisen, Christian F., Pittsburgh, Pa. Insulator. Re15,585; Apr. 24.
Savage, Edwin H., Cleveland, assignor to The Cleveland Tractor Company, Euclid, Ohio. Track-belt unit. Re-15,583; Apr. 24.
Savoye, Herbert F., Hackensack, assignor to American Radium Appliance Company, Morristown, N. J. Apparatus for preparing artificial radioactive water. 1,452,709; Apr. 24.
Sayers, William L., Brooklyn, N. Y. Game. 1,452,618; Apr. 24.
Scheibli, Robert J., jr., St. Louis, Mo., assignor to American Car and Foundry Company, New York, N. Y. Car truck. 1,452,529; Apr. 24.
Schick, Jacob, New York, N. Y. Safety razor. 1,452,935; Apr. 24.
Schmelzer, Anton C., Springfield, assignor, by mesne assignments, to Century Machinery Corporation, Holyoke, Mass. Washing machine. 1,452,710; Apr. 24.
Schmidt, Lambert, assignor to Radiotive Corporation, Brooklyn, N. Y. Telephone apparatus. 1,452,850; Apr. 24.
Schmidt, Lambert, assignor to Radiotive Corporation, Brooklyn, N. Y. Head receiver for telephones. 1,452,851; Apr. 24.
Schnoeckel, Richard Auerbach, assignor to C. G. Haubold Aktien-Gesellschaft, Chemnitz, Germany. Heat-exchanging apparatus. 1,453,250; Apr. 24.
Schoedinger, F. O. (See Hames, Harry C., assignor.)
Schoen, Adolf, New York, N. Y. Heel-breasting machine. 1,453,191; Apr. 24.
Schoen, Adolf, New York, N. Y. Heel-cutting machine. 1,453,192; Apr. 24.
Schön, Ludwig, Essen, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Device for electromagnetical quenching of light arcs appearing upon the interruption of an electric circuit. 1,453,193; Apr. 24.
Schroeder, Frederick A., Bogota, N. J., and H. R. Smith, Brooklyn, assignors to Raymond Concrete Pile Company, New York, N. Y. Brick-handling apparatus. 1,452,711; Apr. 24.
Schröder, Edmund, Berlin, Germany. Electric seam-welding machine. 1,452,762; Apr. 24.
Schuler, Max, assignor to Anschutz & Co., Neumühlen, near Kiel, Germany. Electric machine. 1,453,083; Apr. 24.
Schulze, John W., assignor to Alfred Vester Sons, Inc., Providence, R. I. Pendulet. Des. 62,250; Apr. 24.
Schuman, Frank J., Cleveland Heights, Ohio, assignor to The Allan Manufacturing and Welding Corporation, Buffalo, N. Y. Method of and apparatus for welding. 1,452,936; Apr. 24.
Scott, Alexander N. (See Miller, C. H., and Scott.)
Scott, Paul, Waynoka, Okla. Bath brush. 1,452,658; Apr. 24.
Secretary of War of the United States of America, The, trustee. (See Uphoff, Leslie S., assignor.)
Seelman, John J., Milwaukee, Wis. Dispensing device. 1,452,659; Apr. 24.
Sellers, Harvey A. (See Cash, Arthur W., assignor.)
Seymour, William A., Leavenworth, Kans. Baling-wire needle. 1,452,712; Apr. 24.
Shackelford, Edward H., et al. (See Hebbard, Charles C., assignor.)
Shaffer, Ernest J., Tulsa, Okla. Sucker-rod-connecting means. 1,452,937; Apr. 24.
Shaw, Arthur E., Columbia, S. C. Dental film holder. 1,453,194; Apr. 24.
Sheather, Percival B., et al. (See Bryan, William G., assignor.)
Sheffer, John W. (See Johnson, W. S., and Sheffer.)
Sherbondy, Earl H., assignor to S. D. Waldon, Detroit, Mich. Universal joint. 1452,530; Apr. 24.
Sherbondy, Earl H., assignor to S. D. Waldon, Detroit, Mich. Steering knuckle for motor vehicles. 1,452,531; Apr. 24.
Sherbondy, Earl H., assignor to S. D. Waldon, Detroit, Mich. Vehicle chassis. 1,452,532; Apr. 24.

Sherman, John Q., Dayton, Ohio. Manifolding register. 1,452,660; Apr. 24.
Shuford, Stephen W., Woodlawn, N. C. Weighing mechanism. 1,452,763; Apr. 24.
Shull, William G. (See Sparks, C., and Shull.)
Siegel, Ernest, New York, N. Y., assignor to Axle Lock Corporation. Locking device. 1,452,938; Apr. 24.
Sigwalt, Clarence R., Chicago, Ill. Spring oiler. 1,452,852; Apr. 24.
Simmons Company. (See Rorimer, Louis, assignor.)
Simper, Frank. (See Ellis, R. H., and Simper.)
Simpkins, Louis D., Brooklyn, assignor to National Lead Company, New York, N. Y. Electro-deposition of tin. 1,452,573; Apr. 24.
Simplex Player Action Company. (See Brown, Theodore P., assignor.)
Sims, Jesse C., Maynard, Mass. Signaling mechanism. 1,453,195; Apr. 24.
Singer Manufacturing Company, The. (See Hemleb, Martin, assignor.)
Slauson, Louis E., assignor to Grid-Iron-Grip Company, Rock Island, Ill. Metal wheel. 1,452,661; Apr. 24.
Slepian, Joseph, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Circuit interrupter. 1,452,574; Apr. 24.
Smith, A. O., Corporation. (See Smith, Reuben S., assignor.)
Smith, Clarence E. (See Mesker, F. Smith, and Benc.)
Smith, Cuthbert C., Twickenham, England. Gramophone apparatus. 1,453,196; Apr. 24.
Smith, George M., assignor of one-fourth to R. M. Henry, Maryville, Tenn. Grate. 1,452,897; Apr. 24.
Smith, Henry L., assignor to The E. J. Manville Machine Company, Waterbury, Conn. Operating mechanism for wood-screw machines. 1,452,986; Apr. 24.
Smith, Herman R. (See Schroeder, F. A., and Smith.)
Smith, Reinold V., Eureka, Utah. Recovering zinc from lead-zinc ores. 1,452,662; Apr. 24.
Smith, Reuben S., assignor to A. O. Smith Corporation, Milwaukee, Wis. Apparatus for arc welding. 1,453,026; Apr. 24.
Smith, Reuben S., assignor to A. O. Smith Corporation, Milwaukee, Wis. Apparatus for electric-arc welding. 1,453,025; Apr. 24.
Smith, W. Hawley. (See Campbell, Robert J., assignor.)
Smith, Walter R., Lompoc, Calif. Valve. 1,452,764; Apr. 24.
Smyth, John B., Beaumont, Tex. Treating rock asphalt. 1,452,898; Apr. 24.
Snell, Samuel A., assignor to Moon Brothers Manufacturing Company, St. Louis, Mo. Jack. 1,452,533; Apr. 24.
Snell, Samuel A., St. Louis, Mo., assignor to H. W. Bundy, Detroit, Mich. Steering wheel. 1,452,534; Apr. 24.
Snyder, Atherton B., Grass Valley, Calif. Recording device for liquid pumps. 1,452,663; Apr. 24.
Snyder, Charles F., Pittsburgh, Pa. Facing or cutting tool. 1,453,197; Apr. 24.
Snyder, Earl D., Albany, Ill. Cushion wheel. 1,453,198; Apr. 24.
Société Anonyme d'Horlogerie et Bijouterie de Genève. (See Varaud, André, assignor.)
Societe l'Air Liquide Societe Anonyme pour l'Etude et l'Exploitation des Procedes Georges Claude. (See Claude, Georges, assignor.)
Somers, John J., Bridgeport, Conn. Fastener for reversible garments. 1,453,251; Apr. 24.
Sonntag, Eugene, jr., Astoria, assignor to M. Lowenstein & Sons, Inc., New York, N. Y. Textile fabric. Des. 62,266; Apr. 24.
Sonntag, Eugene, jr., Astoria, assignor to M. Lowenstein & Sons, Inc., New York, N. Y. Textile fabric. Des. 62,267; Apr. 24.
Soutar, Charles W. (See Atack, F. W., and Soutar.)
Sparks, Charles, Oak Park, and W. G. Shull, assignors to Kellogg Switchboard and Supply Company, Chicago, Ill. Coil. 1,452,939; Apr. 24.
Specialty Manufacturing Company. (See Wood, William D., assignor.)
Speed, James B., New York, N. Y. Compression of gases. 1,452,619; Apr. 24.
Sperry, Elmer A., Brooklyn, N. Y., assignor to Anaconda Lead Products Company. Treating white lead. 1,452,620; Apr. 24.
Spijker, Jacobus, Amsterdam, Netherlands. Resilient wheel and air tire to be used therewith. 1,453,199; Apr. 24.
Springfield Auto Lock Company, The. (See Pfeifer, John, assignor.)
Stacho, Joseph O., Newark, N. J. Fur-cutting machine. 1,453,200; Apr. 24.
Standard Electric Manufacturing Company. (See Brogger, Ivar W., assignor.)
Standard Steel and Bearings Incorporated. (See Woodrow, Irvin F., assignor.)
Starks, Ray S., assignor of one-half to H. O. Hamre, Berlin, Wis. Automatic gas lighter. 1,452,987; Apr. 24.
Statler, William J., assignor to The Jewett Refrigerator Company, Buffalo, N. Y. Shelf. 1,452,765; Apr. 24.
Staub, Henri, Manoir du Cygne, Coppet, Switzerland. Gaiter of springs. 1,452,853; Apr. 24.
Stecher, Charles, Chicago, Ill. Boring machine. 1,452,940; Apr. 24.
Stefan, Jacob, jr., Chicago Heights, assignor, by mesne assignments, to Inland Steel Company, Chicago, Ill. Fence. 1,452,766; Apr. 24.
Steinberger, Louis, Brooklyn, N. Y. Strain insulator. 1,453,201; Apr. 24.
Stephen, Edward, Manchester, England. Means for detaching and delivering lengths of paper. 1,452,621; Apr. 24.
Sterling Bronze Company. (See Roth, Louis, assignor.)
Stern, Morris J., Jamaica, N. Y. Jewel mount. Des. 62,268; Apr. 24.
Stevens, William C., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Clutch. 1,453,202; Apr. 24.
Stewart, Alfred C., Los Angeles, Calif. Valve for internal-combustion engines. 1,452,622; Apr. 24.
Stiansen, Anton P., Brooklyn, N. Y. Safety razor. 1,452,767; Apr. 24.
Stiefel, Ralph C., Ellwood City, Pa. Tube-rolling mill. 1,453,203; Apr. 24.
Stitzel, Frederick, Louisville, Ky. Spring wheel. 1,452,623; Apr. 24.
Stokes, Albert W., Philadelphia, Pa. Guide device for taps or reamers. 1,453,204; Apr. 24.
Stokoe, Charles L., Wallsend-on-Tyne, England. Fluid-flow-controlled safety apparatus. 1,452,899; Apr. 24.
Storts, John H., Philadelphia, Pa. Counting and registering device for box-wrapping and similar machines. 1,452,713; Apr. 24.
Straubel, Louis A., Green Bay, Wis. Machine for pressing and labeling interfolded sheets of paper. 1,452,988; Apr. 24.
Strauss, Joseph B., Chicago, Ill. Long-span bridge. 1,453,084; Apr. 24.
Strauss, Norbert F., assignor to Milwaukee Manufacturing Co., Milwaukee, Wis. Heating element. 1,452,989; Apr. 24.
Strickland, Charles V., assignor to R. J. Reynolds Tobacco Company, Winston-Salem, N. C. Pintle-inserting machine. 1,453,085; Apr. 24.
Stromberg Motor Devices Company. (See O'Neill, William L., assignor.)
Stroud, William. (See Barr, A., and Stroud.)
Strout, Calvin E., Portland, Me. Cable chair. 1,452,664; Apr. 24.
Stuart, Fredrick G., Washington, D. C. Attachment for rotary clipper machines. 1,452,624; Apr. 24.
Studebaker Corporation. (See Link, Vincent, assignor.)
Sturdevant, Ceylon, Castle Rock, assignor to G. Robinson, Larkspur, Colo. Chain fastener. 1,453,205; Apr. 24.
Subin, Benjamin, Philadelphia, Pa. Twine cutter. 1,453,206; Apr. 24.
Sulitemeyer, Charles F., Oak Park, Ill., assignor to Chicago Manufacturing and Distributing Co. Manufacture of bearing rings. 1,452,535; Apr. 24.
Sunnen, Joseph, St. Louis, Mo. Valve lifter. 1,452,714; Apr. 24.
Superior Hand Embroiderer Corporation. (See Baker, Fenner B., assignor.)
Sury, Walter, Pieterlen, Switzerland. Vise. 1,453,207; Apr. 24.
Sweetman, Cecil R., et al. (See Bryan, William G., assignor.)
Swift & Company. (See Porth, Harry W. L., assignor.)
Szykowny, Walter C., Toledo, Ohio. Fruit-jar holder. 1,452,941; Apr. 24.
Targosky, Peter, Cleveland, Ohio. Combined seeding machine and manure spreader. 1,452,625; Apr. 24.
Tate-Jones & Co. (See Trinks, Willibald, assignor.)
Taylor, Henry H., and M. B. Hammond, assignors to The Thomas P. Taylor Co., Bridgeport, Conn. Adjustable garter buckle. 1,452,854; Apr. 24.
Taylor, Knox, assignor to Taylor-Wharton Iron and Steel Company, High Bridge, N. J. Tamping tool. 1,452,990; Apr. 24.
Taylor, Morgan O., assignor to H. Northwood Company, Wheeling, W. Va. Holder for candle shades. 1,452,575; Apr. 24.
Taylor, Thomas P., Co., The. (See Taylor, H. H., and Hammond, assignors.)
Taylor-Wharton Iron and Steel Company. (See Taylor, Knox, assignor.)
Terry McCluskey Auto Lock Company. (See Terry, Samuel L., assignor.)
Terry, Samuel L., Chicago, Ill., assignor, by mesne assignments, to Terry McCluskey Auto Lock Company. Lock. 1,453,115; Apr. 24.
Tham, Howard A., and R. J. Weaver, Akron, Ohio. Clothesline holder and tightener. 1,453,027; Apr. 24.
Thomas, Charles W., Cleveland, Ohio. Drawing pen. 1,452,576; Apr. 24.
Thomas, Frederick, Philadelphia, Pa. Creasing machine. 1,452,536; Apr. 24.
Thomas, Nathen D., Jacksonville, Fla. Scarifier. 1,453,208; Apr. 24.
Thomas, William G., Victoria, Va. Babbitting and brassing machine. 1,452,819; Apr. 24.
Thomson Electric Welding Company. (See Thomson, Elihu, assignor.)
Thomson, Elihu, Swampscott, assignor to Thomson Electric Welding Company, Lynn, Mass. Chain-link welding. 1,452,942; Apr. 24.
Thomson, Ralph K., Sioux Falls, S. Dak. Side curtain for automobiles. 1,453,209; Apr. 24.

Thornhill, Edwin B., Hurley, N. Mex. Apparatus for the production of sponge iron and other metallic products. 1,452,626; Apr. 24.
Thornhill, Edwin B., Hurley, N. Mex. Production of sponge iron and other metallic products. 1,452,627; Apr. 24.
Thorssell, Carl T., and H. L. R. Lundén, assignors to Aktiebolaget Kvafveindustri, Gottenborg, Sweden. Purifying the residue obtained in producing ammonia from cyanides. 1,453,210; Apr. 24.
Thuernau, Henry A., Chicago, Ill. Advertising sign. Des. 62,251; Apr. 24.
Thun, Hermann, Essen, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Machine for measuring surface areas. 1,453,211; Apr. 24.
Tindall, Joseph S., Cedar Springs, Mich. Mold-handling apparatus. 1,452,665; Apr. 24.
Tingley, David E., Marshall, Ill. Concrete form. 1,452,628; Apr. 24.
Toal, Edmond J., Minneapolis, Minn. Writing tablet. 1,452,537; Apr. 24.
Tooker, Sidney S., Rochester, N. Y. Antifriction bearing and shaft-centering device. 1,453,028; Apr. 24.
Torchia, Julius C., Hazleton, Pa. Last support. 1,452,991; Apr. 24.
Tornquist, Jonas E., St. Paul, Minn. Capping machine. 1,453,212; Apr. 24.
Toulon, Pierre M. G., assignor to Bureau d'Organisation Économique, Paris, France. Device for the cooling of electric apparatus by the circulation of liquid through the conductors. 1,452,666; Apr. 24.
Towner, Heber F., Santa Ana, Calif. Self lift for agricultural implements. 1,452,855; Apr. 24.
Tribble, Walter, Oakland, Calif. Shpiping container. 1,452,768; Apr. 24.
Trinks, Willibald, Pittsburgh, assignor to Tate-Jones & Co., Inc., Leetsdale, Pa. Heating furnace. 1,452,856; Apr. 24.
Tubbs, Frank M., Santa Rosa, Calif. Rail-securing device. 1,453,213; Apr. 24.
Tube Products Company. (See Jacobs, Clare S., assignor.)
Tubize Artificial Silk Company of America. (See Juer, George, assignor.)
Turner, Charles H., Statesville, N. C. Locking means for belt-tightening mechanism. 1,452,900; Apr. 24.
Turpin, George W., Cleveland, Ohio. Device for producing waves in the hair. 1,452,577; Apr. 24.
Twells, Arthur H., Leicester, England. Valve gear of duplex pumps. 1,453,029; Apr. 24.
Ucar, Florencio C., Madrid, Spain. Means for establishing a voltaic arc between electrodes not in contact. 1,453,030; Apr. 24.
Uggla, Wilhelm R., and G. A. F. Wallgren, Harnosand, Sweden. Toothed wheel. 1,453,031; Apr. 24.
Ugnon, Claudius, J. Galoppa, and C. Saldarini, assignors to Riverside Engineering Co. Inc., Paterson, N. J. Mangle or quetch. 1,452,715; Apr. 24.
Ulrich, William. (See Otto, W. H., and Ulrich.)
Union Carbide & Carbon Research Laboratories, Inc. (See Becket, Frederick M., assignor.)
United Machinery Company, The. (See Leister, William H., assignor.)
United Shoe Machinery Corporation. (See Winkley, Erastus E., assignor.)
Uphoff, Leslie S., U. S. Army, assignor to the Secretary of War of the United States of America, trustee. System of voltage control. 1,452,857; Apr. 24.
Van Cott, Frank J., Unadilla, N. Y. Silo structure. 1,452,578; Apr. 24.
Vanorio, Joseph. (See Rapp J. W. and Vanorio.)
Van Westrum, Gerard A. S., Philadelphia, Pa. Briquette and making same. 1,452,992; Apr. 24.
Vapo Corporation. (See Rapp, William M., assignor.)
Varaud, André, Vesenaz, near Geneva, assignor to Société Anonyme d'Horogerie et Bijouterie de Genève, Geneva, Switzerland. Time indicator. 1,453,086; Apr. 24.
Varaud, André, Vesenaz, near Geneva, assignor to the Société Anonyme d'Horlogerie et Bijouterie de Genève, Geneva, Canton of Geneva, Switzerland. Time indicator. 1,453,087; Apr. 24.
Veeder, Peter Y., Toms River, N. J. Berry-picking machine. 1,452,629; Apr. 24.
Veglio, Gaetano, Levallois-Perret, France. Safety support for the spare wheels of automobiles. 1,453,214; Apr. 24.
Vernier, George B., jr. (See Poole, A. F., and Vernier.)
Vester, Alfred, Sons, Inc. (See Schulze, John W., assignor.)
Vickers Limited. (See Gray, Percy W., assignor.)
Victory Sparkler & Specialty Co. (See Kohn, Koby, assignor.)
Von Krenski, Roman, Berlin-Friedenau, Germany. Vehicle tire. 1,453,033; Apr. 24.
Von Soden-Fraunhofen, Graf Alfred, Friedrichshafen, Germany. Change-speed gear. 1,453,032; Apr. 24.
Voress, Clyde L., New York, N. Y., and V. C. Canter, Bradford, Pa., assignors to Gasoline Recovery Corporation. Volatilizing, distilling, or separating absorbed vapors. 1,453,215; Apr. 24.
Wack, Charles H., Baltimore, Md. Cleat for electric conduits. 1,452,993; Apr. 24.
Wagner, Charles, Grantwood, and A. Hormel, Jersey City, N. J. Conveyer chain for drying apparatus and the like. 1,452,943; Apr. 24.
Wahl Company, The. (See Poole, A. F., and Vernier, assignors.)
Waitz, Charles A., Rouseville, Pa. Pump. 1,452,579; Apr. 24.
Waitz, Charles A., Rouseville, Pa. Pump. 1,452,580; Apr. 24.
Waldon, Sidney D. (See Sherbondy, Earl H., assignor.)
Walker, David, New York, N. Y. Fishing hook. 1,452,630; Apr. 24.
Wallace, Harry B., St. Louis, Mo. Vulcanizing tires. 1,453,034; Apr. 24.
Wallgren, Gunnar A. F. (See Uggla, W. R., and Wallgren.)
Warner, Loring V., Fostoria, Ohio. Lapper. 1,452,769; Apr. 24.
Wasmuth-Endicott Company. (See Hughes, Earl V., assignor.)
Watters, Daniel M., assignor to Killefer Manufacturing Company, Los Angeles, Calif. Power lift for ground-working implements. 1,452,716; Apr. 24.
Weaver, Ralph J. (See Tham, H. A., and Weaver.)
Webb, Benjamin F., Sistersville, W. Va., assignor of nine-twentieth to A. J. Karl, one-eighth to F. Appel, Sistersville, W. Va., and one-tenth to P. Engle and W. H. Carter, Middlebourne, W. Va. Power-transmitting mechanism. 1,452,770; Apr. 24.
Webb, Henry F. (See Johnson, O. H., and Webb.)
Webb, John W., Chicago, Ill. Device for testing fiber board. 1,452,944; Apr. 24.
Weber, Rudolph H., New York, N. Y. Jacquard mechanism for weaving machines or the like. 1,452,771; Apr. 24.
Weber, Wilhelm, assignor to the Firm Gewerkschaft Hausbach II, Wiesbaden, Germany. Depositing method for the masses of sand and gravel obtained in brown-coal open workings. 1,452,994; Apr. 24.
Webster, Bester R., assignor to C. A. Macomic, Chicago, Ill. Typesetting machine. 1,452,942; Apr. 24.
Weidig, Eugene C., New Orleans, La. Plant receptacle. 1,453,216; Apr. 24.
Weigel, Daniel M., Chicago, Ill., assignor to The Wire Cord Company, Akron, Ohio. Pneumatic tire. 1,453,217; Apr. 24.
Weiss, Carl W., Brooklyn, N. Y. Transmission device. 1,452,946; Apr. 24.
Weiss, Roger. (See Ericson, E., and Weiss.)
Welch, Clarence R., Denver, Colo. Rock drill. 1,452,581; Apr. 24.
Wenderhold, William, assignor, by mesne assignments, to E. J. Banshaf, New York, N. Y. Combination lamp-house support. 1,452,582; Apr. 24.
Werle, Ludwig, Sturgeon Bay, Wis. Steering locking device. 1,452,901; Apr. 24.
Werner, Henry E., Houston, Tex. Cotton gin. 1,452,667; Apr. 24.
Wertz, Harvey C., Homestead, Pa. Scaffold jack. 1,452,717; Apr. 24.
Wesley, James R., Chicago, Ill. Truck and push pole for switching cars. 1,453,218; Apr. 24.
Western Electric Company. (See Colpitts, Edwin H., assignor.)
Western Electric Company. (See Price, Charles S., assignor.)
Westinghouse Electric and Manufacturing Company. (See Eschholz, Otto H., assignor.)
Westinghouse Electric and Manufacturing Company. (See Herr, Herbert T., assignor.)
Westinghouse Electric and Manufacturing Company. (See Pupin, Michael I., assignor.)
Westinghouse Electric & Manufacturing Company. (See Slepian, Joseph, assignor.)
Westlake, Charles T., assignor to Commonwealth Steel Company, St. Louis, Mo. Pilot beam. 1,452,538; Apr. 24.
Wettwer, Arthur H., Rice Lake, Wis. Wrench. 1,452,668; Apr. 24.
Wetzer, Rudolf, Pfronten, B., and C. Nube, Offenbach-on-the-Main, Germany. Engraving machine. 1,452,858; Apr. 24.
Wheelock, Edwin M., Winona, Minn. Power-operated road-grading machine. 1,453,231; Apr. 24.
Whitcomb, Daniel F., and K. R. Coolidge, Los Angeles, Calif. Figure toy. 1,452,820; Apr. 24.
White, Franklin R., assignor to The Patent Button Company, Waterbury, Conn. Button. 1,452,539; Apr. 24.
White, Franklin R., assignor to The Patent Button Company, Waterbury, Conn. Button. 1,452,540; Apr. 24.
White, Howard W. and W. Lininger, Kent, Iowa. End gate. 1,453,219; Apr. 24.
Wichser, Bernhard, Brooklyn, N. Y. Valve-operating device. 1,452,859; Apr. 24.
Widell, Magnus E., Maywood, and A. A. Jahr, Forest Park, Ill., assignors to American Can Company, New York, N. Y. Horizontal stationary double seamer for cans. 1,452,947; Apr. 24.
Wilburger, William, Brooklyn, N. Y. Binding post for loose-leaf books. 1,452,860; Apr. 24.
Wilburger, William, Brooklyn, N. Y. Album for disk records. 1,452,861; Apr. 24.
Wilder-Pike Thermometer Co. (See Pike, Seneca M., assignor.)

Willett, Alfred H., West New York, N. J., assignor to American Arch Company. Fire-box-arch construction. 1,452,948; Apr. 24.
Williams, Albert P. (See Risser, G. P., and Williams.)
Williams, Charles G. (See Phillips, Darius T., assignor.)
Williams, Joseph A., Cleveland, Ohio. Making iron, steel, or steel alloys. 1,452,057; Apr. 24.
Williams, Walter J., Binghamton, N. Y. Interlocking fire brick for arches. 1,452,583; Apr. 24.
Williams, William E., Chicago, Ill. Steel wheel for automobiles. 1,452,772; Apr. 24.
Williams, Winfield, assignor to Patterson-Williams Mfg. Co., San Jose, Calif. Exercising apparatus. 1,453,035; Apr. 24.
Williamson, Harley J. (See Carithers, J. V., and Williamson.)
Williamson, Roy H., Spooner, Wis. Toy gun. 1,452,902; Apr. 24.
Willoughby, Victor, Ridgewood, N. J., assignor to American Car and Foundry Company, New York, N. Y. Draft and buffing mechanism. 1,452,541; Apr. 24.
Wilson, Edward, assignor to Wilson Engineering Company, St. Louis, Mo. Compressor. 1,452,718; Apr. 24.
Wilson Engineering Company. (See Wilson, Edward, assignor.)
Wilson-Jones Loose Leaf Company. (See Fargo, Charles R., assignor.)
Winkley, Erastus E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel-building machine. 1,452,669; Apr. 24.
Winkley, Erastus E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel press. 1,452,670; Apr. 24.
Winkley, Erastus E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel press. 1,452,671; Apr. 24.
Winkley, Erastus E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel press. 1,452,672; Apr. 24.
Winter, Robert, jr. (See Hoover, A. W., and Winter.)
Wire Cord Company, The. (See Weigel, Daniel M., assignor.)
Witzenmann, Emil, Pforzheim, Germany. Double-walled tube for heating and cooling purposes. 1,453,220; Apr. 24.
Wood, William D., assignor to Specialty Manufacturing Company, Seattle, Wash. Light-controlling device for photographic-printing machines. 1,452,719; Apr. 24.
Woodrow, Irvin F., West Philadelphia, Pa., assignor, by mesne assignments, to Standard Steel and Bearings Incorporated, Wilmington, Del. Workholder. 1,452,949; Apr. 24.
Woodward, Herbert S. (See Miller, John P., assignor.)
Woodward, William E., Forest Hills, assignor to Franklin Railway Supply Company, New York, N. Y. Lateral-motion device for driving boxes. 1,452,862; Apr. 24.
Worcester, Albert, Los Angeles, Calif. Box-covering machine. 1,452,720; Apr. 24.
Worosila, Joseph, Fort Hancock, N. J. Oiling device. 1,453,221; Apr. 24.
Yeakley, Melvin A., Canton, Ohio. Valve-operating connection. 1,452,995; Apr. 24.
Yerger, Charles W., Washington, D. C., assignor to The Cutler-Hammer M'f'g Co., Milwaukee, Wis. Motor controller. 1,452,542; Apr. 24.
Zukor, Arnold, New York, N. Y. Burglar alarm. 1,453,058; Apr. 24.
Zukowski, Stefan, assignor of forty-five per cent to L. Okoniewski, Pascoag, R. I. Sled. 1,453,232; Apr. 24

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 24TH DAY OF APRIL, 1923.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abrasive device. W. J. Hoberg. 1,452,738; Apr. 24.
Aeroplane. L. Nordquist. 1,453,230; Apr. 24.
Aeroplane wing. J. M. H. Jacobs. 1,452,641; Apr. 24.
Agitator. C. Field. 1,452,966; Apr. 24.
Agricultural implements, Self-lift for. H. F. Towner. 1,452,855; Apr. 24.
Agricultural machine. J. E. Mullen. 1,452,697; Apr. 24.
Airplane engines, Radiator for. E. T. Curran. 1,452,958; Apr. 24.
Airplane-rib construction. J. W. Rapp and J. Vanorio. 1,453,114; Apr. 24.
Alarm: *See*—
Burglar alarm. Vehicle alarm.
Alarm apparatus, Burglar-. B. Galerman. 1,452,500; Apr. 24.
Alkalies from impure lyes, Recovery of pure. K. Heinemann. 1,453,132; Apr. 24.
Alloy and making same. A. B. Norton. 1,453,254; Apr. 24.
Alloy, Readily-fusible. A. de W. Mulligan. 1,452,750; Apr. 24.
Ammonia from cyanide, Purifying the residue obtained in producing. C. T. Thorssell and H. L. R. Lundén. 1,453,210; Apr. 24.
Ammonia into ammonium chloride, Conversion of. C. Bosch, E. Dehnel, and C. Kircher. 1,453,060; Apr. 24.
Amplifying apparatus, Selective. M. I. Pupin. 1,452,933; Apr. 24.
Anchor. P. A. Peterson. 1,453,177; Apr. 24.
Annealing furnace or leer. W. A. Amsler. 1,453,116; Apr. 24.
Antiskid-chain-anchoring means, Spoke-engaging. G. P. Macintosh. 1,452,886; Apr. 24.
Arsenical compound. L. M. Hussey. 1,452,605; Apr. 24.
Asphalt, Treating rock. J. B. Smyth. 1,452,898; Apr. 24.
Auto signal. M. Fujimoto and T. Okawa. 1,452,681; Apr. 24.
Auto windshield attachment. M. Becker. 1,452,904; Apr. 24.
Automobile direction signal. W. W. Lincoln.—Re15,584; Apr. 24.
Automobile lock. J. D. King. 1,452,879; Apr. 24.
Automobile steel wheel. W. E. Williams. 1,452,772; Apr. 24.
Automobile testing apparatus. J. T. Bishop. 1,452,783; Apr. 24.
Automobiles, Safety crank for. G. F. Rauch. 1,452,758; Apr. 24.
Automobiles, Safety support for the spare wheels of. G. Veglio. 1,453,214; Apr. 24.
Automobiles, Side curtain for. R. K. Thomson. 1,453,209; Apr. 24.
Automobiles, Sliding-gear transmission for Ford. F. Paedersen. 1,452,754; Apr. 24.
Babbitting and brassing machine. W. G. Thomas. 1,452,819; Apr. 24.
Bag: *See*—
Garment bag.
Bag, Carrying. V. H. Pendleton. Des. 62,242; Apr. 24.
Bag-frame fastener. J. S. Isidor. 1,452,837; Apr. 24.
Bag-frame fastener. W. A. Lotz. 1,452,839; Apr. 24.
Baker's implement. W. B. Hadley. 1,452,504; Apr. 24.
Balls, Retriever for golf. H. W. Fisher. 1,452,679; Apr. 24.
Barrel. Knockdown. G. A. LeFevre. 1,452,880; Apr. 24.
Barrels, Croze ring for. S. W. Forsman. 1,453,068; Apr. 24.
Baseboard structure, Metallic. G. A. Knapp. 1,453,072; Apr. 24.
Baskets, satchels, and like containers, Handle for. W. Hamm. 1,453,107; Apr. 24.
Battery vent, Storage-. N. M. Hopkins. 1,452,806; Apr. 24.
Bearing. H. P. Himes. 1,452,603; Apr. 24.
Bearing adjuster, Automatic. J. F. Rose. 1,453,184; Apr. 24.
Bearing and shaft-centering device, Antifriction. S. S. Tooker. 1,453,028; Apr. 24.
Bearing rings, Manufacture of. C. F. Sultemeyer. 1,452,535; Apr. 24.
Bearings, Means for checking the wear of shaft. O. W. Pfeffer. 1,452,571; Apr. 24.
Bedstead frame. L. Rorimer. Des. 62,245; Apr. 24.
Belt and making same. H. L. and U. A. Poulin. 1,452,704; Apr. 24.
Belt attachment, Trimmer-. E. F. Parks, jr., and P. G. Lang, jr. 1,452,524; Apr. 24.
Belt-tightening mechanism, Locking means for. C. H. Turner. 1,452,900; Apr. 24.
Berry and fruit washing machine. J. S. Ogburn. 1,452,844; Apr. 24.
Berry-picking machine. P. Y. Veeder. 1,452,629; Apr. 24.
Binder-locking mechanism. C. R. Fargo. 1,453,066; Apr. 24.
Binding machine. C. F. McBee. 1,452,565; Apr. 24.
Blanket or similar article. F. A. Andrews. Des. 62,252; Apr. 24.
Block: *See*—
Buffer block.
Board: *See*—
Drawing board.
Boat-hull construction. G. M. French. 1,453,223; Apr. 24.
Bobbin winders, Stop motion for. P. Nathanson. 1,452,924; Apr. 24.
Bolt: *See*—
Locking bolt.
Bolt anchor. J. Karitzky. 1,452,514; Apr. 24.
Book cover, Metal. F. Hachmann. 1,452,802; Apr. 24.
Books, Binding post for loose-leaf. W. Wilburger. 1,452,860; Apr. 24.
Bootjack. W. C. Gruss. 1,453,105; Apr. 24.
Boring machine. C. Stecher. 1,452,940; Apr. 24.
Box: *See*—
Locomotive driving box. Vanity box.
Sound box.
Box-covering machine. A. Worcester. 1,452,720; Apr. 24.
Box-wrapping and similar machines, Counting and registering device for. J. H. Stortz. 1,452,713; Apr. 24.
Boxes, Cam for gill. G. T. Hemsley. 1,453,010; Apr. 24.
Boxes, Lateral-motion device for driving. W. E. Woodard. 1,452,862; Apr. 24.
Bracket: *See*—
Wall bracket.
Brake. J. A. Heyser. 1,452,736; Apr. 24.
Brake. J. M. Rohling. 1,452,528; Apr. 24.
Brake linings and the like, Making. F. J. Gleason. 1,452,555; Apr. 24.
Brakes, Pressure equalizer for hydraulic. O. J. Frock. 1,453,098; Apr. 24.
Braking mechanism. V. Link. 1,453,050; Apr. 24.
Brick for arches, Interlocking fire. W. J. Williams. 1,452,583; Apr. 24.
Brick-handling apparatus. F. A. Schroeder and H. R. Smith. 1,452,711; Apr. 24.
Bridge, Long-span. J. B. Strauss. 1,453,084; Apr. 24.
Briquette and making same. G. A. S. van Westrum. 1,452,992; Apr. 24.
Brush. A. Gissler. 1,452,502; Apr. 24.
Brush, Bath. P. Scott. 1,452,658; Apr. 24.
Brush, Fountain bath. E. N. Lichtenstein. 1,452,976; Apr. 24.
Buckle. W. E. James. 1,452,914; Apr. 24.
Buckle, Adjustable garter. H. H. Taylor and M. B. Hammond. 1,452,854; Apr. 24.
Buckle, Belt. T. C. Erpenbeck. 1,452,799; Apr. 24.
Buckle, Belt. S. M. Riker. 1,452,818; Apr. 24.
Buffer block. L. E. Harris. 1,453,225; Apr. 24.
Burglar alarm. J. I. Connelly. 1,452,595; Apr. 24.
Burglar alarm. A. Zukor. 1,453,058; Apr. 24.
Burial apparatus. J. D. Jennings. 1,453,141; Apr. 24.
Burner: *See*—
Gas and vapor burner. Oil burner.
Burner. C. W. Mummery. 1,452,650; Apr. 24.
Button. R. L. Huffman. 1,453,245; Apr. 24.
Button. F. R. White. 1,452,538–40; Apr. 24.
Button-blank-cutting machines, Water-jet head attachment for. N. Barry. 1,452,779; Apr. 24.
Cabinet. F. Malovich. Des. 62,240; Apr. 24.
Cabinet, Account-filing. W. T. McGraw. 1,452,919; Apr. 24.
Cabinet door. E. V. Hughes. 1,452,913; Apr. 24.
Cabinet for foods, Steam. R. J. Campbell. 1,452,907; Apr. 24.

Cabinet, Sewing. O. C. Klethmiller and A. Fowler. Des. 62,244; Apr. 24.
Cable chair. C. E. Strout. 1,452,664; Apr. 24.
Cable connector. W. E. Camp. 1,453,001; Apr. 24.
Calculating device. F. Fulgora. 1,453,100; Apr. 24.
Calipers, Micrometer. L. O. Beard. 1,452,780; Apr. 24.
Cameras, Apparatus for automatically focusing multiple-exposure. W. Fritsche. 1,452,833; Apr. 24.
Can opener. V. Lambert. 1,452,516; Apr. 24.
Cans, Horizontal stationary double seamer for. M. E. Widell and A. A. Jahr. 1,452,047; Apr. 24.
Candle shades, Holder for. M. O. Taylor. 1,452,575; Apr. 24.
Cannula and clamp. F. C. Atwood. 1,452,863; Apr. 24.
Capping machine. J. E. Tornquist. 1,453,212; Apr. 24.
Car, Articulated. H. M. Pflager. 1,452,526; Apr. 24.
Car, Cane. L. Almquist. 1,452,486; Apr. 24.
Car-controlling mechanism. A. and J. Hackworth. 1,452,556; Apr. 24.
Car-dumping machine. M. D. Jones. 1,452,606; Apr. 24.
Car, Tank. W. K. Auchincloss. 1,452,487; Apr. 24.
Car truck. R. J. Scheibl, jr. 1,452,529; Apr. 24.
Car under frame, Articulated. H. M. Pflager. 1,452,525; Apr. 24.
Car-wheel boxing and oiling device. A. W. Minney. 1,453,158; Apr. 24.
Cars, Locking device for mine. J. P. Miller. 1,452,923; Apr. 24.
Cars, Truck and push pole for switching. J. R. Wesley. 1,453,218; Apr. 24.
Cars, Unloading mechanism for freight. C. H. Montgomery. 1,452,649; Apr. 24.
Carboy. F. E. Hodes. 1,452,971; Apr. 24.
Carburetor. F. E. Baldwin. 1,452,488; Apr. 24.
Case: *See*—
Packing case.
Catamenial appliance. I. Newman and I. and M. Kern. 1,453,053; Apr. 24.
Cementitious articles, Machine for making. A. O. Crozier. 1,453,040; Apr. 24.
Chain-anchoring means. Felly-engaging antiskid-. G. P. MacIntosh. 1,452,885; Apr. 24.
Chain fastener. C. Sturdevant. 1,453,205; Apr. 24.
Chain for drying apparatus and the like, Conveyer. C. Wagner and A. Hormel. 1,452,943; Apr. 24.
Chain link. J. E. and R. A. Bachman. 1,453,088; Apr. 24.
Chain-link welding. E. Thomson. 1,452,942; Apr. 24.
Chair: *See*—
Cable chair. High chair.
Chair, Ironing board, and table, Convertible. J. D. Mayberry. 1,452,749; Apr. 24.
Check and check book, Bank. R. Bates. 1,453,234; Apr. 24.
Check-controlled machine. A. D. Antoine. 1,452,721; Apr. 24.
Check perforator. R. Bates. 1,453,235; Apr. 24.

Manifolding register.
Regulating and circuit-controlling apparatus. E. J. Blake. 1,452,587; Apr. 24.
Rivet heater, Electric. W. S. Johnson and J. W. Sheffer. 1,452,511–3; Apr. 24.
Rivet set. R. Hervig. 1,452,507; Apr. 24.
Road-grading machine, Power-operated. E. M. Wheelock. 1,453,231; Apr. 24.
Rock drill. G. Griesche. 1,452,734; Apr. 24.
Rock drill. C. R. Welch. 1,452,581; Apr. 24.
Rod: *See*—
Tie rod. Welding rod.
Roller: *See*—
Curtain roller. Land roller.
Roller. W. G. Bosworth. 1,452,824; Apr. 24.
Roof lug. H. C. Hames. 1,452,599; Apr. 24.
Rubber heel lift. C. H. Oakley. 1,452,891; Apr. 24.
Rubber mats, etc., Mold for. L. M. Bickett. 1,453,123; Apr. 24.
Rug manufacture. C. F. Bacon. 1,452,776; Apr. 24.
Rule and border type or slug-cutting machines, Work-holding and positioning device for. J. Logue. 1,452,809; Apr. 24.
Saccharine materials, Decolorizing and purification of. J. J. Hood and J. and P. G. Clark. 1,452,739; Apr. 24.
Safety pin. G. W. Markos. 1,452,747; Apr. 24.
Salt solutions, Decomposing mixed metal-. H. Pauling. 1,452,813; Apr. 24.
Sand and gravel obtained in brown-coal open workings, Depositing method for the masses of. W. Weber. 1,452,994; Apr. 24.
Sash adjusters, Operating means for. L. Roth. 1,452,616; Apr. 24.
Sash fastener. H. C. Gray. 1,452,598; Apr. 24.
Saw clamp. L. B. Flagler. 1,452,551; Apr. 24.
Scaffold. W. J. Murray. 1,453,227; Apr. 24.
Scaffold jack. H. C. Wertz. 1,452,717; Apr. 24.
Scarifier. N. D. Thomas. 1,453,208; Apr. 24.
Seat: *See*—
Folding seat.
Screw machines, Operating mechanism for wood-. H. L. Smith. 1,452,986; Apr. 24.
Seat cover. J. J. Loesch. 1,452,882; Apr. 24.
Seat cover, Sanitary. L. J. Frear. 1,452,552; Apr. 24.
Seeding machine and manure spreader, Combined. P. Targosky. 1,452,625; Apr. 24.
Self-cleaning rake. J. D. Richards. 1,452,984; Apr. 24.
Settee and table, Combined. J. N. Miller. 1,452,613; Apr. 24.
Sewing machine. W. H. Barnett. 1,452,632–3; Apr. 24.
Sewing machines, Embroidering attachment for. M. Hemleb. 1,452,687; Apr. 24.
Sewing machines, Supplemental work support for portable. G. R. Mock. 1,452,690; Apr. 24.
Shade holder. T. Euphrat. 1,453,099; Apr. 24.
Sharpener, Scissors. E. Jones. 1,453,246; Apr. 24.
Sheet and tin-plate packs, Opening. W. Newby. 1,452,890; Apr. 24.
Sheet feeder. W. E. Molins. 1,453,019; Apr. 24.
Sheet metal, Straightening. C. Flinn. 1,452,499; Apr. 24.
Shelf. W. J. Statler. 1,452,765; Apr. 24.
Shingles, Making parti-colored bituminous roofing. J. S. Miller, jr. 1,452,978; Apr. 24.
Shipping cases, Sealing fiber. H. R. Bliss. 1,452,588; Apr. 24.
Shipping container. W. Tribble. 1,452,768; Apr. 24.
Shock absorber. W. R. Morton. 1,452,568; Apr. 24.
Shock-absorber spring. T. B. Jenkins. 1,452,973; Apr. 24.
Shock-absorber top coupling. G. D. Neal. 1,453,163; Apr. 24.
Shock-absorbing mechanism. C. K. Brooks. 1,452,725; Apr. 24.
Shoe-string-holding cuff. E. H. and R. H. Binns. 1,453,036; Apr. 24.
Shoes and the like, Metallic heel for. A. Kurtis. 1,453,253; Apr. 24.
Sign. F. S. Riggs. 1,452,760; Apr. 24.
Sign, Advertising. H. A. Thuernau. Des. 62,251; Apr. 24.
Sign exhibit. Z. A. Gifford. 1,452,873; Apr. 24.
Signal: *See*—
Auto signal. Vehicle signal.
Signal system and transmitter therefor. R. M. Hopkins. 1,452,972; Apr. 24.
Signaling device. F. M. Hill. 1,452,737; Apr. 24.
Signaling, High-frequency. E. H. Colpitts. 1,452,957; Apr. 24.
Signaling mechanism. J. C. Sims. 1,453,195; Apr. 24.
Silo structure. F. J. Van Cott. 1,452,578; Apr. 24.
Sled. S. Zukowski. 1,453,232; Apr. 24.
Sled, Occupant-steered. M. Marciniak. 1,453,153; Apr. 24.
Slicer, Vegetable. J. M. Blanco. 1,452,724; Apr. 24.
Slicing machine. G. Lyeso. 1,452,564; Apr. 24.
Smelting furnace, Zinc-. B. Raeder. 1,452,934; Apr. 24.
Smokers' articles, Device for storing and displaying. R. Peyer. 1,452,700; Apr. 24.
Sock. F. D. Rickert. Des. 62,264; Apr. 24.
Socket. C. B. Holliday. 1,453,138; Apr. 24.
Soldering flux. H. A. Pallady. 1,453,080; Apr. 24.
Sound box. E. Fletcher. 1,452,498; Apr. 24.

Spacing tool, Adjustable. F. W. Deitz. 1,452,828; Apr. 24.
Spark plug. H. H. Chinsky and E. Honstetter. 1,453,039; Apr. 24.
Spark plug, Visible. W. H. Burt. 1,452,868; Apr. 24.
Speed-controlling device. A. Barr and W. Stroud. 1,453,119; Apr. 24.
Spinneret. F. G. Kraft and C. J. Bacon. 1,453,048; Apr. 24.
Spinning-jenny nipper. J. J. Kinney. 1,453,146; Apr. 24.
Spinning machine, Artificial-silk-. G. Juer. 1,452,607; Apr. 24.
Splicing apparatus. O. Butler and A. Morin. 1,452,906; Apr. 24.
Spoke grip. M. N. Colvin. 1,452,908; Apr. 24.
Spring: *See*—
Shock-absorber spring. Vehicle spring.
Spring wheel. W. J. Beisel. 1,452,782; Apr. 24.
Spring wheel. C. A. Kiggins. 1,453,247; Apr. 24.
Spring wheel. F. Stiltzel. 1,452,623; Apr. 24.
Springs, Gaiter of. H. Staub. 1,452,853; Apr. 24.
Stand and binder and method of use, Combined. C. R. Fargo. 1,453,065; Apr. 24.
Station selector. O. K. Bakken. 1,452,903; Apr. 24.
Statuette. W. Danson. Des. 62,253; Apr. 24.
Steel peb. H. L. Beaver. 1,453,120; Apr. 24.
Steering-gear stop device. J. Rowe. 1,452,985; Apr. 24.
Steering-mechanism-stabilizing device. W. D. Richardson. 1,452,656; Apr. 24.
Steering wheel. S. A. Snell. 1,452,534; Apr. 24.
Steering wheel cover. W. F. Ridge. 1,453,181; Apr. 24.
Stereopticon device. W. H. C. Dudley. 1,452,797; Apr. 24.
Stocking. E. Lepow. 1,452,517; Apr. 24.
Stoker, Furnace. R. S. Riley. 1,452,706; Apr. 24.
Storage tank, Portable air-. C. C. Carek. 1,422,789; Apr. 24.
Strainer, Sink. H. Dalitz. 1,452,494; Apr. 24.
Street safety zone. G. E. Healy. 1,452,875; Apr. 24.
Stucco-mixing machine. E. M. Pipe. 1,452,702; Apr. 24.
Sucker-rod-connecting means. E. J. Shaffer. 1,452,937; Apr. 24.
Surgical and other purposes, Lighting means for. E. C. Day. 1,453,006; Apr. 24.
Surgical apparatus. W. H. Garlock. 1,452,733; Apr. 24.
Surgical table. E. E. Cable. 1,453,062; Apr. 24.
Survey and solution of plane triangles in field work, Instrument for the. W. S. Moses. 1,453,078; Apr. 24.
Suspenders for children's clothes. C. E. Keller. 1,452,643; Apr. 24.
Swaging machines, Feed mechanism for. C. S. Jacobs. 1,452,740; Apr. 24.
Sweeping machine, Street-. H. G. Haworth. 1,452,735; Apr. 24.
Sweeper, Street. M. V. Liddell. 1,453,049; Apr. 24.
Swimming device. W. F. Chaupin. 1,452,790; Apr. 24.
Switch: *See*—
Electric switch.
Switch construction, Inclosed-. C. D. Platt. 1,452,814; Apr. 24.
Switches, Wall bridge for. G. H. Lindelof. 1,453,017; Apr. 24.
Switching mechanism. T. B. Ryon. 1,453,024; Apr. 24.
Table: *See*—
Concentrating table. Treatment table.
Surgical table.
Table. R. Ruffin, jr. 1,453,186; Apr. 24.
Tablet, Writing. E. J. Toal. 1,452,537; Apr. 24.
Talking machines, Stop device for. E. Grieger. 1,453,131; Apr. 24.
Tamping tool. K. Taylor. 1,452,990; Apr. 24.
Tank: *See*—
Filtering tank. Storage tank.
Taper protractor, Universal. G. H. Felske. 1,453,067; Apr. 24.
Taps or reamers, Guide device for. A. W. Stokes. 1,453,204; Apr. 24.
Telegraphic receiving apparatus. F. G. Creed. 1,452,793–4; Apr. 24.
Telegraphs, Transmitting apparatus for electric. L. M. Potts. 1,452,527; Apr. 24.
Telephone apparatus. L. Schmidt. 1,452,850; Apr. 24.
Telephone device. L. de Forest. 1,452,827; Apr. 24.
Telephones, Head receiver for. L. Schmidt. 1,452,851; Apr. 24.
Temperature-controlling means, Automatic. H. C. Mallory. 1,452,748; Apr. 24.
Tennis and like games, Racket for. A. Harris. 1,452,803; Apr. 24.
Test unit, Automotive. E. G. Beehler. 1,452,905; Apr. 24.
Textile fabric. E. Ericson and R. Weiss. Des. 62,254; Apr. 24.
Textile fabric. P. Reimann. Des. 62,260–3; Apr. 24.
Textile fabric. E. Sonntag, jr. Des. 62,266-7; Apr. 24.
Thermometer. S. M. Pike. 1,452,701; Apr. 24.
Thermometers, Pocket sterilizing case for clinical. A. J. V. McDonnell. 1,453,151; Apr. 24.
Thermostatic valve. C. H. Atkins. 1,452,723; Apr. 24.
Threshold eliminator. H. V. Pollard. 1,452,703; Apr. 24.
Tie rod, Auxiliary. S. L. Gardner. 1,452,554; Apr. 24.
Time indicator. A. Varaud. 1,453,086–7; Apr. 24.
Timer. A. P. McCulloch. 1,452,884; Apr. 24.
Tin, Electrodeposition of. L. D. Simpkins. 1,452,573; Apr. 24.
Tire, Automobile. J. Greszczuk. 1,453,224; Apr. 24.
Tire-inkating pump. T. M. Davies. 1,452,870; Apr. 24.
Tire lock. J. L. Huston. 1,453,139; Apr. 24.
Tire, Pneumatic. W. R. Busenbark. 1,452,787; Apr. 24.
Tire, Pneumatic. D. M. Weigel. 1,453,217; Apr. 24.
Tire protector. C. B. Jackson. 1,453,140; Apr. 24.
Tire tool. L. de Fernelmont. 1,452,596; Apr. 24.
Tire, Vehicle. R. von Krenski. 1,453,033; Apr. 24.
Tire, Vehicle. J. H. McCormick. 1,453,150; Apr. 24.
Tires, Ground-gripping chain for automobile. J. E. Robison. 1,453,183; Apr. 24.
Tires, Tread for auto. J. B. Pouk. 1,452,894; Apr. 24.
Tires, Vulcanizing. H. B. Wallace. 1,453,034; Apr. 24.
Toilet-article handle. J. Salm. Des. 62,246; Apr. 24.
Tone arm. A. W. Hoover and R. Winter, jr. Des. 62,257–8; Apr. 24.
Tool. W. McHewitt and H. G. Brandt. 1,453,018; Apr. 24.
Tool handle. H. Rosenberg. 1,453,082; Apr. 24.
Tools, Automatic stopping device for pneumatic. L. Rorive. 1,453,252; Apr. 24.
Tools, Multispeed gear for machine. A., A., jr., and H. Butterworth. 1,453,127; Apr. 24.
Tooth, Artificial. M. Karmann. 1,452,878; Apr. 24.
Toothbrush. A. Lenief. 1,453,149; Apr. 24.
Toothed wheel. W. R. Uggla and G. A. F. Wallgren. 1,453,031; Apr. 24.
Torpedo railway signal. H. O. Bemisderfer. 1,452,997; Apr. 24.
Toy. W. J. Morrisey. Des. 62,241; Apr. 24.
Toy elevator. J. P. Kirst. 1,452,608; Apr. 24.
Toy, Figure. D. F. Whitcomb and K. R. Coolidge. 1,452,820; Apr. 24.
Toy furniture. A. Duffield. 1,453,241; Apr. 24.
Toy gun. R. H. Williamson. 1,452,902; Apr. 24.
Toy, Mechanical. W. L. Goldman. 1,452,835; Apr. 24.
Toy vehicle. T. Bowden. 1,452,636; Apr. 24.
Toy vehicle. J. S. Gabke. 1,453,046; Apr. 24.
Track-belt unit. E. H. Savage. Re15,583; Apr. 24.
Tractor. R. Harroun. 1,452,557; Apr. 24.
Tractor. J. O. Heinze. 1,453,134; Apr. 24.
Tractor. G. P. Risser and A. P. Williams. 1,453,056; Apr. 24.
Tractors, Distant control for. F. T. Court. 1,453,130; Apr. 24.
Transmission control. J. H. Hawley. 1,452,505; Apr. 24.
Transmission device. C. W. Weiss. 1,452,946; Apr. 24.
Trap: *See*—
Fish trap.
Trap. J. K. Nordenstam. 1,453,167; Apr. 24.
Treatment table. F. Koenigkramer. 1,453,013; Apr. 24.
Trimmer: *See*—
Belt-attachment trimmer.
Trombone attachment. L. C. Benson. 1,453,122; Apr. 24.
Trousers. L. Newman. 1,453,165; Apr. 24.
Truck, Lifting. H. F. Martin. 1,452,566; Apr. 24.
Tube for heating and cooling purposes, Double-walled E. Witzenmann. 1,453,220; Apr. 24.
Tube holder, Collapsible-. W. H. Roberts. 1,452,761; Apr. 24.
Tube-rolling mill. R. C. Stiefel. 1,453,203; Apr. 24.
Tubes, Closure for. L. A. Freedman. 1,452,967; Apr. 24.
Turbine-blade fastening. H. T. Herr. 1,452,602; Apr. 24.
Turning music, Device for. F. E. Hartup. 1,452,804; Apr. 24.
Twine cutter. B. Subin. 1,453,206; Apr. 24.
Typesetting machine. B. R. Webster. 1,452,945; Apr. 24.
Typewriting machines, Attachment for. J. H. Ananson. 1,452,822; Apr. 24.
Universal joint. E. H. Sherbondy. 1,452,530; Apr. 24.
Urea, Manufacture of. W. Gaus, W. Meiser, and E. Eberhardt. 1,453,069; Apr. 24.
Valve. H. H. Emmons. 1,452,962; Apr. 24.
Valve. W. R. Smith. 1,452,764; Apr. 24.
Valve, Air-brake-release. A. A. Drees. 1,452,495; Apr. 24.
Valve, Control. R. F. Ringle. 1,452,848; Apr. 24.
Valve for carburetors, Thermostatic. F. O. Lewis. 1,453,016; Apr. 24.
Valve for combustion engines, Automatic additional air. W. H. Bauert. 1,453,236; Apr. 24.
Valve gear of duplex pumps. A. H. Twells. 1,453,029; Apr. 24.
Valve-grinding machine. R. Hervig. 1,452,508; Apr. 24.
Valve lifter. J. Sunnen. 1,452,714; Apr. 24.
Valve-operating connection. M. A. Yeakley. 1,452,995; Apr. 24.
Valve-operating device. B. Wichser. 1,452,859; Apr. 24.
Valve, Pressure-control. J. C. Johnson. 1,452,560; Apr. 24.
Valve, Safety. R. E. Newell. 1,453,070; Apr. 24.
Valves, Apparatus for making motor. R. Jardine. 1,452,510; Apr. 24.
Valves, Cam chuck for centering. R. Hervig. 1,452,506; Apr. 24.
Vanity box, Association. A. E. Rope. 1,453,240; Apr. 24.
Vaporizer, Engine-fuel. J. Good. 1,452,683; Apr. 24.
Vapors, Volatilizing, distilling, or separating absorbed. C. L. Voress and V. C. Canter. 1,453,215; Apr. 24.
Vegetable cutter. F. G. Brewer. 1,452,546; Apr. 24.

Vehicle alarm, Motor-. P. Dowd. 1,453,240; Apr. 24.
Vehicle chassis. E. H. Sherbondy. 1,452,532; Apr. 24.
Vehicle lighting device. G. H. Harvey. 1,453,226; Apr. 24.
Vehicle, Motor. A. E. Osborn. 1,452,698; Apr. 24.
Vehicle signal. J. B. Phleger. 1,453,179; Apr. 24.
Vehicle spring. E. Brundige. 1,453,061; Apr. 24.
Vehicle tongue. W. B. Hughes. 1,452,876; Apr. 24.
Vehicle trunk rack. O. G. Holway. 1,452,639; Apr. 24.
Vehicles and the like, Top for. F. K. Lewis. 1,452,975; Apr. 24.
Vehicles, Central buffer for short couplings of railway. E. Müller. 1,453,160; Apr. 24.
Vehicles, Device for extricating mud-stalled. B. D. Hobson. 1,453,011; Apr. 24.
Vehicles, Fan control for motor. E. I. Bowe. 1,453,124; Apr. 24.
Vehicles, Hub brake for motor. W. G. Bryan. 1,453,126; Apr. 24.
Vehicles, Rim for wheels of. L. J. B. Fourniaud. 1,452,831–2; Apr. 24.
Vehicles, Safety signal for. C. M. Mead. 1,452,647; Apr. 24.
Vehicles, Steering knuckle for motor. E. H. Sherbondy. 1,452,531; Apr. 24.
Vessels, Machine for feeding. E. Nordstrom. 1,452,843; Apr. 24.
Vise. W. Sury. 1,453,207; Apr. 24.
Vise, Bench. J. A. Quinlan. 1,452,847; Apr. 24.
Voltage control, System of. L. S. Uphoff. 1,452,857; Apr. 24.
Voltaic arc between electrodes not in contact, Means for establishing a. F. C. Ucar. 1,453,030; Apr. 24.
Wagon, Combined high-hoist and dump. J. Gasser. 1,452,501; Apr. 24.
Wall board, Apparatus for the manufacture of. R. J. Johnston. 1,452,742; Apr. 24.
Wall bracket. J. R. Kearney and H. L. Johnson. 1,452,515; Apr. 24.
Washboiler apron, Detachable swinging. E. Geyer. 1,452,682; Apr. 24.
Washer. E. H. Carpenter. 1,452,402; Apr. 24.
Washing machine. A. C. Schmelzer. 1,452,710; Apr. 24.
Washing machines, Clutch for. W. J. Conlon. 1,453,129; Apr. 24.
Water, Apparatus for preparing artificial radio active. H. F. Savoye. 1,452,709; Apr. 24.
Water-tank heater, Hot-. C. E. Cole. 1,452,676; Apr. 24.
Watering device, Stock-. R. F. Rasmussen. 1,452,705; Apr. 24.
Weaving machines or the like, Jacquard mechanism for. R. H. Weber. 1,452,771; Apr. 24.
Weighing mechanism. S. W. Shuford. 1,452,763; Apr. 24.
Welding machine, Electric seam-. E. Schröder. 1,452,762; Apr. 24.
Welding, Method of and apparatus for. F. J. Schuman. 1,452,936; Apr. 24.
Welding rod. F. M. Becket. 1,452,781; Apr. 24.
Wells, Apparatus for treating oils from flowing. R. Conrader. 1,452,549; Apr. 24.
Wheel: *See*—
Automobile steel wheel. Spring wheel.
Cushion wheel. Steering wheel.
Demountable wheel. Toothed wheel.
Metal wheel.
Wheel and air tire to be used therewith, Resilient. J. Spijker. 1,453,199; Apr. 24.
Wheel structure, Insulated. I. A. and J. C. Call. 1,452,547; Apr. 24.
Wheel with improved pneumatic tire for motor vehicle. H. de Hooydonck. 1,452,795; Apr. 24.
Window construction. F. Dutcher. 1,452,732; Apr. 24.
Window construction, Metal. F. Mesker, C. E. Smith, and J. Beuc. 1,452,519; Apr. 24.
Window shade. E. H. Lunken. 1,452,611; Apr. 24.
Window-shade bracket and curtain-pole support, Combined. G. Basilio. 1,452,865; Apr. 24.
Wire-assembling machine. E. A. Pigeon. 1,452,615; Apr. 24.
Wire-insulation cutter and stripper. B. F. T. Bell. 1,452,634; Apr. 24.
Wireless telegraph calling device. W. H. Nottage and T. D. Parkin. 1,452,925; Apr. 24.
Wireless transmitter. W. T. Ditcham. 1,452,960; Apr. 24.
Wireless transmitting station. H. J. Round. 1,452,849; Apr. 24.
Workholder. I. F. Woodrow. 1,452,949; Apr. 24.
Wrapping machine. A. E. Hopkins. 1,452,604; Apr. 24.
Wrench. G. R. Barker. 1,452,951; Apr. 24.
Wrench. A. H. Wettwer. 1,452,668; Apr. 24.
Wringer: *See*—
Mop wringer.
Yarn-let-off connection. J. W. Giles. 1,453,101; Apr. 24.

CLASSIFICATION OF PATENTS

ISSUED APRIL 24, 1923.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 1: 1,452,565
2— 23: 1,452,517
84: 1,452,648
91: 1,453,144
143: 1,453,243
4— 18: 1,452,552
1,453,106
35: 1,452,494
5— 327: 1,452,915
7— 3: 1,452,642
8— 6: 1,453,021
9— 21: 1,452,790
10— 101: 1,452,986
147: 1,453,204
12— 47: 1,453,191
1,453,192
48: 1,452,670
1,452,671
1,452,672
50: 1,452,669
67: 1,453,042
123: 1,452,991
14— 19: 1,453,084
15— 84: 1,452,735
128: 1,452,976
147: 1,452,658
176: 1,453,149
261: 1,452,798
17— 21: 1,452,893

Disclaimer.

1,224,253.—*Roy R. Wiley* and *Wallace K. Wiley*, Buffalo, N. Y., and *William S. Hough, jr.*, St. Catharines, Ontario, Canada. ILLUMINATED SIGN. Patent dated May 1, 1917. Disclaimer filed April 12, 1923, by the assignee, the *Flexlume Corporation*.

Hereby enters this disclaimer to those claims of the specification of said Letters Patent which are excessive, namely claims 8, 9 and 10 of said Letters Patent and which are as follows:

"8. In an illuminated sign, a sign character comprising a sheet of light transmitting material having the strokes of the sign character in spaced relation to the margins of the sheet, a covering of sheet metal for the exterior of the sheet of light transmitting material leaving the character strokes exposed, said covering being of greater spread than the area defined by the character strokes, and angle strips of sheet metal each of an extent to embrace the marginal portions of the sheet of light transmitting material exterior to the area defined by the character strokes with the angle edge of each angle member in spaced relation to the corresponding edge of the sheet of light transmitting material, and fastening means traversing the angle member between the edge of the sheet of light transmitting material and the angle edge of the angle member and also secured to the exterior metal covering of the sign character.

"9. In an illuminated sign, a sign character comprising a sheet of light transmitting material with the character strokes in spaced relation to the margin of the sheet, an exterior opaque covering for that portion of the sheet of light transmitting material other than the character stroke portions thereof and extending beyond the margins of said sheet, and holding means for the sheet of light transmitting material comprising angle strips applied to the marginal portions of the sheet with fastening members traversing the angle strips exterior to the marginal portions of the sheet and securing the angle strips to the exterior covering for the sheet of light-transmitting material.

"10. An illuminated sign comprising a casing having openings therein, doors mounted in said openings, and each comprising a sheet of metal cut out in conformity with the outline of a sign character, a plate of light-transmitting material with a sign character produced thereon in relief, and holding members applied to the marginal portions of the sheet and to the door with the inner face of the sheet except where engaged by the holding members wholly exposed."

Interference Notices.

U. S. PATENT OFFICE, *Washington, Apr. 3, 1923.*

Rex Fluid Company, its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of The Rex Laboratories, of 2453 North Halsted Street, Chicago, Ill., for registration of a trade-mark and trade-mark registered December 4, 1906, No. 58,083, to the Rex Fluid Company, Des Moines, Iowa, and a notice of such declaration sent by registered mail to said Rex Fluid Company at the said address having been returned by the post office undeliverable, notice is hereby given that unless said Rex Fluid Company, its assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN,
Acting Commissioner.

U. S. PATENT OFFICE, *Washington, Apr. 11, 1923.*

Austin Poor & Co., its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of Ireland Bros., Inc., of 102 Franklin Street, New York, N. Y., for registration of a trade-mark and trade-mark registered June 26, 1906, No. 54,319, to Austin, Poor & Co., of 72 Leonard Street, New York, N. Y., and a notice of such declaration sent by registered mail to said Austin, Poor & Co. at the said address having been returned by the post office undeliverable, notice is hereby given that unless said Austin Poor & Co., its assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

KARL FENNING,
Assistant Commissioner.

U. S. PATENT OFFICE, *Washington, Apr. 16, 1923.*

Jiffy Apron Company, its assigns or legal representatives, take notice:

An interference having been declared by this Office between the applications of Jiffy Jumper Mfg. Co., of 39 West Adams Street, Chicago, Ill., and Guiterman Brothers, of Fourth and Sibley Streets, St. Paul, Minn., for registration of trade-mrks and trade-mark registered February 9, 1915, No. 102,521, to Jiffy Apron Company, 255 Gratiot Avenue, Detroit, Mich., and a notice of such declaration sent by registered mail to said Jiffy Apron Company at the said address having been returned by the post office undeliverable, notice is hereby given that unless said Jiffy Apron Company, its assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

KARL FENNING,
Assistant Commissioner.

Condition of Applications Under Examination at Close of Business April 20, 1923.

Room No.	(Total number of applications awaiting action, excluding Trade-Mark Division, 73,846; Trade-Mark Division, 3,986. Oldest new case, April 28, 1922; oldest amended, May 3, 1923. The dates given are 1923 except where * indicates 1923.) Divisions, Examiners, and subjects of inventions.	Oldest new application and oldest action by applicant awaiting office action. New.	Amended. DECISIONS IN PATENT AND TRADE-MARK CASES.

Commissioner's Decisions.

EX PARTE THE BRADFORD DYERS' ASSOCIATION, LTD.

Decided January 5, 1923.

TRADE-MARKS—REGISTRATION BY A PARTY WHO DYES BUT NEITHER BUYS NOR SELLS FABRICS.

Where an applicant dyes goods, which operation results in a finished fabric, and stamps its mark upon the goods dyed by it as a guarantee of the quality of the dye and the character of the dyeing as well as of the quality of the fabric selected for dyeing, after which the fabric is placed upon the market, *Held* that the goods dyed being goods of commerce the applicant is entitled to registration, although it does not appear that the applicant either buys or sells the goods which it dyes.

APPEAL from Examiner of Trade-Marks.

TRADE-MARK FOR WOOLEN PIECE GOODS.

Mr. William Wallace White for applicant.

FENNING, *Assistant Commissioner:*

This is an appeal from the action of the Examiner of Trade-Marks refusing to register applicant's mark. Applicant alleges that it has established a world-wide reputation for the quality of its dyes and finishes. It receives woven fabric, the weaving having been accomplished by some other concern or concerns whose business it is to weave the raw fibers into the fabric. Applicant dyes the goods, which operation results in a finished fabric, which is then placed upon the market. Applicant stamps its mark upon the goods dyed by it as a guarantee of the quality of the dye and the character of the dyeing as well as of the quality of the fabric selected for dyeing. It alleges that this indication of its mark is well known to the trade. It does not appear, however, that applicant either buy or sells goods which it dyes. The Examiner suggests that unless applicant shows that it actually owns the goods which it dyes and that the finished goods are marketed by it its mark is not used in commerce, and therefore it is not a trade-mark. Reliance is placed upon *ex parte Hankison* (8 O. G., 89; 1875, O. G., p. 72); but there the applicant was a carpet cleaner, and the goods before being treated by applicant had been withdrawn from commerce.

Applicant refers to *Amoskeag Mfg. Co.* v. *Garner* (155 Barb., 151), where a State court apparently was willing to protect a mark of one who took fabrics woven by other manufacturers and printed designs on them. It may be that applicant is entitled to protection at common law, but is not entitled to trade-mark registration. In 1880, however, in an English case (*re Sykes & Co.'s Trade-Mark*, 43 Law Times, New Series, p. 626) the English court held that the mark of a firm which bleached cotton was a good and registrable trade-mark. The decision indicates that the facts there differed from the present case merely in that in the Sykes case the goods were bleached by the applicant, where here the goods are dyed by the applicant.

On the state of facts here shown it is certainly of benefit to the public to be able to know that its goods are dyed by a proper party. The goods dyed are goods of commerce. It is a questionable case, but readily distinguishable from the typical cases of organizations rendering service for whom registration has been denied. Cleaning carpets, selling mortgages, writing insurance, doing laundry work, is different from dyeing goods as one step in their manufacture.

The present mark has been registered in England.

Until the courts definitely determine that applicant is not entitled to registration I believe this Office should give it the benefit of the doubt.

The Examiner is reversed, and the mark will be registered.

Supreme Court of the United States.

EIBEL PROCESS COMPANY *v.* MINNESOTA & ONTARIO PAPER COMPANY.

Decided February 19, 1923.

1. PATENTABILITY—UNIVERSAL ADOPTION OF INVENTION—ACQUIESCENCE BY TAKING LICENSE—LICENSES BY PARTIES FINANCIALLY INTERESTED IN PATENT.

Where the makers of two-thirds of all the print paper of the country are licensees of E., but the makers of the greater part of this output are shareholders in E.'s company, and practically all the other manufacturers of the country use E.'s improvement, it can hardly be that dividends on the stock held by the shareholding licensees would furnish motive enough for them to continue to be licensees and to use something that was not of great advantage to them.

2. SAME—SAME—MARKED INCREASE IN PRODUCTION.

The fact that E.'s improvement has been generally adopted in the paper-making business and that the daily product in paper making has thus been increased at least twenty per cent over that which had been achieved before E. is very weighty evidence to sustain the presumption from his patent that what he invented and discovered was new and useful, but the presumption is not conclusive and may be explained.

3. EVIDENCE—PRIOR DISCOVERY MUST BE CLEARLY AND SATISFACTORILY PROVEN.

The temptation to remember in cases where important results are attained by carrying forward old expedients and the ease with which honest witnesses can convince themselves after many years of having had a conception at the basis of a valuable patent are well known in this branch of the law, and have properly led to a rule that evidence to prove prior discovery must be clear and satisfactory.

4. EVIDENCE OF PRIOR DISCOVERY WHERE INVENTION COMES AS A SURPRISE AND IS UNIVERSALLY ADOPTED.

Considering the indisputable fact that E.'s successful experiment and his application for a patent surprised the whole paper trade, and that for a short time many held back from risking so radical a change and then all adopted it, oral evidence that some per-

sons had discovered the source of trouble and the means of remedying it some years before E. is incredible.

5. CONSTRUCTION OF PATENTS—IMPORTANT AND UNIMPORTANT IMPROVEMENTS.

If an invention has advanced the art substantially, then the court is liberal in its construction of the patent to secure the inventor the reward he deserves. If what he has done marks only a slight step forward and that which he says is a discovery is on the border line between mere mechanical change and real invention, then his patent will be given a narrow scope and infringement will be found only in approximate copies of the new device. * * * A patent which is only an improvement on an old machine may be very meritorious and entitled to liberal treatment.

6. SAME—PATENT FOR AN AVOWED IMPROVEMENT MAY IN ADDITION COVER FEATURES OF OLD MACHINE NOT MENTIONED IN SPECIFICATION.

Where E. is an avowed improver upon a well-known and universally used machine in which the subject matter of his improvement had always been controlled by two factors, and he says nothing in his specification to exclude these factors, but merely adds another factor, and defendants contend that the patentee mentions no other factor, that he must be confined to this, and that a machine which used other factors for this purpose does not infringe, *Held* that the patent is to be construed to cover a machine of the old type in which the improvement is used as an appreciable factor, in addition to the factors theretofore known in the machine in bringing about the desired result.

7. SAME—DEFINITENESS—RELATIVE TERMS SUFFICIENT WHERE IT IS DIFFICULT TO BE MORE DEFINITE AND THE TERMS ARE UNDERSTOOD BY THOSE SKILLED IN THE ART.

Where it was difficult to be more definite, due to the varying conditions existing in the operations of a machine, but where reference in the specification to the small elevations shown in earlier devices indicated that the patentee had in mind substantial elevations as compared with them in order to achieve his result, where the drawing indicates a definite elevation, and where the evidence discloses that one skilled in the art had no difficulty when his attention was called to its importance, in determining what was the elevation required to produce the desired result, *Held* that such expressions as "high" and "substantial" were sufficiently definite.

8. ANTICIPATION—ACCIDENTAL RESULTS NOT INTENDED AND NOT APPRECIATED.

Where the defendant contended that whether a prior patentee perceived the advantage of speeding up the stock to an equality with the wire, yet the necessary effect of their devices was to achieve that result, and therefore their machine anticipated E., *Held* that there was no evidence that any pitch of the wire used before E. had brought about such a result as that sought by him, and if it had done so under unusual conditions, accidental results, not intended and not appreciated, do not constitute anticipation.

9. PATENTABILITY—CHANGE IN DEGREE WITH WHOLLY DIFFERENT OBJECT FROM THAT OF THE PRIOR ART.

Where the defendant contended that the alleged invention covers only a matter of degree in pitch, *Held* that this attack upon E.'s patent cannot prevail where E.'s high or substantial pitch was directed toward a wholly different object from that of the prior art.

10. SAME—CHANGE IN DEGREE TO REMEDY A HITHERTO UNKNOWN SOURCE OF TROUBLE.

Where the invention was not the mere use of a high or substantial pitch to remedy a known source of trouble, but was the discovery of a source not before known and the application of the remedy, the inventor was entitled to be rewarded in his patent.

11. SAME—DISCOVERY OF LONG-SOUGHT SOURCE OF TROUBLE AND APPLICATION OF REMEDY—UNIVERSAL ADOPTION OF REMEDY.

The fact that in a decade of eager quest for higher speeds an important chain of circumstances had escaped observation, the fact that no one had applied a remedy for the consequent trouble until E., and the final fact that when he made known his discovery all adopted his remedy, leave no doubt that what he saw and did was not obvious and did involve discovery and invention.

12. SAME—VALIDITY OF PATENT NOT AFFECTED BY POSSIBILITY OF ACCOMPLISHING SAME RESULT IN ANOTHER WAY.

Although the speed of flow by gravity may be increased by increasing the head of the flow box, this does not affect the validity of E.'s patent, which covers a change in the inclination of the endless carrier for accomplishing the same result, especially since there were difficulties in the first method at the time he filed his application.

13. INFRINGEMENT—MAY BE AVOIDED BY ACCOMPLISHING SAME RESULT IN ANOTHER WAY AND BY DIFFERENT MEANS.

If defendant or others can do what E. accomplished in another way, and by means he did not include in his specification and claims, they are at liberty to do so and avoid infringement.

CERTIORARI to the United States Circuit Court of Appeals for the First Circuit.

Mr. Frederick P. Fish, Mr. Harrison F. Lyman, and *Mr. Guy Cunningham* for the petitioner.

Mr. Nathan Heard, Mr. Maurice M. Moore, Mr. Amasa C. Paul, and *Mr. Livingston Gifford* for the respondent.

STATEMENT OF THE CASE.

This was a bill in equity charging the infringement of a patent and seeking an injunction, an accounting and damages. The Patent No. 845,224 issued to William Eibel, February 26, 1907. The application was filed August 22, 1906. The specifications describe the patent as for an improvement for Fourdrinier machines for paper making and say that—

it has for its object to construct and arrange the machine whereby it may be run at a very much higher speed than heretofore and produce a more uniform sheet of paper which is strong, even and well formed.

The contention of the plaintiff, the petitioner here, is that his improvement was an important step in the art of paper making, and increased the daily product from twenty to thirty per cent.

The patent was held void by the District Court for the Western District of New York in the case of *Eibel Process Company* v. *Remington-Martin Company* (226 Fed., 766, 1914). On appeal, the Circuit Court of Appeals for the Second Circuit reversed the decree of dismissal in the district court, sustained the patent and found infringment of claims Nos. 1, 2 and 3, but did not pass upon claims Nos. 7, 8 and 12. (234 Fed., 624, 1916). The bill in the present case was filed in the district court for Maine, January 1, 1917. That court in 1920 held the patent valid and entered a decree of injunction and for damages. (267 Fed., 847). On appeal, the Circuit Court of Appeals for the First Circuit reversed the decree and directed the dismissal of the bill. (274 Fed., 540, 1921). Because of the conflict in the two circuits, certiorari was granted to review the latter decree.

The Fourdrinier machine has for many years been well known and most widely used for making newsprint paper. Its main feature is an endless wire cloth sieve passed over a series of rolls at a

constant speed. The sieve known as the "wire" is woven with 60 or 70 meshes to the inch. It may be 70 feet or more in length and is often more than 100 inches in width. Its working surface with the total length of 70 feet is about 30 feet, the rest being taken up in the return of the wire underneath. At what is called the breast roll, at one end of the machine, there is discharged upon the wire from a flow box or pond, a constant stream of paper making stock of fibres of wood pulp mixed with from 135 to 200 times their weight of water of the consistency and fluidity of diluted milk. As this stream moves along the wire, the water drains through its meshes and the fibres are deposited thereon. The process is stimulated by a device to shake the wire with constant and rapid sidewise thrusts, forward and back, which insures the proper interlocking and felting of the stock as it progresses, the water continuing to drain from it. At the end of the surface length of the wire, the stock reaches what are called the couch rolls between which it is pressed and then in the form of a sheet of uniformly-distributed pulp, felted sufficiently to hold together, it leaves the wire and is carried through a series of rolls or calenders by which the sheet is pressed and dried and from which it emerges to be rolled up as finished paper.

In the flow box or "pond" where the stream of pulp stock is stored there is a gate or door forming the end of the flow box called the "slice" by lifting which the stock is given the opportunity to flow upon the wire. The stream thus issuing is given a width of the desired sheet of paper and a depth regulated by the height to which the slice is lifted. The stream on the wire is prevented from flowing off the sides by "deckle straps" which are thick rubber bands, resting on each side of the wire at each side of the pulp. Traveling with the wire, they form lateral walls confining the stock till it is too dry to flow. Between the breast roll where the stream of liquid stock strikes the wire, and the couch rolls at the end of the surface length of the wire, there is a series of parallel horizontal rolls supporting the wire, called table rolls, and twenty feet from the breast roll, there are placed under the wire and in contact with it, three suction boxes in succession, in which a partial vacuum is maintained and through them is sucked out the greater part of the water remaining in the wet sheet of the pulp. Placed above the wire and just beyond the first suction box is what is called the "dandy roll" which is faced with wire cloth. Its office is to impress the upper surface of the forming sheet of paper and give it a texture similar to that which the lower surface of the paper has from its contact with the wire. It may also carry the design which is to give the watermark to the sheet if such a mark is desired. Beyond this is a larger roll called the guide roll, arranged with an automatic device varying its axis so as to keep the wire straight. From the guide roll the wire drops below the plane to the couch rolls already referred to.

These machines are very large, some of them weighing more than a million pounds, and their cost will range as high as one hundred twenty-five thousand dollars. They are run night and day in order that the capital invested in them may yield a proper return. Speed which increases production is therefore of the highest importance. Eibel's patent had for its avowed purpose the increase of this speed.

Eibel says in his specifications:

My invention is embodied, essentially, in the first part or element of the machine having the Fourdrinier wire or paper-making wire, and consists in causing the stock to travel by gravity in the direction of movement of the making-wire and approximately as fast as the making-wire moves, thereby resulting in a "gravity-feed" for the machine. The stock may be and preferably is caused to travel more rapidly than the normal or usual speed of the making-wire for a certain grade of stock, and means are provided for increasing the speed of the machine so as to cause the making-wire to move at a higher rate of speed than usual, being substantially equal to the speed of the rapidly-moving stock. To accomplish this result in a simple manner, the breast-roll end of the paper-making wire is maintained at a substantial elevation above the level, thereby providing a continuous downwardly-moving paper-making wire, and the declination thus given to the wire is such that the stock is caused to travel by gravity in the direction of the movement of the wire and substantially as fast as the wire moves. The declination of the paper-making wire may be adjustable or the speed of the wire may be adjustable, in order that the velocity produced by gravity in the stock on the declining wire will approximately equal the speed of the wire. By this arrangement the speed of the machine may be increased to such an extent as to bring the speed of the making-wire up to the maximum velocity of the rapidly-moving stock and a strong, even and well-formed sheet produced which is more uniform than usual.

Two figures accompany the specifications of the Eibel patent. Figure No. 1 shows the wire of the Fourdrinier machine in outline from the breast roll to the guide and couch rolls, with a screw device for raising and lowering the breast roll and wire from the horizontal. The outline shows an elevation of the breast roll and wire so that the angle between the wire and the horizontal at the guide roll is about four per cent, which in a surface length of 30 feet would mean an elevation of 12 inches at the breast roll. The other figure No. 2 shows a device for regulating the speed of the wire applied at the lower couch roll.

Again the patentee says:

For the purpose of increasing the speed of the machine to the maximum I maintain the breast-roll end of the making-wire at a high elevation above the level, so that the stock travels by gravity much faster than the making-wire ordinarily runs for a certain grade of stock, and I then increase the speed of the machine to such extent as to bring the rate of speed of the making-wire up to the speed of the rapidly-moving stock, and as a result the capacity of the machine is largely increased.

I find in practice that by providing a gravity-feed operating substantially as herein described, the stock runs smoothly and evenly without waving or rippling, and the fibers are thereby permitted to settle with great uniformity as regards their distribution over the wire, so that the paper in addition to being well formed is very uniform. Furthermore, as the stock is moving with the paper-making wire instead of being moved by the wire, or essentially by the wire, the formation of the paper will begin at the start and will continue to the end of the travel of the stock with the wire.

The claims in question are:

1. A Fourdrinier machine having the breast-roll end of the paper-making wire maintained at a substantial elevation above the level, whereby the stock is caused to travel by gravity, rapidly, in the direction of movement of the wire, and at a speed approximately equal to the speed of the wire, substantially as described.

2. A Fourdrinier machine having the breast-roll end of the paper-making wire maintained at a high elevation, whereby the stock is caused to travel by gravity faster than the normal speed of the wire for a certain grade of stock, and having means for increasing the speed of the machine to cause the wire to travel at substantially the same rate of speed as the rapidly-moving stock, substantially as described.

3. A Fourdrinier machine having the paper-making wire declined from the breast-roll to the guide-roll, the breast-roll end of the wire being maintained at a substantial elevation above the level, whereby the stock is caused to travel by gravity, rapidly, in the direction of movement of the wire and at a speed approximately equal to the speed of the wire, substantially as described.

7. A Fourdrinier machine having the paper-making wire declined from the breast-roll to the guide-roll, and the suction-boxes supported at a corresponding declination, substantially as described.

8. A Fourdrinier machine having the paper-making wire declined from the breast-roll to the guide-roll, and the several suction-boxes arranged at different elevations, substantially as described.

12. In a Fourdrinier machine, a downwardly-moving paper-making wire, the declination and speed of which are so regulated that the velocity of the stock down the declining wire, caused by gravity, is so related to the velocity of the wire in the same direction, that waves and ripples on the stock are substantially avoided and the fibers deposited with substantial uniformity on the wire, substantially as described.

Mr. Chief Justice TAFT, after stating the case as above, delivered the opinion of the Court.

The evidence in the case establishes that before Eibel entered the field, continued high speeds in the wire of the Fourdrinier machine much beyond five hundred feet a minute resulted in defective paper. Eibel concluded that this was due to the disturbance and ripples in the stock as it was forming at a point between the breast roll and the first suction box, caused by the fact that at that point the wire was travelling much faster than the stock, and that if at that point the speed of the flowing stock could be increased approximately to the speed of the wire, the disturbance and rippling in the stock would cease and the defects would disappear from the paper product. Accordingly he proposed to add to the former speed of the stock by substantially tilting up the wire and giving the stock the added force of the downhill flow. He thought that as long as he could thus maintain equality of speed between stock and wire at the crucial point, and prevent the disturbance and rippling there, a further increase in the speed of the wire would not result in a defective product. He confirmed this by actual trial.

The first and most important question is whether this was a real discovery of merit. The circuit court of appeals thought not. The prior art and the obvious application of the principle that water will run down hill in their opinion robbed it of novelty or discovery. The issue is one largely of evidence.

The plaintiff below introduced the patent and some evidence of infringement and a single expert to explain the discovery and invention and rested. Then the defendant brought in a mass of evidence to show prior discovery and use, to impeach the utility of plaintiff's alleged invention and to demonstrate the indefiniteness of specification and claims. The fact that the adjudication of the validity of the patent would impose a royalty on many of the paper manufacturers of the country who were not already licensees of the plaintiff led to the defendant's sending a circular letter to awaken the interest and secure the help of all so situated. This, as the record shows, had the effect to invoke offers of testimony on the critical points in the case from the unlicensed part of the trade. The plaintiff adduced a few witnesses in rebuttal as to particular details and the same expert as in chief. The plaintiff's case as presented on the record is largely the presumption of validity and novelty attaching to the patent and such evidence as comes from defendants' witnesses. A case that can be made out in all its elements by cross-examination of opposing witnesses is a strong case. Implication of facts and conditions falling from the mouths of witnesses when only collateral to the exact point of inquiry for which they are called is generally the most trustworthy evidence because the result of the natural, so to say, subconscious adherence to truth uninfluenced by a knowledge or perception of the bearing of the implication on the ultimate issue in the case.

A thorough examination of the whole voluminous record produces a satisfying conviction first that for years newsprint paper makers and manufacturers of paper-making machinery were engaged in seeking a method of increasing the speed of the newsprint machines, and that they had succeeded by improving the stock and by strengthening the parts in bringing the speed of the wire and the delivered paper up to between five and six hundred feet a minute but that when these high speeds were attained and maintained for any length of time, though they served to enable manufacturers to advertise such maximums, their continued and regular operation showed defects in the paper which were only overcome by a reduction of speed to something less than five hundred feet. As against advertisement, and the exuberant memory of witnesses, the actual contemporaneous record of daily figures of production whenever brought to light justifies this conclusion. A leading manufacturer, one of the most enthusiastic witnesses on the subject of speed before Eibel produced a memorandum of a visit he made in October, 1904, less than two years before Eibel's application, to see the operation of a machine he had manufactured which he called "the banner installation of the world" and made an entry in his diary, "Grand Sight—475 feet." There is the usual unconscious straining of memory without written record carried back ten or fifteen years, but the evidence on the whole is satisfying that the practical speed for the regular production of good newsprint paper never much exceeded that speed which had gratified the pride of this witness. A typical case is in that of machines made by Bagley & Sewall, large manufacturers of paper-making machines for the Laurentide Paper Company. The president of Bagley & Sewall testified that the speed of the machine was 552 feet a minute with satisfactory paper, and that he visited Laurentide in October, 1904, and counted the revolutions himself. He produced a letter from Mr. Chahoon, of the Laurentide Company, of about the same date, confirming his statement of the count and the satisfactory product and an advertisement of Bagley & Sewall to the same effect of January, 1905. In rebuttal, a monthly record of the work of the machine is produced by the foreman at Laurentide for this same machine from January, 1905, to December, 1906, showing the speed to vary from a maximum of 518 in 1905, to 475 in 1908, with a general average of less than 500 and an explanation that the high speeds did not make a good product and were reduced. Our conclusion is confirmed, and indeed the importance of the issue of fact as to maximum speed before Eibel is minimized by the circumstance, uncontroverted, that the owners of these fastest machines, at once upon Eibel's publication of his discovery, adopted his pitch and increased their product.

What Eibel tried to do was to enable the paper maker to go to six or seven hundred feet and above

in speed and retain a good product. Did he do it? Eibel was the superintendent of a paper mill at Rhinelander, Wisconsin. Before August, 1906, he raised the pitch of the wire from two or three inches to twelve inches and greatly increased the speed with a satisfactory product and in that month he applied for a patent. The defendant's witnesses without exception refer to that disclosure as something that surprised and startled the paper-making trade. It spread, to use the expression of one witness, like wild fire. There were those who hesitated to take the venturesome step to give such an unheard of pitch to the wire and waited until others assumed the risk, but the evidence is overwhelming that within a short interval of a year or two all of the fast machines were run with wires at a pitch of twelve inches and that this pitch has been increased to fifteen and eighteen and even twenty-four inches, that the speed of the machines with satisfactory product has increased to six hundred, six hundred and fifty, and even seven hundred feet, with plans now even for a thousand feet and that the makers of two-thirds of the print paper of the country are licensees of Eibel.

[1] Defendant attempts to break the effect of this evidence by showing that five of the largest paper manufacturers who are licensees of Eibel are also shareholders in the Eibel Process Company, the plaintiff, and that they make 2200 tons of the 5000 tons of paper made daily in the United States. This circumstance seems to have had influence with the circuit court of appeals. There are, however, ten other paper-making companies, not shareholders, who are licensees and use the Eibel pitch, and whose aggregate production is 1200 tons a day; and what is equally significant, thirteen other companies have contributed to a fund to help in resisting the establishment of the right of Eibel to claim a royalty for the use of this high or substantial pitch of the wire in the making of paper. Presumably they too find it wise to use the Eibel pitch. The paper makers in this country who do not use the Eibel pitch, therefore, are few. It can hardly be that dividends on the shares of stock in the Eibel Company held by the five large companies would furnish motive enough for them to continue to be licensees and to use something that was not of great advantage to them in their chief business of making of paper; and certainly no such motive would explain the action of the licensees who are not stockholders or that of the infringers, in continuing to use the Eibel pitch. It should be said that one of the large manufacturers of paper-making machinery called by the defendant said that since 1907 he had not installed a single machine without the Eibel pitch.

[2] The fact that the Eibel pitch has thus been generally adopted in the paper-making business and that the daily product in paper making has thus been increased at least twenty per cent over that which had been achieved before Eibel is very weighty evidence to sustain the presumption from his patent that what he discovered and invented was new and useful. Of course, although very persuasive, it is not conclusive and may be explained. This brings us to the consideration of the evidence of the prior art and the contention of the defendant, and the conclusion of the court below, that the step taken by Eibel, so far as he took one, was a mere obvious application of fully developed devices in the prior art.

Eibel in his patent gives this measure of the prior art:

> The Fourdrinier wire has usually been arranged to move in a horizontal plane, although I am aware that means have been provided for adjusting the breast roll and of the wire to different elevations usually below the level, to provide for running with different grades of stock—as for instance with quick stock and slow stock; but so far as I am aware the making-wire has always had to perform the work of drawing along the stock and as the wire moved much faster than the stock the stock waved or rippled badly near the breast roll end of the wire, which gradually diminished until an equilibrium was established and a smooth, even, glassy surface presented, and not until the waving or rippling ceased did the fibres lay down uniformly and produce a well formed sheet of paper. The machine has been run necessarily at a slow rate of speed to give ample time for the water to escape and for the fibres to lay down so as to make a uniform sheet, and in case the time was insufficient, the breast roll end of the wire has been lowered still further until the desired result was accomplished. In accordance with my invention I operate entirely above the level to cause the stock to travel by gravity at a velocity approximately equal to the speed of the making wire which I believe to be a new principle of operation.

It is important that the stock when it reaches the "dandy" roll beyond the first suction box of the machine, shall be, on the one hand, free enough of water to be a formed sheet and take an impression from the dandy roll, and on the other that it shall not be so dry that it will not retain the impression. Paper of such a heavy composition of fibre and water that it holds water long is said to be slow stock. Paper of lighter and thinner composition parting with water easily and drying quickly is called quick stock. Various means were adopted to give the stock the proper degree of dryness at the dandy roll, usually by adjustment of the composition of the stock. What Eibel describes in this reference was another means. It was not widely used however. It was a slight depression or elevation in the wire at the breast roll so that slow stock could be made to run up hill from the flow box to the dandy roll, lengthening the time of the movement and thus giving more opportunity in its progress for the needed draining of the stock. On the other hand, fast or thin stock from which the water flowed too easily could be made to retain sufficient water by hastening its progress to the dandy roll by the downhill tilt of the wire. This tilt was obtained by raising the breast roll end of the wire either by putting shimming blocks under that end of the machine or by special devices to be described. The sole object was greater or less drainage of stock for the dandy roll. The Eibel invention is distinguished from the prior art in two ways, first in that the pitch of the wire was for a different purpose to be accomplished, not at the dandy roll some twenty or more feet from the breast roll, but at a point only nine or ten feet from there, and, second, by the fact that to achieve

his purpose a high or substantial pitch must be given to the wire, while only a small or trivial pitch was needed for the drainage of the prior art.*

This difference in purpose and degree of pitch between Eibel's device and the prior art is quite clearly shown by reference to a patent granted to Barrett and Horne, assignors to J. H. Horne & Sons, one of the important manufacturers of paper machinery of the country, in 1899. Their specifications showed a device capable of elevating the breast roll less than three inches and its sole purpose was for drainage. Their specifications say:

> In certain kinds of pulp, notably the wood pulp which is now largely used in making paper, the water drains away very rapidly so that the pulp may become nearly dry before it leaves the shake frame, and thus not be properly laid when it reaches the rollers. This tendency may be obviated to a considerable extent by downwardly inclining the shake frame toward the rollers, so that the water tends to travel along with the pulp and will not, therefore, drain out through the wire so rapidly. It is further desirable that the amount of inclination or slope should be variable, so as to adapt the machine for pulp of different kinds or grades.

The Bayliss Austin machine, one of three chiefly relied on to show prior use, was made by the Horne Company and was designed by Barrett and Horne on the model of this patent. It is very clear from an examination of the design and contract for this machine that the pitch of the wire in it could not have exceeded three inches and that it was used for drainage. Other patents were set up in defense, some of them showing devices for raising the breast roll and wire above the level, and lowering them below the level for the purpose of drainage. The angle of elevation and depression was always small. There was a constant straining by the witnesses for the defense to increase the elevation before Eibel. On the direct examination they began with a positive assertion that a pitch of four, five, and even six inches, had been used in certain machines before Eibel's time but written records, contracts and specifications brought out on cross-examination show nothing more than three inches provided for purpose of drainage and not more than that was used. This is not to say that witnesses in the face of such records did not testify to a higher elevation, but in such cases the amount of elevation rested in memory running back more than ten or fifteen years, a memory stimulated by the subsequent high pitches of Eibel and the retrospect of the progress that now seems so easy and clear to every one. There was, too, always indefiniteness as to when such increase in elevation of the wire had taken place whether before or after August, 1906, Eibel's date, and there was no evidence of weight, we think, after a full examination of the record, sufficient to justify a finding that such elevations had ever exceeded three inches before his application.

[3, 4] This is confirmed by the fact that greater elevation was not needed for the purpose of drainage for which it was devised and used. It is true that some witnesses testify that they realized before Eibel's application that speeding up the stock to equal velocity with the wire would solve the difficulty and aid the speed. But there is not a single written record, letter or specification of prior date to Eibel's application that discloses any such discovery by anyone, or the use of the pitch of the wire to aid the speed of the machine. The oral evidence on this point falls far short of being enough to overcome the presumption of novelty from the granting of the patent. The temptation to remember in such cases and the ease with which honest witnesses can convince themselves after many years of having had a conception at the basis of a valuable patent, are well known in this branch of law, and have properly led to a rule that evidence to prove prior discovery must be clear and satisfactory. (*Barbed Wire Patent Case*, 143 U. S., 275, 284; 58 O. G., 1555; *Loom Co.* v. *Higgins*, 105 U. S., 580, 591; 21 O. G., 2031.) Indeed when we consider the indisputable fact that Eibel's successful experiment at Rhinelander and his application for a patent surprised the whole paper trade, and that for a short time many held back from risking so radical a change and then all adopted it, oral evidence that some persons had discovered the source of trouble and the means of remedying it some years before Eibel is incredible. We are confirmed in this conclusion by the finding of Judge Hale in the district court which is not offset by the reversal of his decree in the circuit court of appeals because that court seems to have reached its conclusion chiefly on other grounds yet to be considered.

The defendant's counsel contend that the specifications of the Eibel patent require that the only force to be used in giving speed to the stock shall be the force of gravity created by the angle of down hill inclination of the wire. They say that the patentee mentions no other means of acceleration, that he must be confined to this, and that a machine which uses other factors for this purpose does not infringe. We do not understand the circuit court of appeals to go quite so far, but it does seem to give a construction requiring the force of gravity caused by the pitch of the wire to be the predominating cause of the increased speed of the stock. The factors of speed of the stock in such a machine before the factor of pitch was applied to increase it, were the head or hydraulic pressure of the stock in the flow box behind the slice, imparting movement to it as it came out on to the wire under the lifted slice, and the carrying effect of the moving wire upon the fluid stock as it fell upon the wire and proceeded gradually to form into a web as the fibres were laid and the water drained.

* It is true that defendant's expert Carter points out that in some of the machines of the prior art in which means were provided for tilting up the wire, the tilting was confined to that part of the surface length covered by the shake frame, say 18 feet, and did not extend to the first suction box, whereas Eibel's tilting involved the entire surface length of thirty feet. It would follow from this that the elevation of three inches in such machines would mean a greater angle of declination than three inches for the full surface length and that the disparity between three inches and twelve inches was not so great as the figures would lead one to think. But whatever difference this might make, the fact remains that Eibel's pitch was substantially greater than anything in the prior art.

Many calculations were made by defendant's expert Carter, based on the laws of hydraulic pressure and flow to show that under varying conditions of head and pitch and the speed of the wire, the chief factor would be head, the next the "drag" or carrying effect of the wire, and the least in degree and importance in making the velocity of the stock and the wire equal would be the pitch, and that Eibel's invention could not be present because the "drag" of the wire and its influence upon the speed of the stock must be eliminated under Eibel's specifications. We do not so understand it. As the stock descends upon the wire with the head of the flow box, it is thin and liquid, the wire at its greater speed necessarily imparts additional speed to the stock and in its unformed fluidity the added speed does not disturb or ripple the stock to the injury of the process of paper making. It is only after the stock proceeds a third or a half of the surface length of the wire that the point is reached where the overspeed of the drag becomes troublesome in the felting or formation of the web of the pulp. Before that point is reached, the "drag" may be useful in bringing the speed of the stock nearer to that of the wire without injury. The truth seems to be and this is brought out with force in the testimony of the defendant's expert witness Livermore, that while it is possible to calculate to a nicety the velocity of the free flowing liquid stock due to head and pitch, when unaffected by drainage, variation in viscosity and fluidity and the like, yet when these conditions are present, as they always are, and the other less calculable factor of the drag of the wire enters the problem, there is no means, short of actual experiment to enable one to anticipate results and it is quite impossible to apportion to each factor its real influence. This fact reflects on the question whether Eibel's discovery was invention rather than the mere obvious and simple application of known natural forces.

The defendant introduced expert evidence to show that with a head of 2¼ inches in the flow box and a speed of 585 feet to the minute in the wire, and excluding the factor of "drag" of the wire it would require an elevation of 48 inches to make up the difference in speed of the stock given by the head, and the speed of the wire at a distance 10 feet from the point of discharge on the wire. The conclusion drawn from this seems to be that as no practical machine uses 48 inches pitch, the Eibel invention has never been used or infringed. Disregarding its error in omitting necessary factors already adverted to, this reasoning seems to us to depend on too narrow a construction of the patent.

[5] In administering the patent law the court first looks into the art to find what the real merit of the alleged discovery or invention is and whether it has advanced the art substantially. If it has done so, then the court is liberal in its construction of the patent to secure to the inventor the reward he deserves. If what he has done works only a slight step forward and that which he says is a discovery is on the border line between mere mechanical change and real invention, then his patent, if sustained, will be given a narrow scope and infringement will be found only in approximate copies of the new device. It is this differing attitude of the courts toward genuine discoveries and slight improvements that reconciles the sometimes apparently conflicting instances of construing specifications and the finding of equivalents in alleged infringements. In the case before us, for the reasons we have already reviewed, we think that Eibel made a very useful discovery which has substantially advanced the art. His was not a pioneer patent, creating a new art; but a patent which is only an improvement on an old machine may be very meritorious and entitled to liberal treatment. Indeed, when one notes the crude working of machines of famous pioneer inventions and discoveries, and compares them with the modern machines and processes exemplifying the principle of the pioneer discovery, one hesitates in the division of credit between the original inventor and the improvers; and certainly finds no reason to withhold from the really meritorious improver, the application of the rule "*ut res magis valeat quam pereat*", which has been sustained in so many cases in this Court. (*Winans* v. *Drumead*, 15 Howard, 338, 341; *Corning* v. *Burden*, 15 Howard, 265, 269; *Farrill* v. *Railroad Company*, 1 Wall., 491, 510; *Rubber Co.* v. *Goodyear*, 9 Wall., 788, 795; *McLain* v. *Ortemayer*, 141 U. S., 419, 425; 57 O. G., 1129.)

Eibel was an avowed improver, not in the art of paper making generally, but upon a well-known and universally used machine. In that machine, the speed of the stock which was the subject matter of his improvement, had always been controlled by two factors, the head of the stock in the flow box, and the carrying effect of the under moving wire. He says nothing in his specifications to exclude these factors, he merely adds another factor of speed to secure the equality of speed of the stock with the wire. He says:

> For the purpose of increasing the speed of the machine to the maximum I maintain the breast roll end of the making-wire at a high elevation above the level, so that the stock travels by gravity much faster than the making-wire ordinarily runs for a certain grade of stock, and I then increase the speed of the machine to such an extent as to bring the rate of the making-wire up to the speed of the rapidly-moving stock, and as a result the capacity of the machine is largely increased.

We agree fully with Judge Hale in the district court in his comment on this:

> The process invented by him (Eibel) begins to operate after the stock has entered upon the wire. His apparent attempt was to get rid of bubbles and wrinkles, before he got to the place on the machine where the paper is formed. To do this, he allowed gravity to work with "drag" and with "head." He harnessed all the elements he could find. He brought gravity in with the other elements; and so brought the speed of the stock up to equality with that of the wire. By this means he achieved high speed and also freed the stock on the wire from waves and ripples. (267 Fed., 855.)

The circuit court of appeals questions the assumption that gravity was a new factor with Eibel, because the head of the flow box is only another application of the force of gravity. This is a mere criticism of a term which whether accurate or not is not misleading. What Eibel was dealing with in his patent as a new factor was the additional force acquired by the pitch of the wire and that he called

gravity, and Judge Hale in the passage quoted uses the word with the same meaning and without any confusion to the reader.

[6] We think, then, that the Eibel patent is to be construed to cover a Fourdrinier machine in which the pitch of the wire is used as an appreciable factor, in addition to the factors of speed theretofore known in the machine, in bringing about an approximation to the equal velocity of the stock and the wire at the point where but for such approximation the injurious disturbance and ripples of the stock would be produced.

[7] The next objection to the patent which prevailed in the circuit court of appeals is that its terms are too vague because the extent of the factor of pitch is not defined except by the terms "substantial" and "high". The figure accompanying the specification and illustrating the improvement indicates an angle of four per cent or an elevation of 12 inches, and the reference to the small elevations for drainage shown in earlier devices indicated that the patentee had in mind elevations substantial as compared with them in order to achieve his purpose of substantially increasing the speed of the stock. It was difficult for him to be more definite, due to the varying conditions of speed and stock existing in the operations of Fourdrinier machines and the necessary variation in the pitch to be used to accomplish the purpose of his invention. Indefiniteness is objectionable because the patent does not disclose to the public how the discovery, if there is one, can be made useful and how its infringement may be avoided. We do not think any such consequences are involved here. This patent and its specifications were manifested to readers who were skilled in the art of paper making and versed in the use of the Fourdrinier machine. The evidence discloses that one, so skilled, had no difficulty, when his attention was called to their importance, in fixing the place of the disturbance and ripples to be removed, or in determining what was the substantial pitch needed to equalize the speeds of the stock and wire at that place. The immediate and successful use of the pitch for this purpose by the owners of the then fastest machines and by the whole trade is convincing proof that one versed in paper making could find in Eibel's specifications all he needed to know, to avail himself of the invention. Expressions quite as indefinite as "high" and "substantial" in describing an invention or discovery in patent specifications and claims have been recognized by this Court as sufficient. In *Tilghman* v. *Proctor* (102 U. S., 707; 19 O. G., 859), the claim sustained was for "the manufacturing of fat acids and glycerine from fatty bodies by the action of water at a high temperature and pressure." (See also *Rubber Company* v. *Goodyear*, 9 Wall., 788, 794; *Mowry* v. *Whitney*, 14 Wall., 620, 629; *Lawther* v. *Hamilton*, 124 U. S., 1, 9; 42 O. G., 487; *Carnegie Steel Co.* v. *Cambria Iron Co.*, 185 U. S., 403, 436; 99 O. G., 1866; *Abecrombie & Fitch Co.* v. *Baldwin*, 245 U. S., 198, 205; 246 O. G., 567.)

[8] It is contended on behalf of the defendant that whether Barrett and Horne perceived the advantage of speeding up the stock to an equality with the wire, yet the necessary effect of their devices was to achieve that result and therefore their machine anticipated Eibel. In the first place we find no evidence that any pitch of the wire, used before Eibel, had brought about such a result as that sought by him, and in the second place if it had done so under unusual conditions, accidental results, not intended and not appreciated, do not constitute anticipation. (*Tilghman* v. *Proctor*, 102 U. S., 707, 711; 19 O. G., 859; *Pittsburgh Reduction Company* v. *Cowles Electric Co.*, 55 Fed. Rep., 301, 307; 69 O. G., 789; *Andrews* v. *Carman*, 13 Blatch., 307, 323; 9 O. G., 1011.)

[9] It is next objected that the alleged invention covers only a matter of degree in pitch which can not be the subject of a patent. The prior art showed the application of gravity by use of the pitch of the wire to the improvement of the Fourdrinier machine and Eibel, it is said, merely increased degree of pitch and gravity for the same general purpose. We think this attack upon the patent can not prevail. Eibel's high or substantial pitch was directed toward a wholly different object from that of the prior art. He was seeking thereby to remove the disturbance and ripples in the formation of the stock about ten feet from the discharge, while the slight pitches of the prior art were planned to overcome the dryness in the formed web of the stock at double the distance from the discharge. It would seem that the greater speed of the stock produced by Eibel would make difficult the joint application of the principles of Eibel and Barrett and Horne, and that the function of adjusting the drainage for the dandy roll must be carried on by some of the other methods known to the art when Eibel's pitch is used. But however this may be, the object of the one was entirely different from that of the other. Livermore, an expert witness called by the defendant, when asked the question whether the purpose of the Barrett & Horne patent had anything in common with the theory of the Eibel patent, answered:

> I should say not. It looks to me as if Barrett and Horne referred to the adjustment of inclination with one effect in mind, and that Eibel referred to like adjustment with another effect in mind. * * * In this particular case, the two effects have, so far as I can see, no special correlation to one another, and an adjustment made with one effect in mind might or might not produce a desirable effect as to the other function or phenomenon.

[10, 11] In considering this phase of the controversy, we must not lose sight of the fact that one essential part of Eibel's discovery was that the trouble causing the defective paper product under high machine speed was in the disturbance and ripples some ten feet from the discharge and that they were due to the unequal speeds of stock and wire at that point and could be removed by equalizing the speeds. The invention was not the mere use of a high or substantial pitch to remedy a known source of trouble. It was the discovery of the source not before known and the application of the remedy for which Eibel was entitled to be rewarded in his patent. Had the trouble which Eibel sought to remedy been the well-known difficulty of too great wetness or dryness of the web at the dandy roll and had he found that a higher rather than a low pitch would do that work better, a patent for this improvement might well have been attacked on the ground that he was seeking monopoly for a mere matter of degree. But that is not this case. On the other hand, if all knew that the source of the trouble Eibel was seeking to remedy was where he found it to be and also knew that increased speed of the stock would remedy it, doubtless it would not have been invention on his part to use the pitch of the wire to increase the speed of the stock when such pitch had been used before to do the same thing although for a different purpose and in a less degree. We can not agree with the circuit court of appeals that the casual connection between the unequal speeds of the stock and the wire, and the disturbance and rippling of the stock, and between the latter and the defective quality of the paper in high speeds of the machine was so obvious that perception of it did not involve discovery which will support a patent. The fact that in a decade of an eager quest for higher speeds this important chain of circumstances had escaped observation, the fact that no one had applied a remedy for the consequent trouble until Eibel, and the final fact that when he made known his discovery, all adopted his remedy, leave no doubt in our minds that what he saw and did was not obvious and did involve discovery and invention.

[12, 13] The circuit court of appeals dwells on the fact that the use of the pitch of the wire was not really the introduction of a new factor in the solution of the problem because the same result would have followed if the head of the flow box had been made greater in order to increase by gravity the speed of the stock. Doubtless this could have been done. There were difficulties, however, in such a method when Eibel's application was filed, because in the then machines the flow box was supported by an apron over the wire and the necessary addition to the weight of the stock in the flow box, in increasing the head, would have interfered with the free working of the wire. Since that time an improvement has been adopted by which the flow box does not rest on the wire and additional head can be imparted to the stock. The defendant invites attention to the fact that one or two paper makers are increasing this head and giving up the pitch, for the purpose of increasing the speed of the stock. We do not see that these circumstances in any way affect the validity of the Eibel patent. If defendant or others can do what Eibel accomplished in another way, and by means he did not include in his specifications and claims, i. e., by additional head and the abandonment of a substantial pitch, they are at liberty to do so and avoid infringement.

We come finally to the question of infringement. If the Eibel patent is to be constructed as we have construed it, there can be no doubt that the defendant uses the Eibel invention. The device which the defendant uses for tilting the wire, i. e., by shimming blocks and that for regulating and increasing the speed of the wire are plainly equivalents of the same elements in the new combination which Eibel shows in his drawings and specifications. The defendant uses a Fourdrinier machine having the breast roll end of the paper-making wire maintained at an elevation of 15 inches above the level whereby the stock is caused to travel by gravity rapidly in the direction of the movement of the wire and at a speed approximately equal to the speed of the wire substantially as described. This brings the defendant's machines within the first claim of the patent if 15 inches is a substantial elevation of the making wire, as all the witnesses concede that it is. The same conclusion must be reached as to the second claim because the defendant uses a machine—

> having the breast roll end of the paper making wire maintained at a high elevation, whereby the stock is caused to travel by gravity faster than the normal speed of the wire for a certain grade of stock and having means for increasing the speed of the machine to cause the wire to travel at substantially the same rate of speed as the rapidly moving stock, substantially as described.

The same thing is true of the third claim.

Question has been made whether these three claims are for a machine or a process. We think they are claims for a machine, i. e., for an improvement on a machine, and that the devices for such improvement, to wit, the elevation by a screw or other equivalent method, and the control of the speed of the wire, are shown by the specifications and the figures, together with a sufficient description of their operation.

The seventh and eighth claims are for the same improvement with the suction boxes changed from their usual position in the unimproved machine to make them effectively function on the pitched wire. They are machine claims and are infringed by the defendant. Their new adjustment is part of a new combination and the words substantially as described limit them to a combination including the elements included in the first three claims.

Claim No. 12 is as follows:

> 12. In a Fourdrinier machine, a downwardly-moving paper-making wire, the declination and speed of which are so regulated that the velocity of the stock down the declining wire, caused by gravity, is so related to the velocity of the wire in the same direction that waves and ripples on the stock are substantially avoided and the fibers deposited with substantial uniformity on the wire, substantially as described.

This comes nearer to being a process claim but whether it is or not the defendant infringes it.

The evidence discloses that after the suit was brought, the defendant reduced the pitch of one of its machines to six inches and the contention of defendant is that the machine ran as well and gave as good results as when its pitch was 15 inches. We are not called upon to decide whether this contention can be sustained because the reduction was after the bill was filed. It may be noted, however, that the admissions of witnesses

seem to show that this reduction was made for purposes of the suit and that immediately after the defendant won the suit in the circuit court of appeals, it restored the pitch of this machine to 15 inches, and when the decree of the circuit court of appeals proved not to be final, the wire was lowered again to a 6-inch pitch. Much evidence was taken and much discussion has followed upon the point whether a 6-inch pitch accomplishing in whole or in part what Eibel sought to do would infringe a patent for a substantial pitch. We do not find it necessary to pass definitely on the question because it is not before us on the record, though we can not prevent the natural inferences upon this point to be drawn from the conclusions we have reached.

The decree of the circuit court of appeals dismissing the bill is reversed and the decree of the district court is affirmed.

PATENT SUITS.

TRADE-MARKS

OFFICIAL GAZETTE, MAY 1, 1923.

[VOL. 310. No. 1.]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 14 of said act, a fee of ten dollars must accompany each notice of opposition.

Ser. No. 126,221. (CLASS 39. CLOTHING.) THE KAYNEE COMPANY, Cleveland, Ohio. Filed Dec. 18, 1919.

KAYNEE
WASHTOGS

No claim is made to the word "Washtogs" apart from the mark shown in the drawing.

Particular description of goods.—Children's Rompers and One-Piece Play Garments.

Claims use since about Aug. 1, 1914.

Ser. No. 126,222. (CLASS 39. CLOTHING.) THE KAYNEE COMPANY, Cleveland, Ohio. Filed Dec. 18, 1919.

COVERTOGS

Particular description of goods.—Overalls.

Claims use since about Jan. 1, 1918.

Ser. No. 142,047. (CLASS 1. RAW OR PARTLY-PREPARED MATERIALS.) TETRALIN-GESELLSCHAFT MIT BESCHRÄNKTER HAFTUNG, Berlin, Germany. Filed Jan. 10, 1921.

Tetralin

Particular description of goods.—Resins, Coal, Coke, Artificial Fuel, Tanning Bark, Rubber, and Rubber Substitutes.

Claims use since Dec. 12, 1906.

Serial No. 142,802. (CLASS 35. BELTING, HOSE, MACHINERY PACKING, AND NONMETALLIC TIRES.) THE NATIONAL TIRE & RUBBER COMPANY, East Palestine, Ohio. Filed Jan. 26, 1921.

LAGONDA

Particular description of goods.—Rubber Tires and Tubes.

Claims use since Dec. 29, 1920.

Ser. No. 147,217. (CLASS 39. CLOTHING.) THE S & S SHIRT COMPANY, Philipsburg, Pa. Filed May 4, 1921.

S&S Shirt S&S

The word "Shirt" is disclaimed apart from the mark shown in the drawing.

Particular description of goods.—Work Shirts, Dress Shirts, Negligee Shirts, and Flannel Shirts.

Claims use since May 15, 1910.

Ser. No. 149,352. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) THE FRANK R. PRINA CORPORATION, New York, N. Y. Filed June 18, 1921.

U.S. GOLD

No claim is made to the letters "U. S." except in connection with the balance of the mark.

Particular description of goods.—Wheat Flour.

Claims use since 1914.

Ser. No. 150,833. (CLASS 38. PRINTS AND PUBLICATIONS.) UNIVERSAL FEATURE AND SPECIALTY COMPANY, Chicago, Ill. Filed July 22, 1921.

DOODADS

The lining on the drawing does not indicate color.
Particular description of goods.—Books Published from Time to Time and Comic Section in Daily Newspapers.
Claims use since June 1, 1921.

Ser. No. 151,237. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) STROHMEYER & ARPE COMPANY, New York, N. Y. Filed Aug. 1, 1921.

ANITA

Particular description of goods.—Olive Oil and Salad Oil.
Claims use since September, 1908.

Ser. No. 151,987. (CLASS 39. CLOTHING.) WALTER A. GOLDSMITH, Cleveland, Ohio. Filed Aug. 20, 1921.

Particular description of goods.—Bloomers.
Claims use since Aug. 11, 1921.

Ser. No. 152,048. (CLASS 32. FURNITURE AND UPHOLSTERY.) UNIT CONSTRUCTION COMPANY, Philadelphia, Pa. Filed Aug. 22, 1921.

Particular description of goods.—Portable Sectional Partitions of Wood and Glass Which are Adapted for All Partition Purposes (Including Partitions for Offices and Stores or Rooms of Other Character, Display Booths, the Construction of Rooms, Telephone Booths, Etc.); Sectional Ceilings or Roofs for Such Structures as Previously Mentioned; Store Fixtures Comprising Counters, Tables, Show Cases, Display Cases, Shelf Casing, Stock Cases, Wall Racks, Information Desks, Benches, and Cashiers' Cages; Talking-Machine-Record Counters, Talking-Machine-Record Racks, and Stands for Talking Machines; Fixtures for Window Display Comprising Window Platforms and Portable Window Screens for Use in Window Display; and Printers' Furniture Comprising Imposing and Make-Up Tables, Type Cabinets, Bookbinders' Cabinets, Electrotype Cabinets, Galley Cabinets, Ink and Roller Cabinets, Job-Press Cabinets, Letter-Board Cabinets, Linotype Cabinets, Monotype Cabinets, Units for Type Cabinets, Proof-Readers' Desks, and Letter Boards.
Claims use since Apr. 1, 1913.

Ser. No. 152,049. (CLASS 32. FURNITURE AND UPHOLSTERY.) UNIT CONSTRUCTION COMPANY, Philadelphia, Pa. Filed Aug. 22, 1921.

UNICO

Particular description of goods.—Portable Sectional Partitions of Wood and Glass Which are Adapted for All Partition Purposes (Including Partitions for Offices and Stores or Rooms of Other Character, Display Booths, the Construction of Rooms, Telephone Booths, Etc.); Sectional Ceilings or Roofs for Such Structures as Previously Mentioned; Store Fixtures Comprising Counters, Tables, Show Cases, Display Cases, Shelf Casing, Stock Cases, Wall Racks, Information Desks, Benches, and Cashiers' Cages; Talking-Machine-Record Counters, Talking-Machine-Record Racks, and Stands for Talking Machines, Fixtures for Window Display Comprising Window Platforms and Portable Window Screens for Use in Window Display; and Printers' Furniture Comprising Imposing and Make-Up Tables, Type Cabinets, Bookbinders' Cabinets, Electrotype Cabinets, Galley Cabinets, Ink and Roller Cabinets, Job Press Cabinets, Letter Board Cabinets, Linotype Cabinets, Monotype Cabinets, Units for Type Cabinets, Proof-Readers' Desks, and Letter Boards.
Claims use since Apr. 1, 1913.

Ser. No. 152,124. (CLASS 39. CLOTHING.) THE FAIR, Chicago, Ill. Filed Aug. 24, 1921.

Roger Williams

Trade-mark is the name of an historical character now deceased.
Particular description of goods.—Men's and Boys' Suits and Overcoats.
Claims use since on or about Aug. 15, 1921.

Ser. No. 154,540. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) THE WILTON-PLANTZ CANDY COMPANY, Valdosta, Ga. Filed Oct. 24, 1921.

The undersigned petitioners further disclaim the words "Nut-Bar" from the other features of the trade-mark.
Particular description of goods.—Manufactured Candy with Nuts into a "Nut Bar."
Claims use since January, 1921.

Ser. No. 154,793. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) DWINELL-WRIGHT COMPANY, Boston, Mass. Filed Oct. 31, 1921.

"TIP-TOP"

Particular description of goods.—Coffee.
Claims use since November, 1898.

Ser. No. 155,841. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) VITA RICE PRODUCTS CO., Willows, Glenn County, Calif. Filed Nov. 23, 1921.

VITA RICE CREAM

No claim is made to the words "Rice Cream" apart from the mark shown in the drawing.
Particular description of goods.—Preparation Made from Rice in Powdered and Liquid Form.
Claims use since Oct. 3, 1921.

Ser. No. 156,997. (CLASS 4. ABRASIVE, DETERGENT, AND POLISHING MATERIALS.) OTTOMAR HEINSIUS V. MAYENBURG, doing business as Laboratorium Leo, Dresden, Germany. Filed Dec. 21, 1921.

Leosira

Particular description of goods.—Shaving Soap in Cake, Stick, and Powdered Form.
Claims use since November, 1919.

Ser. No. 157,002. (CLASS 50. MERCHANDISE NOT OTHERWISE CLASSIFIED.) BURTON PRESTON & CO., Mansfield, Ohio. Filed Dec. 21, 1921.

ROB ROY RED

No claim is made to the word "Red" apart from the mark shown in the drawing.
Particular description of goods.—Monuments.
Claims use since Nov. 8, 1921.

Ser. No. 157,417. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) THE EDGAR CHEMICAL COMPANY, Cleveland, Ohio. Filed Jan. 3, 1922.

EXTRACTOLIN

Particular description of goods.—Liniments for the Treatment of Neuralgic Pains; Rheumatism Pains in Side, Chest, or Back; Muscle Strains, Sore Throat, Bronchial Affections, and Similar Uses.
Claims use since about July 1, 1916.

Ser. No. 157,770. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) MAURICE MOSTOVOY, doing business as Sun-Set Raisin Co., Philadelphia, Pa. Filed Jan. 11, 1922.

Particular description of goods.—Raisins.
Claims use since Oct. 15, 1921.

Ser. No. 157,827. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) JOHN S. BOYD COMPANY INC., Williamstown, Mass. Filed Jan. 12, 1922.

CHEVELLE

Particular description of goods.—Cotton Pile Cloth in the Piece.
Claims use since June 1, 1914.

Ser. No. 157,855. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) ARTHUR H. SHAW, Wellesley, Mass. Filed Jan. 12, 1922.

SABRINA

Particular description of goods.—Live Poultry, Eggs for Hatching, and Eggs for Food.
Claims use since Jan. 2, 1915.

Ser. No. 158,583. (CLASS 13. HARDWARE AND PLUMBING AND STEAM-FITTING SUPPLIES.) SOCIÉTÉ P. & A. PICARD, Paris, France. Filed Jan. 28, 1922.

A.P.C.

Particular description of goods.—Cremorne Bolts, Espagnolette Bolts; Locks and Bolts Made of Brass, Hand Chased and Gilt, Designs of All Periods; Steel Mortise and Rim Locks, Locks with Cylinder to be Master Keyed.
Claims use since Apr. 22, 1910.

Ser. No. 158,595. (CLASS 4. ABRASIVE, DETERGENT, AND POLISHING MATERIALS.) THE BIRD-ARCHER COMPANY, New York, N. Y. Filed Jan. 30, 1922.

BAC

Particular description of goods.—Brass Cleaners and Iron Cleaners.
Claims use since Sept. 1, 1919.

Ser. No. 159,509. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) ALBERT A. JULIN, Chicago, Ill. Filed Feb. 15, 1922.

Trade-mark with the exception of the words "The Hair Net of Superior Quality," which the applicant hereby disclaims as not being part of the trade-mark shown in the accompanying drawing.
Particular description of goods.—Hair Nets.
Claims use since Nov. 15, 1921.

Ser. No. 159,522. (CLASS 39. CLOTHING.) NATIONAL CAP MFG. COMPANY, Louisville, Ky. Filed Feb. 18, 1922.

No claim is made to the word "Cap" apart from the mark as shown.
Particular description of goods.—Caps for Men, Boys, and Children.
Claims use since 1911.

Ser. No. 159,538. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) SOUTHERN SAW WORKS, Atlanta, Ga. Filed Feb. 18, 1922. Under ten-year proviso.

Particular description of goods.—Saws.
Claims use since December, 1890.

Ser. No. 159,539. (CLASS 12. CONSTRUCTION MATERIALS.) ST. ANONYME DU FIBROCIMENT ET DES REVETEMENTS ELO, Poissy, France. Filed Feb. 18, 1922.

The trade-mark consists of the word "Elo" written in a distinctive manner.
Particular description of goods.—Building Materials Composed of a Compound of Fiber and Cement.
Claims use since Oct. 9, 1913.

Ser. No. 159,700. (CLASS 45. BEVERAGES, NON-ALCOHOLIC.) WILL H. GUNCKEL, Toledo, Ohio. Filed Feb. 23, 1922.

RAZINOLA

Particular description of goods.—Nonalcoholic, Maltless Beverage Sold as a Soft Drink.
Claims use since about Sept. 15, 1921.

Ser. No. 159,720. (CLASS 39. CLOTHING.) PARKER-BRIDGET COMPANY, Washington, D. C. Filed Feb. 23, 1922.

Warwick Lodge
Sport Suit

No claim is made to the words "Sport Suit" except in the association shown.
Particular description of goods.—Ladies' Sport Suits and Coats.
Claims use since Apr. 1, 1920.

Ser. No. 159,763. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) THE NATIONAL BAKERIES, INC., Tampa, Fla. Filed Feb. 24, 1922.

TAMPAMAID

TAMPAMAID

No claim is made to the words "Cleanliness," "Quality," "Courtesy," "Bread," "Made By," and "Not Less Than 16 Oz." apart from the mark as shown in the drawing.
Particular description of goods.—Bread.
Claims use since Nov. 10, 1921.

Ser. No. 160,178. (CLASS 45. BEVERAGES, NON-ALCOHOLIC.) AMERICAN BURTONIZING COMPANY AND WALLERSTEIN LABORATORIES, New York, N. Y. Filed Mar. 4, 1922.

BURTO

Particular description of goods.—Dextrinous Sirup Used in Making Beverages.
Claims use since Sept. 27, 1921.

Ser. No. 160,290. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) IOWA PACKING CO., Des Moines, Iowa. Filed Mar. 7, 1922.

FULLER'S
OLD HOMESTEAD

Particular description of goods.—Smoked Meats, Dried Beef, Sausage, Ham, Bacon, Lard, and Butter.
Claims use since Feb. 1, 1912.

Ser. No. 160,390. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) HAROLD W. BOUCK, Chicago Ill. Filed Mar. 9, 1922.

RED HEAD

The shading on the drawing indicates that the letters are printed in red.
Particular description of goods.—Poultice Plasters for Pimples and Boils.
Claims use since July, 1921.

Ser. No. 161,077. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) D. S. WILLIAMS, doing business as Williams Brothers & Company, Wilkes-Barre, Pa. Filed Mar. 22, 1922.

WILCO

Particular description of goods.—Canned Vegetables, Canned Milk, Catchup, Flavoring Extracts for Foods, and Mincemeat.
Claims use since 1914.

Ser. No. 161,250. (CLASS 37. PAPER AND STATIONERY.) THE ROBERT GRIFFIN COMPANY, Jersey City, N. J. Filed Mar. 25, 1922.

RADIUM BLEND

Particular description of goods.—Wall Paper.
Claims use since on or about May, 1921.

Ser. No. 161,315. (CLASS 38. PRINTS AND PUBLICATIONS.) THE HOLDING COMMITTEE FOR EDUCATIONAL AND PHILANTHROPIC WORK, St. Louis, Mo. Filed Mar. 27, 1922.

"HOBO" NEWS

Particular description of goods.—Monthly Magazine.
Claims use since on or about Apr. 1, 1915.

Ser. No. 161,373. (CLASS 1. RAW OR PARTLY-PREPARED MATERIALS.) THE NEW ZEALAND REFRIGERATING COMPANY LIMITED, Christchurch, New Zealand. Filed Mar. 28, 1922.

No claim is made herein to the words "Brand," "Registered" and "Canterbury, N. Z." apart from the mark shown.
Particular description of goods.—Wool.
Claims use since July 30, 1896.

Ser. No. 161,378. (CLASS 1. RAW OR PARTLY-PREPARED MATERIALS.) THE NEW ZEALAND REFRIGERATING COMPANY LIMITED, Christchurch, New Zealand. Filed Mar. 28, 1922.

No claim is made to the exclusive use of the words "Brand" and "Registered" apart from the mark shown.
Particular description of goods.—Wool.
Claims use since July 30, 1896.

Ser. No. 161,681. (CLASS 38. PRINTS AND PUBLICATIONS.) MARSHALL FIELD & COMPANY, Chicago, Ill. Filed Apr. 3, 1922.

Fashions OF THE HOUR

Trade-mark "Fashions of the Hour."
Particular description of goods.—Bimonthly Magazines.
Claims use since on or about Oct. 1, 1914.

Ser. No. 162,048. CLASS 46. FOODS AND INGREDIENTS OF FOODS.) PARHAM-LINDSAY GROCERY CO., Chattanooga, Tenn. Filed Apr. 10, 1922.

ROLY REDY

Particular description of goods.—Wheat Flour.
Claims use since June, 1921.

Ser. No. 162,179. (CLASS 37. PAPER AND STATIONERY.) KOVACS AND MESZAROS, Denbo, Pa. Filed Apr. 12, 1922.

Particular description of goods.—Envelopes.
Claims use since May 15, 1922.

Ser. No. 162,556. (CLASS 41. CANES, PARASOLS, AND UMBRELLAS.) KORTENBACH & RAUH, Weyer, Germany. Filed Apr. 19, 1922.

PRIMUS

Particular description of goods.—Umbrellas.
Claims use since January, 1901.

Ser. No. 162,594. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) U. R. S. CANDY STORES, INC., doing business as United Happiness Candy Stores, Long Island City, N. Y. Filed Apr. 19, 1922.

COLLINWOOD

Particular description of goods.—Candy.
Claims use since Nov. 1, 1921.

Ser. No. 162,918. (CLASS 38. PRINTS AND PUBLICATIONS.) JAMES L. CARESKEY, Louisville, Ky. Filed Apr. 26, 1922.

HUMAN ELEMENT
WITH COMMON SENSE

Particular description of goods.—Monthly Magazine.
Claims use since July 13, 1921.

Ser. No. 164,025. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) THE J. W. DENIO MILLING COMPANY, Sheridan, Wyo. Filed May 18, 1922.

PRIDE OF SHERIDAN

Particular description of goods.—Wheat Flour.
Claims use since 1912.

Ser. No. 164,185. (CLASS 39. CLOTHING.) THE OBERNDORFER COMPANY, Milwaukee, Wis. Filed May 20, 1922.

Protectursuit

Particular description of goods.—Rubber Aprons.
Claims use since Apr. 15, 1922.

Ser. No. 164,649. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) SEVERIN S. LEE, doing business as S. S. Lee & Co., Spokane, Wash. Filed May 29, 1922.

The word "Chocolated" is hereby disclaimed apart from the other features of the mark shown on the drawing.

LABELS

REGISTERED MAY 1, 1923.

25,869.—*Title:* BEATON HOSE. For Hosiery. J. R. BEATON COMPANY, INC., New York, N. Y. Published January 15, 1923.

25,870.—*Title:* TRAVELERS. For Dried Raisins. ALICE M. BIDDLE, doing business as Carrolton Packing Co., Hanford, Calif. Published October 10, 1922.

25,871.—*Title:* SKOOKUM BRAND. For Tin Cans Containing Shrimp. BILOXI PACKING AND TRADING COMPANY, INC., Biloxi, Miss. Published September 12, 1922.

25,872.—*Title:* B & M. For Lima Beans. BURNHAM & MORRILL CO., Portland, Me. Published February 1, 1923.

25,873.—*Title:* B & M. For Fish Flakes. BURNHAM & MORRILL CO., Portland, Me. Published February 1, 1923.

25,874.—*Title:* GERMEX. For Germicidal Cleansing and Polishing Materials. CLEVELAND CHEMICAL CORPORATION, Cleveland, Ohio. Published March 15, 1923.

25,875.—*Title:* DRANO. For a Chemical for Cleansing Drains, Sinks, Washbowls, Bathtubs, Flush Bowls, Traps, Toilet Bowls, Stationary Washtubs, Waste Pipes, and Lavatories. THE DRACKETT CHEMICAL COMPANY, Cincinnati, Ohio. Published January 5, 1923.

25,876.—*Title:* FLEXO THE ORIGINAL LIFE GIVING BELT TREATMENT HIGH STRENGTH COMBINATION OF TANNAGE OILS. For Dressing Oils Suitable for Softening and Preserving Articles of Leather and Similar Substances. THE FLEXO COMPANY, Fredericksburg, Va. Published March 26, 1923.

25,877.—*Title:* CURIOSITY BOX. For Dried Fruits. DANA K. GIBBS, doing business as Willcox & Gibbs Packing Company, Clovis, Calif. Published January 1, 1922.

25,878.—*Title:* DAN. W. HERSHEY'S FAMOUS SPECIAL DRESSING FOR ALL KINDS OF SALADS. For Salad Dressing. DANIEL W. HERSHEY, Dayton, Ohio. Published March 1, 1923.

25,879.—*Title:* BLACK MONK. For Ice-Cream Cones. WALTER J. HIRSCH COMPANY, Chicago, Ill. Published June 22, 1922.

25,880.—*Title:* JOHNSON'S SANE NUTS — THEY'RE MORE REFINED. For Salted-Nut Containers. JOHNSON NUT COMPANY, Minneapolis, Minn. Published December 28, 1922.

25,881.—*Title:* COMET. For Golf Balls. JORDAN MARSH COMPANY, Boston, Mass. Published February 1, 1923.

25,882.—*Title:* DAISY. For Bread. LILY BAKING COMPANY, Muskogee, Okla. Published March 29, 1923.

25,883.—*Title:* BERBER. For Dates. BURDETTE K. MARVIN, doing business as Marvin Date Co., Riverside, Calif. Published January 5, 1923.

25,884.—*Title:* WHITE PEARL BRAND. For Cartons for Butter. MENASHA PRINTING AND CARTON COMPANY, Menasha, Wis., assignor to Macon Creamery Company, Macon, Miss. Published March 1, 1923.

25,885.—*Title:* MAYFLOWER. For Cartons for Butter. MENASHA PRINTING AND CARTON COMPANY, Menasha, Wis., assignor to Pickerington Creamery, Pickerington, Ohio. Published March 13, 1923.

25,886.—*Title:* SELECT BRAND. For Cartons for Butter. MENASHA PRINTING AND CARTON COMPANY, Menasha, Wis., assignor to Mid-West Creamery, Ponca City, Okla. Published March 15, 1923.

25,887.—*Title:* NYANZA. For Toilet Paper. NATIONAL PAPER PRODUCTS COMPANY, San Francisco, Calif. Published August 10, 1922.

25,888.—*Title:* AVALON. For Toilet Tissue Paper. NATIONAL PAPER PRODUCTS CO., San Francisco, Calif., and Carthage, N. Y. Published December 30, 1922.

25,889.—*Title:* PIUTE. For Toilet Tissue Paper. NATIONAL PAPER PRODUCTS COMPANY, San Francisco, Calif., and Carthage, N. Y. Published December 30, 1922.

25,890.—*Title:* ALPINE. For Toilet Tissue Paper. NATIONAL PAPER PRODUCTS CO., San Francisco, Calif., and Carthage, N. Y. Published December 30, 1922.

25,891.—*Title:* ARGONAUT. For Toilet Tissue Paper. NATIONAL PAPER PRODUCTS CO., San Francisco, Calif., and Carthage, N. Y. Published December 30, 1922.

25,892.—*Title:* SOUTHLAND. For Toilet Tissue Paper. NATIONAL PAPER PRODUCTS CO., San Francisco, Calif., and Carthage, N. Y. Published December 30, 1922.

25,893.—*Title:* APARTMENT. For Toilet Tissue Paper. NATIONAL PAPER PRODUCTS CO., San Francisco, Calif., and Carthage, N. Y. Published December 30, 1922.

25,894.—*Title:* BEACH. For Toilet Tissue Paper. NATIONAL PAPER PRODUCTS CO., San Francisco, Calif., and Carthage, N. Y. Published December 30, 1922.

25,895.—*Title:* AIRCRAFT. For Toilet Tissue Paper. NATIONAL PAPER PRODUCTS CO., San Francisco, Calif., and Carthage, N. Y. Published December 30, 1922.

25,896.—*Title:* GOLDEN. For Toilet Tissue Paper. NATIONAL PAPER PRODUCTS CO., San Francisco, Calif., and Carthage, N. Y. Published December 30, 1922.

25,897.—*Title:* COLLEGIAN. For Toilet Tissue Paper. NATIONAL PAPER PRODUCTS COMPANY, San Francisco, Calif., and Carthage, N. Y. Published December 30, 1922.

25,898.—*Title:* WESTLAND. For Toilet Tissue Paper. NATIONAL PAPER PRODUCTS COMPANY, San Francisco, Calif., and Carthage, N. Y. Published December 30, 1922.

25,899.—*Title:* GOBLIN. For Toilet Tissue Paper. NATIONAL PAPER PRODUCTS COMPANY, San Francisco, Calif., and Carthage, N. Y. Published December 30, 1922.

25,900.—*Title:* NORMEDAL. For Wrapper for Toilet-Paper Rolls. NORTHERN PAPER MILLS, Green Bay, Wis. Published January 2, 1923.

25,901.—*Title:* PERCY PIERCE PACKAGE. For Cartons Containing Ice Cream. PERCY PIERCE, Philadelphia, Pa. Published February 15, 1923.

25,902.—*Title:* P-B. For Soap Flakes. PROUTY-BOWLER SOAP CO., Des Moines, Iowa. Published April 7, 1923.

25,903.—*Title:* SUPERGLOSS. For Auto and Furniture Polish. REALNEED PRODUCTS CO., Harrisburg, Pa. Published October 24, 1922.

25,904.—*Title:* SAN MARCO. For Macaroni. ROMAN MACARONI CO., Long Island City, N. Y. Published December 1, 1922.

25,905.—*Title:* ZA-REX. For Bottles Containing a Fruit Sirup for Making Beverages. ZA-REX FOOD PRODUCTS INC., Boston, Mass. Published February 14, 1923.

PRINTS

REGISTERED MAY 1, 1923.

6,676.—*Title:* GET IT NOW. For Germicidal Cleansing and Polishing Materials. CLEVELAND CHEMICAL CORPORATION, Cleveland, Ohio. Published March 15, 1923.

6,677.—*Title:* MONARCH TEA. For Tea. REID, MURDOCH & Co., Chicago, Ill. Published January 15, 1923.

6,678.—*Title:* MONARCH. For Tea, Coffee, and Cocoa. REID, MURDOCH & Co., Chicago, Ill. Published January 15, 1923.

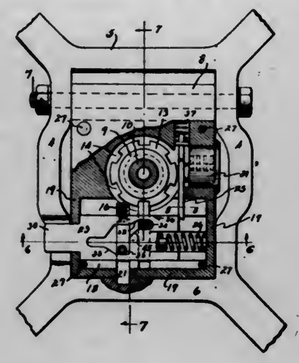
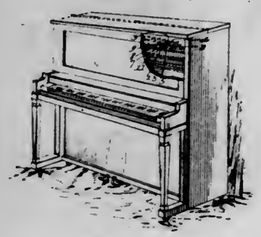
6,687.—*Title:* COMET RICE. For Rice. SEABOARD RICE MILLING COMPANY, Galveston, Tex. Published March 3, 1923.

REISSUES.



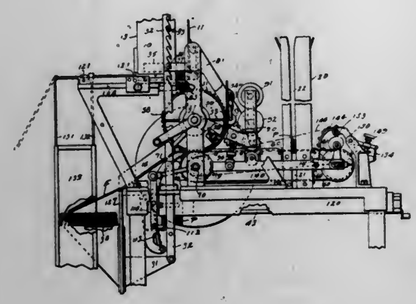
MAY 1, 1923.

15,586. VEHICLE SPRING. FRANK V. COOKE, Detroit, Mich., assignor to Karl B. Goddard, Detroit, Mich. Filed Nov. 30, 1921. Serial No. 518,989. Original No. 1,344,792, dated June 29, 1920, Serial No. 326,445, filed Sept. 26, 1919. 8 Claims. (Cl. 267—36.)



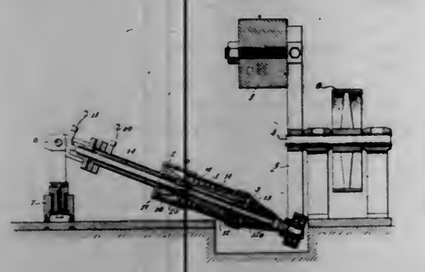
1. The combination of a vehicle body, an axle, a spring pivoted to one side of the body and to the end of the axle farthest from said side, a second spring pivoted to the other side of the body and to the other end of said axle, a forked member depending from said body adapted to embrace said springs in such a manner as to permit movement of the springs longitudinally, but to restrain movement laterally and vertically within said forked member, said forked member adapted to form an upper fulcrum support for said springs.

15,587. TILTING LOCKING STEERING WHEEL. EDWARD N. PAGELSEN, Detroit, Mich., assignor to Edward H. Vincent, Detroit, Mich. Filed Nov. 9, 1922. Serial No. 599,941. Original No. 1,365,846, dated Jan. 18, 1921, Serial No. 334,481, filed Oct. 30, 1919. 16 Claims. (Cl. 74—33.)



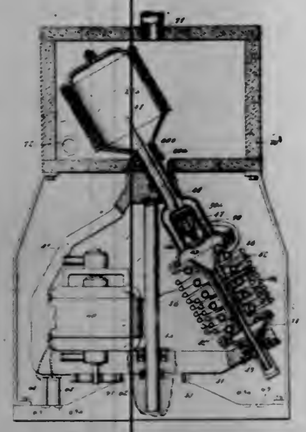
7. In combination with a steering shaft and a head rotatably mounted thereon, a steering wheel structure movable on said head, and means by which the shaft and the wheel structure may be simultaneously or consecutively locked to said head.

15,588. SUPPORT FOR MOTH-REPELLENT HOLDERS. SAMUEL HOWARD BISHOP and JOHN QUEEN SLYE, Washington, D. C. Filed June 22, 1922. Serial No. 570,262. Original No. 1,344,318, dated June 22, 1920, Serial No. 318,356, filed Aug. 18, 1919. 13 Claims. (Cl. 299—24.)



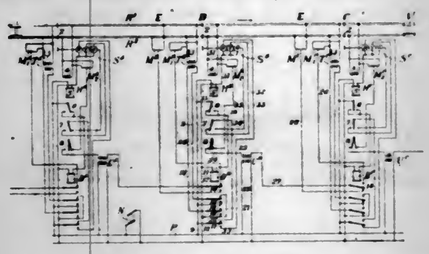
1. A moth repellent container, and a support therefor selectively engageable telescopically over the tuning pins of a piano.

15,589. ADDRESS-PRINTING MACHINE. CLIFTON CHISHOLM, Cleveland, Ohio, assignor, by mesne assignments, to The American Multigraph Company, Cleveland, Ohio, a Corporation of Ohio. Filed Nov. 24, 1920. Serial No. 426,305. Original No. 1,285,622, dated Nov. 26, 1918, Serial No. 126,829, filed Oct. 21, 1916. 21 Claims. (Cl. 101—54.)



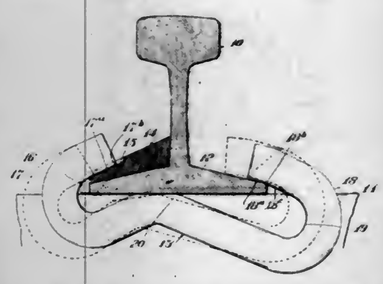
1. In an address printing machine, the combination of a conveyer having spaced lugs for feeding address plates, a driving wheel for said conveyer, a rotary platen adapted to coact with address plates fed by the conveyer and having a periphery which is longer than the periphery of said driving wheel and a multiple thereof, said lugs being spaced a distance apart proportional to the periphery of said driving wheel, and means controllable at will to vary the number of address plates fed for each rotation of the platen.

15,590. COMPRESSOR. JAY GRANT DE REMER, Greenwich, Conn. Filed Mar. 23, 1923. Serial No. 627,216. Original application filed Jan. 16, 1918, Serial No. 212,113. Divided and application filed Dec. 9, 1919, Serial No. 343,471. Original No. 1,373,175, dated Mar. 29, 1921. 15 Claims. (Cl. 230—12.)



2. In an apparatus for the purpose described, the combination of a shaft-like support, a helically formed conduit of decreasing volume per turn carried by said support in an inclined position, the larger end of the helix being at a less distance from the axis of said support than the smaller end thereof, means for supplying liquid and fluid to be compressed to the larger end of the conduit, means for conducting compressed fluid from the smaller end of said conduit, and means for revolving the conduit about the axis of the support.

15,591. REFRIGERATING APPARATUS. JAY GRANT DE REMER, Greenwich, Conn. Filed Mar. 23, 1923. Serial No. 627,217. Original No. 1,373,174, dated Mar. 29, 1921, Serial No. 212,113, filed Jan. 16, 1918. 21 Claims. (Cl. 62—115.)



21. The combination of a frame rotatable about an axis, a refrigerant compressor comprising helical and return conduits containing a circulating body of compressing liquid and mounted on said frame with the axis of the helix disposed at an acute angle to said rotational axis, supply and return refrigerant tubes extending from said compressor conduits toward and beyond the said rotational axis, an expansion device connected to the ends of said tubes and means in the supply tube to regulate the flow of refrigerant to the expansion device.

15,592. RAILWAY-TRAFFIC-CONTROLLING SYSTEM. LLOYD V. LEWIS, Edgewood Borough, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Apr. 19, 1922. Serial No. 555,640. Original No. 1,351,771, dated Sept. 7, 1920, Serial No. 263,607, filed Nov. 21, 1918. 26 Claims. (Cl. 246—38.)

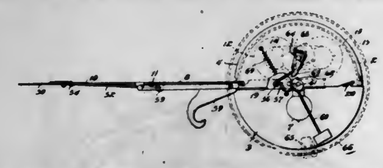
10. Railway traffic controlling apparatus comprising track rails, means for supplying two alternating signaling currents thereto one of which flows in opposite directions in the two rails and the other of which flows in the same direction in the two rails, a vehicle, two soft iron cores thereon located over the two rails respectively and disposed transversely with respect to the rails; a circuit on the vehicle including a coil on each of said cores which coils are so connected in the circuit that the potentials induced in said coils by currents flowing in the same direction in said rails are additive, a second circuit on the vehicle including another coil on each core which coils are so connected in the circuit that the potentials induced in the coils by currents flowing in opposite directions in the track rails are additive, and vehicle governing means controlled by the currents in said two circuits.

15,593. RAIL ANCHOR. FRED A. POOR, Chicago, Ill., assignor to The B & M Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 14, 1923. Serial No. 625,144. Original No. 1,386,800, dated Aug. 9, 1921, Serial No. 349,689, filed Jan. 6, 1920. 40 Claims. (Cl. 238—324.)

1. A device for preventing longitudinal creep of railroad rails, comprising a body adapted to extend across the bottom face of a rail, jaws carried by said body and overlying the upper faces of the flanges at opposite sides of the rail, and a take-up block interposed between one of the jaws and the upper face of the adjacent flange serving upon a movement of the body and jaws transversely of the rail with respect to the block to cause the jaw engaging said block to move upwardly with respect to the upper face of the flange for tightening the anchor on the rail.

15,594. SIGNAL FOR VEHICLES. TIMOTHY B. POWERS, Brooklyn, N. Y., assignor, by mesne assignments, to Turn-O-Stop Manufacturing Corporation, Inc., New York, N. Y., a Corporation of New York. Filed May 28, 1921. Serial No. 473,385. Original No. 1,334,047, dated Mar. 16, 1920, Serial No. 316,604, filed Aug. 11, 1919. 36 Claims. (Cl. 177—329.)

1. In a signaling apparatus, a casing, a plate hinged to one side of the casing, an actuating member connected with the plate to cause it to swing out of the casing and to retract it, a plate hinged to the outer edge of said plate, a link pivoted between the second plate and the casing, whereby when the first plate is swung outward the second plate will swing outward to a position in alinement with the first plate, and when the first plate is swung back to the casing the second



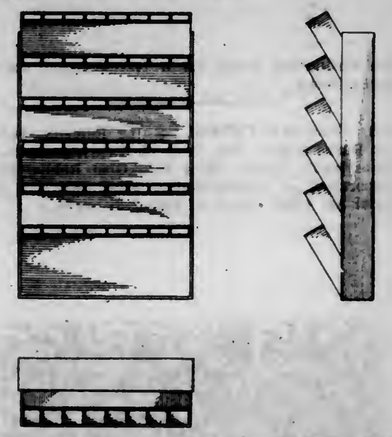


plate will be swung to a position adjacent the casing, and a lamp on the front of the casing normally surrounded and obscured by the two plates but exposed when the plates are swung outward into alinement.

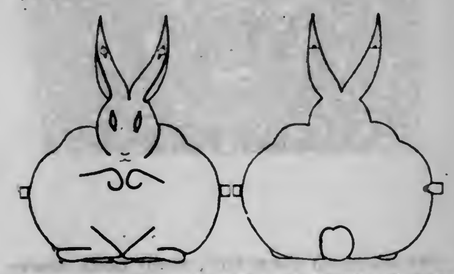
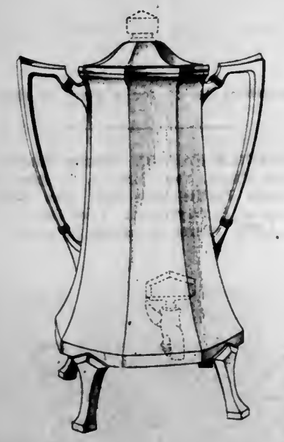
DESIGNS.



MAY 1, 1923.

62,269. PENCIL DISPLAY HOLDER. FRANK H. BECK, Larchmont, N. Y. Filed Sept. 21, 1921. Serial No. 502,308. Term of patent 7 years.

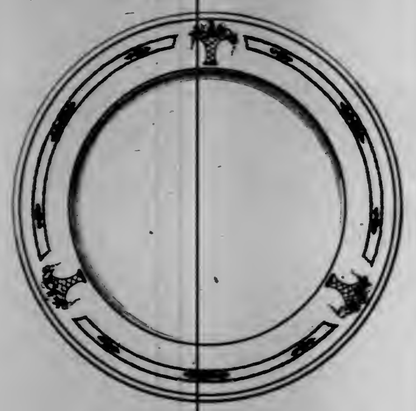


The ornamental design for a pencil display holder, as shown.

62,270. COMBINED BIB AND APRON OR SIMILAR ARTICLE. MARY D. BENSON, New York, N. Y. Filed Aug. 23, 1922. Serial No. 3,533. Term of patent 14 years.

The ornamental design for a combined bib and apron or similar article as shown.

62,271. URN. GEORGE E. CURTISS, New Britain, Conn., assignor to Landers, Frary & Clark, a Corporation of Connecticut. Filed Aug. 31, 1922. Serial No. 3,603. Term of patent 14 years.



The ornamental design for an urn as shown.

62,272. EMBLEM, A BADGE, BROOCH, PIN, CUFF BUTTON, WATCH FOB, OR AN ARTICLE OF SIMILAR NATURE. CHARLES B. DYER, Indianapolis, Ind. Filed Nov. 20, 1922. Serial No. 4,346. Term of patent 7 years.

The ornamental design for an emblem, a badge, a brooch, a pin, a cuff button, a watch fob, or an article of similar nature, as shown.

62,273. PLATE OR SIMILAR ARTICLE. WILLIAM SAMUEL ENSION, New Rochelle, N. Y., assignor to Tiffin Products, Inc., Long Island City, a Corporation of New York. Filed Feb. 2, 1922. Serial No. 503. Term of patent 14 years.

The ornamental design for a plate or similar article as shown.

62,274. TEXTILE FABRIC. EMILE ERICSON, Pelham, and ROGER WEISS, New York, N. Y., assignors to The Pennsylvania Textile Mills Inc., Glen Riddle, Pa., a Corporation of Pennsylvania. Filed Dec. 22, 1922. Serial No. 4,656. Term of patent 3½ years.

The ornamental design for a textile fabric, substantially as shown.

62,275. TEXTILE FABRIC. EMILE ERICSON, Pelham, and ROGER WEISS, New York, N. Y., assignors to The Pennsylvania Textile Mills Inc., Glen Riddle, Pa., a Corporation of Pennsylvania. Filed Dec. 22, 1922. Serial No. 4,657. Term of patent 3½ years.

The ornamental design for a textile fabric, substantially as shown.

62,276. TEXTILE FABRIC. EMILE ERICSON, Pelham, and ROGER WEISS, New York, N. Y., assignors to The Pennsylvania Textile Mills Inc., Glen Riddle, Pa., a Corporation of Pennsylvania. Filed Dec. 22, 1922. Serial No. 4,659. Term of patent 3½ years.

The ornamental design for a textile fabric, substantially as shown.

62,277. TEXTILE FABRIC. EMILE ERICSON, Pelham, and ROGER WEISS, New York, N. Y., assignors to The Pennsylvania Textile Mills Inc., Glen Riddle, Pa., a Corporation of Pennsylvania. Filed Dec. 22, 1922. Serial No. 4,660. Term of patent 3½ years.

The ornamental design for a textile fabric, substantially as shown.

62,278. TEXTILE FABRIC. EMILE ERICSON, Pelham, and ROGER WEISS, New York, N. Y., assignors to The Pennsylvania Textile Mills Inc., Glen Riddle, Pa., a Corporation of Pennsylvania. Filed Dec. 22, 1922. Serial No. 4,661. Term of patent 3½ years.

The ornamental design for a textile fabric, substantially as shown.

62,279. TEXTILE FABRIC. EMILE ERICSON, Pelham, and ROGER WEISS, New York, N. Y., assignors to The Pennsylvania Textile Mills Inc., Glen Riddle, Pa., a Corporation of Pennsylvania. Filed Dec. 22, 1922. Serial No. 4,663. Term of patent 3½ years.

The ornamental design for a textile fabric, substantially as shown.

62,280. TEXTILE FABRIC. EMILE ERICSON, Pelham, and ROGER WEISS, New York, N. Y., assignors to The Pennsylvania Textile Mills Inc., Glen Riddle, Pa., a Corporation of Pennsylvania. Filed Dec. 22, 1922. Serial No. 4,666. Term of patent 3½ years.

The ornamental design for a textile fabric, substantially as shown.

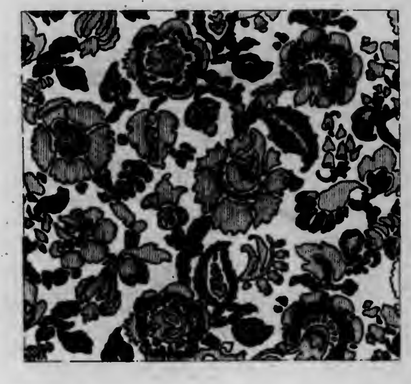
62,281. TEXTILE FABRIC. EMILE ERICSON, Pelham, and ROGER WEISS, New York, N. Y., assignors to The Pennsylvania Textile Mills Inc., Glen Riddle, Pa., a Corporation of Pennsylvania. Filed Dec. 22, 1922. Serial No. 4,667. Term of patent 3½ years.

The ornamental design for a textile fabric, substantially as shown.

62,282. TEXTILE FABRIC. EMILE ERICSON, Pelham, and ROGER WEISS, New York, N. Y., assignors to The Pennsylvania Textile Mills Inc., Glen Riddle, Pa., a Corporation of Pennsylvania. Filed Dec. 22, 1922. Serial No. 4,668. Term of patent 3½ years.

The ornamental design for a textile fabric, substantially as shown.

62,283. TEXTILE FABRIC. EMILE ERICSON, Pelham, and ROGER WEISS, New York, N. Y., assignors to The Pennsylvania Textile Mills Inc., Glen Riddle, Pa., a Corporation of Pennsylvania. Filed Dec. 22, 1922. Serial No. 4,669. Term of patent 3½ years.

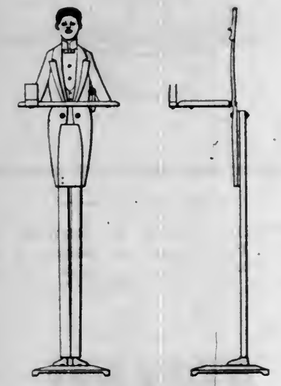


The ornamental design for a textile fabric, substantially as shown.

62,284. TEXTILE FABRIC. EMILE ERICSON, Pelham, and ROGER WEISS, New York, N. Y., assignors to The Pennsylvania Textile Mills Inc., Glen Riddle, Pa., a Corporation of Pennsylvania. Filed Dec. 22, 1922. Serial No. 4,670. Term of patent 3½ years.

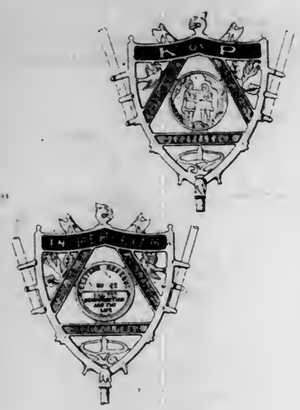
The ornamental design for a textile fabric, substantially as shown

62,285. TEXTILE FABRIC. EMILE ERICSON, Pelham, and ROGER WEISS, New York, N. Y., assignors to The Pennsylvania Textile Mills Inc., Glen Riddle, Pa., a Corporation of Pennsylvania. Filed Dec. 22, 1922. Serial No. 4,671. Term of patent 3½ years.



The ornamental design for a textile fabric, substantially as shown.

62,286. TEXTILE FABRIC. EMILE ERICSON, Pelham, and ROGER WEISS, New York, N. Y., assignors to The Pennsylvania Textile Mills Inc., Glen Riddle, Pa., a Corporation of Pennsylvania. Filed Dec. 22, 1922. Serial No. 4,672. Term of patent 3½ years.



The ornamental design for a textile fabric, substantially as shown.

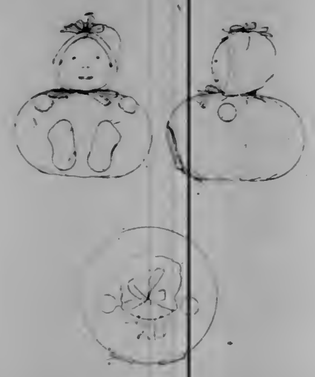
62,287. SMOKER STAND. FREDERICK E. HADERMANN, New York, N. Y. Filed Oct. 15, 1921. Serial No. 508,022. Term of patent 3½ years.

The ornamental design for smoker stand as shown and described.

62,288. COMBINED GRAVE MARKER AND FLAG HOLDER. GEORGE G. JONES, Cleveland, Ohio. Filed Nov. 30, 1921. Serial No. 519,014. Term of patent 7 years.

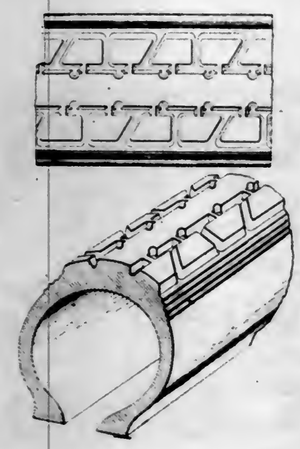
The ornamental design for a combined grave marker and flag holder substantially as shown in the drawings hereof.

62,289. BRUSH HOLDER. WALTER E. KEENE, Baltimore, Md. Filed June 11, 1921. Serial No. 476,944. Term of patent 3½ years.



The ornamental design for a brush holder as shown.

62,290. TEXTILE FABRIC OR SIMILAR ARTICLE. HILDA KAJI, Philadelphia, Pa., assignor to Morris B. Leventhal, Philadelphia, Pa. Filed Nov. 18, 1921. Serial No. 516,210. Term of patent 7 years.

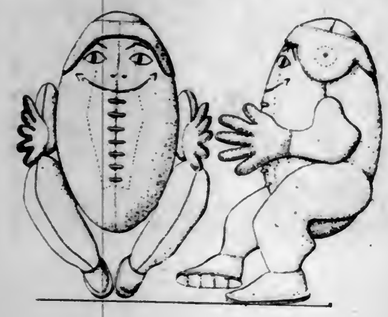


The ornamental design for a textile fabric or similar article, substantially as shown.

62,291. COMBINATION DOLL AND PIN CUSHION. PEARL LE DOUX, Oakland, Calif. Filed Nov. 20, 1922. Serial No. 4,348. Term of patent 3½ years.

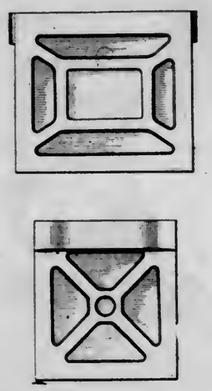
The ornamental design for a combination doll and pin cushion substantially as shown.

62,292. TIRE TREAD. HAROLD D. MITCHELL, Brooklyn, N. Y., assignor to C. Kenyon Company, Brooklyn, N. Y., a Corporation of New York. Filed Aug. 1, 1922. Serial No. 3,266. Term of patent 14 years.



The ornamental design for a tire tread substantially as shown.

62,293. BADGE OR BUTTON. BURTON I. REED, Concord, N. H. Filed Jan. 25, 1922. Serial No. 361. Term of patent 3½ years.

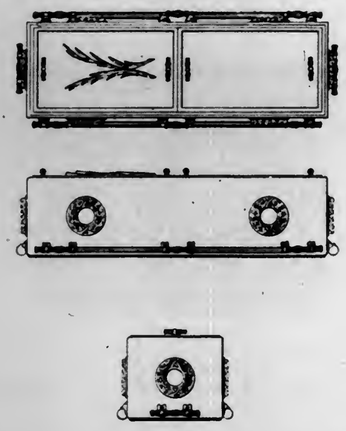


The ornamental design for a badge or button, as shown.

62,294. TOY FIGURE. MARY I. TOWNSEND, Seattle, Wash., assignor of two-thirds to William B. Van Valin, Los Angeles, Calif. Filed Aug. 11, 1922. Serial No. 3,351. Term of patent 7 years.

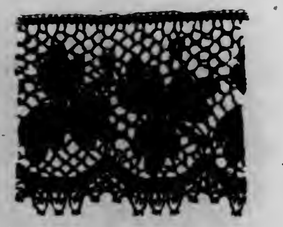
The ornamental design for a toy figure, as shown.

62,295. BATTERY JAR. WILLIAM W. WEITLING, College Point, N. Y. Filed Mar. 8, 1922. Serial No. 1,077. Term of patent 14 years.



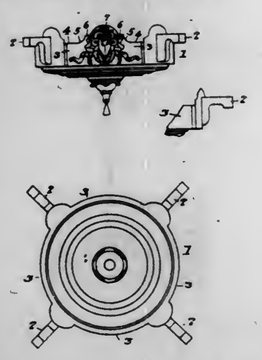
The ornamental design for a battery jar, as shown

62,296. DOLL. MARTHA ST. CLAIR WINGERT, Whittier, Calif. Filed Mar. 24, 1922. Serial No. 1,369. Term of patent 7 years.



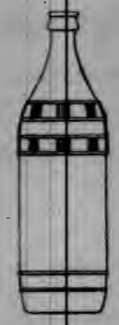
The ornamental design for a doll, as shown.

62,297. COFFIN. EDWARD E. ALLEN, Rutland, and PHILIP M. M. PHELPS, Fair Haven, Vt. Filed June 7, 1922. Serial No. 2,555. Term of patent 3½ years.



The ornamental design for a coffin, as shown.

62,298. LACE. WALTER DRAYCOTT, Alton, R. I. Filed July 19, 1922. Serial No. 3,133. Term of patent 3½ years.

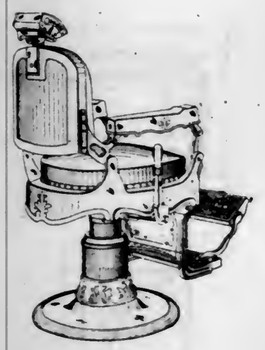


The ornamental design for lace, as shown.

62,299. PAN FOR A LIGHTING FIXTURE. LOUIS JACOBSON, Philadelphia, Pa. Filed May 4, 1921. Serial No. 466,699. Term of patent 3½ years.

The ornamental design for a pan for a lighting fixture as shown and described.

62,300. BOTTLE. MORRIS I. KATZ, Springfield, Mass. Filed May 4, 1922. Serial No. 2,077. Term of patent 14 years.

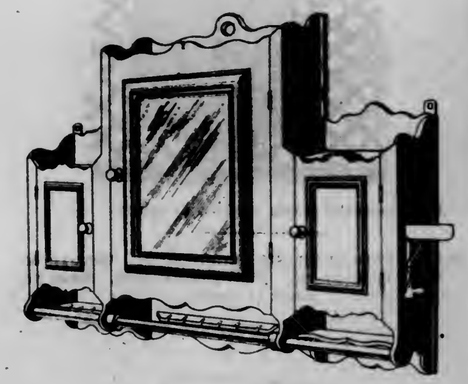


The ornamental design for a bottle as shown.

62,301. BARBER POLE. WALTER F. KOKEN, St. Louis, Mo. Filed Mar. 24, 1922. Serial No. 1,373. Term of patent 14 years.

The ornamental design for a barber pole, as shown.

62,302. BARBER CHAIR. WALTER F. KOKEN, St. Louis, Mo. Filed Mar. 24, 1922. Serial No. 1,374. Term of patent 14 years.

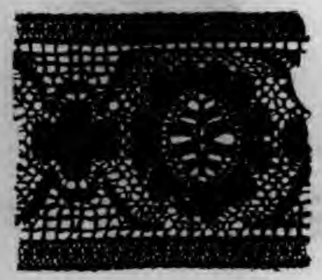


The ornamental design for a barber chair, as shown.

62,303. BOTTLE. WILLIAM BAIRD MARBLE, Los Angeles, Calif., assignor to Southern Glass Company, a Corporation of California. Filed June 12, 1922. Serial No. 2,630. Term of patent 14 years.

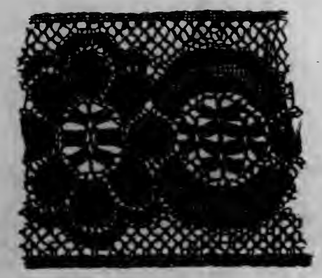
The ornamental design for a bottle, as shown.

62,304. CABINET. ARTHUR G. MARSHALL, formerly known as Otto George Marquyl, Pittsburgh, Pa. Filed Nov. 23, 1921. Serial No. 517,365. Term of patent 7 years.



The ornamental design for a cabinet, as shown.

62,305. SPUR. GILBERT J. ORMISTON, Chicago, Ill. Filed May 8, 1922. Serial No. 2,131. Term of patent 14 years.



The ornamental design for a spur, as shown.

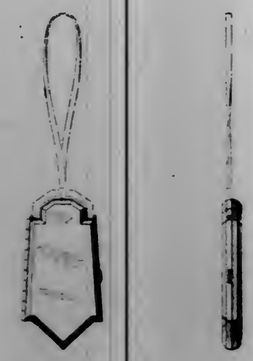
62,306. LACE. GEORGE RADFORD, Oakland Beach, R. I., assignor to Richmond Lace Works, Alton, R. I., a Corporation of Maine. Filed July 19, 1922. Serial No. 3,123. Term of patent 7 years.

The ornamental design for lace, as shown.

62,307. LACE. GEORGE RADFORD, Oakland Beach, R. I., assignor to Richmond Lace Works, Alton, R. I., a Corporation of Maine. Filed July 19, 1922. Serial No. 3,125. Term of patent 3½ years.

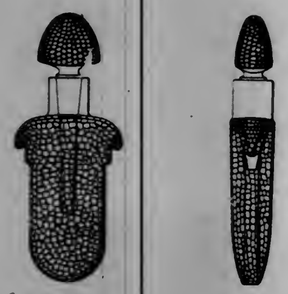
The ornamental design for lace as shown.

62,308. LACE. GEORGE RADFORD, Oakland Beach, R. I., assignor to Richmond Lace Works, Alton, R. I., a Corporation of Maine. Filed July 19, 1922. Serial No. 3,126. Term of patent 3½ years.



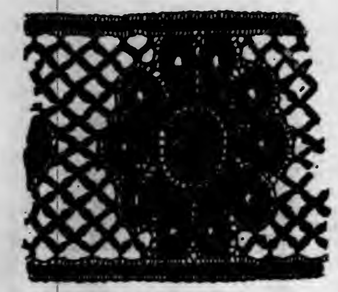
The ornamental design for lace, as shown.

62,309. LACE. GEORGE RADFORD, Oakland Beach, R. I., assignor to Richmond Lace Works, Alton, R. I., a Corporation of Maine. Filed July 19, 1922. Serial No. 3,127. Term of patent 3½ years.



The ornamental design for lace, as shown.

62,310. VANITY CASE. ALFRED FRANCIS REILLY, North Attleboro, Mass. Filed Nov. 22, 1921. Serial No. 517,115. Term of patent 3½ years.

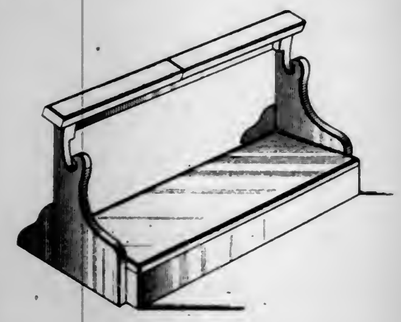


The ornamental design for a vanity case, as shown.

62,311. STOPPERED LIQUID CONTAINER. ARTHUR SCHOENBRUN, New York, N. Y., assignor to Magnum Import Co., Inc., New York, N. Y. Filed May 27, 1922. Serial No. 2,437. Term of patent 7 years.

The ornamental design for a stoppered liquid container, as shown.

62,312. LACE. HANS SEEL, Hopkinton, R. I., assignor to Richmond Lace Works, Alton, R. I., a Corporation of Maine. Filed July 19, 1922. Serial No. 3,132. Term of patent 3½ years.

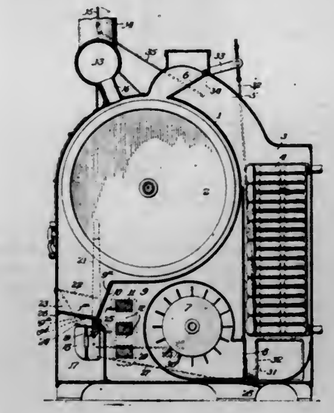


The ornamental design for lace, as shown.

62,313. PUBLIC TRASH RECEPTACLE. WILLIAM M. VISER, Louisville, Ky. Filed Mar. 25, 1922. Serial No. 1,395. Term of patent 14 years.

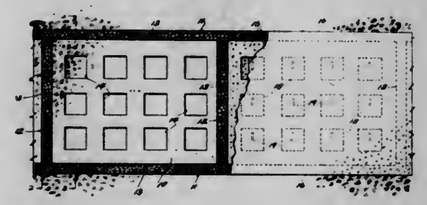
The ornamental design for a public trash receptacle substantially as shown.

62,314. PRIE DIEU. CHESTER E. WALKER, Peoria, Ill. Filed June 9, 1922. Serial No. 2,599. Term of patent 3½ years.



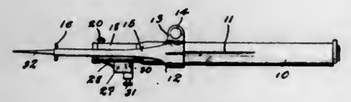
The ornamental design for a prie dieu, as shown.

PATENTS



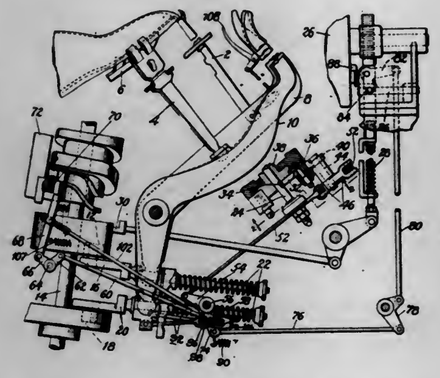
GRANTED MAY 1, 1923.

1,453,260. DRYROOM TUMBLER. VICTOR E. ADLAND and LESLIE H. KAMPER, Chicago, Ill., assignors to Troy Laundry Machinery Company, Ltd., Chicago, Ill., a Corporation of New York. Filed Oct. 31, 1921. Serial No. 511,652. 7 Claims. (Cl. 34—5.)



1. A dryroom tumbler having a casing and a tumbler therein for goods to be dried, means for supplying both drying and freshening air to the tumbler, and independent means for receiving from the tumbler the respective kinds of air thus supplied.

1,453,261. HIGHWAY AND SIMILAR FOUNDATION. JOSEPH HAY AMIES, Philadelphia, Pa. Filed Feb. 16, 1921. Serial No. 445,532. 7 Claims. (Cl. 94—10.)

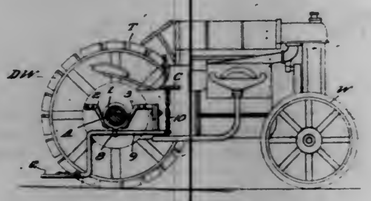


1. A foundation of the character stated comprising a sub-grade provided along each side thereof with a trench of which one is relatively deep and the other relatively shallow, a plurality of other trenches extended transversely through the sub-grade and inclining from the shallow toward the deeper of and communicating with the longitudinal trenches, and a cementitious superstructure for said sub-grade the material of which partially fills said trenches to form buttresses for supporting the arch of the road bed and means within said trenches for supporting said cementitious material free of the trench bottoms for drainage purposes.

1,453,262. HAND-EMBROIDERY NEEDLE. GEORGE E. BANGHART, Olney, Ill. Filed Jan. 26, 1922. Serial No. 531,881. 1 Claim. (Cl. 112—80.)

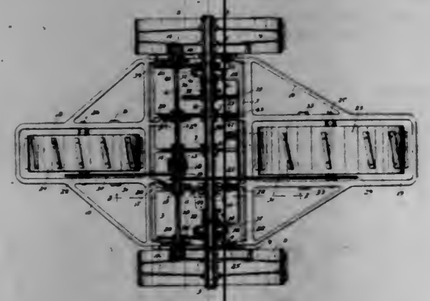
A device of the character described comprising a barrel, a needle mounting plug engaged in one end thereof, a tube having a flared end exposed through the upper end of the barrel, and eccentrically opening through the lower end of the device, and a friction device to engage a yarn passing from the last named end of the tube to a needle in said plug.

1,453,263. PULLING-OVER MACHINE. ARTHUR BATES and WILFRID THOMAS MINETT, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Mar. 31, 1922. Serial No. 548,452. 14 Claims. (Cl. 12—4.)



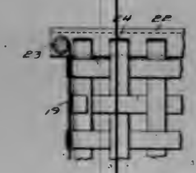
1. In a machine of the class described, the combination with a plurality of upper pulling devices for pulling an upper respectively in different locations, and means for fastening the upper, of controlling mechanism for said fastening means automatically operative to prevent the fastening of the upper under abnormal upper pulling conditions in respect to any one of said plurality of upper pulling devices.

1,453,264. SAFETY ATTACHMENT FOR TRACTORS. LEANDER BIERSCHBACH, Mount Pleasant, Mich. Filed Oct. 7, 1920. Serial No. 415,438. 3 Claims. (Cl. 180—82.)



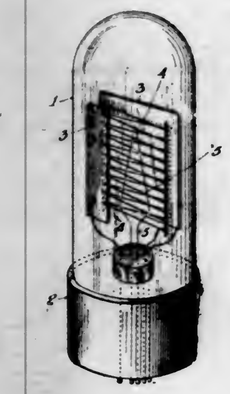
1. An attachment of the class described comprising an axle encircling band having diverging holding arms fixed thereto, an adjustable bumper depending from one of

said arms, and a lever fulcrumed intermediate its ends on said band and having one end extended under said



bumper and provided with a clutch connecting element, the other end of said lever being offset and provided at its terminal with a shoe.

1,453,265. TRACTOR. CHARLES E. BIAD, Minneapolis, Minn. Filed May 22, 1920. Serial No. 383,379. 14 Claims. (Cl. 180—17.)

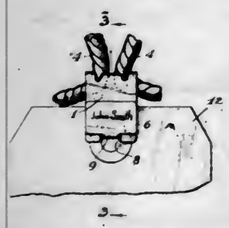


1. A tractor having laterally spaced side traction wheels and longitudinally offset transversely intermediate traction wheels, a motor on said tractor having connections for driving all of said traction wheels, and including a differential gear mechanism in the driving connection between said intermediate and side wheels operative to drive said intermediate wheel at a proportionate speed in turning.

1,453,266. ICE RECEPTACLE. BENJAMIN H. BLOUNT, Houston, Tex. Filed Jan. 24, 1922. Serial No. 531,376. 1 Claim. (Cl. 220—19.)

An ice receptacle having woven metal walls, a binder for the upper edge of the receptacle comprising spaced end rods over which the vertical strands of the ends of the woven walls are rolled, and spaced side members each perforated to receive the ends of the rods and apertured to receive the vertical strands of the sides of the woven walls.

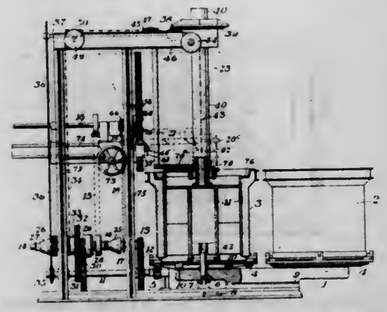
1,453,267. ELECTRON-EMITTING CATHODE AND METHOD OF MAKING THE SAME. JAMES LLEWELLYN BRADFORD, New York, N. Y., assignor to De Forest Radio Telephone & Telegraph Company, New York, N. Y., a Corporation of Delaware. Filed Nov. 29, 1918. Serial No. 264,504. 26 Claims. (Cl. 250—27.)



6. The process of manufacturing electron-emitting cathodes, which consists in mixing together a base material and a mixture of oxides and a chloride of the alkali earth group, and finally amalgamating the mixture into a homogeneous body.

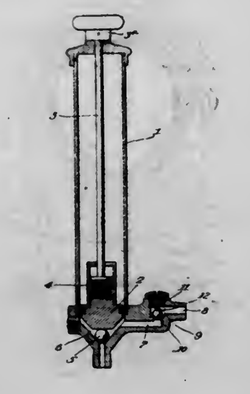
21. An electron-emitting cathode consisting of an homogeneous body containing tungsten as a base material, and a diluent including oxids and a chloride of metals falling under the second and eighth respectively groups of the periodic law.

24. An electron-emitting cathode consisting of an homogeneous body containing a base material, strontium oxide and a metallic chloride.



1,453,268. SEALING MEANS. WINFRED MUDGE BROOKS, South Orange, N. J. Filed Apr. 19, 1921. Serial No. 462,661. 6 Claims. (Cl. 292—325.)

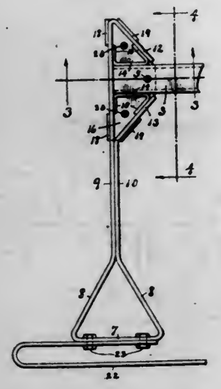
1. Sealing means comprising: a member of sheet material having a main portion provided with an aperture, for the reception of strands, and an auxiliary portion at one end, said main portion being bent back upon itself along a line extending transversely through the aperture, and said auxiliary portion being bent back upon the doubled-up main portion.



1,453,269. CONCRETE-PIPE MACHINE. CHARLES F. BUENTE, Pittsburgh, Pa. Filed Aug. 6, 1921. Serial No. 490,292. 23 Claims. (Cl. 25—37.)

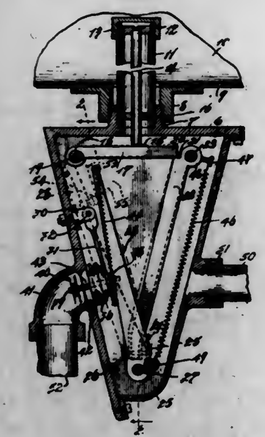
1. In a concrete pipe machine, the combination of a mold, a core therefor, means for rotating said mold, means for causing a relative rotative movement between said mold and core, means for maintaining a uniform feed of concrete into said mold in the formation of one

size of pipe, and means whereby the rate of rotation of said mold may be varied and the rate of feed varied inversely to the rate of rotation of the mold in the formation of another size of pipe.



1,453,270. PRIMER FOR INTERNAL-COMBUSTION ENGINES. CHARLES S. BURTON, Oak Park, Ill. Filed Jan. 16, 1922. Serial No. 529,462. 1 Claim. (Cl. 103—154.)

A primer for internal combustion engines consisting of a plunger pump having one-way seating valves at the intake and discharge, the plunger being positioned with respect to the intake valve for locking said valve on its seat at the limit of the forcing stroke of the plunger and having a terminal for encountering the valve which is connected to the plunger for longitudinal play thereon; a spring reacting between the plunger stem and said terminal to thrust the latter yieldingly against the valve; and means for stopping the positive thrust of the plunger short of the limit of the play of the terminal whereby the pressure of the valve on its seat is limited to the tension of the spring.

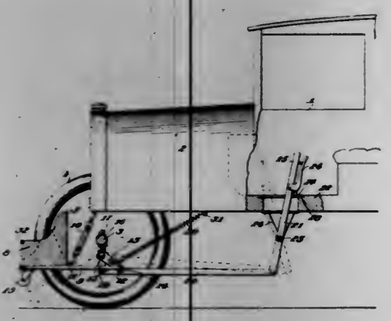


1,453,271. FENDER BRACKET. HARRY CAPLAN, Detroit, Mich. Filed Dec. 27, 1921. Serial No. 524,841. 5 Claims. (Cl. 293—55.)

4. A fender bracket consisting of two triangular ends and a bar between them, the outer end having a side at substantially right angles to the bar, which side is adapted to be attached to the fender, and caps attached to the inner end and to the frame bar of the vehicle, the edges of the caps being turned inwardly to brace the sides

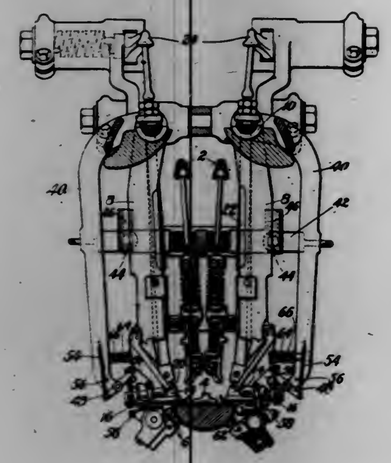
of the inner end, braces being attached to the inner sides of the caps to brace the inner end and position the bracket on the frame bar of the vehicle.

1,453,272. THERMOSTATIC VALVE. PETER J. COLLINS, Brooklyn, N. Y. Filed Sept. 16, 1921. Serial No. 501,057. 8 Claims. (Cl. 236—48.)



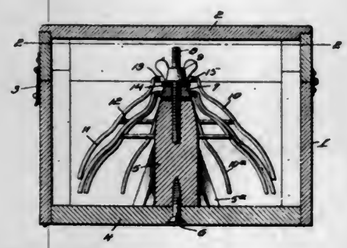
1. In a thermostatic valve, an expansible and contractible body comprising a thermostatic element, a lever of the third class yieldingly held against said element and moved thereby, a pair of coacting levers of like class one of which is actuated by said first lever, a pivoted valve carrier having a valve adjustably secured thereto, and a connection between the second of said pair of coacting levers and the valve carrier to swing the former over the valve carrier pivot to open and close the valve.

1,453,273. VEHICLE FENDER. LARIE GRELLA, Brooklyn, N. Y. Filed Jan. 19, 1923. Serial No. 613,673. 11 Claims. (Cl. 293—34.)



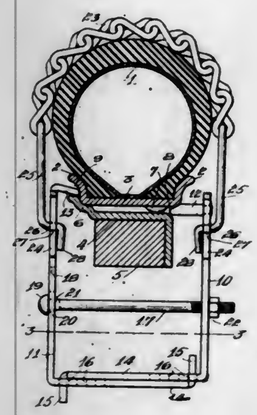
1. A fender for automobiles comprising intermediately pivoted longitudinal bars, a catcher on the outer end por-

tions of said bars, a rock shaft operatively engaging the inner ends of said bars, whereby the catcher may be



raised or lowered by rocking said shaft, and means for rocking said shaft.

1,453,274. MACHINE FOR SHAPING UPPERS OVER LASTS. ERIC A. HOLMGREN, Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New York. Filed Oct. 22, 1919. Serial No. 332,520. 44 Claims. (Cl. 12—4.)

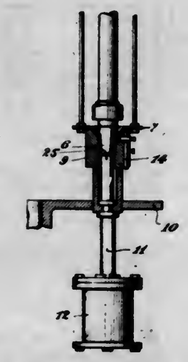


1. In a machine of the class described, the combination with means for pulling an upper over a last, of overlaying and fastening means, and mechanism for moving said overlaying and fastening means toward the shoe including parts arranged for relative movement in response to resistance encountered by said means in its movement toward the shoe to actuate the fastening means and a positively operating device for preventing the relative movement of said parts until the fastening means has arrived in a predetermined relation to the shoe.

1,453,275. LAMP-SHADE-DELIVERY BOX. THOMAS J. KEEPING, Los Angeles, Calif. Filed Sept. 19, 1921. Serial No. 501,738. 5 Claims. (Cl. 206—1.)

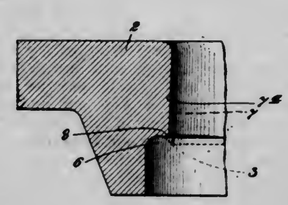
1. A delivery box of the class described, comprising a closed casing, having a shadt stand or support mounted therein, and composed of nested members constituting a plural support for a plurality of lamp shades.

1,453,276. NONSKID ATTACHMENT FOR VEHICLE WHEELS. JACOB S. KOMINZ, Rochester, N. Y. Filed July 15, 1921. Serial No. 485,063. 8 Claims. (Cl. 152—14.)



1. A non-skid attachment comprising two clamping members, wheel engaging means on the clamping members for engaging opposite sides of a wheel, an interlocking connection between the clamping members arranged to be positioned on the inner side of the felly of the wheel, means connecting the clamping members between the wheel engaging means and the interlocking connection for drawing said wheel engaging means in firm engagement with the opposite sides of the wheel, and a non-skid device connecting said clamping members.

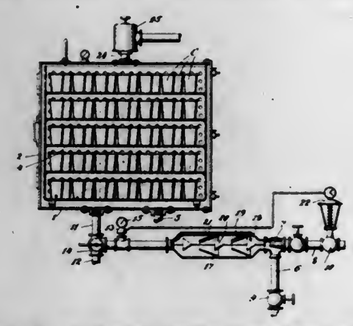
1,453,277. MATRIX DEVICE FOR MOLDS. PETER KUCERA, Connellsville, Pa., assignor to Capstan Glass Company, Connellsville, Pa., a Corporation of Delaware. Filed May 22, 1920. Serial No. 383,341. 14 Claims. (Cl. 49—38.)



14. A block mold for the manufacture of glassware or the like comprising in combination a body portion pro-

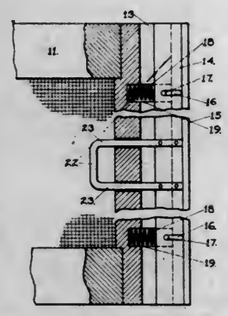
vided with a mold recess, a mold table, a ring mold, a member mounted upon the side wall of the mold and being provided on one end with a configuration adapted to be impressed upon the article being molded and means

operated by the ring mold to move said member into operative position and operated by the mold table to move said member out of engagement with the finished molded article.



1,453,278. METHOD OF MANUFACTURING RING MOLDS AND THE LIKE. PETER KUCERA, South Connellsville, Pa., assignor to Capstan Glass Company, Connellsville, Pa., a Corporation of Delaware. Original application filed Jan. 6, 1920, Serial No. 349,704. Divided and this application filed July 9, 1921. Serial No. 483,422. 9 Claims. (Cl. 76—107.)

1. The method of manufacturing molds for pressed glassware which comprises producing a matrix of approximately the desired shape, then subjecting portions of the mold to compression forces to compact and harden the said portions, then finishing the hardened portions to the desired size and shape.

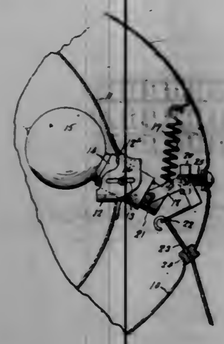


1,453,279. METHOD AND APPARATUS FOR CONTROLLING COOLING OF PACKAGES. GEORGE W. LUHRMANN, Jersey City, N. J., assignor to Anchor Cap & Closure Corporation, Brooklyn, N. Y., a Corporation of New York. Filed Jan. 8, 1920. Serial No. 350,239. 7 Claims. (Cl. 62—170.)

1. The method of cooling sealed packages having frangible containers, which includes maintaining the packages under an equalizing pressure, supplying a cooling fluid, attemperating the cooling fluid with reference to the temperature of the packages to provide a cooling medium, applying successive quantities of the cooling

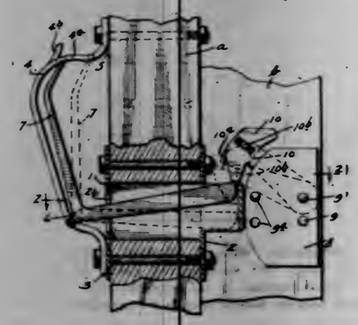
medium at successively reduced temperatures to packages disposed in successive zones, and withdrawing the cooling medium from the zone of highest temperature.

1,453,280. WINDOW SCREEN. HENRY A. PARK, South Roanoke, Va. Filed Mar. 27, 1922. Serial No. 547,086. 1 Claim. (Cl. 156—14.)



In combination with a window frame, guide strips mounted upon the confronting sides of the frame, a screen frame formed in its opposite edges with channels and with sockets communicating therewith, bearing members slidably mounted within the channels in the screen frame and embracingly engaging said guide strips, coil springs fitting within said sockets and bearing against the inner edges of said bearing members for forcing the same outwardly, a stationary handle carried by one side of the screen frame, a handle member secured to the other bearing member and slidable through the adjacent side of the screen frame, and means for limiting outward movement of the bearing members, each of said bearing members being formed from a single piece of resilient metal bent at its longitudinal center and having its major portion jammed together with its free edges extended outwardly and rolled to engage opposite sides of the guide strip.

1,453,281. LAMP-BULB-TILTING DEVICE. WILLIAM F. PERSONS, Cleveland, Ohio, assignor to The Guide Motor Lamp Manufacturing Company, Cleveland, Ohio, a Corporation of Ohio. Filed Oct. 29, 1920. Serial No. 420,521. 1 Claim. (Cl. 240—44.)



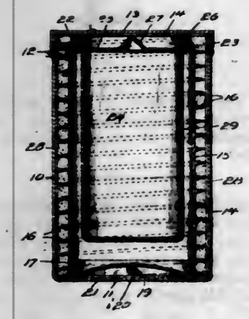
In a device of the kind described, the combination with a lamp body and reflector, of a slotted sleeve connected to said reflector, a lamp socket pivoted in said sleeve and movable both pivotally and longitudinally within said sleeve, means for maintaining said socket

normally in line with the axis of reflector, a longitudinally adjustable member to the rear of the socket,

a rocking member pivotally connected to said adjustable member and to the socket, and means for rocking said rocking member and socket.

1,453,282. AUTOMATIC DOOR LATCH. CARL PETERS, Sherburn, Minn. Filed June 13, 1921. Serial No. 477,079. 9 Claims. (Cl. 292—254.)

1. A latch device comprising a keeper adapted to be secured to the inside of a door, a latch pivoted to swing about a horizontal axis parallel to the door and adapted to be secured to the door jamb, and so arranged that it will be raised by the keeper and engage with the same, a housing handle member secured to the outside of the door, a lever mounted therein to swing on a horizontal axis parallel to the door having one arm adapted to extend through the door and engage the said latch to lift the same, and having another arm extending vertically in said handle portion normally spaced from the front thereof.

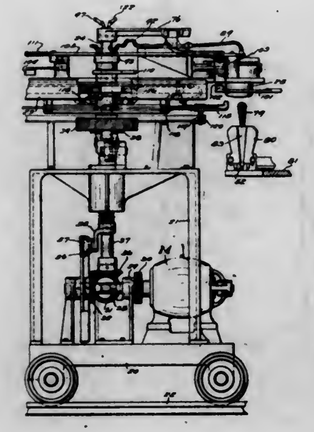


1,453,283. PAPER CLOSURE. GEORGE RAMSEY, Brooklyn, N. Y., assignor to Anchor Cap & Closure Corporation, Brooklyn, N. Y., a Corporation of New York. Filed Apr. 11, 1918. Serial No. 227,874. Renewed Sept. 3, 1921. Serial No. 498,573. 13 Claims. (Cl. 215—38.)

1. A closure of the character specified comprising a cap of paper and the like having a top portion and a depending skirt, a bead in the said skirt with the concave portion of the bead on the interior of the skirt and the convex portion of the bead on the exterior of the skirt, and a reinforcing band covering said bead, said band being formed of material having greater stability than the material in the cap and adapted when compressed

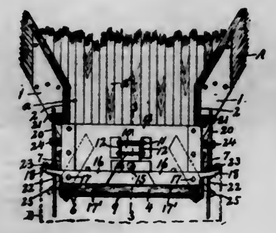
to cause said bead to be collapsed and to produce an inward radial movement of portions of the skirt whereby said cap may be sealed against a substantially incompressible side wall of a suitable container.

1,453,284. RECEPTACLE. EUGENE A. ROBE, New Concord, Ohio. Filed Apr. 4, 1922. Serial No. 549,557. 5 Claims. (Cl. 220—15.)



1. In a receptacle as characterized, an outer cylindrical casing, an inner cylindrical container, a cylindrical member interposed between the casing and container and arranged to provide spaces between its outer wall and the inner wall of said casing and its inner wall and the outer wall of said container, said member having an inner and outer open end, said container engaging with the outer end of said member for closing it, a removable closure for an inner end of said member, a spiral element interposed between the inner wall of said casing and the outer wall of said member to strengthen said walls against injury or collapse, a packing filling the outer space between said casing and said member and within the channelway formed by said spiral element, and means whereby a vacuum may be drawn in the space between the inner wall of said member and the outer wall of said container.

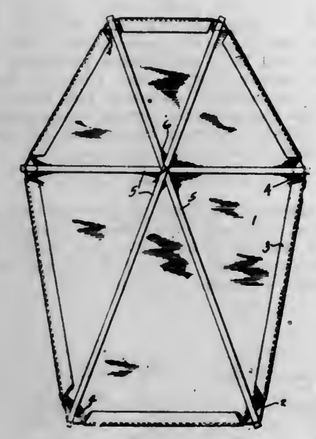
1,453,285. APPARATUS FOR GATHERING AND TRANSFERRING MOLTEN GLASS. JOHN F. RULE, Toledo, Ohio, assignor to The Owens Bottle Company, Toledo, Ohio, a Corporation of Ohio. Filed Oct. 24, 1919. Serial No. 332,987. 5 Claims. (Cl. 49—62.)



5. The combination of a carrier rotatable continuously about a vertical axis, a gob forming receptacle carried thereby open at its lower end to receve a charge of glass, means to dip said receptacle into contact with a pool of molten glass during said rotation and gather a charge of glass by suction, a knife on said carrier, means to project the knife across the bottom of the receptacle to sever the gathered glass from the supply, a burner on

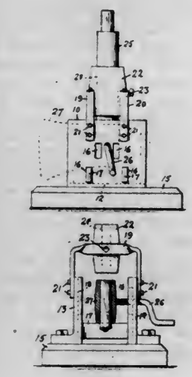
said carrier, means to project the burner laterally to an operative position directly beneath the charge of glass

and direct a heating flame vertically upward against the cut end of the glass, means to then withdraw the burner, and means to introduce the glass into a shaping mold.



1,453,286. COMBINED CHUTE AND BAG HOLDER. CHARLES E. SCHWAR, Lyons, N. Y. Filed Feb. 24, 1922. Serial No. 538,885. 5 Claims. (Cl. 83—26.)

1. In combination with a chute, a frame pivoted to the chute for swinging movement in either of two opposite directions and provided with a gate movable to and from a position across the discharge opening in the chute as the frame is rocked in opposite directions, movable bag-supporting members on the frame, a catch plate for holding said members in operative position for holding the bag, a stop for limiting the movement of said catch plate and a handle on the catch plate for tripping the same against the stop and thereby releasing the bag-holding members from their holding positions.

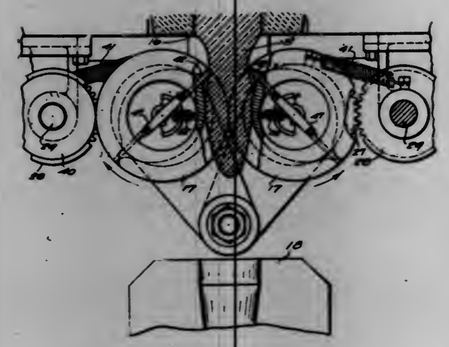


1,453,287. KITE. HARVEY A. SELLERS, Decatur, Ill. Filed Nov. 14, 1921. Serial No. 514,872. 1 Claim. (Cl. 244—22.)

In a kite, in combination, a frame comprising a plurality of sticks adapted to have a radiating crossing relation, a six sided foldable covering for said frame cut away V shape at the corners and having a single cord binder exposed at the cut away corners, said sticks being of such a length relative to the distance between the corners of the kite as to require the buckling of said sticks to engage said cord binder and each end of the

sticks having a slit to receive said binder cord, and a non-removable elastic and flexible binder to hold the sticks when knocked down and at their crossing point when the kite is assembled.

1,453,288. TOOL-HANDLE REMOVER. WILLIAM D. SNOWMAN, Ashland, Me. Filed Sept. 21, 1921. Serial No. 502,159. 1 Claim. (Cl. 29—86.)

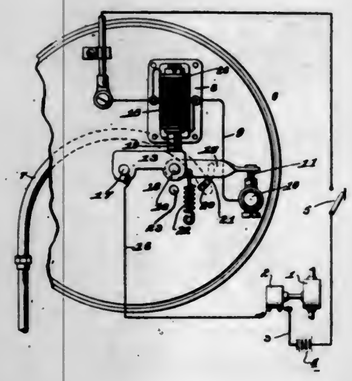


A tool handle removing device comprising spaced side members having supporting seats in their confronting faces, bars engageable in said seats and adapted to support a tool head, a holder supported on said side members and having a longitudinally directed guideway, and a striking pin movable through said guideway.

1,453,289. PROCESS OF SEPARATING ZINC AND LEAD. EDWARD H. SNYDER, Salt Lake City, Utah. Filed Nov. 24, 1919. Serial No. 340,219. 4 Claims. (Cl. 75—17.)

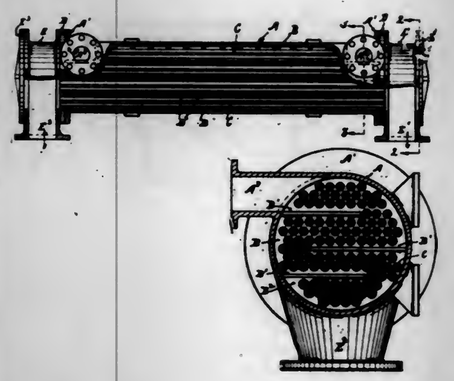
1. A process which comprises roasting lead-zinc ore containing sulfur and thereby making a product containing large quantities of lead sulfate and zinc oxid, intimately mixing such product with a chlorid of an alkali-forming metal in amount at least chemically equivalent to the lead compound present in the product, and heating the mass in a non-reducing atmosphere to a temperature between 750° C., and 1100° C., whereby the lead is substantially converted into chlorid and volatilized and the zinc oxid remains substantially unvolatilized, whereby the lead chlorid may be collected separately from the zinc oxid.

1,453,290. METHOD OF AND MEANS FOR FEEDING MOLTEN GLASS. LEONARD D. SOUBIER, Toledo, Ohio, assignor to The Owens Bottle Company, Toledo, Ohio, a Corporation of Ohio. Filed June 1, 1920. Serial No. 385,590. 27 Claims. (Cl. 49—55.)



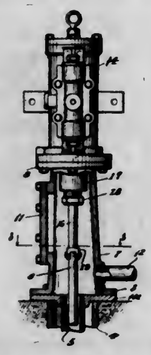
12. The combination of a container for molten glass having an outlet at which a continuous supply of the glass is maintained and through which a column of glass is extruded, a pair of gob shaping rolls on opposite sides of the glass, means to rotate said rolls in contact with the extruded glass while the latter is still united with the glass in the container, and cutting mechanism arranged to advance with the shaping surfaces of the rolls and sever the glass into individual masses.

20. The combination of a gob forming roll having two oppositely disposed gob forming recesses extending along its periphery, said roll having diametrically opposite slots between the ends of said recesses, cutter blades mounted to reciprocate radially in said slots, a yoke connecting said blades, means to rotate the roll, and a stationary cam arranged to shift said yoke in one direction when the roll reaches a predetermined point in its rotation to thereby project one cutter and to shift the yoke in a reverse direction when the roll has rotated a half revolution beyond said position, whereby each cutter is projected at the same rotative position.



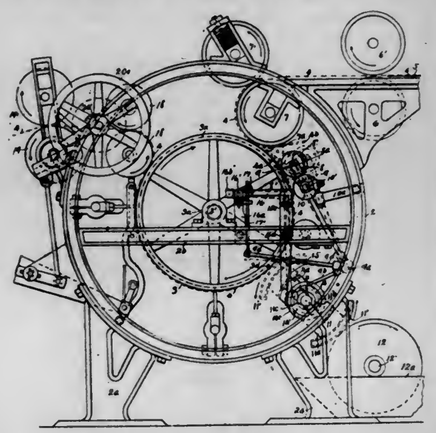
1,453,291. REGULATOR FOR SYSTEMS OF APPARATUS. ALLEN C. STALEY, St. Louis, Mo., assignor to Standard Engineering Company, St. Louis, Mo. Filed Aug. 14, 1919. Serial No. 317,496. 14 Claims. (Cl. 200—81.)

1. In a regulator for controlling a device operating in a system of apparatus, the combination of an electric circuit, a pair of contacts, one of which is movable relatively to the other and operating when in engagement to close the circuit, a member controlled by said device



for engaging the movable contact to move the same away from the other contact and thereby open the circuit, and means co-operating with said member after the circuit is broken to increase the distance between the contacts.

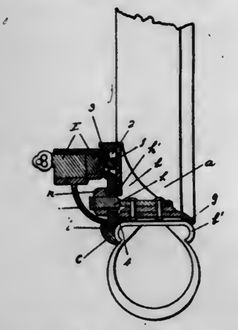
1,453,292. HEAT-EXCHANGE APPARATUS. HOMER I. STEFFA, Chicago, Ill. Filed Aug. 8, 1921. Serial No. 490,813. 2 Claims. (Cl. 257—236.)



1. In an apparatus of the class described, a casing having inlet and outlet openings at opposite ends thereof, a series of transverse walls therein, each wall having an opening through which fluid may flow, the said openings being located alternately in the top and bottom of the walls, staggered horizontal partitions between said transverse walls, a series of longitudinal tubes passing through said casing and through said transverse walls, and secured in plates on the ends of said casing, and header chambers on the ends of said casing covering the ends of said tubes.

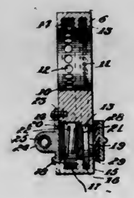
1,453,293. OIL-SAVER DEVICE. WILLIAM M. STEPHENSON, Dallas, Tex. Filed Oct. 26, 1917. Serial No. 198,077. 11 Claims. (Cl. 103—202.)

1. An oil pumping system including an engine in combination with the casing of a well, and an oil receptacle device interposed between the well casing and the engine to support said engine and act as an oil receptacle, and a discharge pipe connected to the receptacle.



1,453,294. PAPER-BAG-BOTTOMING MACHINE. JOSEPH W. TAGGART, Watertown, N. Y. Filed Nov. 23, 1921. Serial No. 517,261. 9 Claims. (Cl. 93—21.)

1. In a paper bag bottoming machine, the combination of the drum having circumferential grooves, and the slitting rolls which carry the paper bags to the drum, one of said rolls having a spur which pierces and effects the spreading of the bottom end flaps after the slitting operation, of a rotary paste pad geared to and driven by said drum adapted to apply paste to said end flaps while the bags are being carried by the drum past a certain point, a roller adapted to engage the grooves in the drum whenever the feeding of the unpasted bags is interrupted, and means actuated by said roller for preventing the said pad from smearing the drum with paste.



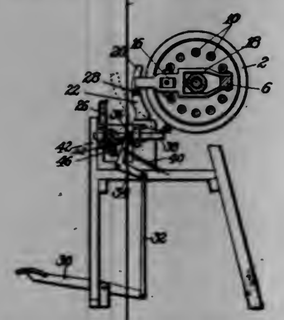
1,453,295. DEMOUNTABLE-RIM LOCK. HUSTON TAYLOR, Detroit, Mich., assignor to Detroit Carrier and Manufacturing Company, Detroit, Mich, a Corporation of Delaware. Filed Mar. 6, 1920. Serial No. 363,847. 2 Claims. (Cl. 70—122.)

1. In combination with a ring on which a tire rim is adapted to be mounted, of a bolt extending from said ring parallel to the axis of the ring, a wedge plate mounted on said bolt and having a projection adapted to enter between the rim and the ring, a nut to hold the wedge plate in position to secure the rim on the ring, said wedge plate having a shoulder on one side of the bolt and an aperture on the opposite side of the bolt,

a housing adapted to fit over said nut and prevent access to the nut, said housing having an extension adapted to engage said shoulder, and a key-operated lock mounted in the housing and provided with an engaging member adapted to enter the aperture in the wedge plate to secure the housing in position.

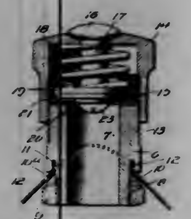
1,453,296. AUXILIARY AIR VALVE FOR INTERNAL-COMBUSTION ENGINES. ALBERT WAGNER, Cincinnati, Ohio, assignor to Wagner Research Society, Cincinnati, Ohio, a Copartnership comprising Albert Wagner, Henry A. Meyer, Felix Elsbach, and Jacob Bloch. Filed Oct. 9, 1922. Serial No. 593,294. 6 Claims. (Cl. 48—180.)

1. A device of the character described adapted to be placed between a carbureter and an internal combustion engine, comprising a body or casing having an opening to register with the outlet of the carbureter, said body having a plurality of passages to admit air to said opening, a valve for admitting air to one of said passages, and a normally closed automatically actuated valve for admitting air to another of said passages, when the first mentioned valve is opened.



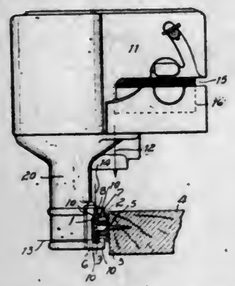
1,453,297. LAMP MOUNTING FOR CERTAIN OPTICAL INSTRUMENTS. REINHOLD H. WAPPLER, Yonkers, N. Y., assignor to American Cystoscope Makers, Inc., a Corporation of New York. Filed Mar. 15, 1920. Serial No. 365,834. 7 Claims. (Cl. 128—7.)

1. In a device of the character described the combination of an optical barrel, a lamp socket carried by said



optical barrel, an incandescent lamp bulb provided with a stem fitting into said lamp socket in order to support said incandescent lamp bulb thereupon, so that said lamp bulb may be turned relatively to said socket, and means controllable at the will of the operator for securing said stem in different radial positions relatively to said socket.

1,453,298. STARTING AND STOPPING MECHANISM. JESSE S. WENTWORTH, Norwood, Ohio, assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Original application filed Mar. 27, 1914, Serial No. 827,596. Patent No. 1,336,875. Divided and this application filed Oct. 11, 1918. Serial No. 257,727. 8 Claims. (Cl. 192—25.)



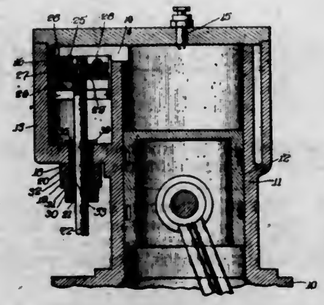
1. In mechanism of the class described, the combination with a clutch, of means for actuating said clutch comprising a clutch controlling member, a switch cam mounted on said member, an operator-controlled slide, and means on said slide arranged to engage the switch cam to operate the controlling member upon movement of the slide in one direction and to disengage the switch cam and permit the controlling member to return to original position upon continued movement of the slide in the same direction, said slide being also arranged to engage another portion of the switch cam upon movement of the slide in the opposite direction to its original position.

1,453,299. FLUID-TIGHT CONTAINER AND CLOSURE THEREFOR. EUGENE WETZEL, Appleton, Wis. Filed Sept. 30, 1921. Serial No. 504,268. 6 Claims. (Cl. 220—24.)

1. The combination with a container having its body provided with an opening at one corner thereof and further provided with an outwardly projecting flange extending around said opening and disposed at an angle with respect to said body, of an angularly disposed neck extended through said opening and having its outer face provided with a groove for the reception of said flange, means mounted on the inner end of said neck for clamping said flange thereto, and a cap threadably engaging with the outer portion of said neck and provided with a spring controlled valvular device adapted to seat on the outer end of the neck for closing it when the cap is adjusted toward the neck.

1,453,300. MOUNTING FOR MEASURING MACHINES AND THE LIKE. JOHN L. WHEELER, St. Louis, Mo., assignor to The Measuregraph Company, St. Louis, Mo., a Corporation of Delaware. Filed Dec. 20, 1921. Serial No. 523,699. 2 Claims. (Cl. 211—12.)

1. In a mounting for a measuring machine to be secured to a counter, and which is operated by pulling the fabric through the machine parallel with the edge of the counter, the combination of a rail, a shoe mounted to slide along the rail and having fixed bearing cheeks to engage and slide upon the rail on its opposite sides, and a measuring machine supported on the shoe with its center of gravity disposed in a vertical plane removed from the plane of the rail, whereby the forces developed at the said bearing cheeks of the shoe are reacted to by the said face of the rail, and operate to offer sufficient frictional resistance to prevent the measuring machine from being pulled along the rail by the fabric during the measuring movement.

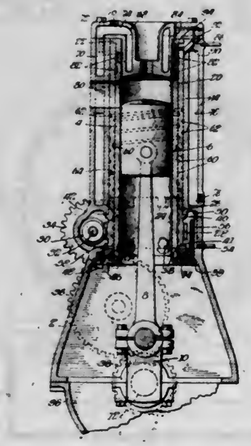


1,453,301. LONG-REACH TONGS. OSCAR S. WINKLER, Baltimore, Md. Filed Mar. 21, 1922. Serial No. 545,607. 7 Claims. (Cl. 294—22.)

1. In a grapple, the combination of a pair of gripping jaws, a body on which said jaws are mounted, an actuating handle on said body, and means including an elastic element connecting the handle to the jaws in such manner that the jaws can be both closed and yieldingly held closed by said handle and said means.

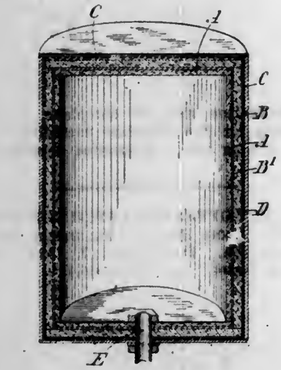
1,453,302. VALVE ARRANGEMENT. ELTON A. WRIGHT, Chicago, Ill. Filed July 10, 1920. Serial No. 395,329. 5 Claims. (Cl. 123—188.)

1. In an internal combustion engine, a hollow cylindrical slide valve split throughout its length, a valve stem, and a holding member supporting the valve upon the stem in such manner as to permit a limited relative lateral movement of the valve and stem, said holding



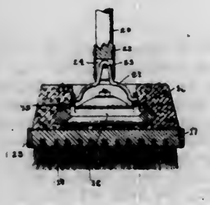
member being provided with axial openings through which a fluid passes during normal operation of the engine.

1,453,303. PROCESS OF MANUFACTURING PLATES FOR ARTIFICIAL DENTURES. HOMER T. YARYAN, St. Petersburg, Fla. Filed Sept. 23, 1921. Serial No. 502,639. 5 Claims. (Cl. 204—8.)



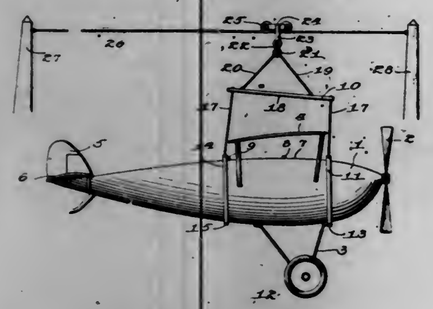
1. The process of manufacturing plates for artificial dentures, which consists in taking a reproduction of the mouth, electrically depositing a base metal on the reproduction to form a plate blank, attaching a vulcanite anchoring means to the blank, and plating the blank with a metal which is noncorrosive and not objectionable to the mouth.

1,453,304. EXPLOSIVE ENGINE. JAMES A. CHARTER, Chicago, Ill. Filed Aug. 15, 1919. Serial No. 317,701. 10 Claims. (Cl. 123—80.)



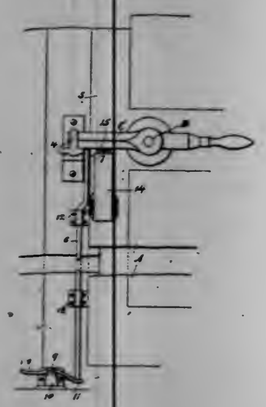
1. In mechanism of the class described, in combination with an engine cylinder, a sleeve valve having valve ports therein mounted for rotation with reference to the cylinder, gear mechanism for rotating said sleeve located within a space formed within the engine structure, means supplying oil to said gear containing space, and means at a point above the gearing and below the valve ports permitting automatic drainage therefrom of all the oil in the gear chamber in excess of a predetermined quantity.

1,453,305. SELF-SEALING PETROL TANK OR OTHER CONTAINER. CHARLES ANGUS CLEGHORN, Woburn Sands, England. Filed July 9, 1919. Serial No. 309,619. 12 Claims. (Cl. 154—46.)



1. A container for fluids comprising a layer of sponge rubber and a coating of Turkish birdlime disposed on the face of the rubber.

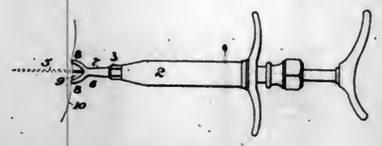
1,453,306. BRUSH. JAMES COLLIER, Racine, Wis., assignor to S. C. Johnson & Son, Racine, Wis., a Partnership consisting of Herbert Fisk Johnson, Herbert Fisk Johnson, jr., Helen Converse Johnson, and Jessie Johnson Lyman. Filed Apr. 13, 1922. Serial No. 552,202. 3 Claims. (Cl. 15—143.)



1. In a brush of the class described a moulded body of cementitious material, a reinforcing member moulded therein, ears projecting from said reinforcing member, a brush back removably secured to said body and a handle pivotally connected to said ears.

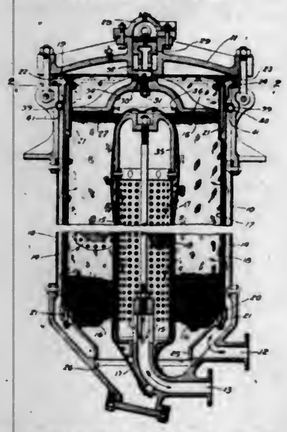
1,453,307. AEROPLANE SUSPENSION. HENRY A. CRAWFORD, Tulsa, Okla. Filed July 15, 1922. Serial No. 575,232. 4 Claims. (Cl. 104—23.)

1. In combination with an aeroplane, a track, suspending means for the aeroplane including a truck on said track, a sling and a connection between the sling and truck.



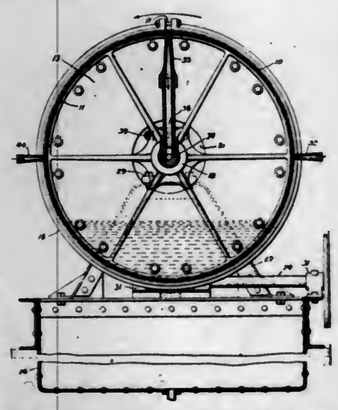
1,453,308. FOOT-OPERATED LATCH FOR DOORS AND THE LIKE. CECIL EDWARD DILLISTONE, Owen Sound, Ontario, Canada. Filed Nov. 12, 1921. Serial No. 514,820. 1 Claim. (Cl. 292—255.)

In combination a latch pivoted to a refrigerator door and the like and extending beyond one side thereof; a keeper attached to the door-jamb frame; a latch-lifter rod adapted to be supported by said door-jamb frame to have vertical movement only, and provided at its upper end with a laterally offset portion which operates adjacent one side of said keeper and underneath said latch, and a foot-operated lever against which the lower end of said rod rests, the said rod through its own weight returning to normal position when pressure is relieved from said lever.



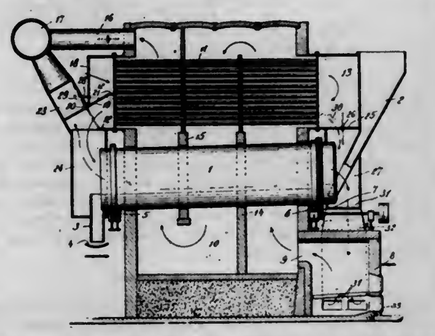
1,453,309. HYPODERMIC SYRINGE. JACOB A. EBERLY, Jr., Philadelphia, Pa. Filed May 24, 1921. Serial No. 472,053. 10 Claims. (Cl. 128—221.)

1. In a device of the character stated, the combination of a chuck and hypodermic needle with a guard carried by and extending beyond the end of the chuck and out of alinement with the needle, whereby the needle is free



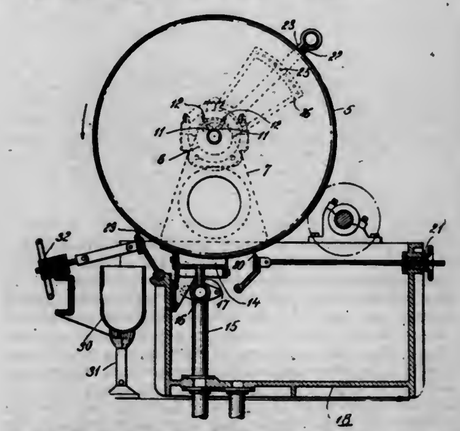
and is permitted to abruptly bend at the end of the chuck and out of contact with the guard.

1,453,310. FILTER. GODFREY ENGEL, Sr., Brooklyn, N. Y., assignor to Buffalo Foundry & Machine Co., Buffalo, N. Y., a Corporation of New York. Filed Feb. 25, 1920. Serial No. 361,309. 6 Claims. (Cl. 210—183.)



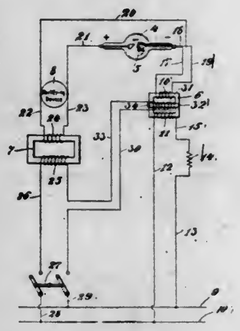
4. A filter comprising a casing, a screen supported within and secured to the casing at one end and a sliding expansion joint between the casing and the opposite end of the screen.

1,453,311. ROTARY FILTER. GODFREY ENGEL, Sr., Brooklyn, N. Y., assignor to Buffalo Foundry & Machine Co., Buffalo, N. Y., a Corporation of New York. Filed Feb. 25, 1920. Serial No. 361,310. 8 Claims. (Cl. 210—199.)



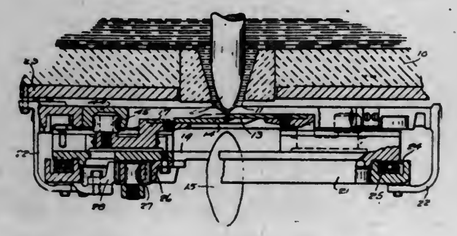
5. In a filter, a rotating drum screen, means for feeding the liquid to be filtered into said drum, means for collecting the filtrate issuing from the drum, a suction nozzle disposed with its mouth adjacent the inner surface of the screen and at a point above the possible liquid level in the drum, a filtrate collecting nozzle disposed with its mouth adjacent the outer surface of the screen and at a point to operate on the screen in advance of the first mentioned suction nozzle and means for directing a cleaning blast inwardly through the screen and disposed to operate on the screen after the screen has been acted upon by the first mentioned suction nozzle.

1,453,312. ROTARY DRIER. GODFREY ENGEL, Sr., Brooklyn, N. Y., assignor to Buffalo Foundry & Machine Co., Buffalo, N. Y., a Corporation of New York. Filed Sept. 18, 1920. Serial No. 411,346. 9 Claims. (Cl. 34—6.)



4. In apparatus of the character described, a drying cylinder, a furnace for heating the same, an air preheater disposed in the path of the furnace gases, a conduit for passing air through the preheater and the drying cylinder to the furnace, valve mechanism for controlling such flow of air and including a valve at one end of the preheater for controlling flow through one section of or through the entire preheater, and a valve at the opposite end of the preheater for enforcing flow through another section of the preheater or permitting flow direct to the drying cylinder.

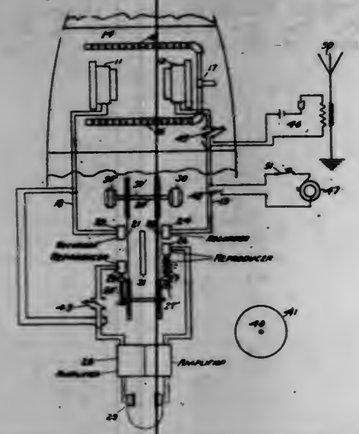
1,453,313. DEALCOHOLIZING PROCESS AND APPARATUS. GODFREY ENGEL, Sr., Brooklyn, N. Y., assignor to Buffalo Foundry & Machine Co., Buffalo, N. Y., a Corporation of New York. Filed Oct. 18, 1920. Serial No. 417,696. 12 Claims. (Cl. 195—1.)



12. In apparatus of the character disclosed, means for supporting a body of refrigerated material, a traveling support positioned to dip into the body of refrigerated material, means for subjecting the support to the influence of a freezing medium, whereby to freeze a film of the material onto the surface of the traveling support, a liquid collector positioned to remove liquid adhering to the frozen film at one point in the travel of the support and means positioned to subsequently remove the frozen film from the support.

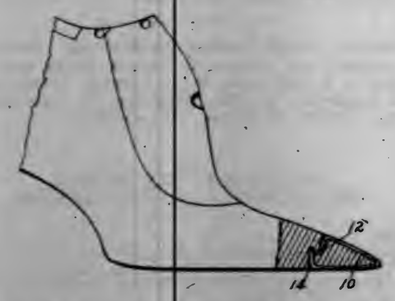
1,453,314. CURRENT REGULATOR FOR X-RAY SYSTEMS. CHARLES FAYER, New York, N. Y., assignor to Wappler Electric Co., Inc., a Corporation of New York. Filed Apr. 2, 1918. Serial No. 226,169. 1 Claim. (Cl. 250—3.)

The combination of an X-ray tube provided with a cathode to be heated, a transformer connected with said cathode in order to heat said cathode by supplying currents thereto, a transformer connected with said X-ray tube for the purpose of exciting the latter, a circuit connected with said last mentioned transformer in order to energize said last mentioned transformer, and electromagnetic mechanism energized by said circuit, said electromagnetic mechanism being so positioned and arranged relatively to said first mentioned transformer that the magnetic flux of said electromagnetic mechanism reaches directly said first mentioned transformer and modifies the magnetic flux thereof.



1,453,315. GLASS-CUTTING MECHANISM. ENOCH T. FRANGREN and LEONARD D. SOUBIER, Toledo, Ohio, assignors to The Owens Bottle Company, Toledo, Ohio, a Corporation of Ohio. Filed Sept. 9, 1921. Serial No. 499,404. 15 Claims. (Cl. 49—14.)

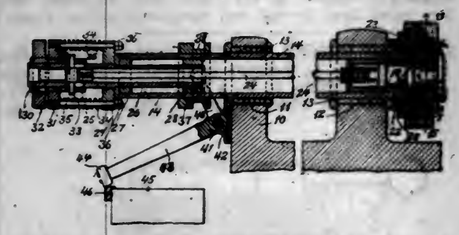
13. The combination of a container for molten glass having an outlet orifice in the bottom thereof through which the glass issues, cutting mechanism comprising shear blades located beneath said orifice at opposite sides of the issuing glass, and means to advance said blades in spiral paths and thereby sever the issuing glass, said



blades having V-shaped cutting edges, the outer portions of which overlap as the blades approach so that the cutting edges surround the issuing glass during the cutting operation.

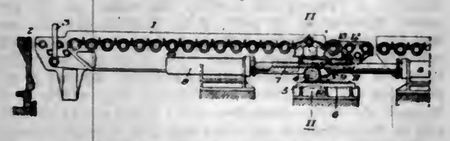
1,453,316. ACOUSTIC METHOD AND APPARATUS. REGINALD A. FESSENDEN, Brookline, Mass., assignor to Submarine Signal Company, Portland, Me., a Corporation of Maine. Filed Apr. 28, 1919. Serial No. 293,297. 9 Claims. (Cl. 177—386.)

6. Acoustic apparatus comprising two sound receivers, two sound recorders, one connected to each sound receiver; two sound records, two sound reproducers, and means for varying the times of reproduction of the records relatively to each other.



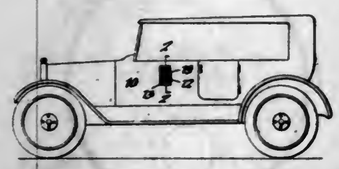
1,453,317. LAST WITH REENFORCED TOE. GUY B. FITZ, Auburn, Me., assignor to Fitz-Empire Double Pivot Last Company, Auburn, Me., a Corporation of Maine. Filed July 16, 1919. Serial No. 311,220. 2 Claims. (Cl. 12—133.)

1. A last having a flat metal ribbon extending in a longitudinal vertical plane around the toe tip with its outer surface substantially continuous with the surface of the toe tip.



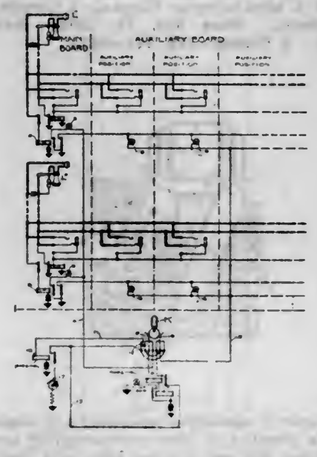
1,453,318. MECHANICALLY-OPERATED AUTOMATIC CHUCK. GEORGE C. GIDDINGS, Springfield, Vt. Filed Dec. 14, 1922. Serial No. 606,959. 1 Claim. (Cl. 279—121.)

In an automatic machine tool, a rotatable chuck-carrying spindle, a rotatable and endwise movable chuck actuator contained within said spindle, a tube fixed within the spindle surrounding said actuator and projecting at one end from the spindle, a spring abutment fastened to said tube adjacent to the end of the spindle, a second spring abutment having a sliding engagement on the tube, and being in rigid connection with the chuck actuator, a spring interposed between the two abutments tending to move them apart, a collar surrounding the spindle, with



provision for movement endwise thereon, connections between said collar and the second abutment adapted to transmit movement from the former to the latter, in the opposite direction to the force application of said spring to the second abutment, and a cam-controlled operating lever for so moving said collar, the collar having a shoulder, and the lever having a stud adapted to bear upon said shoulder, for imparting movement as described to the collar.

1,453,319. BACK SHEAR TABLE. LORENZ IVERSEN, Pittsburgh, Pa. Filed Aug. 10, 1921. Serial No. 491,242. 11 Claims. (Cl. 164—49.)



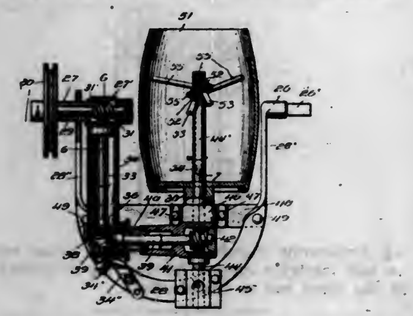
1. A table of the character described, comprising a main section and a disappearing section, movable means supporting one end of the main section, and means operatively connected to said supporting means for operating said disappearing section upon movement of said main section, substantially as described.

1,453,320. THEFT DETECTOR FOR AUTOMOBILES. JOSEPH J. MICHALSKI, Buffalo, N. Y. Filed Mar. 17, 1922. Serial No. 544,628. 5 Claims. (Cl. 40—61.)

1. A theft detector of the character described, comprising a box-like member adapted for attachment to a vehicle to move relatively thereto, the front wall of said member being provided with a transparent portion and its rear wall with a pocket facing said transparent portion and having an opening accessible from the back side of said rear wall, the exposed face of said pocket having a colored area visible through said transparent portion, a detecting member of a contrasting color arranged to normally overlie the colored area of said pocket, and means for locking said box-like member in its normal position, whereby said detecting member is inaccessible in such position.

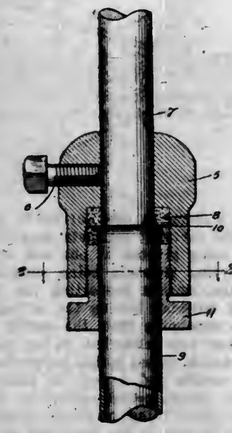
1,453,321. CALL-DISTRIBUTING SYSTEM. WILLIAM S. PACA, Oil City, Pa., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed Sept. 4, 1919. Serial No. 321,675. 8 Claims. (Cl. 179—54.)

5. In a telephone system, a plurality of signal lamps, a current measuring device in series with certain of said lamps, and a second current measuring device cooperating with the first to light and flash certain of said lamps.



1,453,322. RAIL TIE. RICHARD PALMER, South Alburg, Vt. Filed Apr. 17, 1922, Serial No. 553,563. Renewed Mar. 5, 1923. 4 Claims. (Cl. 238—30.)

1. In combination, a rail tie, strips of resilient material connected at their outer ends to the underface of the tie near the opposite ends of the latter, said strips forming pockets, a quantity of yieldable material arranged in said pockets, the tie resting directly on said material.

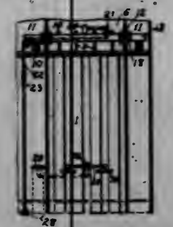


1,453,323. MIXING APPARATUS. WILLIAM E. PALMETER, Elmwood, Nebr. Filed July 18, 1922. Serial No. 575,800. 1 Claim. (Cl. 83—73.)

A mixer for the purpose set forth comprising a main frame, a U-shaped tiltable frame arranged within the main frame and provided with a support, a mixing chamber mounted on said support, a power shaft support mounted at one side of the main frame for pivotally supporting one side of the tiltable frame, a pintle projecting from the other side of the tiltable frame and pivotally mounted in the other side of said main frame for pivotally supporting the other side of the tilting frame within the main frame, a power shaft journaled in the power shaft support, an operative drive connection between said power shaft and said container, a rack carried by the main frame, and an adjustable

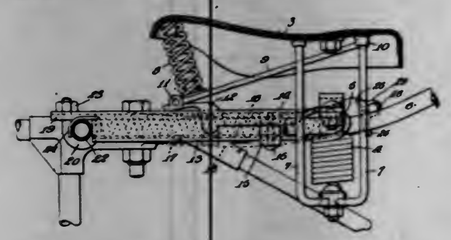
means connected with said pintle and cooperating with said rack and adapted to shift said container at an angle and for maintaining it in its shifted position.

1,453,324. BRASS-LINER STUFFING-BOX HEAD. ALBERT D. PURTLE, Marietta, Ohio. Filed May 7, 1921. Serial No. 467,667. 1 Claim. (Cl. 286—35.)



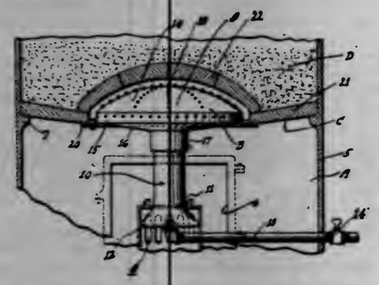
A stuffing box head having an opening formed therein, a polished rod operating through the opening, a liner tube embracing a portion of the polished rod and having one end thereof disposed within the opening, packing material within the opening disposed around the rod and contacting therewith, the packing material being positioned above the liner, means formed at the upper end of the liner tube and embedded in the packing material for restricting movement of the liner tube with respect to the polished rod, packing material positioned below the upper end of the liner and contacting therewith, and means for securing the packing within the head.

1,453,325. APPARATUS FOR ELECTRICAL PRECIPITATION OF SUSPENDED MATERIAL FROM GASES. WALTER A. SCHMIDT, Los Angles, Calif., assignor to International Precipitation Company, Los Angeles, Calif., a Corporation of California. Continuation of application Serial No. 127,606, filed Oct. 25, 1916. This application filed Sept. 14, 1922. Serial No. 588,284. 4 Claims. (Cl. 183—7.)



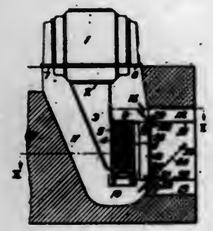
1. In an apparatus for electrical precipitation of suspended particles from gases, the combination with an

insulated support and a vertically extending discharge electrode mounted on said insulated support and extend-



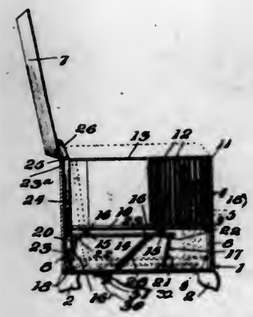
ing downwardly therefrom, of hammer means mounted on said insulated support for applying a vertical blow to the upper end of said electrode.

1,453,326. MOTOR AND OTHER CYCLE. JOHANNES TH. SENTROP, Jr., Montreal, Quebec, Canada. Original application filed Feb. 8, 1918, Serial No. 216,114. Divided and this application filed Dec. 13, 1918, Serial No. 266,627. Renewed Aug. 29, 1921. Serial No. 496,754. 7 Claims. (Cl. 208—15.)



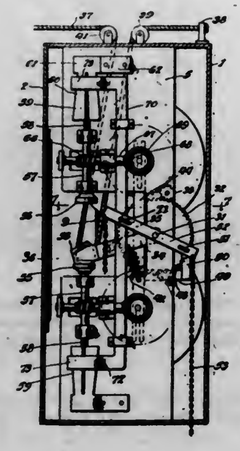
1. In a cycle, a frame, a tube carried by the frame, a saddle and saddle carrying members mounted upon the tube the latter being pivoted at one end to the frame, such saddle carrying members being slidable longitudinally of the tube, springs supporting the rear portion of the saddle, a cross-bar having the springs suspended therefrom, arms depending from the saddle on opposite sides of the frame and connected to the lower ends of said springs, a double coiled spring supporting the front portion of the saddle and a pair of links forming a bearing for said double coiled spring at the front of the saddle, such links being pivotally connected to the underside of the saddle at the rear and extending forwardly and converging to a central point on the tube.

1,453,327. GAS BURNER. JOSEPH WM. SHARP, Philadelphia, Pa. Filed Apr. 11, 1921. Serial No. 460,221. 7 Claims. (Cl. 126—92.)



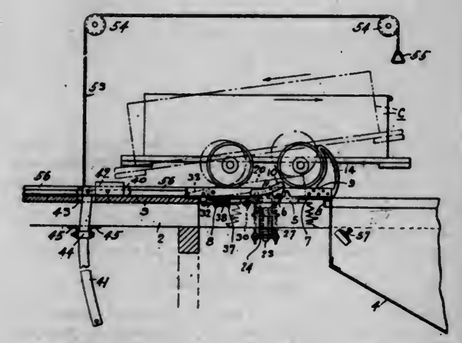
1. The combination of a burner comprising a head provided with a plurality of burner openings, a supply pipe leading to said head, a grate arranged around the head formed of refractory material, and a dome formed of refractory material supported by said grate and arranged over and in spaced relation to said head.

1,453,328. SYSTEM OF VENTILATION. JAMES SMILLIE, Stretford, England, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Nov. 12, 1920. Serial No. 423,598. 3 Claims. (Cl. 171—252.)



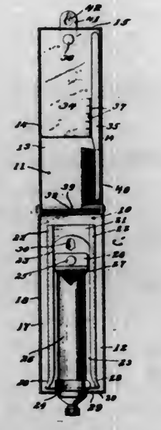
1. A system of ventilation comprising a dynamo-electric machine, a plurality of ducts communicating therewith, cooling means disposed adjacent said ducts, and a plurality of valve elements certain portions of which are adapted to be moved to open and close certain ducts and certain other portions thereof adapted to coact to open and close another duct to effect either an open or closed circulation of a cooling medium through said machine.

1,453,329. PHONOGRAPH CABINET. EDWARD W. WINSLOW, Belle Plaine, Iowa. Filed Apr. 6, 1921. Serial No. 459,077. 7 Claims. (Cl. 211—16.)



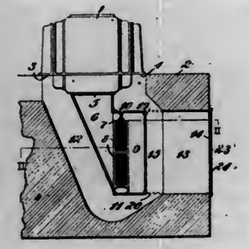
1. A cabinet for phonograph records having a record receiving compartment and provided with a hinged lid, a platform movable upwardly and downwardly within the compartment and arranged to receive and support the records, parallel lever members mounted within the compartment below the platform and connected with and operated by the lid, and means for connecting the lever members and for supporting the platform whereby the latter will be raised and lowered when the lid is opened and closed, said means including a crank element connected with one of the lever members.

1,453,330. STATION INDICATOR. JOSEPH C. WOOD, Jackson, Tenn., assignor of one-fourth to William M. Lane and one-eighth to William B. Barger, both of Jackson, Tenn. Filed Mar. 16, 1922. Serial No. 544,202. 10 Claims. (Cl. 40—87.)



1. In a station indicator, the combination of a display web, means for effecting travel of said web including a vibratory lever, a stop in the path of the lever, and means for feeding the stop toward the lever for progressively limiting the travel of the web.

1,453,331. KICK-BACK CAR DUMP. CHRISTIAN B. ANFINDSEN, Charlerol, Pa. Filed Nov. 9, 1921. Serial No. 514,010. 9 Claims. (Cl. 214—47.)

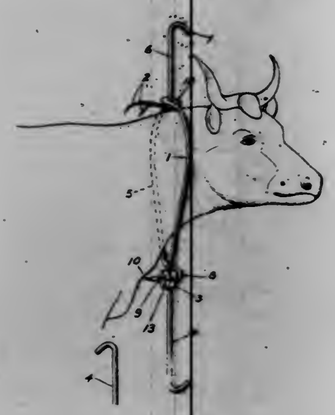


1. Car-dumping apparatus of the kick-back type comprising a support, tracks carried by the said support, means for causing the said support to be tilted to car-dumping position, auxiliary tracks also carried by the said support and means for resiliently maintaining the said auxiliary tracks inclined upwardly in the direction of movement of the cars coming upon the said support.

1,453,332. TOILET CASE. MORRIS W. ASKIN, Washington, D. C. Filed Dec. 18, 1920. Serial No. 431,765. 4 Claims. (Cl. 132—84.)

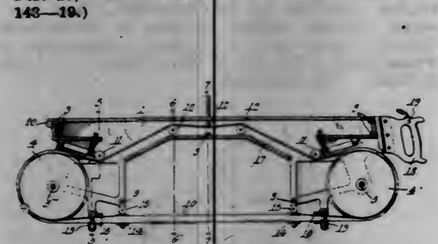
1. In a toilet case, a body portion, a lid hingedly connected therewith, a slidable tooth-paste tube carrier, and means on said lid and carrier for allowing sliding of said carrier to projected and retracted position and for locking it in retracted position when said lid is closed.

1,453,333. SYSTEM OF VENTILATION. KARL BAUMANN, Urmston, England, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 9, 1920. Serial No. 415,796. 6 Claims. (Cl. 171—252.)



1. A system of ventilation for dynamo-electric machines comprising a plurality of ducts, doors arranged in said ducts for controlling the flow of a cooling medium therethrough, and means adapted to be moved into and out of the path of one of said doors to respectively prevent and permit of the movement of another door.

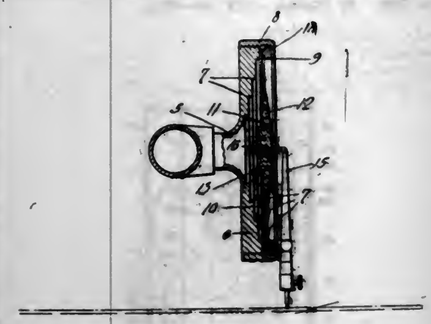
1,453,334. ANIMAL POKE. ANGUS BEATON, Medicine Hat, Alberta, Canada. Filed Oct. 1, 1921. Serial No. 504,747. 2 Claims. (Cl. 119—138.)



1. In an animal poke, opposedly bent wire members surrounding the animal's neck, one member provided with a loop at one end and a loop formed intermediately of the member, and a forwardly directed hook on the other end thereof, the other member having a portion in-

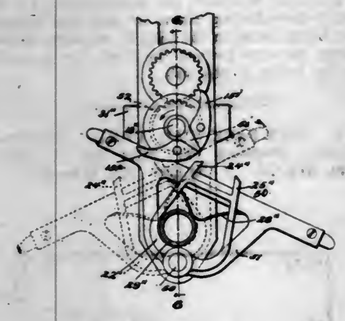
serted through the loop in the end of the first mentioned member, a rearwardly directed exteriorly threaded

pricker at one end of the second member inserted through the intermediate loop in the first mentioned member, and a nut threaded onto the said pricker.



1,453,335. PORTABLE MOTOR-DRIVEN MEAT SAW. WILLIAM HERBERT BENNETT, Charlotte, N. C. Filed Feb. 25, 1922. Serial No. 539,249. 8 Claims. (Cl. 143—19.)

1. In a power driven portable hand saw, the combination of a frame, pulleys mounted at opposite ends of the frame, a saw band passing around the pulleys, and a plurality of guiding rollers near each end of the frame to guide the band saw into a plane with that of the pulleys, the guide rollers nearest the pulleys being disposed at an angle diagonal to the frame and the guide rollers nearer the center of the frame being disposed in alignment therewith.

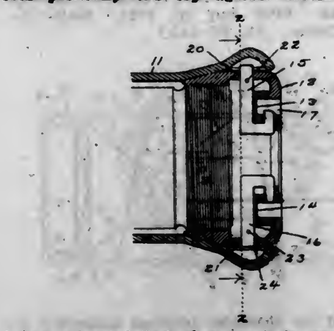


1,453,336. PHONOGRAPH DIAPHRAGM AND SOUND BOX. CHARLES CECIL BROSKIE, Stone, Ky. Filed July 21, 1919. Serial No. 312,175. 1 Claim. (Cl. 181—32.)

A diaphragm for phonographs having a comparatively large central opening with a cork disk mounted thereover and having a flat face overlapping and closely contacting with one face of the diaphragm, said disk having its outer or exposed face convexed and provided on its inner face with a central projection seated snugly within and extending through the opening in the diaphragm, the wall of said opening being embedded in the perimeter of said projection whereby the diaphragm and disk form a substantially unitary structure, said projection having its

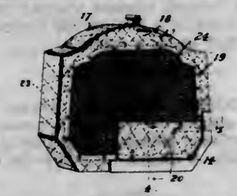
inner face concaved to gather the sound waves and throw them out into the tone arm, and a stylus bar extending through the center of said disk and its projection.

1,453,337. AUTOMATICALLY-REVERSING DRAIN BOARD FOR CLOTHES WRINGERS. EDWARD PAYSON COWLES, Sparta, Mich. Filed June 25, 1920. Serial No. 391,657. 4 Claims. (Cl. 68—32.)



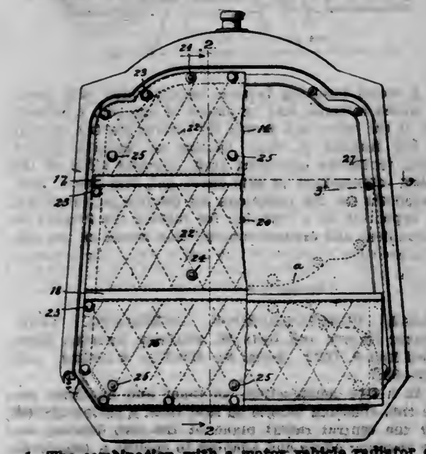
1. In a wringer, a roller adapted to be driven in either direction, a reversible drain-board, means for driving said roller in either direction, said means including a rotatable member having a cam, and means for reversing the drain-board when the direction of drive is changed, said last mentioned means including a member adapted to be engaged by said cam when the direction of drive is changed.

1,453,338. WHEEL. WALTER W. DAVISON, Buffalo, N. Y., assignor to Wire Wheel Corporation of America, Buffalo, N. Y., a Corporation of New York. Filed Mar. 19, 1920. Serial No. 367,074. 2 Claims. (Cl. 301—9.)



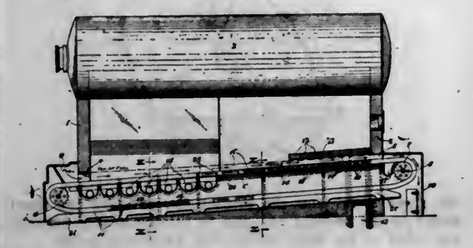
1. In a wheel, the combination with an inner hub of a hub shell mounted thereon, a hub cap on said hub and bearing against said hub shell to hold it on said hub, a locking ring fixed in the mouth of said hub shell and provided with a series of equally spaced slots, the division between said slots being of substantially the same width as the slots, a plurality of locking bars mounted in said hub cap and normally tending to reciprocate radially

therein into engagement with the slots in said ring to lock positively the cap against loosening, said bars



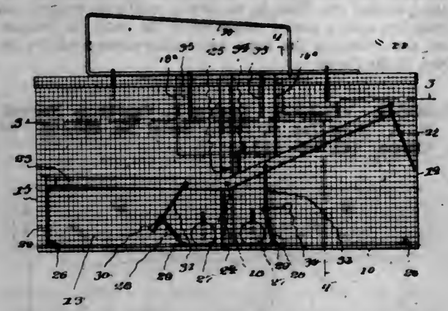
being so located that when one is in engagement with a slot in the locking ring another rests against a division in the ring.

1,453,339. RADIATOR COVER. FRANK J. DRUAR, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed Jan. 3, 1919. Serial No. 269,427. 2 Claims. (Cl. 257—132.)



1. A motor vehicle radiator comprising in combination, a core, a removable shell surrounding the core and having an opening for air to pass through the core, a blanket disposed between said core and shell and projecting slightly beyond the edge of the shell bounding said opening, and a curtain closing said opening and detachably secured to the projecting portion of the blanket.

1,453,340. ATTACHMENT FOR MOTOR-VEHICLE RADIATORS. FRANK J. DRUAR, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed Jan. 3, 1919. Serial No. 269,428. 10 Claims. (Cl. 257—132.)

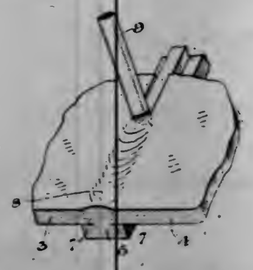


1. The combination with a motor vehicle radiator comprising a core and removable shell formed with an air opening at the front thereof; of a frame disposed between the edges of the shell bounding said opening and the core, a curtain adapted to close said opening, and means to detachably secure the curtain to said frame.

1,453,341. FURNACE. WILLIAM M. DUNCAN, Alton, Ill. Filed Mar. 14, 1919. Serial No. 282,714. 5 Claims. (Cl. 110—40.)

5. A furnace having a fuel intake in its front wall, an ash outlet formed transversely of its rear wall, and a combustion chamber adjacent to said fuel intake, a fuel carrier and ash conveyor comprising an elongated traveling grate extending from said fuel intake to said ash outlet, and a shield arranged over said elongated traveling grate and extending from said combustion chamber to the ash outlet in said rear wall, said elongated traveling grate having a fuel supporting portion in said combustion chamber and an ash conveying portion located below said shield and extending from said combustion chamber and entirely through the ash outlet in the rear wall.

1,453,342. ANIMAL TRAP. THOMAS J. ELLISON, Richmond, Ky. Filed Nov. 1, 1922. Serial No. 596,416. 5 Claims. (Cl. 43—67.)

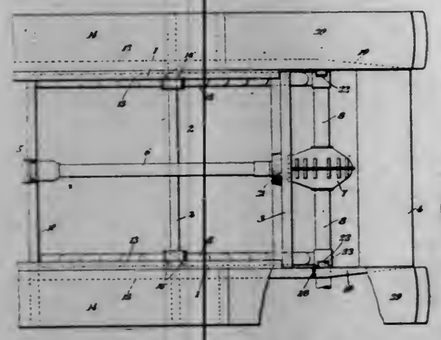


1. An animal trap comprising an enclosure having separate entrance compartments and a victim-receiving chamber, entrance gates for the entrance compartments, a pivoted beam to the ends of which the gates are connected for alternate operation, a tiltable victim-actuated member in each entrance compartment and having an operative connection with the aforesaid pivoted beam, a passageway leading from the entrance compartments to the victim-receiving chamber, and means for preventing the return of the animal from said chamber to the entrance compartments.

1,453,343. WELDED JOINT. JOSEPH W. FAY, Milwaukee, Wis., assignor to Fred Pabst Company, a Corporation of Wisconsin. Filed Dec. 19, 1921. Serial No. 523,586. 1 Claim. (Cl. 219—16.)

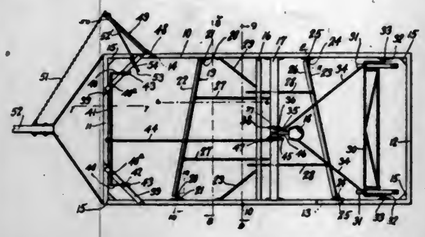
The herein described method of joining sheet metal parts which comprises positioning the edges of the sheet

metal upon the face of a backing bar having relatively low spacing projections, directing an arc against the face of the bar between the projections to fuse the edges of



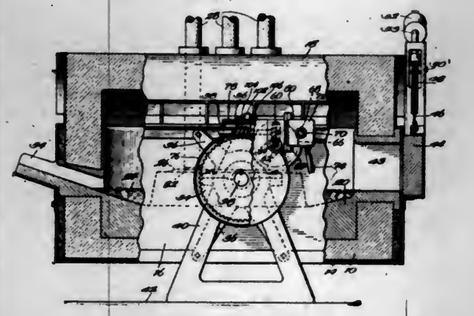
the sheet metal and the projections, to unite the sheet metal to the backing bar and to fill the groove between the edges of the sheet metal with additional metal.

1,453,344. AUTOMOBILE BODY MOTION STABILIZER. THOMAS J. FAY, Brooklyn, N. Y. Filed Dec. 4, 1919. Serial No. 342,332. 15 Claims. (Cl. 188—130.)



1. In a vibration absorber for vehicles having an axle and a chassis frame, the combination of a drum rigidly carried by the axle, a friction band extending substantially around the periphery of the drum, a connection between the band and chassis frame for oscillating the band around the drum as the frame oscillates toward and from the axle, a device connected to the band for tightening and loosening the same, and means connecting the device to the frame.

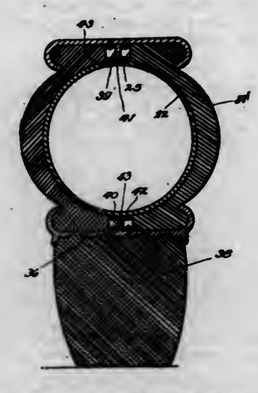
1,453,345. VEHICLE. JOSEPH B. FERGUSON, Newark, N. J. Filed Jan. 9, 1920. Serial No. 350,402. 34 Claims. (Cl. 280—106.5.)



1. In a vehicle an axle, a frame resiliently supported from said axle, means on said frame normally out of contact with said axle for supporting said axle against shocks in a plane substantially parallel with the direction of motion of said vehicle, and rigid means connected to said frame for holding said axle and said last named means normally out of contact.

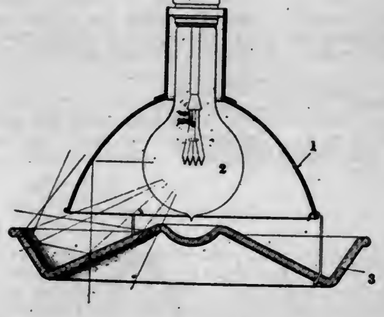
1,453,346. ROAD LEVELER. WILLIAM E. GADDIS, McCune, Kans., assignor of one-third to Hancle L. Stewart, McCune, Kans. Filed July 23, 1921. Serial No. 487,065. 2 Claims. (Cl. 37—143.)

1. A device of the character described comprising an elongated rectangular frame, a draft tongue connected therewith, transverse scraper blades mounted therein, an auxiliary mold board and blade pivotally mounted at one side of the main frame and extending laterally therefrom, a flexible member connected with the free end of said auxiliary mold board and with said draft tongue, a rod pivotally connected with the free end of said mold board, and a lever pivotally connected with said rod and movable over a notched segment whereby to hold said auxiliary mold board in a downwardly inclined direction for scraping a ditch beside a roadway.



1,453,347. ELECTRIC FURNACE. ALFRED W. GREGG, Chicago, Ill., assignor to Whiting Corporation, Harvey, Ill., a Corporation of Illinois. Filed July 11, 1921. Serial No. 483,653. 3 Claims. (Cl. 204—64.)

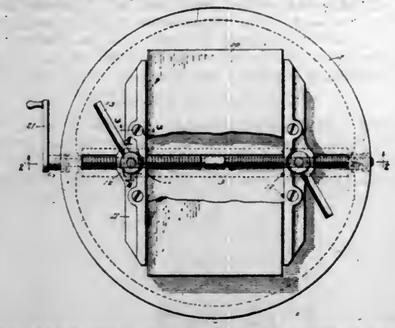
1. A metal receiving furnace box provided with doors thru which material may be placed at one end, a pouring spout at the other end, means for leading electric current into the furnace to effect melting of material placed therein, trunnions extending from opposite sides of the furnace, intermediate of said spout and said doors, journal supports for the trunnions, an electric motor mechanism supported by a trunnion for rocking the furnace on the trunnions and expansion permitting means on the support preventing rotation of the motor about the trunnion axis.



1,453,348. PUNCTUREPROOF PNEUMATIC TIRE. ROBERT GRIEVE and JOHN W. FLADING, Lansing, Mich. Filed May 8, 1922. Serial No. 559,371. 5 Claims. (Cl. 152—33.)

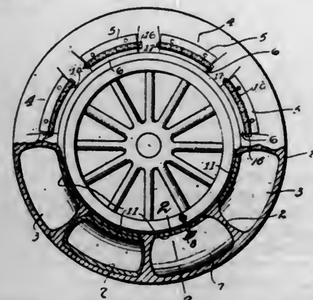
1. In a tire construction, an inner and an outer metallic rim, opposing flanges on said rims, a casing divided along the central radial plane of the tire defining annular abutting edges and adapted to enclose a pneumatic tube, an annular filled piece inserted between said abutting edges and said flanges having curved edges adapted to engage correspondingly shaped recesses provided along

the adjacent portions of said casing, said filler piece having H-shaped cross section and means securing said inner metallic rim to a wheel felloe.



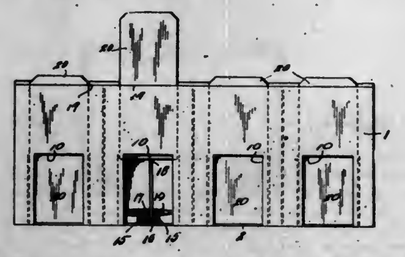
1,453,349. LIGHTING FIXTURE. EDWIN F. GUTH, St. Louis, Mo. Filed May 29, 1920. Serial No. 385,360. 2 Claims. (Cl. 240—78.)

1. In a lighting fixture, the combination with a source of light of a reflector enclosing said source and opening downwardly, a light reflecting and diffusing member positioned beneath and spaced from the reflector opening and of greater diameter than said opening, said diffusing member having its central portion cone-shaped and its outer portion in the form of an upwardly inclined flange.



1,453,350. CLAMPING MECHANISM. HORACE W. HACKER, Chicago, Ill. Filed June 13, 1921. Serial No. 477,337. 4 Claims. (Cl. 90—60.)

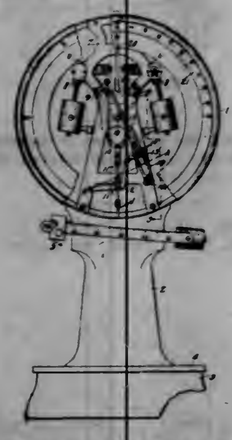
1. In a clamping device, the combination with a bed formed with an elongated slot therein; of a shaft journaled upon said bed and beneath said slot along which the shaft extends; two blocks in threaded connection with said shaft, the threads in one block and the portion of the shaft engaging this block being opposite in direction to the threads in the other block and the portion of the shaft engaging this latter block, said blocks crossing and extending beyond said slot and underlying the bed; clamping jaws movable by said blocks along the slot, and movable up and down with reference thereto;



screw devices upon the blocks and in depressing engagement with the jaws; and springs between the jaws and bed for elevating the jaws.

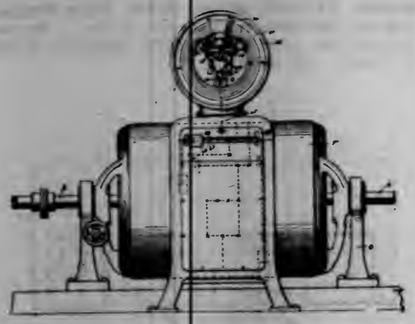
1,453,351. TIRE. HARRY R. HAUPT, St. Louis, Mo. Filed May 24, 1920. Serial No. 383,730. 1 Claim. (Cl. 152—22.)

A tire comprising a shoe of the clincher-type having the interior partitioned off into separate semi-cylindrical compartments, an inflatable inner tube in each compartment, and filler means of separate sections removably positioned between the clincher beads of the shoe for supporting the tubes of the compartments, each of said sections having a concaved face disposed to form a smooth continuance of the inner curved walls of the shoe whereby each compartment is rendered substantially circular in cross section to prevent pinching or chafing of the inner tube.



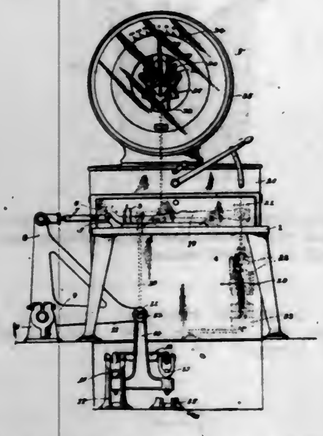
1,453,352. RAT AND MOUSE TRAP. JAMES HECKMAN, Electra, Tex., assignor of one-half to Sam L. Bargsley, Electra, Tex. Filed May 17, 1922. Serial No. 561,650. 2 Claims. (Cl. 43—61.)

2. In a rat and mouse trap having a plurality of trap chambers, independent covers to said chambers, the roof



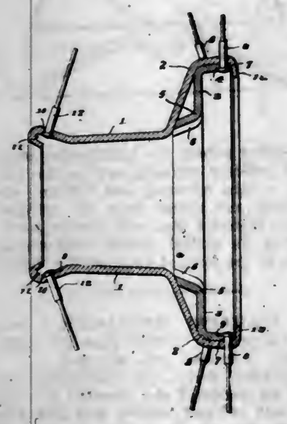
portion of the trap including a central partition crimped in S-shape to form guideways for two independent covers, slots in the roof of the trap, vertically slidable doors mounted in said slots, triggers arranged to hold said doors normally in raised position and to release and drop the doors upon receiving the weight of an animal, substantially as described and shown.

1,453,353. WEIGHING SCALE. HALVOR O. HEM, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed Dec. 21, 1916. Serial No. 138,198. 13 Claims. (Cl. 265—37.)



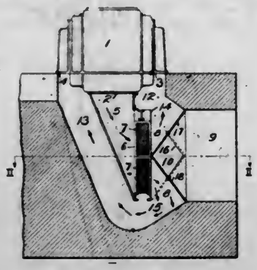
1. In a weighing scale, the combination of a platform, a pendulum fulcrumed upon fixed bearings and having one arm connected with the platform so as to be rocked downwardly upon imposition of a load upon the platform, indicating mechanism, a supplemental lever arranged between and connected with both the pendulum and the indicating mechanism, the pivot and connection with the pendulum of one arm of said lever being arranged in parallelogrammatic relation with the pivots of said pendulum arm, and the other arm of the lever being of variable length between the pivot and the point of connection with the indicating mechanism and arranged to impart increased uniform movement to the indicating mechanism when the pendulum is rocked.

1,453,354. DYNAMOMETER. HALVOR O. HEM, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed Aug. 15, 1918. Serial No. 249,969. 13 Claims. (Cl. 265—24.)



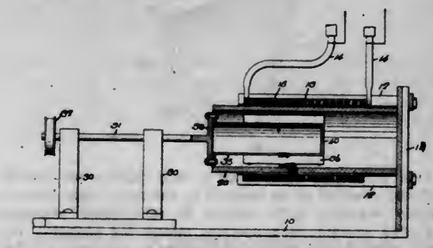
1. In a dynamometer, a torque resisting element, an indicating attachment employing a dial, an indicating hand swinging thereover, a pendulum arranged to counterbalance the force exerted by the machine to be tested, a main lever connected with the pendulum, a graduated beam and poise mounted on said lever, and a series of interconnected levers arranged between the main lever and the torque resisting element.

1,453,355. WIREDRAWING SCALE. HALVOR O. HEM, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed Feb. 25, 1920. Serial No. 361,249. 15 Claims. (Cl. 205—16.)



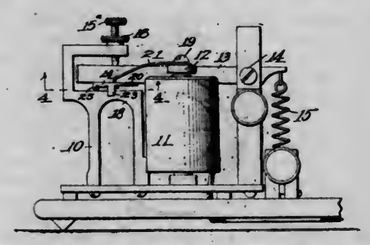
1. In wire drawing apparatus, a movable member adapted to engage a wire being drawn, and a force measuring instrument operatively connected to said member to indicate the force exerted in moving said member.

1,453,356. WHEEL. HENRY A. HOUSE, Jr., Buffalo, N. Y., assignor to Wire Wheel Corporation of America, Buffalo, N. Y., a Corporation of New York. Filed Sept. 24, 1919. Serial No. 325,852. 2 Claims. (Cl. 301—9.)



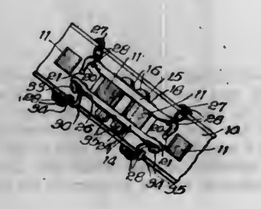
1. The combination with a hub shell, of an annular member, of Z form in cross section, inserted in the inner end of said shell, one bend of said member being provided with a driving surface, and spokes laced through the other bend of said member and the hub shell.

1,453,357. SYSTEM OF VENTILATION. JOHN ERNEST JOLLEY, Stretford, Manchester, England, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 6, 1920. Serial No. 415,065. 8 Claims. (Cl. 171—252.)



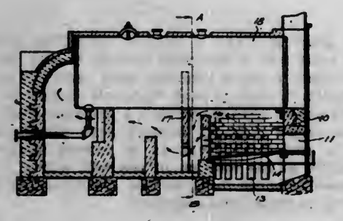
1. A cooling system for an electrical apparatus comprising a casing, a plurality of passages communicating therewith through which air is adapted to be circulated, a cooling device disposed in the path of the air circulated through said passages and means for selectively including said cooling device in a closed circulation of air through said casing and for preventing the air passing through said cooling device from circulating through said casing.

1,453,358. PROCESS OF JOINING METALS. CHARLES F. KETTERING, Dayton, Ohio, assignor to General Motors Research Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Dec. 15, 1920. Serial No. 430,841. 10 Claims. (Cl. 219—12.)



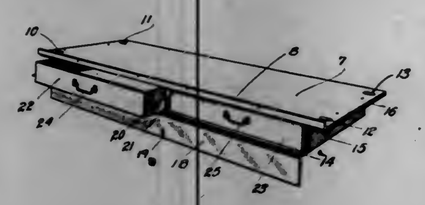
1. The process of joining metals which comprises placing the metals in proper relative position together with suitable bonding materials and heating the assembly by generation of heat within the body of one or more of the metals.

1,453,359. TELEGRAPH SOUNDER. JOHN H. KINSLEY, Clinton, Mass. Filed Mar. 27, 1920. Serial No. 369,299. 5 Claims. (Cl. 178—98.)



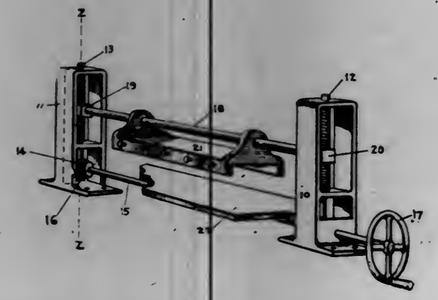
1. In a telegraph sounder, a frame, an armature, a lever pivoted to said frame, adjusting means effective to determine the normal range of movement of said lever, and an additional adjusting device effective to determine for said lever a relatively long or a relatively short stroke independent of said normal adjusting means, said device having two separate engaging portions and being selectively movable to either one of two definite operative positions in each of which one engaging portion only is effective to determine the length of stroke.

1,453,360. ANTISKID DEVICE FOR VEHICLES. WILLIAM H. KRUG, Oshkosh, Wis. Filed Jan. 31, 1919. Serial No. 274,163. 11 Claims. (Cl. 152—14.)



1. The combination with a vehicle wheel of means for securing an anti-skid chain thereto, comprising a pair of bars, means for clamping said bars upon opposite sides of a pair of adjacent spokes, comprising means for securing said bars to spokes spaced various distances apart, one of said bars having an offset end portion provided with a key-hole slot, the other one of said bars having a shank extending toward said other bar and provided with a crosshead, a chain having a link at one end for manipulation over said crosshead, and a coupling member at the other end of said chain, comprising a head adapted to be manipulated through said key-hole slot, the length of said chain being such as to prevent said link from becoming detached from said shank without first uncoupling said coupling member from said last-named clamping bar.

1,453,361. FURNACE. WILLIAM J. LAWRENCE, Toledo, Ohio. Filed Feb. 19, 1920. Serial No. 360,008. 3 Claims. (Cl. 110—75.)



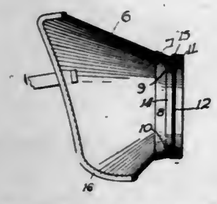
1. In a furnace, the combination of a combustion chamber, a grate therefor, the side walls of said chamber being formed with air passages extending from beneath the grate and opening into the combustion chamber above the grate, dampers controlling said passages, a fuel door, means operated by the closing of said door to open said dampers, and automatic means to effect a gradual movement of the dampers toward closed position.

1,453,362. TOOL-BOX ATTACHMENT FOR MOTOR VEHICLES. EMMETT O. LOVELAND, Kansas City, Mo. Filed Mar. 24, 1922. Serial No. 546,292. 5 Claims. (Cl. 224—29.)

4. The combination with the running board of a motor vehicle, of a tool box secured to the underside thereof and having an opening at its outer edge, a transverse partition in the tool box having a laterally projecting portion, and a door hinged to the edge of the opening and having an opening through which the projection may pass, the projection having an opening for the hasp of a padlock.

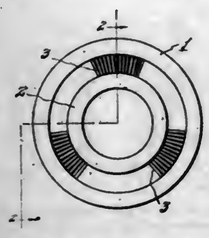
1,453,363. PRINTING PRESS. HARRY B. MCBEE, St. Louis, Mo., assignor to McBee Binder Company, Athens, Ohio. Filed Sept. 26, 1921. Serial No. 503,317. 1 Claim. (Cl. 101—316.)

In a printing press, a pair of companion standards spaced apart and a bed plate secured to and extending beyond same; a screw threaded shaft vertically mounted for rotation in each of said standards; means to rotate the said shafts simultaneously; a carrying shaft for a make-up frame mounted between said screw threaded shafts in such manner as to be carried upwardly or downwardly of the rotation of the said shafts; a make-up frame depending from the last mentioned shaft, substantially as shown and described.



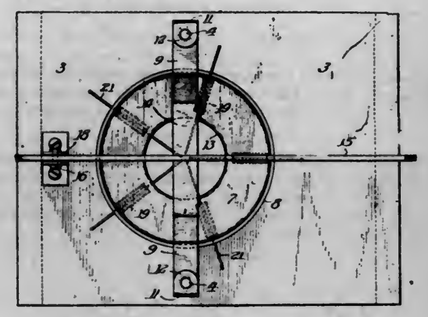
1,453,364. DOOR BUFFER. HERMAN C. MAISE, Springfield, Mass., assignor, by mesne assignments, to Edward G. Budd Manufacturing Company, a Corporation of Pennsylvania. Filed June 21, 1916. Serial No. 104,899. 2 Claims. (Cl. 16—86.)

1. A device of the character described comprising a substantially U-shaped metallic casing having inner and outer walls and an integral base connecting said walls, a resilient pad positioned between the inner and outer walls and seating on said base, the outer wall being of less length than said pad and the pad presenting a semi-



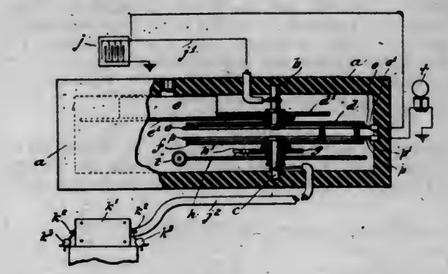
circular portion projecting beyond said outer wall, and means for retaining said pad in the casing.

1,453,365. RESPIRATOR. ROBERT MALCOM, Chicago, Ill. Filed Dec. 15, 1920. Serial No. 430,865. 3 Claims. (Cl. 128—146.)



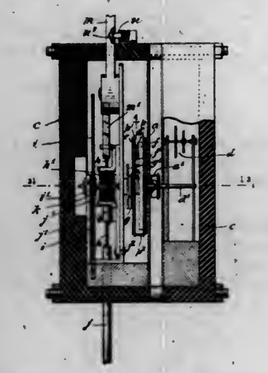
1. A respirator comprising a body portion of flexible material adapted to be secured to the face, rings concentrically arranged with respect to each other engaging one edge of said body portion, means for engaging the inner edge of said rings and forming a shoulder, a filter member, and a retaining member engaging said means and holding said filter in place.

1,453,366. METHOD OF MANUFACTURE OF ANTI-FRICTION BEARINGS. HUGH M. ROCKWELL, Bristol, Conn., assignor, by mesne assignments, to Standard Steel and Bearings Incorporated, Wilmington, Del., a Corporation of Delaware. Filed Apr. 10, 1920. Serial No. 372,898. 5 Claims. (Cl. 51—278.)



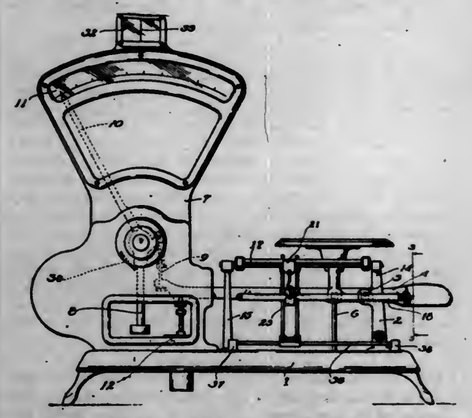
1. The steps in the manufacture of antifriction bearings which consist in assembling the race members in normal relation and in arranging the race members thereof in assembled relation by the insertion between said race members of resilient spacing members and simultaneously grinding the opposite faces of the race members.

1,453,367. PIE CUTTER. CHARLES J. SCHIPPLOCK and JACOB C. KESSLER, Chicago, Ill. Filed Mar. 10, 1921. Serial No. 451,107. 1 Claim. (Cl. 146—7.)



In a pie cutter, the combination with a base, of a pair of vertical standards projecting upwardly from said base, a slidable head mounted on said standards, said head including a horizontally disposed disk, radial knife holders carried by said disk, knives detachably supported by said holders and projecting toward said base, springs surrounding the standards and normally urging said disk upwardly, an upright disposed at one side of the disk, a handle pivoted to said upright, and a yoke carried by said disk and projecting thereabove adapted to be engaged by said handle to lower the disk against the tension of said coil springs.

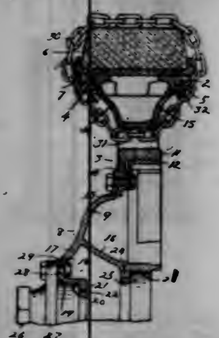
1,453,368. SPEED REGULATOR FOR AUTOMOBILES. FREDERICK W. TEVES, East Elmhurst, N. Y., assignor of one-half to Arthur Hazen Green, New York, N. Y. Filed Jan. 25, 1922. Serial No. 531,564. 15 Claims. (Cl. 175—355.)



1. A speed regulator for automobiles embodying therein a constant speed member, means whereby said member is actuated, a variable speed member, means whereby said variable speed member is normally actuated in unison with said constant speed member, but may be actuated independently thereof when its speed exceeds that of said constant speed member, means operatively connected with the running gear of an automobile, normally inoperative connections between said means and said variable speed member, whereby said member may be actuated at a speed greater than, and independently of, said constant speed member, and co-operating electrical contacts carried by said members respectively, whereby when said members are actuated in unison, the circuit to the ignition system of an internal combustion engine is closed, and is interrupted when said variable speed member is actuated independently of, and at a speed greater than, said constant speed member.

1,453,369. SPEED REGULATOR FOR AUTOMOBILES. FREDERICK W. TEVES, East Elmhurst, N. Y., assignor one-half to Arthur Hazen Green, New York, N. Y. Filed Mar. 4, 1922. Serial No. 541,131. 10 Claims. (Cl. 175—353.)

1. A speed regulator for automobiles embodying therein a constant speed member, a variable speed member, mechanical and electrical connections between said members, whereby said variable speed member may be driven by said constant speed member, and the circuit to an ignition system is controlled, a plurality of differentially operative actuating means, connections between said actuating means respectively and said variable speed member, said connections permitting movement of said member independently of said actuating means, and means operatively connected with the running gear of a vehicle and capable of being selectively engaged with said actuating means to cause a change in the speed ratio between said variable speed member and the running gear of a vehicle.



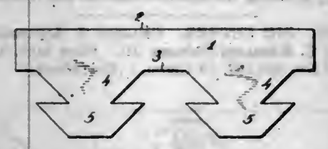
1,453,370. WEIGHING SCALE. EDWARD G. THOMAS, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed Feb. 7, 1921. Serial No. 443,026. 9 Claims. (Cl. 265—32.)

1. In a weighing scale, in combination, a pivoted member, means for variably resisting movement of said member whereby it is caused to assume different posi-

tions corresponding respectively to the weights of various loads on the scale, a second movable member, means for connecting said second movable member to said pivoted member, whereby said second movable member is caused to move to positions corresponding to the weights of such loads multiplied by selected prices per pound, a chart carried by said second movable member, and means for projecting a magnified indication from said chart.

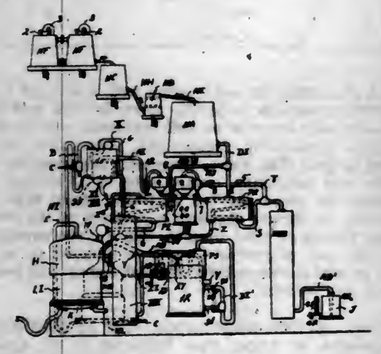
1,453,371. VEHICLE WHEEL. ELMER F. WATERBOR, Detroit, Mich., assignor to Michigan Malleable Iron Company, Detroit, Mich., a Corporation of Michigan. Filed Feb. 8, 1919. Serial No. 275,704. 2 Claims. (Cl. 301—65.)

1. In a vehicle wheel, the combination with a hub, of a web extending from said hub, said web being fashioned to engage one side of a gear ring, an annular flange extending from said web and surrounding said gear ring, spaced bearings for supporting a tire rim, and connections between said bearings and flange.



1,453,372. CONVERTIBLE AUTOMOBILE BODY. GATT H. WONG, Chicago, Ill. Filed Oct. 8, 1921. Serial No. 506,331. 2 Claims. (Cl. 155—7.)

1. In a convertible automobile body of the character described, front and rear seats having seat-cushions and back-rests, the seat-cushions and back-rests being readily adjustable into horizontal alignment so as to form a bed, means whereby the front seat-cushion may be raised from an angular to a horizontal position, a slidably pivotal hinge mounted at each end of the front back-rest whereby said back-rest may be tilted backwardly into horizontal alignment with the seat-cushion and slid into abutment, therewith, means whereby the rear seat-cushion may be slid forwardly and supported in horizontal alignment with the front back-rest, and a slidably pivotal hinge mounted at each end of the rear seat back-rest whereby the bottom of the rear back-rest may be drawn forwardly to the rear seat-cushion and the top of the back-rest dropped downwardly.



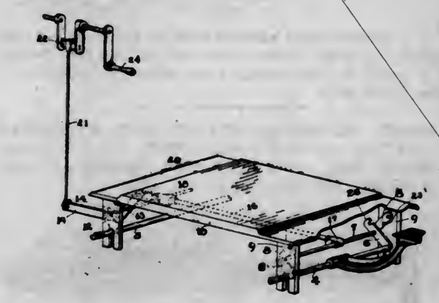
1,453,373. SHINGLE STRIP. HERBERT ABRAHAM, New York, N. Y., assignor to The Ruberoid Company, a Corporation of New Jersey. Filed Aug. 5, 1921. Serial No. 489,971. 6 Claims. (Cl. 108—7.)

1. A prepared roofing strip having its lower edge formed with alternating projections and recesses, each projection consisting of two mutually similar symmetrical portions, the projections and recesses being substantially similar in size and shape but reversed in position, the

ends of the strip being so shaped that when two of said strips are laid end to end, the contiguous ends form a recess which is similar to the first-mentioned recesses.

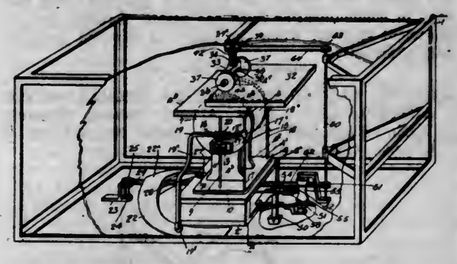
1,453,374. PROCESS AND APPARATUS FOR THE MANUFACTURE OF NONPOTABLE ALCOHOLIC LIQUID. FRANCISCO DE MOURA ACCIOLY, Rio de Janeiro, Brazil. Filed Oct. 20, 1922. Serial No. 595,855. 2 Claims. (Cl. 195—6.)

1. A process for the production of nonpotable alcoholic liquid, said process comprising mixing an alcohol-containing substance with acids and neutral tartrate of potash; mixing with the liquor thus produced a further preparation including saccharine juices, tar, naphthaline and acid; distilling the mixture to obtain alcohol; adding to the alcohol thus produced an enriching mixture including sulphuric ether, naphtha, oils, muriatic acid, tar and naphthaline; and distilling the enriched mixture.



1,453,375. MAUSOLEUM. WILLIAM H. ALLEN, Cleveland, Ohio. Filed Feb. 13, 1922. Serial No. 536,180. 3 Claims. (Cl. 72—7.)

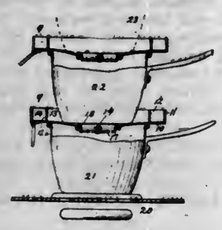
1. In a mausoleum building having a wall, a second wall which extends substantially parallel with the first



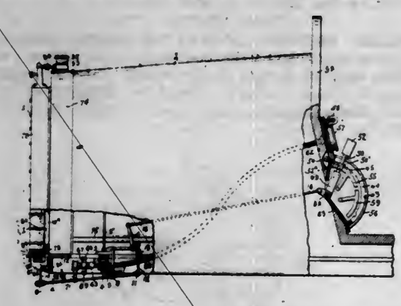
wall, said second wall having as a part thereof metallic horizontally extending members forming a plurality of rectangular spaces, a plurality of metallic containers one end of each container occupying a rectangular space between adjacent vertical and horizontally extending members the opposite end of said container being supported adjacent the first mentioned wall, and a door for said container.

1,453,376. SCALE-PLATFORM LIFTING MECHANISM. HARRY S. BERGEN, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed Feb. 25, 1920. Serial No. 361,158. 5 Claims. (Cl. 265—72.)

1. In a device of the class described, in combination, a weighing scale including a base, an upright portion and a platform, and platform lifting means including a handle supported by said upright portion and a pedal supported by said base.



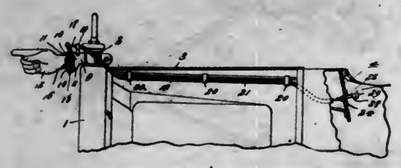
1,453,377. MAP-DRAWING MACHINE. HENRY COVERLEY CAMPBELL, New York, N. Y. Filed Mar. 2, 1921. Serial No. 450,166. 2 Claims. (Cl. 234—8.)



1. In a map drawing machine, the combination with the driving gear and steering gear of an automobile, of a pair of suitably mounted vertically set gears, a drawing board resiliently held in contact with the peripheries of said gears, a pencil point resiliently held against the board, a friction pinion held in engagement with the face of each of said gears, means for driving said pinions operated from the driving mechanism of the vehicle, and means for moving said pinions radially of the gears in opposite directions operated from the steering mechanism of the vehicle.

1,453,378. STEAM RING. SANNA CLIFFORD, Ossining, N. Y. Filed Apr. 1, 1922. Serial No. 548,788. 4 Claims. (Cl. 53—1.)

1. A device for use in connection with cooking vessels comprising a base plate provided with a central aperture and adapted to rest as a closure on the top of a lower vessel, and a pair of spaced flanges projecting above said base plate, the inner of said flanges being disposed in spaced relation with the aperture of said base plate and forming therewith a central chamber for the support of an upper cooking vessel and also forming with the outer flange an outer rim chamber adapted to utilize the escaping heat and serve as a heating compartment.

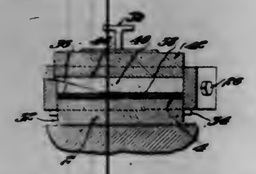


1,453,379. MANUAL OPERATING MEANS FOR AUTOMATIC TEMPERATURE-CONTROL SYSTEMS. HARRIS SHAUL COY, Anderson, Ind. Filed Mar. 5, 1918. Serial No. 220,583. 2 Claims. (Cl. 236—35.)

1. In a motor driven vehicle including a radiator, a plurality of air current controlling blades associated with said radiator, a movable member operatively coupled to said air current controlling blades, a casing including a segmental portion and having segmentally arranged ratchet teeth, a member swinging within said casing and having a longitudinal socket, coupling means between said swinging member and said blade engaging member, a rod slidably engaging in the socket of said swinging member and having a pawl device carried by said rod and engaging said ratchet teeth, a spring within the socket of said swinging member and operating to hold the pawl in yieldable engagement with the ratchet teeth, and a handle member having a reduced portion to engage the socket of said swinging member.

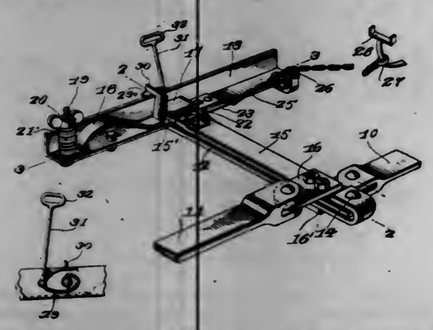
1,453,380. VEHICLE SIGNAL. THOMAS A. CROTTY, Danbury, Conn. Filed Oct. 21, 1922. Serial No. 595,910. 1 Claim. (Cl. 116—46.)

In a signal for motor vehicles, a clamp secured to the water filling spout of the vehicle, and having a forwardly projecting arm formed thereon, an indicating hand pivotally secured to the arm of the clamp by a vertically extending bolt member having a cranked upper portion, a flexible wire secured at one end to the crank portion of



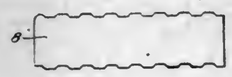
the bolt and secured at its opposite end to an operating rod for the indicating hand, the said rod adapted to extend through a plate secured to the instrument board of the vehicle and having a forwardly projecting sleeve portion received within an opening in the instrument board, spaced notches formed upon the operating rod and adapted for selective engagement with a transversely extending lip formed upon the said plate for retaining the indicating arm in certain set positions.

1,453,381. MACHINE FOR MAKING TILES. DOMINICK D'ALESSANDRO and RAFFAELE PACE, Quincy, Mass.; said Pace assignor to said D'Alessandro. Filed Mar. 1, 1921. Serial No. 448,900. 2 Claims. (Cl. 25—42.)



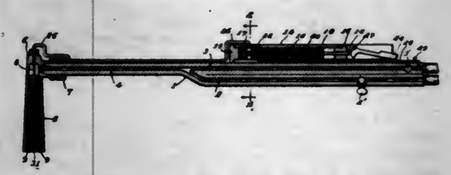
1. The combination with a mold having bottom and side walls, of a pattern adapted to rest upon the bottom wall of the mold, a portion of the pattern being adapted to contact with a side wall to maintain the pattern properly positioned within the mold, and the pattern having a bar spaced from the bottom wall of the mold connecting the pattern to said portion.

1,453,382. METHOD OF MAKING TILES. DOMINICK D'ALESSANDRO and RAFFAELE PACE, Quincy, Mass.; said Pace assignor to said D'Alessandro. Original application filed Mar. 1, 1921. Serial No. 448,900. Divided and this application filed Nov. 3, 1922. Serial No. 598,720. 5 Claims. (Cl. 18—61.)



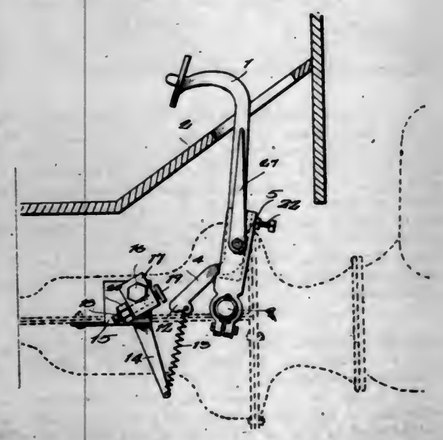
1. The method of making tiles that comprises successively positioning a pattern upon the bottom wall of a mold, pouring a film-like surface layer of differently colored liquid cements upon the bottom wall between the walls of the pattern, removing the pattern to permit the differently colored liquid cements to flow towards each other and form sharp dividing lines of demarcation, introducing a layer of granular cement over the liquid cement and subjecting the whole to pressure.

1,453,383. TRACTOR HITCH. FRED P. DEDERING, Kiel, Wis. Filed Jan. 14, 1922. Serial No. 529,262. 3 Claims. (Cl. 180—14.)



1. A hitching device for a tractor including a beam, a bar movably mounted on the beam, a means on the beam and normally contracted by the movable bar for holding the bar against movement under normal pulling strains but releasable by said bar under excessive strains, and means connected with the movable bar and with the clutch pedal of the tractor for moving the pedal to throw out the clutch.

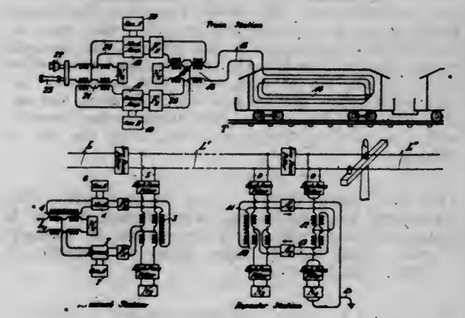
1,453,384. METHOD OF MAKING PRINTING-PLATE BLANKS AND PRODUCT THEREOF. JOSEPH S. DUNCAN, Chicago, Ill. Filed Mar. 13, 1922. Serial No. 543,161. 12 Claims. (Cl. 101—369.)



1. A printing plate blank of uniform thickness and consisting of a strip having projections on one face thereof of a height to compensate for any deficiency in the thickness of the strip.

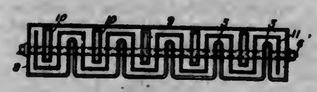
1,453,385. COMBINED OXYGEN AND ACETYLENE CUTTING AND WELDING TORCH. PAUL DZUTSOFF, Seattle, Wash. Filed July 5, 1922. Serial No. 572,844. 4 Claims. (Cl. 158—27.4.)

1. The combination with a blow pipe, of a gas-controlled valve comprising a chamber, a piston movable therein a piston rod connected with said piston, a conduit leading from the chamber to the nozzle of the blow pipe, a supply conduit, a chambered abutment to which said supply conduit connects and through which the piston rod passes, said piston rod having a gas-conducting passage in communication with the piston chamber and the abutment chamber when the piston is removed from the said abutment.



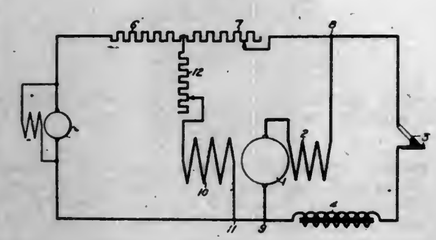
1,453,386. CLUTCH CONTROLLING MECHANISM FOR AUTOMOBILES. JOHN ALBERT EWELL, Quinault, Wash. Filed Sept. 28, 1922. Serial No. 591,123. 5 Claims. (Cl. 74—81.)

1. In combination with a clutch, a lever for directly controlling the clutch provided with a longitudinal slot,



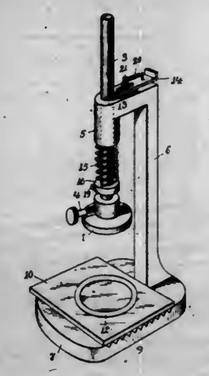
a foot pedal in the form of a bell crank lever pivotally mounted in the slot with a vertical arm of the bell crank lever having one end seated in the slot, the second arm projecting outwardly from the slot, a set screw projecting into the slot and engageable with the vertical arm to limit movement of said arm in the slot, a bracket spaced from and mounted in a fixed position relative to the second arm, a spring connecting the bracket with the free end of the second arm, a set screw adjustable in the bracket and having a head adjacent the free end of the second arm, the free end of the second arm having a rounded portion adapted to engage the head of the last mentioned set screw when the foot pedal is operated whereby the slotted lever will be oscillated at a slower rate of speed than the foot pedal during certain periods of oscillation of said foot pedal.

1,453,387. SYSTEM FOR COMMUNICATING WITH MOVING VEHICLES. LLOYD ESPENSCHIED, Hollis, and HERMAN A. AFFEL, Brooklyn, N. Y., assignors to American Telephone and Telegraph Company, a Corporation of New York. Filed Sept. 30, 1919. Serial No. 327,398. 6 Claims. (Cl. 179—82.)



1. In a system of communication the combination of a transmission line arranged for the transmission of high frequency carrier currents having signal variations imposed thereon, and a transportation device moving in the vicinity of said transmission line, said transporatation device including apparatus wherein may be produced high frequency carrier currents by induction from the high frequency carrier currents transmitted over said transmission line, means in said transportation device for receiving the carrier currents induced in said apparatus, said means comprising a vacuum tube amplifier demodulator and a telephone receiver, and means in said transportation device for transmitting carrier currents to said apparatus; said means comprising a vacuum tube amplifier modulator and a telephone transmitter.

1,453,388. ELECTROLYTIC CONDENSER. CHARLES LE G. FORTESCUE, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Nov. 3, 1919. Serial No. 335,426. 4 Claims. (Cl. 175—315.)

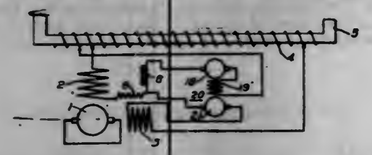


1. An electrolytic cell comprising a casing formed with curved side walls and upwardly extending, tubular bottom portions, an electrolyte disposed therein, a plurality of film-forming electrodes of corresponding shape immersed in the electrolyte and disposed in spaced relation with respect to each other and to the casing and means for maintaining the electrodes in position.

1,453,389. ARC-WELDING DYNAMO-ELECTRIC MACHINE. KLAUS L. HANSEN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 25, 1919. Serial No. 326,294. 7 Claims. (Cl. 171—223.)

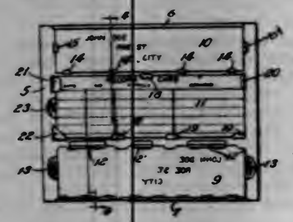
1. In an arc welding system comprising a plurality of electrodes, a generator connected thereto, an independent source of electric current, a field winding connected in series with the generator, another field winding so connected to the independent source of current as to oppose the action of the field winding connected in series with the generator, a resistor connected to the independent source of current and to the generator, and another resistor connected to the source of current and in series with the field winding connected thereto.

1,453,390. SPLASH COUNTERDROP PRESS. HAROLD HELLBERG, Somerville, Mass. Filed Aug. 26, 1921. Serial No. 495,463. 2 Claims. (Cl. 76—4.)



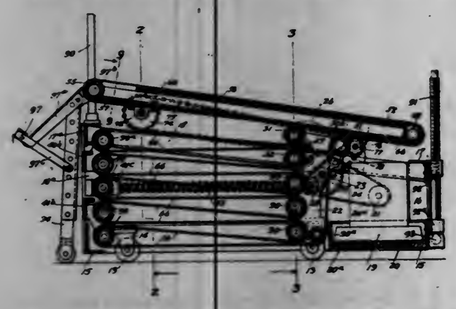
1. A die forming mechanism comprising a base having a horizontal supporting surface, a standard, a spindle slidably supported by said standard to descend vertically toward said surface and having means at its lower end for carrying a die member, and a wire ring removably supported upon said surface and loosely fitting the periphery of said die member.

1,453,391. ALTERNATING-CURRENT COMMUTATOR GENERATOR. RUDOLF E. HELLMUND, Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 10, 1918. Serial No. 249,332. 5 Claims. (Cl. 172—276.)



1. The combination with a dynamo-electric machine of the commutator type having exciting and inducing

field windings adapted to carry currents of a given frequency, of means associated with said exciting field



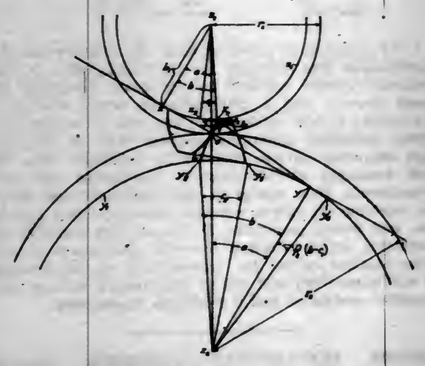
winding constituting substantially a negative resistance for relatively low-frequency currents only.

1,453,392. PRINTING DEVICE. JAMES P. JACKSON, Chicago, Ill., assignor to Addressograph Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 17, 1922. Serial No. 553,481. 5 Claims. (Cl. 101—369.)

1. A printing device comprising a frame, a card, devices on the frame to engage the card at the ends thereof and spaced from each other a distance greater than the length of the card to permit endwise movement of the card, and a stop arranged to engage one end of the card to hold it against endwise movement and beneath said devices.

1,453,393. PORTABLE EXTENSIBLE CONVEYER. JAMES JESSEN, Minneapolis, Minn. Filed May 14, 1920. Serial No. 381,410. 14 Claims. (Cl. 198—8.)

1. An extensible and contractible conveyer comprising a main frame, a telescoping conveyer frame mounted on said main frame, an endless belt operating over said conveyer frame, movable pulleys, over which said belt travels, mounted on said main frame, said pulleys moving a linear distance inversely proportional to the number of moving pulleys and the distance said conveyer frame travels when telescoped to maintain an even tension of said belt.



14. In an extensible and contractible conveyer, the combination with a main frame and an outer supporting conveyer frame section pivotally connected to said main frame, of inner and intermediate conveyer frame sections telescopingly connected to said supporting conveyer frame section, forward and rear stops arranged in said conveyer frame sections to limit the telescoping movement of said inner and intermediate frame sections, geared means actuating to extend said conveyer frame sections and means for successively locking said inner and intermediate frame sections together, and causing said geared means to successively actuate said inner and intermediate conveyer frame sections when said conveyer frame sections are extended.

1,453,394. VENTILATING INSOLE. JOSEPH KLEPAC, New York, N. Y. Filed Feb. 10, 1921. Serial No. 443,886. 9 Claims. (Cl. 36—3.)

3. An independent shoe insole comprising superposed spaced layers secured together at their edges, said insole having inlet openings at one end and exit openings at the other end, and means operable upon compression of the layers toward each other and subsequent release to inspirate through one set of openings and expirate through the other, said insole being movable within the shoe and with the foot during the act of walking.

1,453,395. GEAR TOOTH. JOHN M. LABBERTON, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Nov. 6, 1919. Serial No. 336,069. 2 Claims. (Cl. 74—41.)

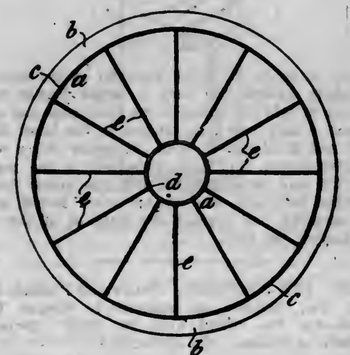
1. The method of determining the pressure angle of a pair of co-operating gear wheels having involute teeth, when the gear center distance, the gear ratio and the diametral pitch are known, which comprises the selection of a numerical value for the percentage of rolling action between co-operating teeth, which value is less than unity, calculating the values c_1 and c_2 in terms of b from the formulæ.

$$c_1 = \left[\frac{K(2+R)-1}{1+RK}\right]b$$

$$c_2 = \left[\frac{K\left(2+\frac{1}{R}\right)-1}{1+\frac{K}{R}}\right]b$$

wherein K represents the assumed numerical value of rolling action and R = gear ratio which is equal to

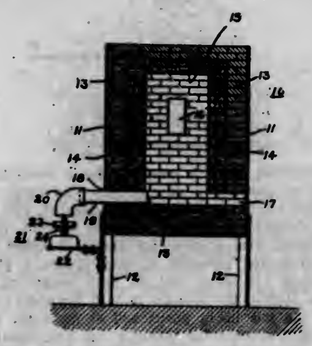
or less than unity, substituting the values of c_1 and c_2 in the formula



$$\frac{\pi}{g_T} = \frac{\cos a}{2}\left[\sqrt{(b+R(b-c_1))^2 - c_1^2}\right]$$

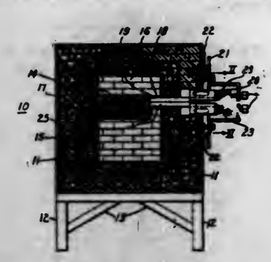
where

g_T = number of teeth in larger gear wheel,
b = tan a and
a = pressure angle



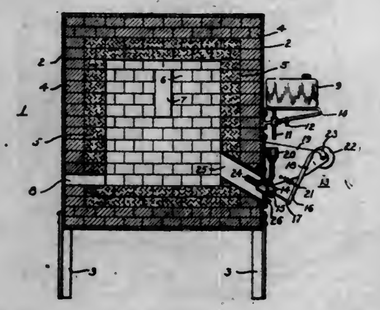
and then solving for a.

1,453,396. DART BOARD OR LIKE TARGET. EDWARD HENRY ALBERT LEGGATT, Woodford Green, England. Filed Jan. 29, 1923. Serial No. 615,652. 3 Claims. (Cl. 124—15.)



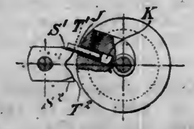
1. A dart board consisting of a plate, a metal frame fixed to the plate, and adapted to form compartments, and a filling of plastic material in the frame.

1,453,397. PROTECTION OF RESISTORS OF ELECTRIC FURNACES. GEORGE M. LITTLE, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 21, 1921. Serial No. 463,220. 1 Claim. (Cl. 204—64.)



In an electric furnace, the combination with a housing enclosing a furnace chamber and having an opening near the bottom of said chamber for introducing material to be heated, and a carbonaceous resistor located near the top of said chamber, of a source of hydrocarbon vapor comprising an oil flame, means for conducting the products of combustion of said flame into said chamber near the bottom thereof and means for varying the amount of hydrocarbon vapor produced by said flame.

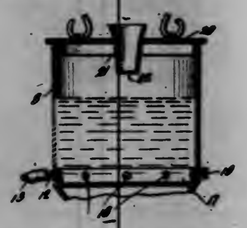
1,453,398. SELF-TIGHTENING WATER-COOLED TERMINAL. GEORGE M. LITTLE, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 21, 1921. Serial No. 463,221. 3 Claims. (Cl. 204—64.)



2. In an electric furnace, the combination with a resistor comprising a plurality of refractory elements, a terminal electrode operatively engaging said resistor, a wedging contact terminal mounted on the end of said electrode and resilient means for pressing said terminal, electrode, and resistor into close operative engagement, of auxiliary means for maintaining said resistor elements in operative position independent of said electrode, contact terminal and resilient means.

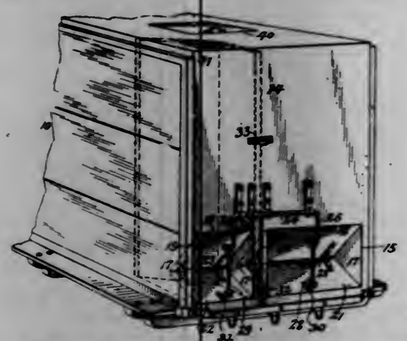
1,453,399. MEANS FOR PROTECTING RESISTORS IN ELECTRIC FURNACES. GEORGE M. LITTLE, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 25, 1921. Serial No. 464,290. 11 Claims. (Cl. 204—64.)

3. In an electric-resistance furnace, the combination with a furnace chamber and a carbonaceous resistor therein, of means for introducing a hydrocarbonaceous fluid into said chamber under pressure, said means comprising a cam-and-spring-operated plunger pump.



1,453,400. PULLEY. MARTIN LUBASH, Richmond Hill, N. Y., assignor of one-half to James Fitzsimmons, Baldwin, Long Island, N. Y. Filed May 17, 1920. Serial No. 381,857. 6 Claims. (Cl. 254—191.)

1. In a pulley, the combination with a sheave for a rope, and a clamping device normally ineffective to pre-

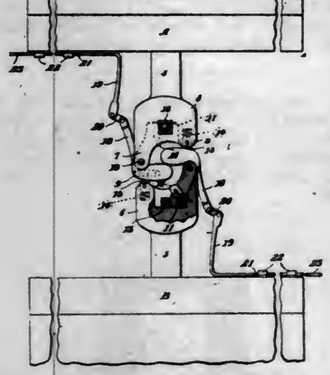


vent relatively slow movements of said rope over said sheave in either direction, of means rendered effective by an abnormal movement of said rope in one direction due to breakage, to cause said clamping device to clamp said rope and sheave and prevent further movement in the same direction.

1,453,401. PLANT WATERER. MARY W. MATTSON, Hansboro, N. Dak. Filed Nov. 20, 1920. Serial No. 425,438. 1 Claim. (Cl. 137—21.)

A plant waterer including a water receptacle provided with an annular series of outlet openings adjacent the bottom of the receptacle, a single common closure for all of said openings insertible and operable from the top of the receptacle for completely or partially closing communication through the latter simultaneously, and individual closing means for each of said openings.

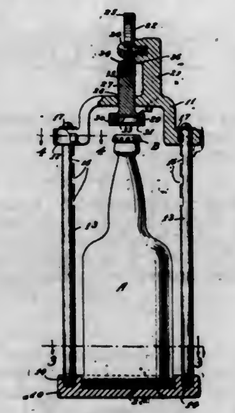
1,453,402. CLOSURE FOR STORAGE COMPARTMENTS. FREDERICK MEYER, Buffalo, N. Y. Filed June 15, 1920. Serial No. 389,111. 3 Claims. (Cl. 296—24.)



1. A storage compartment having an outlet opening, a bottom extending inwardly from the lower end of said outlet opening, an upright outer wall above said outlet opening, and an inclined wall which slopes from the lower end of said outer wall downwardly and inwardly to the upper end of said outlet opening, a delivery chamber communicating at its inner end with said compartment through said outlet opening and having upright longitudinal walls and a bottom extending outwardly from the lower end of said outlet opening, and a lid controlling said outlet opening and normally inclining from its inner end downwardly toward its outer end and pivoted at its inner end to said inclined wall at the upper end of said outlet opening and adapted to engage its front end with the bottom of said delivery chamber.

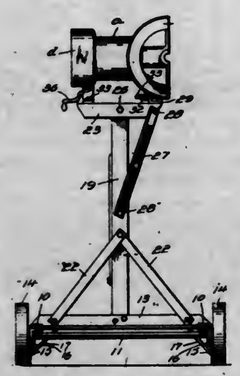
1,453,403. RESILIENT HEEL. JOSEPH A. PARRELLA, Washington, D. C. Filed Nov. 17, 1921. Serial No. 515,850. 2 Claims. (Cl. 36—35.)

1. A heel lift of the character described of concavo-convex formation and formed of resilient material, said lift provided with an arcuate groove in its concave upper surface extending along its back and sides and terminating short of the front edge, a plurality of nail holes being formed in the lower face of the lift and in alignment with the said groove, concavo-convex washers embedded in the material of the lift and in alignment with the said nail holes and said groove, the concave face of said washers lying adjacent the concave upper surface of the lift, said washers being of such material and thickness as to allow them to be inverted by the securing nails so as to force the material of the groove to bind tightly against the heel, a recess formed in the upper face of said lift adjacent the front edge and spaced therefrom, a nail hole being formed in the lower face of the lift and in alignment with the recess and a washer of concavo-convex formation embedded in the material of the lift and in alignment with the recess and the last named nail hole, said washer when forced upward by the securing nail binding the material of the recess firmly against the heel.



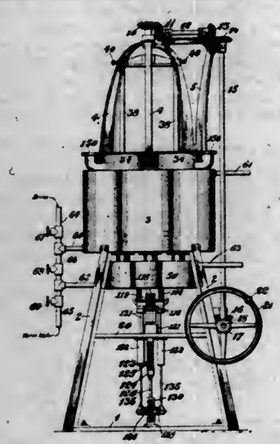
1,453,404. CAR COUPLING. VALENTINE PICKLO, Johnstown, Pa., assignor of one-half to Gregor Walat, Johnstown, Pa. Filed Feb. 16, 1922. Serial No. 536,997. 1 Claim. (Cl. 213—109.)

The combination with a coupling head involving an angular pivoted jaw and a pair of legs, one longer than the other and to which said jaw is pivoted, the outer end of the shorter leg having a socket therein, the inwardly extending arm of said jaw having a socket therein, a cushion spring mounted in each socket, a plunger confined within the outer end of each socket and engaged by the spring, the plunger in said inwardly extending arm of the jaw being positioned at an angle to the plunger in said shorter leg whereby the first mentioned plunger is substantially parallel with the other plunger when the angular pivoted jaw is in its open inoperative position for purposes specified.



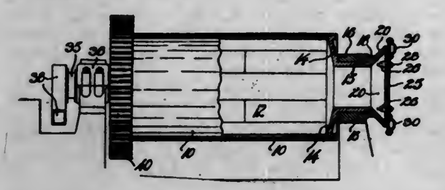
1,453,405. BOTTLE CAPPER. OCRON S. PLATT, Bridgeport, Conn. Filed Aug. 19, 1921. Serial No. 493,581. 2 Claims. (Cl. 226—84.)

1. A bottle capper consisting of a bottle supporting member, tie rods thereon, a yoke upon the tie rods and spaced from the supporting member, the yoke having an opening and carrying a cam support consisting of an upstanding lug with bearing surface on one side thereof, a cam pivoted upon the cam support, a closing



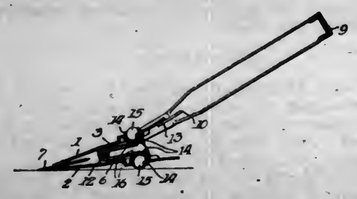
die with plunger slidably arranged in the opening in the yoke, the plunger and cam having operative connection on one side only of said plunger and cam, and means for actuating the cam to depress the plunger.

1,453,406. WORKHOLDER. THOMAS E. PURVIS, Tekamah, Nebr. Filed May 10, 1921. Serial No. 468,382. 4 Claims. (Cl. 29—89.)



1. A work holder of the class described comprising a base, standards rising from said base in spaced relation one with respect to the other, a work table pivoted on its longitudinal center to the free ends of said standards whereby the same may be tilted to vertical positions to either side of the latter said table at one side of its top provided with a pair of apertured U-shaped supports and at the other side of its top with an apertured bracket, a brace member pivoted at one end to one of said standards, means detachably securing said brace member to said work table for holding the same in its horizontal position, tensioned fastenings extending through the apertures of said supports for engagement in certain bolt openings of an engine casting, and a detachable fastening means extending through the aperture of said bracket and adapted for engagement with any one of certain other bolt openings of the engine casting.

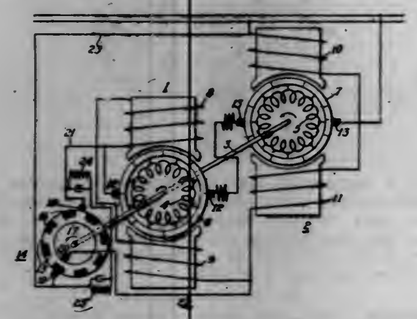
1,453,407. ICE-CREAM-BRICKING MACHINE. EDWARD J. RETZBACH, St. Louis, Mo., assignor, by direct and mesne assignments, to Mojonnier Bros. Co., Chicago, Ill., a Corporation of Illinois. Filed June 11, 1917. Serial No. 174,002. 44 Claims. (Cl. 226—19.)



1. A machine of the class described comprising a plurality of ice cream containers, means for discharging the cream therefrom in assembled layers, means for relatively regulating the discharge from said containers, and means controlling as a whole the discharge of a predetermined amount of cream.

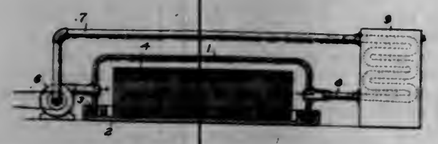
1,453,408. GRINDING MILL. JOSEPH P. RUTH, Jr., Denver, Colo. Filed Nov. 29, 1921. Serial No. 518,507. 2 Claims. (Cl. 83—9.)

1. A tube mill comprising a drum having a frusto-conical discharge head with a hollow journal and a flaring discharge flange, and a splash door secured to said drum, said door being spaced at equal distances from said flange and thereby forming a discharge opening extending entirely around the outer end of said flange, said door being of greater diameter than said outer flange end.



1,453,409. RAZOR-BLADE HOLDER. CLINTON A. SCOTT, Chicago, Ill. Filed Aug. 16, 1920, Serial No. 403,907. Renewed Oct. 2, 1922. Serial No. 591,986. 6 Claims. (Cl. 51—221.)

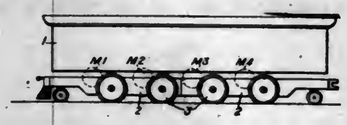
2. A device for holding a safety razor blade that is to be sharpened including a pair of blade clamping jaws



having lateral wings formed with aligned holes, the wings of one jaw being received between the wings of the other jaw; a riveting sleeve passing through the wings and assembled with the outer wings and upon which the inner wings may turn; a handle having prongs; a pin extending through the riveting sleeve that may turn upon the pin which is secured at its ends to said prongs; and a rearwardly extending U-shaped spring through which the riveting sleeve passes, the ends of the spring pressing against the inner faces of the rear portions of the jaws to exert closing pressure upon the jaws, an inner wing being extended to limit the opening movement of the jaws.

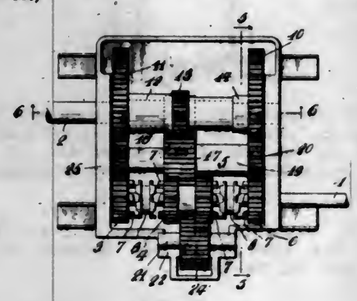
1,453,410. DYNAMO-ELECTRIC MACHINE. JOSEPH SLEPIAN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 17, 1919. Serial No. 345,540. 37 Claims. (Cl. 171—328.)

1. In combination, a dynamo-electric machine embodying a commutated winding and field windings and means for opposing a change of flux in a field winding during the period of short-circuit of a portion of the commutated winding which embraces substantially the same field-flux as said field winding.



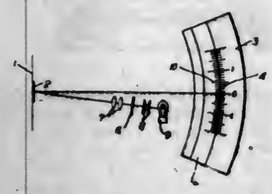
1,453,411. PROCESS OF ANNEALING SHEET IRON. JAMES A. SMAIL, Youngstown, Ohio. Filed Oct. 5, 1921. Serial No. 505,541. 14 Claims. (Cl. 148—13.)

1. A process of annealing a pack of iron sheets which consists in bringing the pack up through an annealing temperature in an enclosed atmosphere, and then causing said pack to cool down rapidly while still closed off from the outside atmosphere.



1,453,412. SYSTEM OF CONTROL. GERALD F. SMITH, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 25, 1919. Serial No. 326,354. 9 Claims. (Cl. 172—179.)

1. In a system of regenerative control, the combination with a plurality of momentum-driven dynamo-electric machine armatures connected to a common load, of a translating device connected in series relation with certain of said armatures, one of said armatures being connected through all the machine field windings across

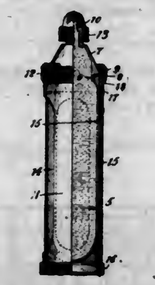


said translating device, and a second translating device connected in parallel relation to the field winding corresponding to said one armature.

1,453,413. GEAR TRANSMISSION. CHARLES W. SNODGRASS, Denver, Colo., and WALTER R. WHITMOYER, Detroit, Mich., assignors to Robert O. Bolles, Charles W. Snodgrass, and Walter R. Whitmoyer, trustees of S. & W. Transmission Association, Denver, Colo. Filed Jan. 20, 1922. Serial No. 530,638. 10 Claims. (Cl. 74—59.)

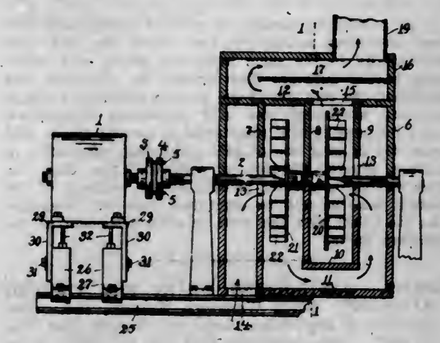
1. A variable speed transmission having driving and driven shafts, comprising a plurality of clutch-controlled pinions on the driving shaft, a fixed and a loose gear having a connected pinion on the driven shaft, said loose gear meshing with said clutch-controlled pinion, and a counter shaft having an interconnected gear and pinion thereon meshing respectively with the pinion and the fixed gear on the driven shaft.

1,453,414. MEASURING INSTRUMENT. HARRY P. SPARKES, Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 6, 1919. Serial No. 295,183. 10 Claims. (Cl. 88—24.)



8. The combination with a movable element of a measuring instrument and a mirror thereon, of a plurality of vernier scales and means for projecting one of said scales upon another through the agency of the mirror.

1,453,415. COLLAPSIBLE DISPENSING TUBE. BENJAMIN E. D. STAFFORD, Pittsburgh, Pa. Filed Sept. 17, 1920. Serial No. 410,816. 4 Claims. (Cl. 221—60.)



1. A collapsible metal tube having an open end, a removable head detachably secured to said open end and

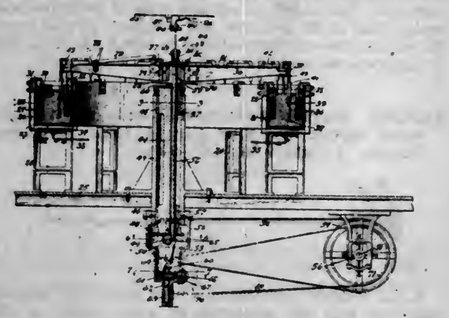
having a peripheral flange overlapping and resting on said end, and a rigid container or finger tube secured to

the head and housing the collapsible tube and provided with a finger slot.

1,453,416. ORGAN BLOWER. ROBERT L. STANLEY, Richmond, Me. Filed Feb. 14, 1922. Serial No. 536,526. 5 Claims. (Cl. 230—11.)

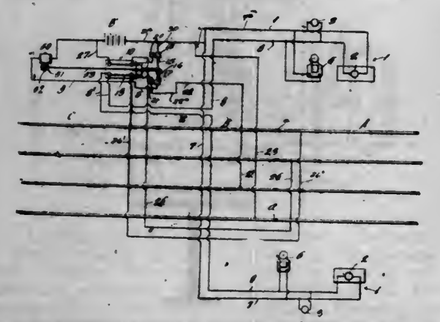
1. A centrifugal blower comprising a rotative shaft, and two fan blowers mounted thereon, each blower consisting of a disk having vanes attached thereto, the vanes of each blower being on the opposite side of its disk relative to the other, and the diameter of one disk being greater than that of the other, and means for delivering air to the smaller fan and receiving it from the larger, whereby all end-thrust on the shaft is eliminated.

1,453,417. DETACHABLE HUB FOR ECCENTRICS. JOHN M. STONE, Carrizo Springs, Tex. Filed Apr. 17, 1922. Serial No. 553,316. 2 Claims. (Cl. 74—1.)



1. A pump jack including a shaft, a slotted eccentric on said shaft, a plurality of sleeves locked to said shaft on opposite sides of the eccentric, flanges on the opposite ends of said sleeves, certain of the flanges being adjustably connected to the eccentric, and a driving wheel secured to another of the flanges.

1,453,418. HYPODERMIC SYRINGE. JOHN A. TEGSMER, Worcester, Mass. Filed Oct. 22, 1920. Serial No. 418,672. 3 Claims. (Cl. 128—218.)



3. A hypodermic syringe comprising a casing having a relatively fixed end with a contracted opening therein, a needle extending through said opening and having an enlarged head seated within said end, a sleeve slidable in said casing and abutting the inner end of said needle head, and means to force said sleeve firmly against said head to secure said needle in said casing.

1,453,419. ELECTROPLATING APPARATUS. WILFRED THOMPSON and WALTER R. JAMESON, Niagara Falls, N. Y., assignors to Wm. A. Rogers, Limited, Niagara Falls, N. Y., a Corporation of Canada. Filed Sept. 12, 1921. Serial No. 499,977. 19 Claims. (Cl. 204—5.)

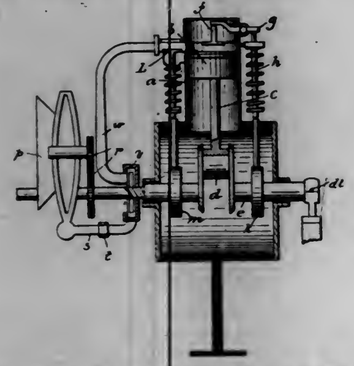
1. An electroplating apparatus comprising a tank adapted to contain an electrolyte, a support upon which the articles to be plated are suspended in said electrolyte, and means for moving said support lengthwise and also crosswise relative to said tank.

1,453,420. RAILWAY-CROSSING SIGNAL. ELBERT MONROE TOLSTON, Macon, Ga. Filed Dec. 11, 1919. Serial No. 344,010. 2 Claims. (Cl. 246—128.)

1. In a signal of the class described, a plurality of separate track sections, one of which is disposed across a highway, a signal circuit including rail sections on opposite sides of the highway section and a source of electrical energy, a motor circuit including a motor having a

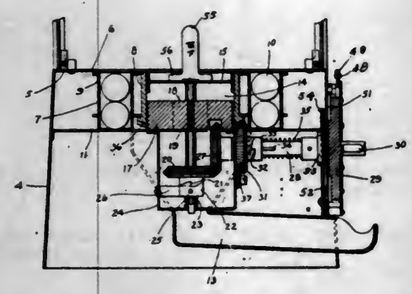
drum attached to its shaft, a knife switch connected in both of said circuits, a flexible element connecting said drum to the lever of said switch to lift the lever and open the switch to break the signal circuit when the motor is energized by the train entering the crossing section and the succeeding section.

1,453,421. SPRING LUBRICATING PROTECTOR. ALFRED R. ULP, Pasadena, Calif. Filed Oct. 29, 1921. Serial No. 511,308. 11 Claims. (Cl. 267—37.)



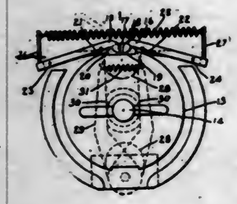
2. A spring lubricating protector having a flexible body and an absorbent lining adapted to rest at the bottom and sides of a spring portion, in combination with an upper telescopic member adapted for arrangement over the body and to be secured below the body and a spring portion to which the body is applied; the said securing of the telescopic member being effected by laces extending outwardly from points at opposite sides of the transverse median line of the protector and wrapped and tied about the end portions of the protector to secure the laces and to compress the said end portions.

1,453,422. HATPIN FASTENER. HERMANN WALKENHORST, Milton, Ky. Filed Aug. 14, 1922. Serial No. 581,599. 1 Claim. (Cl. 132—72.)



A pin protector comprising a cork shaped for manual operation, said cork containing an axial opening at the smaller end, and a plug of soft metal embedded in said cork at the bottom of the mentioned opening.

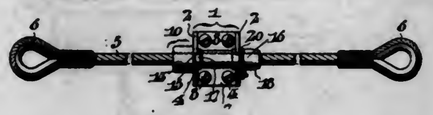
1,453,423. INTERNAL-COMBUSTION ENGINE. DANIEL MICHEL WEIGEL, London, England. Filed Aug. 4, 1919. Serial No. 315,135. 4 Claims. (Cl. 123—44.)



1. In an internal combustion engine, a plurality of rotating cylinders adapted to receive explosive mixture in a precompressed state and to derive energy from said gases by their expansion when ignited, said cylinders being adapted to directly expand said gases without further substantial compression therein, a centrifugal compressor having vanes adapted to be driven upon the rotation of said engine cylinders for compressing air for the said mixture, and means for supplying said gases to said cylinder from said compressor.

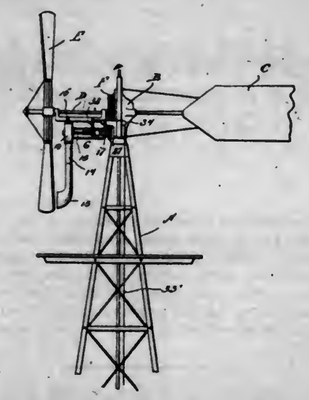
1,453,424. VENDING MACHINE. BRICE WILLIAMS, Kokomo, Ind. Filed June 18, 1921. Serial No. 478,628. 4 Claims. (Cl. 211—8.)

1. In a vending machine, a pair of horizontally disposed dispensing receptacles, one within the other and substantially in the same horizontal plane, said receptacles having passages therethrough for collecting and dispensing the contents of the vending machine, a single operating mechanism for said dispensing receptacles, means for causing said receptacles to operate singly, and means for causing one of said dispensing receptacles to rotate a greater distance at each operation than the other whereby a greater amount of the contents of the vending machine will be dispensed from one receptacle than the other with the same relative movement of the operating parts.



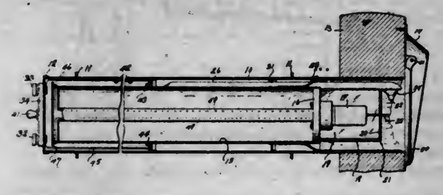
1,453,425. CONTROLLING MEANS FOR VENDING MACHINES. BRICE WILLIAMS, Kokomo, Ind. Continuation of application Serial No. 478,628, filed June 18, 1921. This application filed Nov. 30, 1921. Serial No. 519,020. 7 Claims. (Cl. 194—63.)

1. In a coin controlling means for vending machines, the combination with a shaft and a disk fixed to said shaft and having opposed notches in the periphery thereof, of a pair of locking latches having one of their ends co-operating with a single notch in unison, and means associated with the locking latches for engagement with coins when the disk is rotated for releasing one or the other of the latches from the notch.



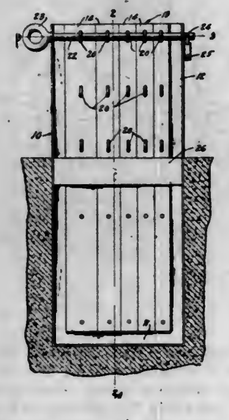
7. In a coin controlled vending machine, the combination with a plurality of dispensing means each dispensing a different quantity of commodity, each specified quantity being delivered at a single continuous movement of the dispensing means, of a single disk for receiving coins of different sizes and rotatable in opposite directions, the direction of travel of said disk determining the operation of the different dispensing means, and means controlled by the size of the coin deposited in said disk for determining the direction of travel of said disk.

1,453,426. FAIRLEAD OR GUIDE FOR THE CONTROL CABLES OF AIRCRAFT. SELDON T. WILLIAMS, Philadelphia, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Nov. 15, 1920, Serial No. 424,091. Renewed Oct. 8, 1921. Serial No. 506,490. 4 Claims. (Cl. 244—31.)



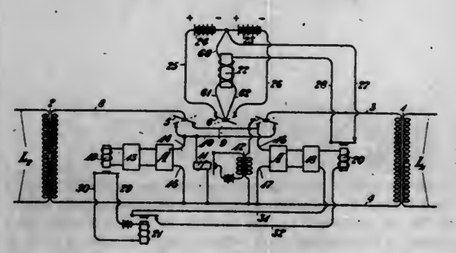
1. In a device of the character described, the combination with an apertured holder element, of a longitudinally split guide sleeve element adapted to be received within the aperture of the holder element and positioned with its extremities protruding beyond the end of said holder element; together with means at the ends thereof for securing the sleeve against longitudinal displacement within the holder.

1,453,427. WINDMILL GOVERNOR. ERNESTO ZAMORA, Eva, Tex. Filed Oct. 18, 1921. Serial No. 508,428. 3 Claims. (Cl. 170—37.)



1. In combination with a wind mill head including a rotary wind wheel and a power element driven thereby, a blower of the centrifugal type, a pipe connected with the power blower and having its discharge end directed toward the rear side of the wind wheel, and a releasable drive connection between said power element and the blower.

1,453,428. VEHICLE SIGNAL. JOHN R. ALEXANDER, New Albany, Ind., assignor of one-half to Thomas Alexander, Toledo, Ohio. Filed Oct. 3, 1921. Serial No. 504,978. 3 Claims. (Cl. 116—50.)

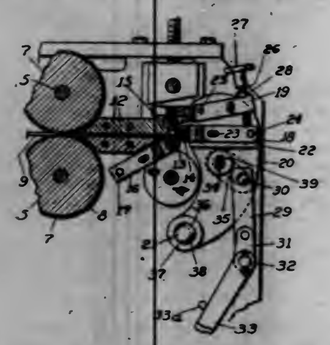


1. A signalling device for vehicles comprising an elongated tubular member, an inner member slidable within said tubular member, a collapsible hood structure carried by the inner member and including a pair of normally divergent spring arms, a pair of stationary arms between the spring arms and sheets of fabric connected with said spring arms and stretched over said stationary arms, an illuminating element mounted at the outer end of said inner member and disposed within said hood, a frame surrounding and protecting the bulb, and transparent panes of different colors mounted at the front and back of the frame.

1,453,429. HEAD GATE. HENRY C. BEGGS, Fort Morgan, Colo. Filed Apr. 3, 1922. Serial No. 549,051. 3 Claims. (Cl. 61—28.)

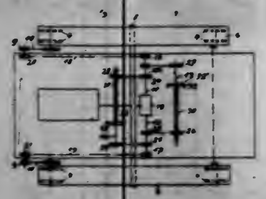
1. A head gate comprising a frame, a gate slidable in the frame and comprising a plurality of independently slidable sections, said sections being graduated as to size.

1,453,430. VOICE-OPERATED RELAY. OTTO B. BLACKWELL, Garden City, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Nov. 22, 1919. Serial No. 339,799. 39 Claims. (Cl. 179—171.)



1. A telephone line, a repeater associated therewith, a circuit changing device comprising a differentially wound polarized relay and a plurality of switches for operatively associating said repeater with said line for transmission in either direction, said circuit changing device being controlled by the direction of transmission of voice currents transmitted over said line, and a filter associated with said circuit changing device adapted to readily allow the transmission of currents of voice frequencies and to attenuate and practically extinguish currents of other frequencies.

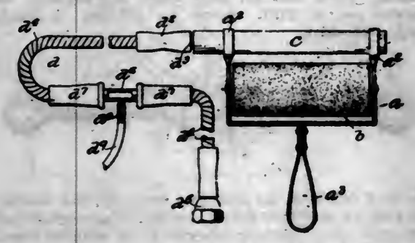
27. The combination of a relay, a repeater controlled thereby, and means whereby the acuation of said relay renders said relay inoperative.



28. A repeater system comprising two lines, a repeater therebetween, and means, comprising a relay coil, for controlling said repeater in response to energization of said coil by incoming voice current in each of said lines.

1,453,431. COILING MACHINE. ARLINGTON A. BLOUNT, Worcester, Mass., assignor to Sleeper & Hartley, Inc., Worcester, Mass., a corporation of Massachusetts. Filed Jan. 8, 1921. Serial No. 435,881. 10 Claims. (Cl. 153—65.)

1. In a machine of the class described, the combination with means for feeding material to be coiled and a plurality of devices arranged with a predetermined relation about a space into which the material is fed for forming the material into a coil, of means for rendering said devices operative or inoperative, at will, without affecting the relation between said devices.

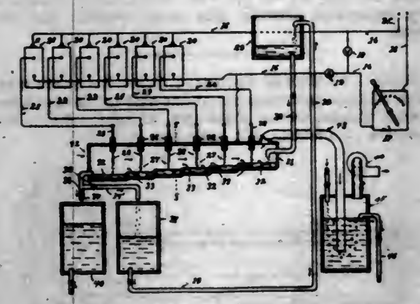


1,453,432. STEERING GEAR FOR MOTOR VEHICLES. HUGO E. BREMER, Nehem, Westphalia, Germany. Filed July 16, 1919. Serial No. 311,348. 1 Claim. (Cl. 180—9.2.)

In a steering gear for motor vehicles having a pair of road chains, the combination with two chain shafts adapted to be operated by the motor for driving said road chains, a differential gear connecting said chain shafts to the motor, two sets of auxiliary shafts arranged in pairs one within the other, two pairs of clutch members fitted to said auxiliary shafts for individually coupling the same and said chain shafts together, and means for transferring in a given ratio the power from one chain shaft to the other whereby to produce a difference in the speeds of operation of said road chains.

1,453,433. CLOTH PRESSING AND STEAMING DEVICE. JAMES BRUNELLI, Brooklyn, N. Y. Filed Aug. 22, 1921. Serial No. 494,306. 12 Claims. (Cl. 26—5.)

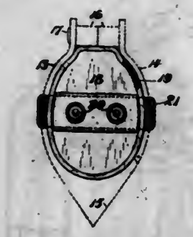
1. In an apparatus of the class described, a yoke-shaped frame provided with a handle, a roller rotatably mounted in said frame, the face of which is provided with projecting and substantially rigid bristles and a perforated



steam casing or receptacle mounted in connection with said frame in front of said roller.

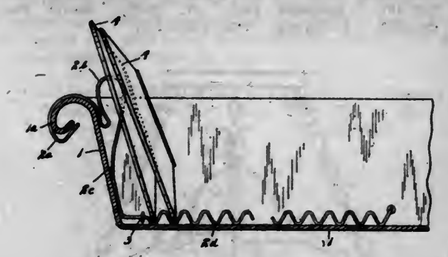
1,453,434. FURNACE-DOOR ARCH. LESTER E. BUDD, Philadelphia, Pa. Filed July 14, 1921. Serial No. 484,541. 4 Claims. (Cl. 110—80.)

1. A furnace arch structure including a top, piers supporting the top, a dead plate supporting the piers, the piers having upright passages communicating wtih the ash pit and with ports leading to the fire box, the dead plate having slots communicating with the upright passages, and the top having ports extending from front to rear thereof communicating with the doorway and the fire box.



1,453,435. METHOD AND APPARATUS FOR NITROGEN FIXATION. CHARLES H. BUETTNER, Cincinnati, Ohio. Filed Nov. 17, 1921. Serial No. 515,844. 15 Claims. (Cl. 204—31.)

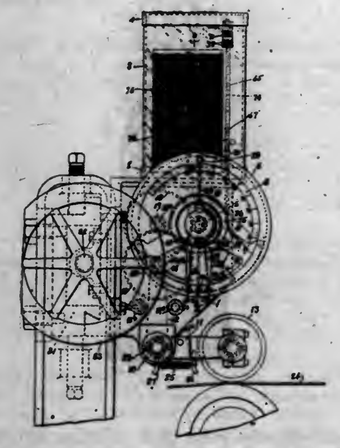
1. The method of nitrogen fixation which comprises subjecting mixed nitrogen and oxygen to an electrical discharge between a plurality of electrical terminals



each in an independent electrical circuit and a body of water, and absorbing the fixation products into said body of water.

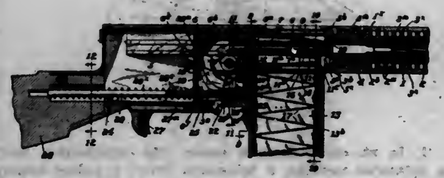
1,453,436. HOLDER FOR WHEEL LOCKS. EDWARD M. BURNHAM, San Francisco, Calif. Filed Apr. 3, 1922. Serial No. 549,230. 4 Claims. (Cl. 224—29.)

1. A holder for a wheel lock of the type mentioned comprising a block adapted to be permanently fastened to a vehicle, said block being of a size and shape to fit within the lock and engage snugly with opposite portions of the lock when the latter is in closed position thereon, and a projecting rim portion on the front face of the block to prevent removal of the lock in an axial direction.



1,453,437. RINSING HOLDER FOR DISHES. WILLIAM E. BURNHAM, Minneapolis, Minn.; Julia E. Burnham special administratrix of said William E. Burnham, deceased. Filed Apr. 12, 1921. Serial No. 460,709. 4 Claims. (Cl. 141—11.)

1. A dish holding device adapted to be placed in a receptacle to support the dishes in spaced relation to the bottom thereof, comprising a portion constructed and arranged to engage over the side of the receptacle to hold the device in position, an adjacent loop portion disposed in a plane normal to the side of said receptacle arranged to form a support for a row of dishes and a horizontal portion extending in contact with the bottom of the receptacle and formed with spaced means for supporting the dishes in said row.

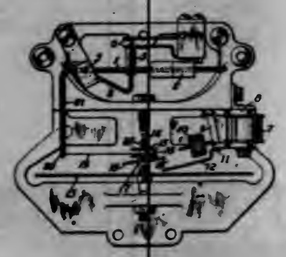


1,453,438. SIGNAL AND RECORDING METER FOR PAPER-MAKING MACHINERY. EDWARD H. BUTTERFIELD and FERDINAND D. OTTENHEIM, Middletown, Ohio, assignors to Tom Harvey, jr., Middletown, Ohio. Filed May 12, 1919. Serial No. 296,667. 31 Claims. (Cl. 92—46.)

1. In a device of the character described, the combination, a member movable transversely of a strip of paper movable thereunder and adapted to contact with the surface thereof, means to move said member transversely during the operation of the machine, a graduated dial, a pointer cooperating therewith and adapted to be moved to predetermined fixed positions relative there-

to, and another pointer disconnected from the first mentioned pointer cooperating with the dial and operable by said member whereby the variations in thickness of the paper will be indicated on said dial.

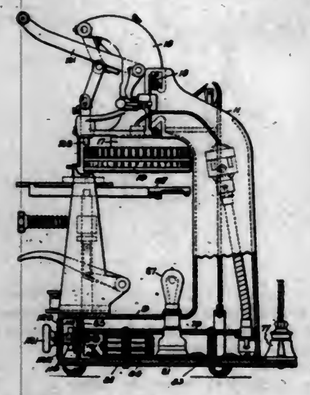
1,453,439. RECOIL-OPERATED FIREARM. NICASIO CEDILLO, Houston, Tex., assignor to C. E. Reed, Houston, Tex. Filed Mar. 21, 1921. Serial No. 454,002. 14 Claims. (Cl. 89—3.)



4. In a machine, a main casing, a barrel carrier movable therein under recoil, a barrel rigidly connected to said barrel carrier, a breech block and breech bolt supported by said barrel carrier, said breech bolt having a central passage, a firing pin therein, said breech bolt and firing pin having aligning elongated slots or recesses, and said breech block having a part projecting into both said slots or recesses.

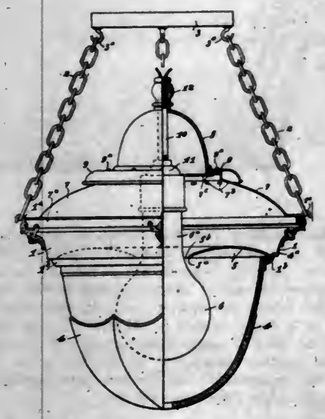
1,453,440. TASSEL AND PENDANT. JOSEPH E. CHAPPATTE, Narberth, Pa. Filed Sept. 28, 1920. Serial No. 413,398. 5 Claims. (Cl. 156—40.)

5. An ornamental tassel block of plastic material having upon its outer surface an integral design in relief representative of fabric and provided with a central bore adapted to receive a suspending cord and with a concavity at its bottom adapted to receive a fringe.



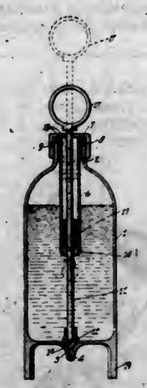
1,453,441. EXCESS-DEMAND METER. GEORGE A. CHEETHAM, Manchester, England, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 6, 1920. Serial No. 415,093. 8 Claims. (Cl. 171—34.)

1. In an excess-demand meter, the combination with a rotatable member, a bell-crank lever, a pulley loosely mounted on the rotatable member, and means for connecting the lever to the pulley, of electrical means for controlling the connection of the pulley to the rotatable member.



2. In a motor meter, the combination with a rotatable member, a bell-crank lever, a pulley loosely mounted on the rotatable member, and a flexible means for connecting the lever to the pulley to move the lever, of means controlled by the movement of the bell-crank lever for so recurrently connecting the pulley to the rotatable member as to cause the lever to impose a substantially constant average retarding force on the rotatable member.

1,453,442. MARKING MACHINE. WILLIAM E. CHOATE, Westerly, R. I., assignor, by mesne assignments, to Federal Finance Corporation, a Corporation of Massachusetts. Original application filed Aug. 15, 1916, Serial No. 115,112. Divided and this application filed Apr. 26, 1921. Serial No. 464,558. 16 Claims. (Cl. 219—30.)



1. A marking machine comprising an annular carrier having a cylindrical flange, plunger dies normally housed in said flange, an angular annulus of heat insulating material opposing the angle of the carrier formed by the flange and a resistance coil received between them.

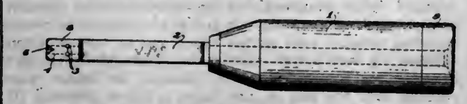
1,453,443. LIGHTING FIXTURE. WESLEY E. COCHRAN, Cleveland, Ohio. Filed June 1, 1920, Serial No. 385,417. Renewed Sept. 27, 1922. Serial No. 591,001. 8 Claims. (Cl. 240—78.)

1. A lighting fixture, comprising a holder ring, a light diffusing bowl thereon, a suspending device for said ring, a ventilated canopy detachably connected to said ring, a light diffusing shade detachably mounted on said canopy and projecting upwardly therefrom, a tubular cord stem terminating in a lamp socket, means for detachably connecting said cord stem to said light diffusing shade, a lamp bulb extending within said light diffusing bowl, and a reflector above and closing said bowl and having an opening containing said lamp bulb and reflecting the light rays thru said bowl.

1,453,444. DOSAGE BOTTLE. WILLIAM J. COVELL, San Francisco, Calif. Filed Feb. 1, 1922. Serial No. 533,390. 8 Claims. (Cl. 221—95.)

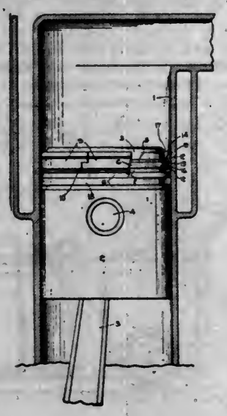
1. A dosage bottle comprising a container having a neck portion and a dispensing aperture formed opposite said neck portion; a tubular member mounted within the neck and extending inwardly into the container; a stem slidably mounted within the tubular member and extending beyond the ends thereof, the inner end of the stem being arranged to normally close the dispensing aperture; a piston mounted upon the stem and arranged to normally occupy a position at the inner end of the tubular member, said piston being arranged to be receded within the tubular member to form a partial vacuum within the container, said vacuum operating to draw air into the container through the dispensing aperture opened by the receding of the stem and piston to restore atmospheric pressure, a subsequent advancing of the piston in turn operating to increase the pressure within the container and thereby force a portion of the contents of the container outwardly through said dispensing aperture.

1,453,445. DISPENSING CONTAINER. WILLIAM J. COVELL, San Francisco, Calif. Filed Feb. 1, 1922. Serial No. 533,391. 5 Claims. (Cl. 221—95.)



1. A dispensing container comprising a container having a neck portion and a dispensing tip formed thereon; a tubular member mounted within the neck and extending into said container, said member being open at both ends and having its inner end open within the container; a piston slidably mounted within the tubular member; a stem secured upon said piston and extending outwardly from the tubular member through the neck of the container, whereby said piston may be reciprocated within the tubular member, a receding movement creating a partial vacuum within the container whereby air is drawn into the container through the dispensing tip to restore normal pressure, and a subsequent forward movement of the piston causing an increase in the pressure whereby liquid may be forced from the container through said dispensing tip.

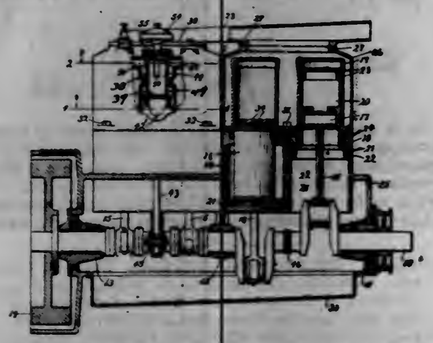
1,453,446. WIRE-JOINING TOOL. BRUCE J. DAVIDSON, New York, N. Y., assignor to Wirebounds Patents Company, Kittery, Me., a Corporation of Maine. Filed June 30, 1919. Serial No. 307,749. 44 Claims. (Cl. 140—118.)



1. A tool for use in joining package wires by intertwisting, comprising a plurality of wire engaging means spaced apart a distance approximately equal to a desired length of twist and adapted to receive side by side the wires to be twisted, at least one such means arranged to be rotated relatively to the wire to produce the twist.

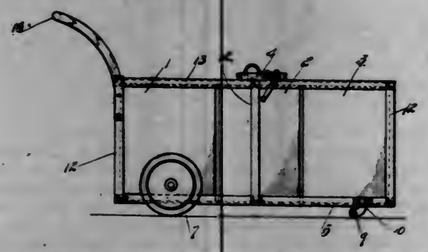
1,453,447. WIRE-JOINING METHOD. BRUCE J. DAVIDSON, Marseilles, Ill., assignor to Wirebounds Patents Company, a Corporation of Maine. Original application filed June 30, 1919. Serial No. 307,749. Divided and this application filed Dec. 15, 1921. Serial No. 522,653. 13 Claims. (Cl. 140—118.)

1. A method of joining package wires by intertwisting characterized by forming an even regular intertwist between portions of the wire for a certain length with the convolutions of the twist uniformly tensioned and by ringing off the tip of the twist a predetermined distance from the package.



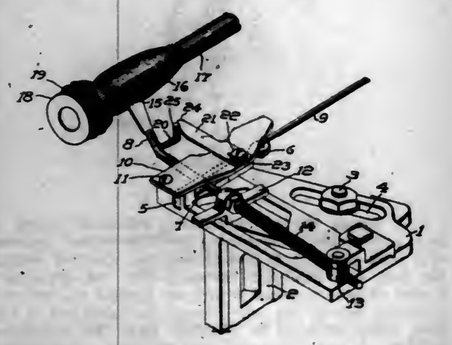
1,453,448. PISTON AND PISTON RING. WILLIAM R. DAY, Cleveland, Ohio. Filed Dec. 31, 1920. Serial No. 434,219. 3 Claims. (Cl. 74—109.)

1. In an apparatus of the character set forth, the combination of a piston adapted to operate within a cyl-



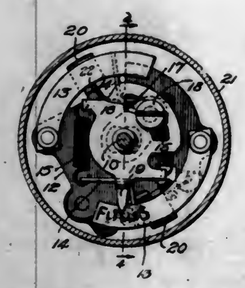
inder, the head of said piston being reduced in diameter and the walls of said piston adjacent said head being provided with a plurality of flanges arranged in spaced relationship and defining grooves, rings fitted in said grooves, the ring fitted in the groove adjacent said reduced head being composed of a plurality of segments each movable radially independently of the other, each of said segments extending to a point adjacent the reduced portion of said piston head, and the edge of the flange adjacent said piston head being bevelled.

1,453,449. TWO-CYCLE GAS ENGINE. OLIVER M. DE LAUNTY, Chicago, Ill. Filed June 10, 1920. Serial No. 387,861. 2 Claims. (Cl. 123—59.)



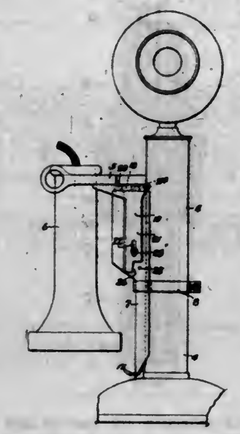
1. In a gas engine, the combination with a common cylinder block chambered to provide a pair of upright power cylinders each having pump and explosion chambers, an exhaust port at the lower end of the explosion chamber of each power cylinder, an intermediate upright cylinder for a rotating valve element, an intake port opening into the side of the valve cylinder adjacent its lower end, passages leading from the lower end of the valve cylinder to the pump chambers of the two power cylinders, an extension of each of the last mentioned passages opening into the valve cylinder above the said intake port and passages leading from the upper end of the valve cylinder to the explosion chambers of the two power cylinders, of a rotating chambered valve turning in the valve cylinder, a diaphragm dividing the chamber of the valve into upper and lower sections, two lateral ports in the lower section of the valve controlling the said intake port, a single port in the lower end of the valve controlling the said two passages leading to the pump chambers of the power cylinders, a single port in the upper section of the valve controlling the said two extension passages and a single port in the upper section of the valve controlling the said two passages leading to the explosion chambers of the power cylinders.

1,453,450. MOPPING VEHICLE. HARRY DILAS, Bay City, Mich. Filed Aug. 16, 1921. Serial No. 493,477. 1 Claim. (Cl. 280—50.)



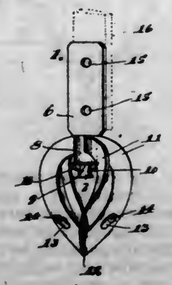
A mopping vehicle comprising a shallow water tight base tank, a running gear having downwardly bent axles in the rear end, and relatively small swiveled casters in the front to allow the said base tank to be carried close to the floor, and a plurality of tanks adapted to be carried in the shallow receptacle, a superstructure, and a handle rigidly attached thereto for propelling said vehicle.

1,453,451. FEELER MECHANISM FOR LOOMS. HORACE E. DILL, Graniteville, S. C., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Dec. 19, 1921. Serial No. 523,322. 6 Claims. (Cl. 139—85.)



1. In a loom having a feeler mechanism, comprising, in combination, a feeler supported in a position and for normal movement inclined to the longitudinal axis of the shuttle on each detecting beat and for abnormal movement at an increased inclination to effect replenishment of filling when the filling is substantially exhausted, a projection carried by the feeler, and a preventer finger mounted in fixed position and to one side of which the projection passes in its normal inclined movement with a working supply of filling in the shuttle on a detecting beat, and to the other side of which the projection passes when the feeler partakes of its abnormal inclined frontward movement upon substantial exhaustion of filling.

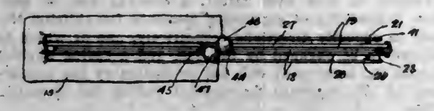
1,453,452. CENTRIFUGAL GOVERNOR. HENRY F. DOBBIN, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 29, 1921. Serial No. 525,762. 4 Claims. (Cl. 188—184.)



3. A centrifugal governor comprising a supporting member, a pair of fly weights each of said weights having a pliable adjusting member secured to the free end thereof, a rotatable member, and spring means cooperating with said adjusting members and rotatable member to restrain the fly weights against centrifugal motion.

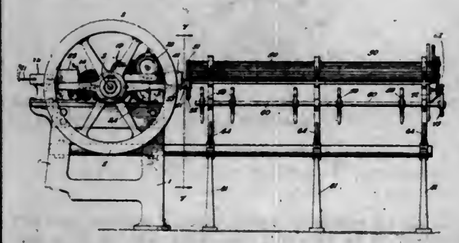
1,453,453. NOTIFYING OR CALL DEVICE FOR TELEPHONES. GEORGE FORSTER, Philadelphia, Pa. Filed July 24, 1920. Serial No. 398,769. 11 Claims. (Cl. 179—81.)

1. An attachment for a telephone, including an alarm device located at a position remote from the telephone: means automatically movable to effect the operation of said device and normally held against operation by a part of the telephone necessarily movable in order to answer the telephone, said means being operative when released by said part of the telephone to effect the operation of said alarm device; and means for independently moving said first means into an inoperative position so as to silence said alarm device; substantially as described.



1,453,454. DRAIN CLEANER. CHARLES FRITZ, Chicago, Ill. Filed Jan. 2, 1920. Serial No. 348,849. 4 Claims. (Cl. 137—70.)

1. A drain cleaner comprising a shaft; a hub rotatably mounted on said shaft; and cutting blades formed integral with said hub, curving outwardly therefrom and joined together at an outward point, said blades and hub rotating automatically when said cleaner is thrust in the drain pipe, substantially as described.

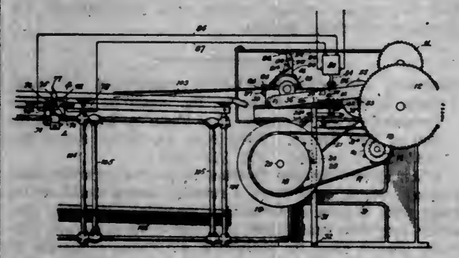


1,453,455. BAG FRAME. FRANK A. FULLER, Newark, N. J., assignor to The J. E. Mergott Co., Newark, N. J., a Corporation of Delaware. Filed Dec. 22, 1921. Serial No. 524,111. 8 Claims. (Cl. 150—29.)

1. A bag frame comprising a pair of channel members having angular extensions disposed in parallel, plate members disposed within the channeled members, hinge elements connecting the ends of said plate members, the plate and channel members being riveted near their ends,

said plate members having perforations for stitching the bag cover thereto, and means formed with said plates adapted to prevent abrasion of the stitches.

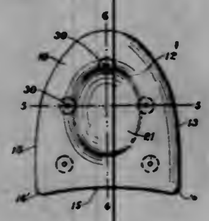
1,453,456. WIRE DEFORMING AND SEVERING MACHINE. ALEC J. GERRARD and PARVIN WRIGHT, Chicago, Ill. Filed Nov. 29, 1920. Serial No. 427,102. 12 Claims. (Cl. 29—34.)



1. In a machine for deforming the ends of wires, the combination of means for feeding the wire through the deforming mechanism; a rotating means provided with a groove for receiving the fed wire; means for supporting the fed wire; means for stopping the feeding means; means for deforming the fed wire; and means for severing the deformed wire, substantially as described.

1,453,457. PROCESS AND COMPOSITION OF MATTER FOR COLORING MORTARS. FRANK M. HALDEMAN, Cleveland, Ohio, assignor to The Master Builders Company, Cleveland, Ohio, a Corporation of Ohio. Filed July 1, 1921. Serial No. 481,968. 6 Claims. (Cl. 106—24.)

1. The art of coloring cement mortar which contains the step of mixing a finely ground insoluble mineral pigment with the water used in making the mortar, and incorporating such water with the cement and aggregate prior to the settling of the pigment, the quantity of such water being sufficient to produce the desired wetting of the mixture.



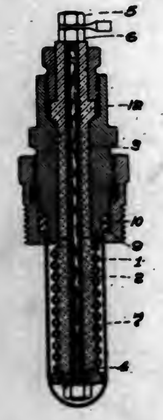
1,453,458. MACHINE FOR MAKING CORRUGATED BOARD. BERG HEINRICHS, Anderson, Ind., assignor to Mid-West Box Company, Anderson, Ind., a Corporation of Indiana. Filed July 16, 1920. Serial No. 396,826. 7 Claims. (Cl. 164—49.)

1. In a machine of the character described, the combination of mechanism for continuously feeding a web, a

reciprocable carriage movable with the web, mechanism for reciprocating the carriage, a cutter pivotally mounted on the carriage, a lever mounted on the carriage and connected to rock said cutter, a one-way dog on said lever, a plurality of stationary elements for shifting the lever in opposite directions respectively, one of which is adapted to be engaged by the dog, and a spring applied to hold the lever so it will not be shifted by the engagement of the dog with the element during the retractile stroke.

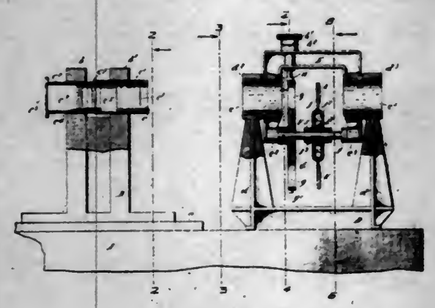
1,453,459. RESILIENT HEEL LIFT. RAYMOND I. HILL, Elyria, Ohio, assignor, by mesne assignments, to W. R. Huntington. Filed Nov. 26, 1917. Serial No. 203,986. 9 Claims. (Cl. 36—35.

2. As an article of manufacture, a resilient heel lift provided on its attaching face, when said lift is in normal position, with an elevated central portion and with an arch around the central portions and adapted to be flattened when the lift is in working position.



1,453,460. RESILIENT HEEL LIFT. RAYMOND I. HILL, Elyria, Ohio, assignor, by mesne assignments, to W. R. Huntington. Filed Nov. 26, 1917. Serial No. 203,987. 7 Claims. (Cl. 36—35.)

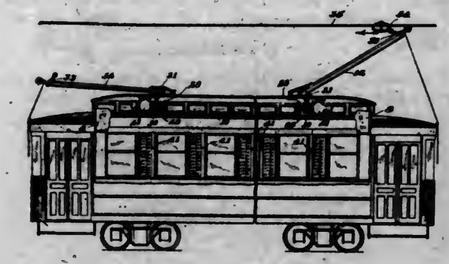
1. A resilient heel lift having a flat marginal portion, and inside the marginal portion having on the attaching face a protuberance, and on the tread face a crater of substantially the same outline as the protuberance, said heel lift having means outside said protuberance for receiving attaching devices.



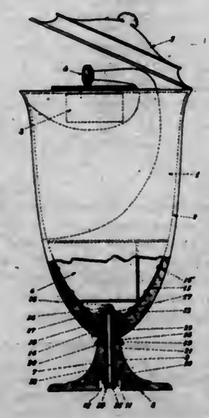
1,453,461. ELECTROTHERMAL IGNITION DEVICE. LEON F. HOFFMAN, Franklin, Pa., assignor to Chicago Pneumatic Tool Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 18, 1922. Serial No. 588,933. 2 Claims. (Cl. 123—145.)

1. An electro-thermal ignition device for internal combustion motors, comprising a tubular casing closed at its inner end, a core of insulating material extending centrally into said casing and provided with a spirally disposed groove upon its periphery, a resistor composed of spirally-wound wire occupying said groove, a holder for said tubular casing, a tubular body through which said core extends, said holder and said body forming co-operative assembly means for said casing and said core, and an electrical conductor extending through said core,

to the inner end of which one end of said resistor is attached, the other end of said resistor being attached to said holder.



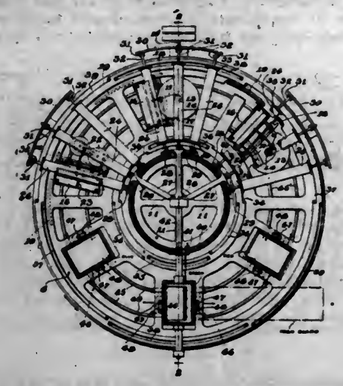
1,453,462. LENS-ADJUSTING MEANS. ARTHUR J. HOLMAN, Boston, Mass., assignor to Motion Picture Improvement Company, a Corporation of Massachusetts. Filed Dec. 2, 1921. Serial No. 519,477. 2 Claims. (Cl. 88—16.8.)



1. In a device of the character specified the combination with the usual elements of a telescope excepting therefrom the object lens, of cross-hairs mounted in the field of vision of the eye-piece of said telescope, and means whereby a disk the periphery of which consists of a plurality of lens sectors, may be rotatably mounted on a shaft, which shaft is revolvable about the axis of said telescope tube and parallel thereto in a manner whereby each lens sector of said disk may be positioned successively by a uniform angular rotation of said disk about said shaft to form an object lens for said telescope and when so positioned may be rotated by the revolution of said shaft about the axis of said telescope tube.

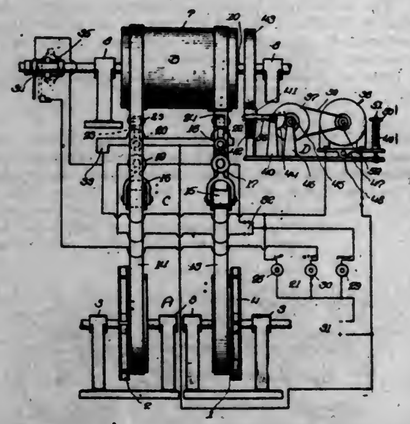
1,453,463. STREET INDICATOR. JOHN R. HUME, Chicago, Ill. Filed Sept. 8, 1919. Serial No. 322,509. 9 Claims. (Cl. 40—36.)

1. The combination with a car and track therefor, of a plurality of traveling sign elements mounted thereon; means for operating said sign elements; a motor for operating said operating means; an operative connection between said motor and said operating means, including a clutch; means carried by said car for operating said clutch; and stationary elements positioned along the car track and arranged to operate said clutch operating means, substantially as described.



1,453,464. PHONOGRAPH CABINET. PAUL IRIBE, New York, N. Y. Filed June 5, 1920. Serial No. 386,838. 7 Claims. (Cl. 45—52.)

1. In a phonograph, in combination, a wooden pedestal, a wooden cabinet member, a ball bearing for sustaining the latter, a metallic reinforce within said pedestal, said reinforce including a metallic tube, a race of said ball bearing at the upper end of said pedestal and sustained by said tube, said cabinet member having a reinforce including a metallic tube extending axially through its bottom, the second race of said bearing being sustained at the bottom of said latter tube, a pin extending through said tubular members, means for preventing upward withdrawal of said pin from said pedestal, and a nut threaded upon the upper end of said pin and in proximity to the reinforce of the cabinet.

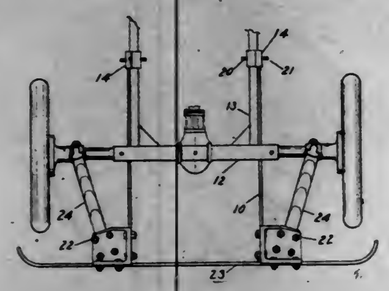


1,453,465. MULTICOLOR-PRINTING MACHINE. RAPHAEL JACOBUCCI, Providence, R. I., assignor of one-half to George Rivkind, Boston, Mass. Filed Nov. 26, 1921. Serial No. 517,935. 3 Claims. (Cl. 101—186.)

1. In a device of the character described having a fixed base, a rotary table and a cylinder, a circular track-way on the base having spaced parallel portions extending

beneath the cylinder and a bed plate carriage supported by a truck operating on said track-way.

1,453,466. POWER-TRANSMISSION APPARATUS. AUSTIN KIMBLE, Wausau, Wis., assignor to Marathon Electric Mfg. Co., Wausau, Wis., a Corporation of Wisconsin. Filed Sept. 16, 1921. Serial No. 501,129. 15 Claims. (Cl. 192—11.)

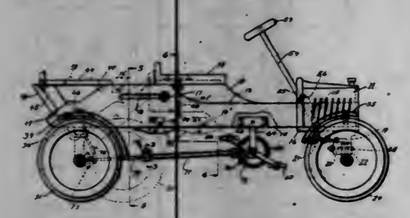


1. A power transmission apparatus comprising a pair of power-producing members adapted to be continuously rotated in opposite directions, a driving member, a pair of power-transmitting friction members adapted to connect said power-producing members with said driving member, said friction members being normally inactive to transmit power, and mechanism actuatable to connect one or the other of said friction members in driving relation with its respective power producing member and said driving member.

1,453,467. REAR-SPRING SUPPORT FOR AUTOMOBILES. HENRY KNIPPEL, Lincoln, Nebr. Filed June 5, 1922. Serial No. 565,939. 3 Claims. (Cl. 267—36.)

2. An attachment for vehicles comprising clamps which are adapted to be secured to the rear axle of a vehicle, links pivoted at one of their ends to each of said clamps, springs secured at their forward ends to the free ends of said links, forwardly extending beams se-

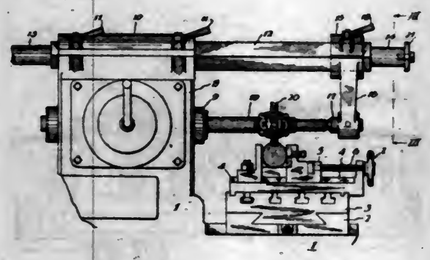
cured at their rear ends to the rear ends of said springs, the rear portions of said beams being disposed to one side of but in horizontal alignment with the side beams of the vehicle, the forward portions of said beams passing underneath the rear beam of the vehicle and forwardly



to a point in advance of the rear axle of the vehicle, means for securing the forward ends of the said beams to the side beams of the vehicle, and a cross beam connecting the rear ends of the aforesaid beams, said cross beam serving as a rear bumper for the vehicle.

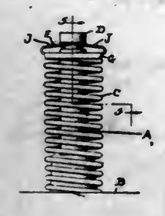
1,453,468. PROCESS FOR MAKING REFRACTORY PRODUCTS. LOUIS P. KRAUS, Jr., New York, N. Y. Filed Aug. 23, 1918. Serial No. 251,092. 14 Claims. (Cl. 106—11.)

1. The method of treating refractory material consisting in roasting a ground mixture of the material and a combustible at such a clinkering temperature below its melting point as to produce a clinkered material in the form of spongy grains free from crystalline structure.



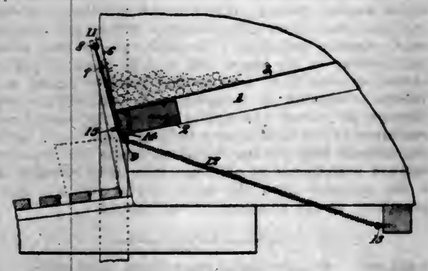
1,453,469. VELOCIPEDE. CARL LATHER, Chicago, Ill., assignor of one-half to Frank Joseph, Chicago, Ill. Filed Oct. 18, 1921. Serial No. 508,492. 14 Claims. (Cl. 208—113.)

1. A vehicle of the class described comprising adjustable axle bearing body sections; wheels on said axle; means for transmitting motive power to said wheels; means for governing the direction of travel of said wheels; seat members mounted on said body, one of said seat members being pivotally mounted on one of said body sections; and a recess formed in the other of said seat members for the reception of the pivotally mounted seat member, substantially as described.



1,453,470. ARBOR SUPPORT. ERNEST J. LEHR, Cleveland, Ohio, assignor to Hosea T. Bradner, Cleveland, Ohio. Original application filed Apr. 26, 1918, Serial No. 230,979. Divided and this application filed Feb. 8, 1919. Serial No. 275,685. 11 Claims. (Cl. 90—18.)

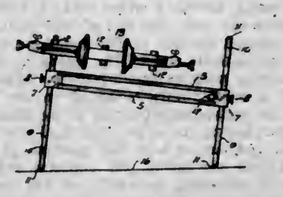
1. An arbor support comprising a column provided with an angular socket, an over-arm having a section of corresponding angularity as and fitted in said socket, another section of said over-arm being rounded, and an



arbor support fitted to said angular section and adapted to be slid along to enclose said rounded section and enable its being swung around.

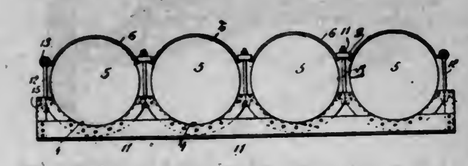
1,453,471. SPRING RETAINER. GEORGE MICHIEL LE TARTE, Detroit, Mich. Filed Dec. 28, 1921. Serial No. 525,492. 5 Claims. (Cl. 251—144.)

4. As a new article of manufacture, a centrally apertured disk for engagement about a headed stem and against the top of a helical spring, said disk being provided with upwardly and inwardly extending tongue pieces adapted to engage under the head of the stem and with depending peripheral projections adapted to hold the end of the spring against slippage.



1,453,472. BIN DOOR. ALLAN H. MCINTYRE, Dunedin, Fla., assignor to Skinner Machinery Company, Dunedin, Fla., a Corporation of Florida. Filed Feb. 1, 1922. Serial No. 533,228. 5 Claims. (Cl. 211—6.)

1. In combination with a bin floor, a substantially vertically disposed bin wall rising therefrom and provided

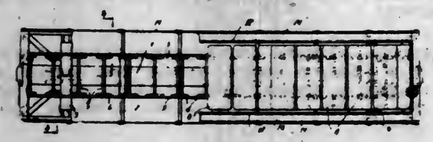


with a door opening, a vertically slidable door receivable within said opening for closing the same, a guide at the base of said door opening below the floor through which said door slides, means carried by the door for engaging the door wall for holding the door in closed position, said means adapted for engaging said guide to limit the opening movement of the door.

1,453,473. X-RAY PLATE CHANGER. RAYMOND J. MCKENNA, Denver, Colo., assignor to Magnuson X-Ray Company, a Firm composed of Alfred G. Magnuson and Cora I. Magnuson. Filed Feb. 23, 1922. Serial No. 538,640. 4 Claims. (Cl. 250—34.)

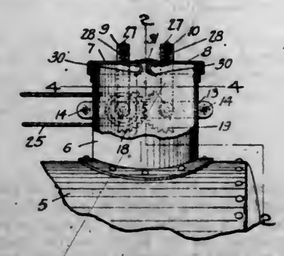
1. A plate changer of the tunnel type, comprising a removable holder for a sensitized plate or film; a flat housing for the reception of the removable holder; and a plurality of parallel rods separately adjustable through the housing at right angles therewith for its support and for engagement with a clamp above the housing.

1,453,474. MULTITANK CRADLE. MAX MAURAN, Niagara Falls, N. Y., assignor to The Mathieson Alkali Works, Inc., New York, N.Y., a Corporation of Virginia. Filed Sept. 22, 1921. Serial No. 502,529. 7 Claims. (Cl. 105—362.)



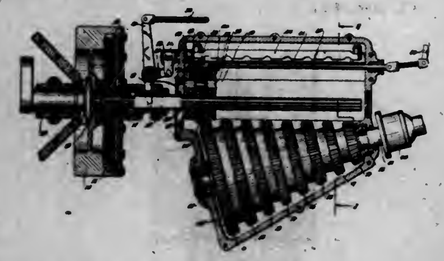
1. A cradle of the class described, comprising a unitary frame adapted to be mounted on a car, and provided with a series of transversely extending parallel seats for receiving tanks, and means for clamping the tanks to the seats.

1,453,475. MULTIPLE-UNIT TANK CAR. MAX MAURAN, Niagara Falls, N. Y., assignor to The Mathieson Alkali Works, Inc., New York, N. Y., a Corporation of Virginia. Filed May 18, 1922. Serial No. 562,001. 13 Claims. (Cl. 105—362.)



1. A multiple unit tank car, comprising a body composed of a central longitudinally extending sill and transverse girders, said girders supporting seats for receiving substantially cylindrical drums arranged with their long axes longitudinal to the car, drums in the seats, and means for clamping the drums in the seats.

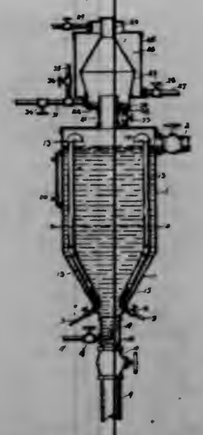
1,453,476. DOUBLE-TIER MULTIPLE-UNIT TANK CAR. MAX MAURAN, Niagara Falls, N. Y., assignor to The Mathieson Alkali Works, Inc., New York, N. Y., a Corporation of Virginia. Filed May 18, 1922. Serial No. 562,003. 6 Claims. (Cl. 105—360.)



1. A multiple-tier multiple unit tank car, including a car body comprising an open frame having seats, and substantially cylindrical containers held in the seats, the seats being spaced to space the containers so that each pair of containers will provide between them a seat for another similar container resting on the containers of the pair, and similar containers held in the last named seats.

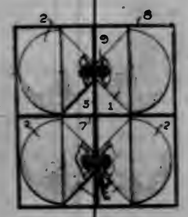
1,453,477. SMOKESTACK COVER. RICHARD J. O'NEILL, Denver, Colo., assignor of one-half to F. S. McNamara, Denver, Colo. Filed June 24, 1921. Serial No. 480,112. 5 Claims. (Cl. 110—163.)

1. A smoke stack cover comprising two members adapted to cover the top of the smoke stack, each having a U-shaped support pivoted to the smoke stack and carrying the member, and springs positioned between said supports and said members, said springs being adapted to hold said members in contact with said smoke stack.



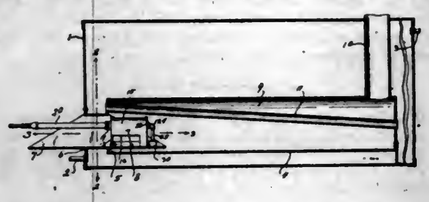
1,453,478. CONE-GEAR TRANSMISSION MECHANISM. ALDEN E. OSBORN, New York, N. Y. Filed Apr. 25, 1921, Serial No. 464,405. Renewed July 31, 1922. Serial No. 578,855. 16 Claims. (Cl. 74—58.)

1. In a transmission gearing the combination of a primary driving member, a driving element, and a driven element, a friction clutch adapted to connect or disconnect said primary driving member and said driving element, a driving gear slidably mounted on said driving element, gears having connection with said driven element and adapted to mesh with the driving gear, a stationary frame having guideways substantially parallel



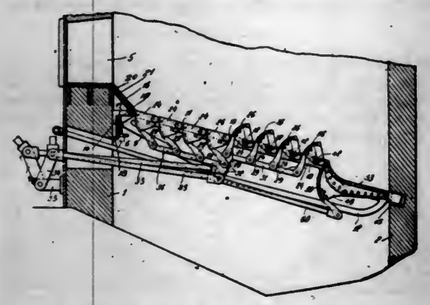
with the axis of the said driving element, a carrier slidably mounted on said guideways, and bearings for supporting said driving gear independently of said driving element, and means for moving said carrier along said guideways to bring said driving gear into mesh with one or another of said gears connected with the said driven element.

1,453,479. PROCESS OF TREATING HYDROCARBON OILS. JOHN P. PERSCH, Houston, Tex., assignor of one-fifth to Brainard Tolles, Ho-ho-kus, Tex. Filed Oct. 4, 1920. Serial No. 414,502. 5 Claims. (Cl. 196—27.)



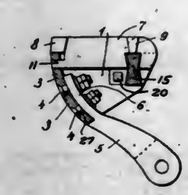
1. The process of reducing the viscosity of hydrocarbon oils consisting in placing the oil to be treated in a large container, forcing a gaseous fluid through a nozzle into the oil to atomize the oil at the nozzle, confining the atomized oil and fluid in an open ended pipe and causing the mixed fluid and oil to pass through the pipe whereby the fluid is brought into intimate contact with the consecutive small portions of the mass of oil in a restricted space, conducting away the gaseous fluid after it passes through the pipe and delivering the oil back into the main body of oil and continuing the operation until the whole mass of oil is acted upon and its fluidity increased.

1,453,480. SHIPPING CONTAINER. WALTER E. SANDERS, Trenton, N. J., assignor to Essex Rubber Company, Trenton, N. J., a Corporation of New Jersey. Filed June 7, 1920. Serial No. 386,976. 4 Claims. (Cl. 206—46.)



1. In a container the combination of an apertured frame for supporting resilient articles, means associated with said articles and said frame to hold two articles on said frame on opposite sides thereof and opposite each other, a portable flexible box to hold said frame and articles, and interlocked partitions associated with said frame and said articles to retain said frame in predetermined position.

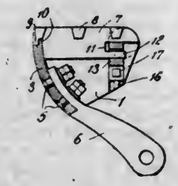
1,453,481. HEATER FOR WATER TANKS. CHRIS F. H. SPIEGEL, Hamburg, Iowa. Filed Oct. 4, 1922. Serial No. 592,372. 1 Claim. (Cl. 126—368.)



In a heating device, a water tank, a heat casing disposed within the tank, one end of said casing being supported in spaced relation to the bottom of the tank by a bracket, the opposite end of the casing having an opening registering with an opening in the adjacent wall of the tank, a substantially U-shaped burner support disposed in the registering openings of the tank and casing, said support having the upper portion of each end thereof cut away, and one of said end portions of the support extending into the casing, the opposite end portion of the support extending outwardly of the casing to provide an air conduit, and burner means supported by the inner end portion of the support.

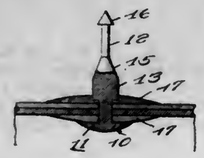
1,453,482. STOKER. GEORGE HORNELL THACHER, Jr., North Providence, R. I. Filed Jan. 23, 1920. Serial No. 353,423. 4 Claims. (Cl. 110—39.)

1. In a hand stoker having inclined bearing bars, and stoker bars mounted to rock thereon, a fixed supporting bar at the upper ends of the bearing bars and fixed bearing boxes for the lower ends of the bars, the bearing bars having hooked engagement with the supporting bar, and sliding engagement with the boxes, thereby to permit expansion and contraction without distortion of the bearing bars, the supporting bar being notched to receive the bearing bars thereby to prevent lateral movement of the upper ends of the bearing bars.



1,453,483. STOKER. GEORGE HORNELL THACHER, Jr., North Providence, R. I. Filed Dec. 28, 1920. Serial No. 433,595. 5 Claims. (Cl. 110—39.)

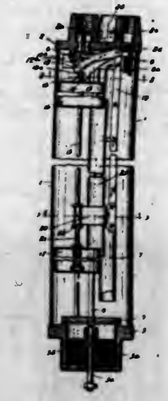
1. A grate structure comprising a frame composed of a curved shield, and end members, provided with trun-



nions on which the frame may rock, a plurality of detachable grate sections resting on the upper edge of the shield and cooperating to cover said edge and to form a guard for the same, and means for connecting said sections to the frame to prevent upward movement of said sections while permitting longitudinal expansion and contraction of the members.

1,453,484. STOKER GRATE. GEORGE HORNELL THACHER, Jr., North Providence, R. I. Original application filed Jan. 23, 1920, Serial No. 353,423. Divided and this application filed Dec. 28, 1920. Serial No. 433,596. 4 Claims. (Cl. 126—180.)

4. A grate structure comprising side members connected by a shield having a rib extending longitudinally of its upper edge, grate sections resting upon the said upper edge and having transverse grooves for receiving the rib, and covering said upper edge, a crossbar detachably connected with the side members and having apertures, the grate sections resting upon and covering the crossbar, and each section having a tongue for engaging one of said apertures.

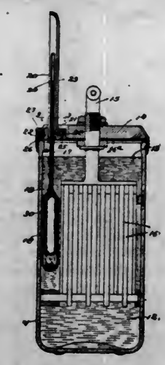


1,453,485. REPAIR PLUG FOR INNER TUBES. JOHN R. BOSBURGH, Johnstown, N. Y. Filed Feb. 7, 1923. Serial No. 617,503. 5 Claims. (Cl. 152—26.)

5. A sealing plug for use in closing punctures in tubes comprising a mushroom-shaped element formed of rubber and having an enlargement upon the stem thereof, having a shoulder facing the head and concavo-convex washers having their concave faces opposed mounted upon the stem intermediate the enlargement and the head and adapted to receive therebetween the tube to be repaired, the convex face of the washer remote from the head being provided with a socket receiving the lower end of said enlargement.

1,453,486. AIR-POWER WATER PUMP. JACOB A. AEBLY, West Concord, Minn. Filed Apr. 8, 1921. Serial No. 459,557. 15 Claims. (Cl. 103—248.)

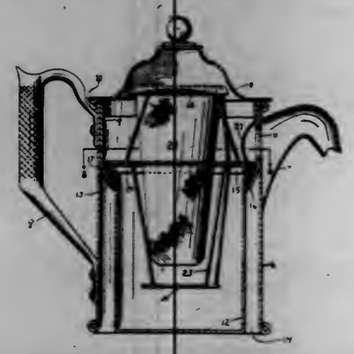
1. A pump of the class described having in combination, a cylinder, a water inlet valve therefor, an air exhaust valve and an air inlet valve, and means for operating said air exhaust and inlet valves comprising



water operated floats and connections therefrom to said valves and a weighted lever pivoted to the air exhaust valve.

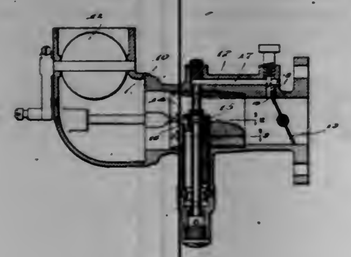
1,453,487. ADAPTER FOR SAFETY RAZORS. WALTER ALTHOFF, Geneva, N. Y., assignor to Geneva Cutlery Corporation, Geneva, N. Y., a Corporation of New York. Filed Oct. 11, 1921. Serial No. 506,979. 8 Claims. (Cl. 30—12.)

1. The combination with a base plate and a cap plate adapted to receive a razor blade between them, of means having a portion positioned between said base plate and said cap plate for holding a razor blade in an exterior position.



1,453,488. HYDROMETER. EDWARD F. ANDREWS, Maywood, Ill. Filed June 24, 1918. Serial No. 241,532. 6 Claims. (Cl. 285—46.)

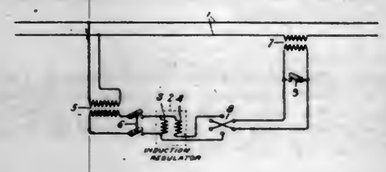
1. The combination with a storage cell, of a cover therefor having an opening therein adapted to receive



a guide, a hydrometer adapted to float in the liquid of said cell and to project upwardly through said guide, a scale carried by said guide adjacent said hydrometer, and an indicator carried by said hydrometer and adapted to be read against said scale to indicate the specific gravity of said liquid.

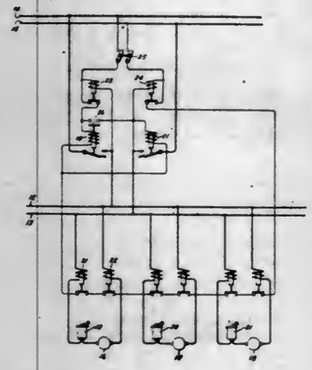
1,453,480. COFFEEPOT. VICTOR BENEDEK, Chicago, Ill. Filed Apr. 30, 1921. Serial No. 465,680. 7 Claims. (Cl. 53—3.)

1. A coffee pot comprising an outer metallic member, and an inner member mounted therein, said inner member including an aluminum container and a metal sleeve embracing and supported on the upper edge of said container.



1,453,490. CARBURETOR. EARL ALBERT BESSOM, Indianapolis, Ind., assignor to The Wheeler-Schebler Carburetor Co., Indianapolis, Ind., a Corporation of Indiana. Original application filed Apr. 30, 1917, Serial No. 165,323. Divided and this application filed Mar. 6, 1919. Serial No. 280,923. 2 Claims. (Cl. 261—121.)

1. In a carburetor, the combination of a substantially horizontal mixing tube, a fuel nozzle projecting vertically thereinto, and a boss on the leeward side of and abutting against said fuel nozzle and provided with a stream line surface whereby the formation of a pool of liquid on the leeward side of the fuel nozzle is prevented.

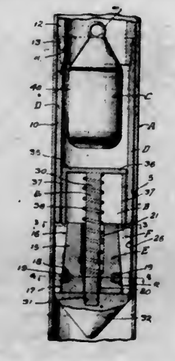


2. In a carburetor, the combination of a substantially horizontal mixing tube, a fuel nozzle projecting upward thereinto, and a boss formed on the inner face of said mixing tube and located on the leeward side of and against said fuel nozzle, said boss tapering off both laterally toward the center line thereof and downward so as to form a stream line surface which is swept clean of fuel by the passing air stream.

1,453,491. VOLTAGE-REGULATING SYSTEM. FRANKLIN J. CHAMPLIN, Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed Mar. 22, 1921. Serial No. 454,447. 14 Claims. (Cl. 171—119.)

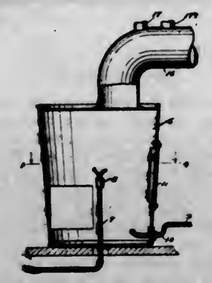
13. In a voltage regulating system for an alternating current circuit, the combination of an induction regulator having its inducing and induced windings connected together as an auto-transformer and provided with the proper number of turns so that the voltage across the secondary winding of the transformer is zero when the regulator is in a predetermined bucking position, a series transformer having its primary winding connected to the terminals of said regulator and its secondary winding connected in series with the circuit to be regulated, and switching means adapted to be operated to reverse the connections of one of the windings of said transformer.

1,453,492. OVERLOAD CIRCUIT CONTROLLER. CHARLES B. CONNELY, Scotia, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Aug. 2, 1921. Serial No. 489,358. 5 Claims. (Cl. 175—294.)



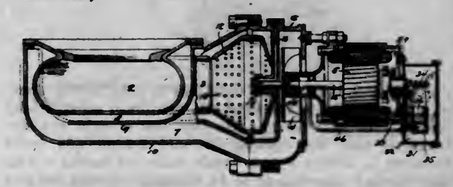
1. The combination with an electric circuit of an electromagnetic switch biased to the open position for controlling the same, current responsive means for controlling the winding of the said switch, a normally closed electromagnetic relay having its winding connected across the circuit making contacts of the said switch for controlling the switch winding, and connections whereby upon an overload in the said circuit the current responsive means operates to deenergize the line switch and said relay is energized to maintain the winding of the said switch open until the voltage drop across the said contacts is reduced to a predetermined value.

1,453,493. FISHING TOOL. GEORGE F. CUNNINGHAM, Alexandria, La. Filed Sept. 1, 1921. Serial No. 497,479. 7 Claims. (Cl. 294—96.)



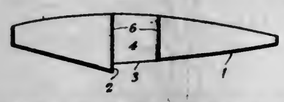
1. A fishing tool comprising a body having a plurality of tapered guide ways therein, wedge shaped jaws slidably

mounted in said guide ways, means for normally holding the jaws in an inoperative non-work engaging position



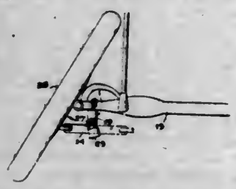
in said guide ways, and means for forcibly moving said jaws outwardly into a work engaging position.

1,453,494. AIR WASHING AND COOLING APPARATUS. PURLY A. DENNON, Grand Island, Nebr. Filed Oct. 20, 1919. Serial No. 332,044. 1 Claim. (Cl. 261—88.)



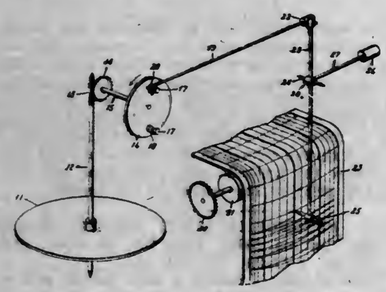
In an air washing and cooling apparatus, the combination of an inverted conical drum, an air inlet conduit communicating tangentially with the drum adjacent its bottom, an air outlet conduit communicating with the drum through its top at a point spaced from the outer edge and center thereof, a fluid injector in the drum between the inlet and outlet ports thereof, a fan in communication with the inlet conduit, and a fluid drain pipe adjacent the bottom of the drum and communicating therewith at a point below the inlet port thereof.

1,453,495. LIQUID-FUEL BURNER. JOHN A. DOBLE, San Francisco, Calif., assignor to Doble Laboratories, San Francisco, Calif., a Corporation of California. Filed Jan. 5, 1920. Serial No. 349,374. 8 Claims. (Cl. 158—36.)



6. In a liquid fuel burner, a metallic combustion chamber, a housing surrounding and spaced from said combustion chamber whereby a passage is formed within the housing, a fuel mixing chamber discharging into the combustion chamber, means for blowing air through said passage and into said fuel mixing chamber, means in the mixing chamber for producing a fuel spray and means for igniting the combustible mixture.

1,453,496. HYDROAEROPLANE. CLAUDIUS DORNIER, Friedrichshafen, Germany, assignor to the Firm Luftschiffbau Zeppelin Gesellschaft mit beschrankter Haftung, Friedrichshafen, Germany. Filed June 28, 1920. Serial No. 392,555. 1 claim. (Cl. 244—2.)

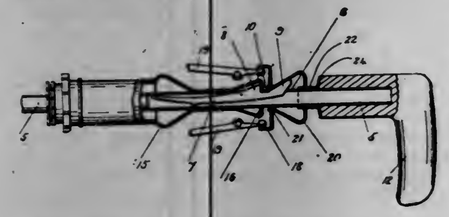


A flying boat comprising a hydroplaning hull provided with a bottom step, a bottom opening, and an internal compartment, the walls of which surround the opening and extend vertically upward, the opening forming a passageway from the compartment through the bottom and through which articles may be dropped, the forward boundary of the opening being located at the step.

1,453,497. THEFT-PREVENTION DEVICE FOR AUTOMOBILES. JAMES N. FARLOW, San Francisco, Calif. Filed Mar. 13, 1922. Serial No. 543,495. 7 Claims. (Cl. 70—90.)

7. A theft prevention device for automobiles comprising a body member, means for attaching the body member to the axle of an automobile, means for adjusting the last named means to provide for the securing of the body member to axles of different sizes, an angular member adjustably supported by the body member and capable of movement to engage a front wheel of the vehicle, and means for locking the angular member in wheel engaging position, said angular member preventing access to the adjusting means when in wheel engaging position.

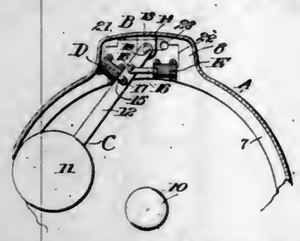
1,453,498. MAXIMUM-DEMAND METER. WALTER L. HAMILTON, Holyoke, Mass., assignor to General Electric Company, a Corporation of New York. Filed Aug. 25, 1919. Serial No. 319,695. 5 Claims. (Cl. 234—5.5.)



1. A recording electric meter comprising a shaft adapted to be rotated at a speed proportional to a metered quantity, an oscillating member, mechanical means driven by said shaft for mechanically oscillating said member at a frequency varying in fixed proportion to the speed of rotation of said shaft, and means for recording the oscillations.

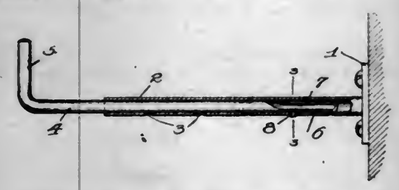
1,453,499. UMBRELLA. MORRIS H. HARTZELL, Philadelphia, Pa. Filed Oct. 18, 1921. Serial No. 508,503. 4 Claims. (Cl. 135—44.)

3. A tubular umbrella rod provided with a slot, a spring catch inclosed in and pivoted to the said rod and having a plurality of teeth which project from the said slot, a runner slidable on the rod and engaging with the said catch, and a finger sleeve slidable on the said rod and engaging with the said catch and provided with a tip cup, said sleeve operating when moved down the rod to first release the umbrella ribs from the tip cup and then to release the runner from the catch, said spring catch operating also to move the runner and tip cup upwardly on the rod to a predetermined extent when the finger sleeve is released by the fingers.



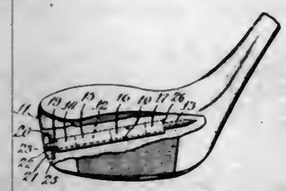
1,453,500. UMBRELLA. MORRIS H. HARTZELL, Philadelphia, Pa. Filed May 15, 1922. Serial No. 561,126. 2 Claims. (Cl. 135—41.)

1. The combination, with an umbrella rod provided with a spring retaining catch for the runner, said catch having also a projecting tooth; of a finger sleeve slidable on the rod and having a projection which bears constantly on the inclined face of the said tooth, said sleeve being slid upwardly on the rod by the said spring catch and operating to release the runner when slid downwardly by hand, and a tip cup secured to the finger sleeve and adapted to release the umbrella ribs while being slid downwardly and prior to the release of the runner.



1,453,501. AUTOMOBILE LIGHT DIMMER. CHARLES S. HASH, Chadron, Nebr. Filed Dec. 16, 1920. Serial No. 431,063. 1 Claim. (Cl. 240—45.)

In a light dimmer, a casing, a lamp therein, said casing being extended at its top to provide a dome, a lug depending from the casing into the dome, an arm pivoted to said lug and carrying a dimmer disk, electro-magnets in said dome one on each side of the arm and adapted at adjacent ends to directly abut the arm, said magnets having slidable armatures pivoted to said arm, one of said magnets being adapted to actuate the arm in one direction to dispose the disk in line with the lamp, the other of said magnets being adapted to actuate the arm in the opposite direction to inutile position, the magnets being

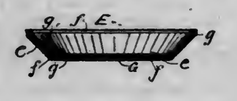


disposed at an angle to each other and with the ends aforesaid corresponding to the angle of the arm when in engagement therewith, respectively.

1,453,502. HOOK. CYRUS S. HINDERLITER, Eddyville, Pa. Filed Aug. 16, 1922. Serial No. 582,230. 5 Claims. (Cl. 156—22.)

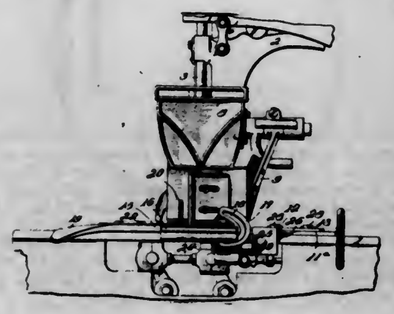
1. Fastening means for an adjustable curtain rod comprising a tubular member having openings disposed at spaced intervals longitudinally thereof, a rod adapted to snugly fit the tubular member, one end of said rod being flattened to provide a resilient strip, the end portions of said strip being extended back upon the strip to provide a substantially U-shaped spring member, the distance between said members being slightly less than the diameter of the rod, and a snap button projecting from said strip adjacent the junction of said strip with the rod, the reverted end portion of the strip being adapted to engage the inner surface of the tubular member remote from the opening and coacting with the snap button to prevent movement of the rod relative to the tubular member.

1,453,503. GOLF CLUB. THOMAS J. HOLMES, Chicago, Ill. Filed Aug. 8, 1921. Serial No. 490,460. 1 Claim. (Cl. 46—4.)



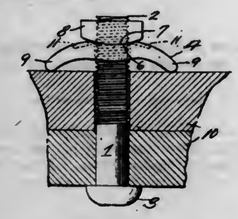
A golf club head having a materially long boring therein, a rod secured to the head and positioned substantially coaxially in said boring, the free end of said rod terminating near the opening of said boring and being threaded to receive a nut, weight material having a hole therethrough adapting it to fit slidingly on said rod and having an external diameter adapting it substantially to fit the boring in the head, said weight material substantially filling said hole from end to end and being mounted on said rod, and a nut on the outer end portion of said rod.

1,453,504. AUTOMATIC SELF-LOCKING FOLDING TABLE. JOHN F. JANISCH, Kirksville, Mo. Filed Nov. 10, 1921. Serial No. 514,382. 2 Claims. (Cl. 45—116.)



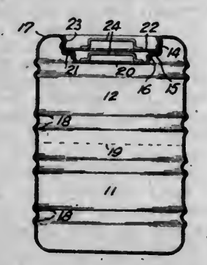
1. A folding table including top sections, links connecting the same, legs pivotally connected to the sections adjacent the outer ends thereof, foldable ties supported by the links and slidably and pivotally engaging the top sections, stop devices supported by the links for engagement by the ties to support the inner ends of the top sections in extended or active positions, and foldable braces connecting the top section and the legs and pivotally and slidably engaged by the ties for folding the legs inwardly between the top sections when said sections are folded together.

1,453,505. CUP PACKING FOR PISTONS. ROBERT C. KENDALL, Chicago, Ill. Filed Oct. 21, 1921. Serial No. 509,352. 3 Claims. (Cl. 74—108.)



1. A new article of manufacture forming a cup piston packing, and comprising a saucer shaped member made of leather and provided with a central aperture and an inner saucer shaped member made of textile material and provided with a central aperture, said inner member provided with a cement coating on the inner face thereof, and said members joined by cement applied on adjacent faces thereof.

1,453,506. SEWING MACHINE FOR STITCHING WAISTBANDS. BENJAMIN V. KERSHNER, Kansas City, Mo., assignor to Union Special Machine Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 30, 1920. Serial No. 369,865. 3 Claims. (Cl. 112—136.)



1. A sewing machine for stitching waist bands comprising stitching mechanism having spaced needles for forming two rows of stitches, a guide for the lining strip shaped to infold the edges thereof, a guide for the stiffening strip located beneath the lining strip guide, a binder for directing the binding about the edge of the stiffening strip, said binder being disposed in advance of one of said needles, an edge guide disposed in advance of the other needle for directing the edge of a body fabric between the lining strip and the stiffening strip, and a guide located beneath the stiffening strip guide for directing a tacking strip to the needle stitching the binding to the stiffening strip.

1,453,507. NUT LOCK. MATTHEW D. KIMBALL, Omaha, Nebr., assignor of one-half to David P. Feder, Omaha, Nebr. Filed June 21, 1922. Serial No. 269,084. 3 Claims. (Cl. 151—38.)

1. The combination with the threaded shank of a bolt, a nut threaded on said threaded shank, of means for preventing retrograde movement of said nut after the same has been tightened, said means comprising a spring washer, said spring washer being provided with a transversely disposed concavity, the inner side of said nut being provided with a transversely disposed convexed surface adapted to be received in the concavity, the ends of said washer curving outwardly, upwardly and downwardly and adapted to engage a surface whereby said washer will be flexed.

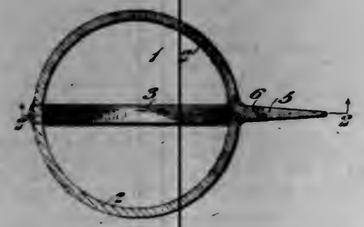
1,453,508. CONTAINER OR RECEPTACLE FOR CARBIDE AND THE LIKE. JESSE C. KING, Montreal, Quebec, Canada, assignor to Canada Carbide Company, Limited, Montreal, Canada. Filed May 31, 1919. Serial No. 300,915. 1 Claim. (Cl. 220—4.)

As a new article of manufacture, a container for carbide and the like, comprising a pair of cup-shaped members each having a substantially flat end or bottom and a circumferential wall integral therewith and merging gradually into the end wall in a curve of sufficient radius to eliminate sharply defined external ridges and internal crevices, the said members being connected at their free edges, and one of said members having in its bottom an opening, and a flange surrounding the opening projecting inwardly of the container and toward the axis thereof and formed to receive a screw cover and a friction cover.

1,453,509. VEHICLE BRAKE DEVICE. GEORGE S. LANE, San Francisco, Calif., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporaton of Pennsylvania. Filed June 4, 1921. Serial No. 474,984. 3 Claims. (Cl. 192—3.)

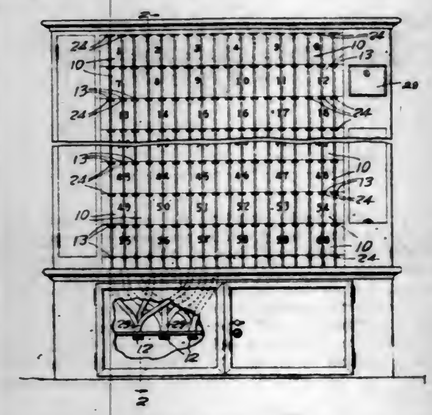
3. The combination of a valve device for controlling the fluid pressure brakes of a motor vehicle, a throttle

button adapted to be depressed for controlling the power, and a foot treadle for operating said valve device upon a



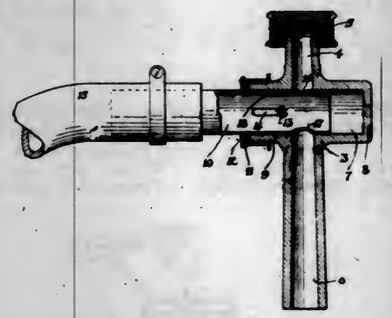
lateral movement thereof and for operating said button upon vertical movement in any lateral position of the treadle.

1,453,510. CAR-DOOR LOCK. WALTER H. LAWRENCE, Council Bluffs, Iowa, assignor of one-half to William A. Wells, Council Bluffs, Iowa. Filed Aug. 8, 1922. Serial No. 580,537. 1 Claim. (Cl. 292—201.)



The combination with a railroad car having oppositely disposed doors, pivoted latching devices cooperating with said doors for locking the same, of means for rocking said pivoted latching devices for unlatching the doors, said means comprising a horizontally disposed cylinder disposed within the car, a centrally disposed partition in said cylinder, pistons disposed within the cylinder on opposite sides of the partition, coiled springs for normally forcing said pistons inwardly, rods carried by said pistons and extending outwardly, pin and slot connections between the outer ends of the rods and the pivoted latching devices, air supply pipes connected to the cylinder adjacent the inner ends thereof and in communication with the interior of the cylinder at opposite sides of the partition, valve means for controlling the flow of air through said pipes and means for controlling said valves from outside of the car.

1,453,511. GOLF-BALL DIPPER OR RETRIEVER. LAURENCE BANCROFT MELLOR, Clifford Park, Germantown, Pa. Filed Mar. 15, 1921. Serial No. 452,605. 3 Claims. (Cl. 46—4.)



1. In a golf ball dipper or retriever, a skeleton frame formed of a supporting ring, and a rigid shoe extending below the plane of said ring transversely thereof, whereby a skeleton dipper is formed, which enables the device readily to be drawn through the water and foreign material to retrieve the ball sought to be reclaimed.

1,453,512. BANKING APPARATUS. CHARLES E. MEWOR, Spirit Lake, Iowa. Filed June 7, 1921. Serial No. 475,716. 4 Claims. (Cl. 232—1.)

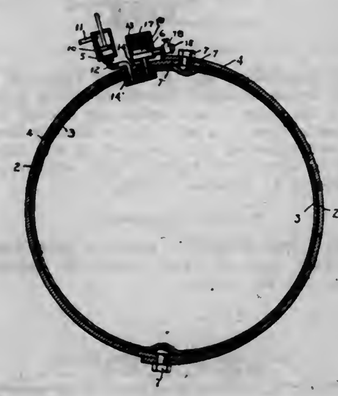
1. A banking apparatus comprising a vertical series of independent coin holder units, such units comprising alining vertical passages, each marked to identify it with a bank customer, means to record the deposits in the various units and identify them with the respective customers, and means to discharge the contents of the various units at one point the coins from an upper unit passing through a lower unit to the point of discharge.

1,453,513. WATER EJECTOR. CHARLES H. METZ, Canton, Ohio, assignor to Clara A. Metz, Canton, Ohio. Filed Aug. 27, 1921. Serial No. 496,079. 1 Claim. (Cl. 162—1.)

An ejector including a tubular cross case with a supply connection at its inlet end and a discharge nozzle at its outlet end, a tubular valve slidable endwise in the cross case with a hose extension on its outer end, means for guiding and limiting the endwise movement of the valve, differential ports in the valve alined with the inlet and outlet ends of the case when the valve is at one limit of its endwise movement, and another port in the valve alined with the inlet end of the case when the valve is at the other limit of the endwise movement.

1,453,514. BOTTLE CLOSURE OR CAP. ROBERT MURCHIE, Detroit, Mich. Filed Aug. 15, 1921. Serial No. 492,356. 2 Claims. (Cl. 215—5.)

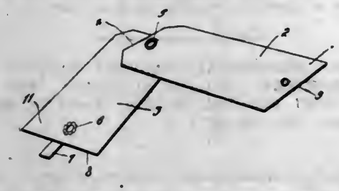
1. In combination with a bottle, a cap adapted to be received within the mouth thereof comprising an apertured layer adapted to fit snugly in said mouth, an imperforate layer hinged to said apertured layer and adapted to fold thereover within said mouth, a folding wall section positioned intermediate said layers so as



to fold therein against when the imperforate layer is closed down over the apertured layer and adapted to unfold so as to form side walls of a restraining spout leading from the aperture through the one of the said layers when the imperforate layer is upraised.

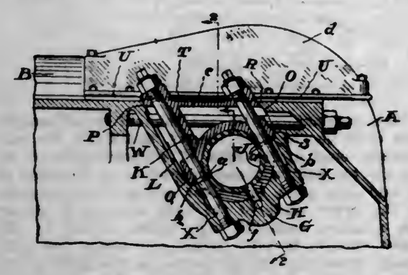
1,453,515. PROCESS OF MAKING VULCANIZATION ACCELERATORS. PAUL I. MURRILL, Plainfield, N. J., assignor to R. T. Vanderbilt Company, Inc., New York, N. Y., a Corporation of New York. Original application filed Aug. 8, 1921, Serial No. 490,686. Divided and this application filed Nov. 1, 1922. Serial No. 598,421. 6 Claims. (Cl. 260—112.)

6. The process of making an oxidization product of a metallic salt of an organic acid, which comprises, condensing dimethylamine with carbon bisulphide, precipitating with an aqueous solution of zinc sulphate to form an insoluble zinc salt, and then oxidizing the precipitate.



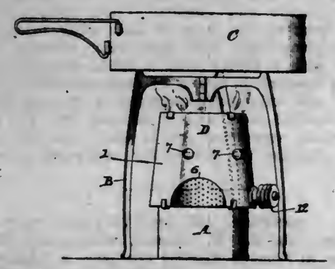
1,453,516. GAS HOLDER. JOSEPH R. PAYSON, Chicago, Ill. Filed Feb. 14, 1920. Serial No. 358,722. 8 Claims. (Cl. 220—3.)

1. A holder for fluid under pressure, comprising a fluid tight inner receptacle, and an outer receptacle having a wall composed of layers of tempered steel.



1,453,517. DUPLICATE TAG. STANLEY PENKRA, Long Island City, N. Y. Filed Nov. 20, 1920. Serial No. 425,502. 4 Claims. (Cl. 40—6.)

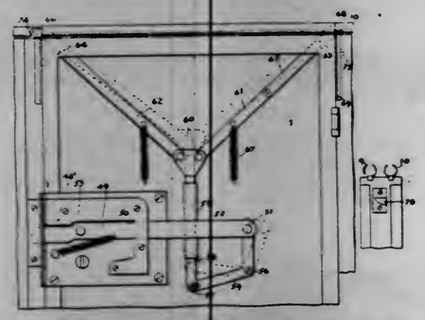
2. A device, as described consisting of a pair of independent tags identical in size and form, an eyelet connecting said tags at one end and an eyelet secured to one of said tags at its free end said last eyelet having



an elongated flexible tongue adapted to be bent over the other tag, whereby both free ends of the tags may be held together.

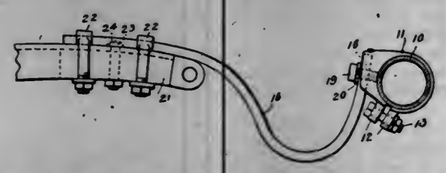
1,453,518. MAIN BEARING. WILLIAM T. PRICE, Easton, Pa., assignor to Price Engine Corporation, a Corporation of New York. Filed Aug. 7, 1920. Serial No. 401,850. 12 Claims. (Cl. 64—10.)

1. A main bearing comprising an engine frame having a slot therein the longitudinal axis of which is oblique to the vertical and in substantially the line of bearing wear, a bearing part in the closed end of said slot, a cap having a part adapted for insertion into the open end of said slot, having side surfaces fitting corresponding surfaces of said slot and a bearing part co-acting with said first bearing part, means for relatively adjusting said bearing parts lengthwise of the slot and for binding them securely in place, and means acting crosswise of the slot for binding said corresponding surfaces of said slot and cap together, said means being distinct from each other and separately operable at different times into definite final positions.



1,453,519. ALCOHOL-FLAME INTENSIFIER. ARCHIE MARTIN RAWLS, Dixon, Ill. Filed Apr. 3, 1922. Serial No. 549,042. 8 Claims. (Cl. 158—89.)

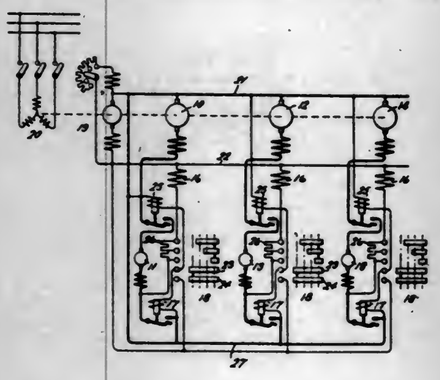
1. A burner for fuel receptacles having an open top comprising an outer sheet metal frusto-conical member, three cylindrical perforated sheet metal members con-



centrically arranged within the outer member, an inverted cone shaped flame spreader closing the top of the inner cylindrical member, and means for holding the parts in operative relation to each other.

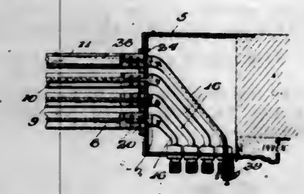
1,453,520. HORIZONTALLY-MOVING WINDOW FOR AUTOMOBILES. WILLIAM RICHARDSON, San Francisco, Calif. Filed Mar. 30, 1920. Serial No. 369,875. 3 Claims. (Cl. 296—47.)

1. The combination with the body of an automobile having doors in the sides thereof, and a top for said automobile, open at its sides, of windows mounted between the top and body and adapted to be extended to close said open sides, tracks for said windows mounted upon the upper edges of the body and doors, similar tracks mounted upon the top, means carried by the windows slidable in said tracks, and means for automatically presenting an obstruction in the path of the windows at the end of the body carried tracks to prevent movement of said windows into the path of the door, when said doors are open.



1,453,521. BUMPER-BAR-SUPPORTING BRACKET. PHILIP RIEDELE, Los Angeles, Calif. Filed Oct. 18, 1922. Serial No. 595,249. 1 Claim. (Cl. 293—55.)

In a device of the class described, the combination with a cylindrical bumper bar, of a split clamping collar for engaging and supporting said bumper bar, a bolt for securing the ends of said collar together to clamp the bumper bar, said collar being provided on its periphery with a flanged seat, a spring supporting arm having an aperture in one of its ends adapted to engage the seat, said collar being provided on its seat portion with a threaded bore, and a threaded bolt for securing the spring supporting arm to said collar, the end of said bolt engaging the bumper bar to prevent a turning movement.



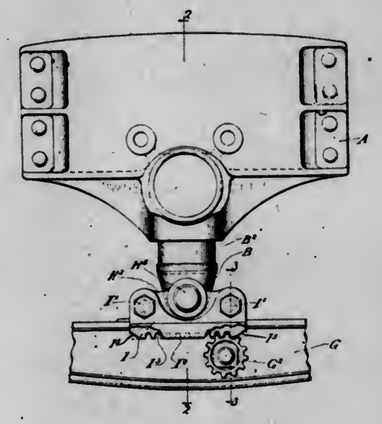
1,453,522. CONTROL OF DYNAMO-ELECTRIC MACHINES. HAROLD W. ROGERS, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Oct. 6, 1922. Serial No. 592,849. 4 Claims. (Cl. 172—179.)

1. The combination in a system of control of a generator having a separately excited field winding, a motor, a contactor, a master switch, and connections whereby operating the master switch energizes the con-

tactor to close and simultaneously connect the motor to the generator and the generator field winding to a source of supply through the contacts of the contactor.

1,453,523. OPERATING MEANS FOR WINDOW SASHES. WILLIAM E. ROGGE, Gulfport, Miss. Filed Feb. 16, 1922. Serial No. 536,996. 2 Claims. (Cl. 292—305.)

1. The combination with a window frame, of a plurality of sashes arranged therein, operating arms connected to the edges of said sashes and passing through said window frame at a point spaced laterally from said sashes, and adjusting nuts threaded on said arms and adapted to engage said window frame whereby to hold the sashes in an adjusted position.



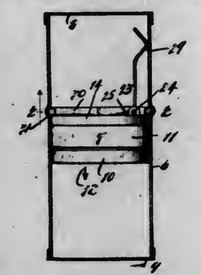
1,453,524. WIRE SPLICER. FRANK A. ROPP, Smithton, Pa. Filed June 16, 1922. Serial No. 568,850. 1 Claim. (Cl. 191—44.1.)

A wire splicer comprising an elongated body portion having a longitudinal bore adapted for the reception of wire ends to be connected, said body portion further provided with a slot opening into the said bore, a pair of oppositely disposed gripping members pivotally mounted in said slot, each of said members having a working face formed with teeth adapted to engage a respective wire

end, and a locking cover hinged to the body portion carrying a resilient element in engagement with said gripping members for locking the latter to the secured position.

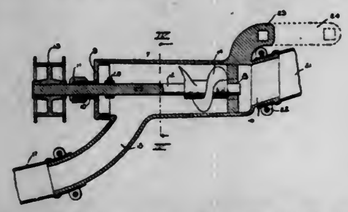
1,453,525. ADJUSTABLE FRONT AXLE. JAMES ROSS, Laporte, Ind., assignor to Advance-Rumely Company, Laporte, Ind., a Corporation of Indiana. Filed Apr. 17, 1922. Serial No. 553,721. 15 Claims. (Cl. 280—80.)

1. In combination with a vehicle frame an axle and means for moving said frame bodily with respect to said axle, said means including a sliding member supported from said axle and carrying one end of the vehicle frame and a pinion mounted for rotation in said axle and adapted to engage said sliding member and when rotated to move the same so as to move the frame laterally.



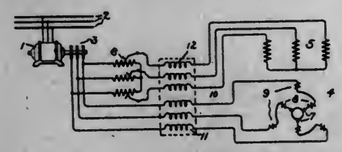
1,453,526. PROCESS OF FORMING BOX TOES FOR SHOES. ALBERT J. RYAN, Cincinnati, Ohio. Filed Jan. 15, 1920. Serial No. 351,666. 14 Claims. (Cl. 12—146.)

1. A method of preparing box toes for shoes which consists in independently forming a plastic blank over a forming die having the shape of the desired toe and an underlying channel with a base and side walls, and retaining said blank over said die and in said channel until in a state of fixation.



1,453,527. VOICE FOR DOLLS. FRANK G. SCHNEIDER, Brooklyn, N. Y. Filed Mar. 8, 1922. Serial No. 542,080. 3 Claims. (Cl. 46—46.)

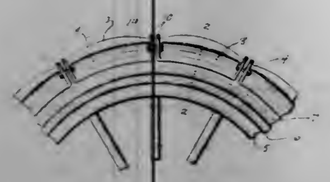
1. In a sound producing device, a casing, one end of which is substantially airtight, a weighted plunger having an opening therein, and movable within the casing and having airtight contact with the surface thereof to force air through said opening, a reed carried by the plunger and disposed in the opening therein, a valve operable by the movement of said plunger to control the



flow of air through the reed, and means within the casing to cooperate with the movement of the plunger to operate the valve.

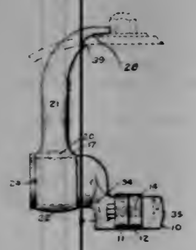
1,453,528. COOLER ATTACHMENT FOR ENGINES. HENRY NELSON SCHOFIELD, Frederick, Md. Filed Sept. 8, 1921. Serial No. 499,209. 2 Claims. (Cl. 123—175.)

2. In a cooler for engines, the combination of a horizontal tube constituting a casing and extending longitudinally of an engine at one side thereof and provided adjacent its front end with a branch outlet, said tube having an interior bearing at its rear end and provided at its front end with a removable cap having a bearing, a shaft extending longitudinally of the said tube and slidably supported in the said bearings concentric with the said tube, the front end of the shaft projecting outwardly beyond the cap, a rotary pumping element consisting of a screw mounted on the rear portion of the shaft within the said tube, adjustable means mounted on the shaft and operating with the pumping element to limit the slidable movement of the shaft, means for connecting the rear end of the tube with the water jacket of the engine and for connecting the branch outlet with the radiator of the engine, a belt pulley mounted on the projecting front end of the shaft and arranged to receive the fan belt of the engine, the longitudinal movement of the shaft permitting the pulley to adjust itself automatically to the fan belt.



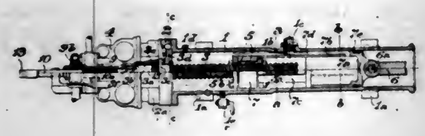
1,453,529. COMPOUND REGULATING SET FOR INDUCTION MOTORS. WALTER SEIZ, Baden, Switzerland, assignor to General Electric Company, a Corporation of New York. Filed Nov. 30, 1921. Serial No. 518,753. 8 Claims. (Cl. 172—274.)

1. In combination a source of supply, an asynchronous motor having its primary winding connected thereto, a



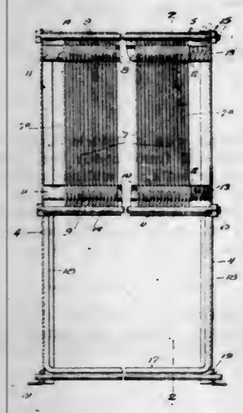
commutator machine connected in cascade with the secondary winding of said motor, means for exciting said commutator machine comprising inductively related exciting windings thereon, one of said windings being a series winding and means for neutralizing the inductive effect of said series winding on said other winding.

1,453,530. PNEUMATIC-TIRE ATTACHMENT. WILLIS A. SHUEY, Boise, Idaho. Filed Aug. 5, 1919. Serial No. 315,505. 1 Claim. (Cl. 152—16.)



In a circumferentially adjustable segmental armor for tires a plurality of members embodying suitably curved tread fitting shoe sections, the longitudinal side faces of which are free of attaching means, each of said shoe sections being formed with a transverse peripheral flange at each end, each provided with a spaced pair of bolt holes towards the top of the section ends, and a central longitudinal rib extending between and merging at its ends into said respective end flanges, in combination with means for securing said shoe sections around the tire tread, independently of their longitudinal side walls to permit of limited radial bodily play, with said end flanges adjacent and slightly spaced to permit of endwise relatively individual adjustment of each shoe section, the said securing means embodying non-resiliently mounted bolts extending through complementary pairs of the bolt holes of each adjacent pair of said end flanges, and nuts for said bolts.

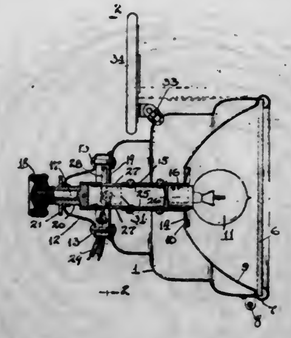
1,453,531. AUTOMOBILE LOCK. WILLIAM J. SMITH, New York, N. Y., assignor of one-fourth to Jerome S. Rawson and one-fourth to James A. H. Colgan, both of New York, N. Y. Filed Oct. 21, 1921. Serial No. 509,266. 8 Claims. (Cl. 70—129.)



6. In an automobile lock the combination of a steering post housing clamp, a shaft integral therewith, a lock rigidly mounted in said shaft, a locking bar mounted so as to rotate freely on said shaft and having a head portion adapted to fit the angle formed by any two spokes of a steering wheel and adapted to be locked to said shaft in the upright position in the angle formed by any two spokes of a steering wheel.

1,453,532. STEAM-ENGINE-VALVE-REVERSING GEAR. FREDERICK R. STEVENS, Schenectady, N. Y. Filed Jan. 2, 1923. Serial No. 610,232. 6 Claims. (Cl. 74—40.)

1. In a steam engine valve reversing gear, the combination of a cylinder, closed at one end; a screw rotatable therein; a connecting member, fitting in said cylinder and effecting closure of the opposite end thereof, and adapted to be coupled to a reach rod; and a nut, fixed in said connecting member and engaged by the screw.



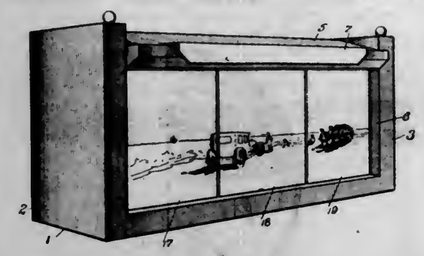
1,453,533. LOOM REED. LOUIS STROHACKER, Freeport, Ill., assignor to Structo Manufacturing Company, Freeport, Ill., a Corporation of Illinois. Filed May 15, 1922. Serial No. 560,909. 5 Claims. (Cl. 139—87.)

5. A loom reed comprising two pivotally supported, side frame members, upper and lower dent holding bars, substantially U shaped in cross section, the sides of which are bulged outwardly to form a channel therebetween, dents extending between said bars with their end portions passing through said channels, spacing discs located in said channels between the dents, and tie rods extending through the hollows of said bars along the ends of said dents, there being nuts upon said tie rods for clamping the side frame members upon the dent holding bars, and clamping said dents and discs between said side frame members.

1,453,534. LAMP FOR AUTOMOBILES AND THE LIKE. FREDERICK W. WAKEFIELD, Vermilion, Ohio, assignor to The F. W. Wakefield Brass Company, Vermilion, Ohio, a Corporation of Ohio. Filed Jan. 24, 1917. Serial No. 144,108. 7 Claims. (Cl. 240—44.)

5. In a lamp of the character described, the combination of a suitable casing open at both ends; a glass closing the front end of said casing; a removable plate closing the rear end of said casing; a reflector mounted in said casing, said reflector having a central aperture; a spindle both rotatably and longitudinally adjustably mounted in said plate in line with such aperture, said

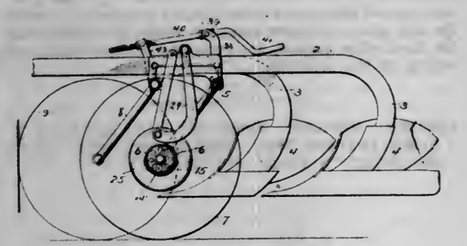
spindle being provided with a lamp-socket at its forward end; and circuit connections to such socket controlled by the rotative position of said spindle.



1,453,535. LIGHT SIGNAL. WESLEY B. WELLS, Pittsburgh, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Feb. 24, 1921. Serial No. 447,443. 2 Claims. (Cl. 240—44.)

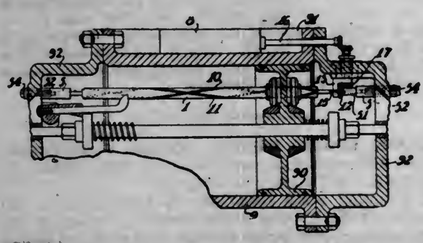
1. A light signal comprising a frame, an optical projecting device mounted in said frame, a bracket attached to said frame and adjustable vertically with relation thereto, said bracket having a horizontal member provided with relatively large round holes, a lamp receptacle resting on said member and provided with relatively small holes, a plate located underneath said horizontal member and provided with threaded holes, screws passing snugly through the holes in said receptacle and through the holes in said bracket with considerable clearance and screwing into the holes in said plate, and a lamp mounted in said receptacle for supplying light to said optical projecting device.

1,453,536. SIGNBOARD. FRED G. WHITE, Kansas City, Mo., assignor to Lewis R. Long, Kansas City, Mo. Filed Mar. 11, 1921. Serial No. 451,521. 5 Claims. (Cl. 40—76.)



1. A device of the class described comprising rotatable, indicia-carrying drums having complementary aligning faces and mounted for rotation on fixed axes, mechanism for simultaneously rotating the drums to successively present complementary aligning faces, said mechanism including a draw bar pitman for actuating the drums,

a cam having a neutral portion and a pitman-actuating portion, means for actuating the cam, and locking means

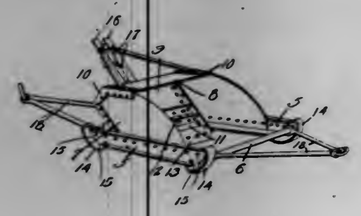


for temporarily engaging the drums to hold them in fixed aligning portions, said locking means being controlled from the cam-actuating means.

1,453,537. POWER-LIFT MECHANISM FOR PLOWS. HERMAN E. ALTGELT, New Braunfels, Tex., assignor to Oliver Chilled Plow Works, South Bend, Ind. Filed Apr. 5, 1919. Serial No. 287,756. 10 Claims. (Cl. 97—73.)

4. In an agricultural implement of the character described, the combination with a frame, an axle and a carrying wheel, of an oscillatory lifting member loose on the axle, means for locking said member to the carrying wheel, and a rigid lifting arm pivotally connected with the frame, said lifting arm extending between the carrying wheel and lifting member and pivotally connected directly with the outer face of the latter.

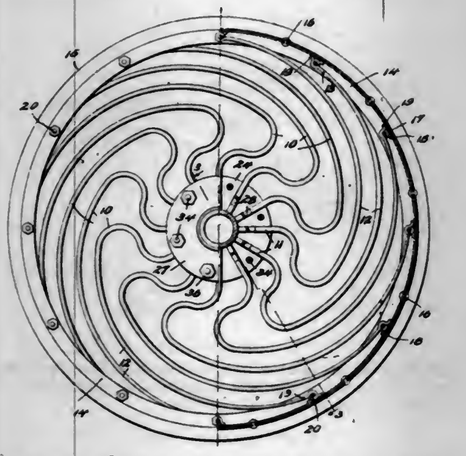
1,453,538. FRACTIONAL COUNTER. LACEY BADOS, Portland, Oreg., assignor to American Liquid Meter Company, Portland, Oreg., a Corporation of Washington. Filed Nov. 7, 1921. Serial No. 513,350. 13 Claims. (Cl. 235—91.)



1. In combination, in a meter having a reciprocable member, mechanism operable by rotation in one direction only, and means operable by movement of the meter member in either direction for causing rotary movement of the mechanism in the single operating direction.

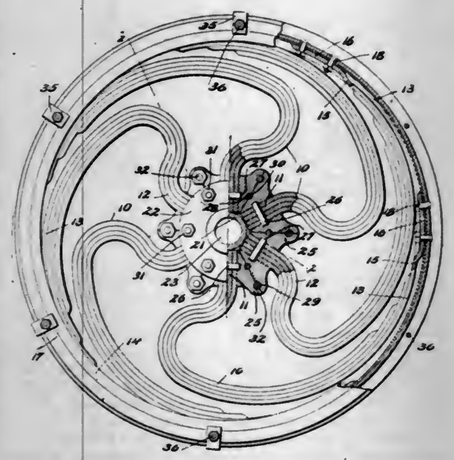
1,453,539. HEADLIGHT LENS. ROBERT H. BARZ, Stockton, Calif. Filed May 15, 1922. Serial No. 560,886. 1 Claim. (Cl. 240—48.4.)

A non-glare attachment for automobile headlight lenses comprising a metal beading adapted to be placed about the periphery of the lens, a metallic and substantially semicircular hood mounted on the upper half of the beading and projecting inwardly thereof, said hood following the contour of the reflector of the headlight and the inner edge thereof sloping inwardly from its lower edges toward the top, and a reflector mounted within the hood along the inner edge thereof, the reflecting surface facing inwardly of the headlight.



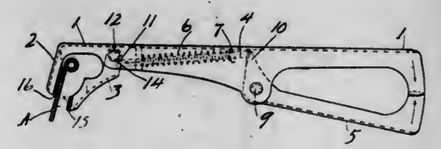
1,453,540. BUCKET. FITCH H. BEACH and FRED S. BEACH, Charlotte, Mich. Filed Dec. 22, 1921. Serial No. 524,223. 1 Claim. (Cl. 37—135.)

A scoop including side bars, a body portion secured to the side bars, said body portion including side members, a rear wall having connection with the side members and including an upper stationary section and a lower digging section, means for hingedly connecting the digging section to the upper stationary section, the lower edge of the digging section extending an appreciable distance below the lower edges of the side bars to dig into the surface over which the scoop is being moved, and a top section for connecting the side members.



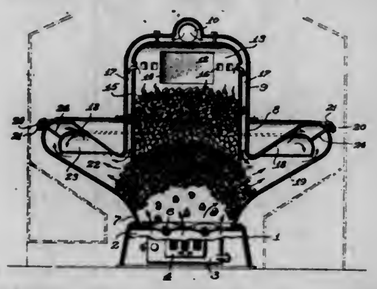
1,453,541. SPRING WHEEL. WILLIAM JAKOB BEISEL, Port Richmond, N. Y. Filed July 26, 1921. Serial No. 487,615. 10 Claims. (Cl. 152—50.)

1. A spring wheel comprising in combination a continuous channel bar rim facing inwardly, a series of flat metal spring spokes curved between their ends and having outer end portions extending along and close to the inner surface of the base of the channel bar rim between its side flanges, and pivot pins passing laterally through said side flanges and operatively connected to said spokes, the said end portions being spaced inwardly from the base of the channel bar rim to said pins but having extensions beyond the pivot pin making yielding contact with



the inner face of the rim and reversely curved end portions extending from said pins making contact with said inner face of the rim in advance of said pins.

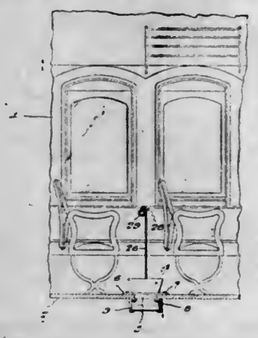
1,453,542. SPRING WHEEL. WILLIAM JAKOB BEISEL, Port Richmond, N. Y. Filed Dec. 7, 1921. Serial No. 520,577. 2 Claims. (Cl. 152—50.)



1. In a vehicle wheel, the combination with a hub of an inwardly facing channel bar rim, a series of similar leaf spring spokes entering said hub radially and secured thereto, each spoke being curved laterally of the radial plane of its inner end at a point near the hub, then reversely with substantial uniformity back to a point near said plane and then on a gradually increasing radius, the ends of the outer leaves entering between the side flanges of the rim, the end portion of the outer leaf beyond the end of the next inner leaf being offset outwardly a short distance lying in close contact with the inner surface of the base of the rim and bolts passing through and connecting said end portions and two rims.

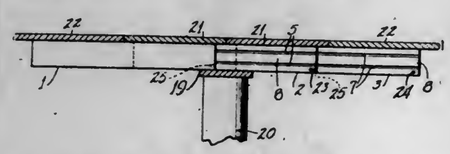
1,453,543. GRASPING INSTRUMENT. FRED BONSER, Colorado Springs, Colo. Filed May 19, 1921. Serial No. 471,023. 2 Claims. (Cl. 294—31.)

1. A grasping instrument comprising in combination, a stalk, extending the whole length of the instrument; a jaw member at one end of said stalk and integral therewith and extending at an angle of about forty-five degrees from the line of extension of said stalk; a separate jaw provided to oppose said integral jaw and to register therewith and pivotally secured at its upper end to the under side of said stalk; a plunger pin pivotally secured at its forward end to said separate pivotally secured jaw to operate it against said integral jaw; a bell crank pivoted on said stalk on its under side near its longitudinal center with its longer lever extending longitudinally with said stalk to its end and its short lever extending toward said stalk, the end of said short lever being pivotally secured to the opposite end of said plunger pin from said pivoted jaw; a coil spring surrounding said plunger pin and normally forcing it toward said bell crank, thus drawing said pivotally suspended jaw from said integral jaw, and soft cushions on the faces of said jaws, for the purposes specified.



1,453,544. FURNACE OR STOVE. ALBERT A. BRUDER, Holly, Mich. Filed Oct. 20, 1921. Serial No. 509,024. 3 Claims. (Cl. 126—74.)

1. A magazine stove comprising a fire box having a substantially semi-circular heating radiating drum formed by parallel walls disposed at an angle to the vertical axis of the stove, said fire box having an upper cylindrical end supported by one of the walls of said drum, an exhaust flue for said drum, a cover mounted on the cylindrical end of said fire box and provided with an air inlet opening, and a dome suspended in said cover and having a doorway at said cover so that fuel may be placed in said dome, said dome cooperating with said cover in providing a passage opening into said drum, and said drum having openings communicating with said passage.



1,453,545. AUTOMATIC CUSPIDOR. EDWIN W. BUTTON and CLARENCE E. BUTTON, Corning, N. Y. Filed Aug. 18, 1921. Serial No. 493,303. 1 Claim. (Cl. 4—39.)

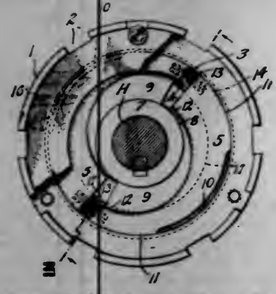
In a cuspidor for the floor of cars, etc., including, in combination, a bowl having an open bottom provided with an extending neck that is received in an opening in the floor, and means securing the bowl on the floor, a casting having an opening therethrough in register with the opening in the neck of the bowl, said casting comprising two similar sections, one of which being secured to the under face of the floor, and adjustable means securing the second section to the last mentioned section, said sections having at their confronting surfaces a substantially rectangular depression entering from one side of the casting, a flat valve received in the depression,

guided by the side walls thereof and limited in inward movement by contact with the inner wall thereof, a stem centrally formed on the outer edge of the valve, guide means for the stem, and a helical spring surrounding the stem and exerting a tension between said guide means and said outer end of the plate whereby to sustain the same in a position to normally close the passage through the casting, and means for moving the stem to influence the valve to uncover said opening.

1,453,546. TABLE-SLIDE CONSTRUCTION. EARL H. COOK, Watertown, Wis. Filed Feb. 6, 1922. Serial No. 534,511. 2 Claims. (Cl. 45—115.)

1. A table slide construction comprising three members having their vertically disposed sides slidably engaging with each other, L-shaped grooves in the abutting surfaces of each slide, the aligned grooves of adjacent member forming U-shaped slots the portions of the slots connecting the arms of the slots being disposed adjacent to the top and bottom of said members and in a horizontal plane, and connecting plates adjustably carried by said members and being adapted to slidably connect said members together, said plates having horizontally disposed sides adapted to slidably engage with the horizontal portions of said grooves, whereby the maximum amount of supporting surface is provided between the members by the connecting plates, the plates connecting the end members to the central member being upwardly offset so as to elevate the outer ends of the end members slightly with respect to the central member.

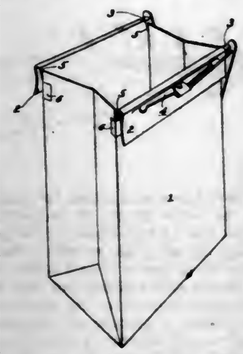
1,453,547. BARREL-HOLDING DEVICE. BEN F. CULVER and WILLIAM H. DOYLE, Platteville, Wis.; said Culver assignor to said Doyle. Filed May 18, 1922. Serial No. 561,912. 1 Claim. (Cl. 248—58.)



A barrel supporting device, comprising oppositely arranged pairs of legs, pivot elements passing through the

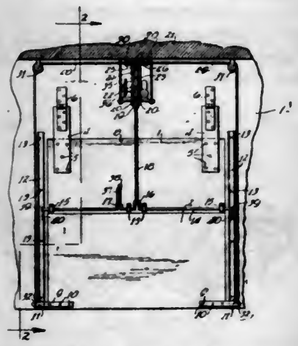
upper ends of the legs in opposite pairs whereby the pairs of legs may be shifted to opened and closed positions, a brace connected with one leg and adapted for detachable connection with the leg in the opposite pair, a hoop arranged between the upper ends of the legs and apertured for receiving the pivot elements, a substantially U-shaped supporting element having its ends apertured and arranged between the upper ends of said

legs and pivotally receiving the pivot elements, a diagonal brace serving to detachably connect the hoop and substantially U-shaped supporting elements, and a diagonal brace pivotally connected with the substantially U-shaped supporting element and adapted for detachable engagement with one of said legs, the legs, hoop, and substantially U-shaped supporting element all turning upon the same pivot elements and adapted when collapsed to lie in substantially the same plane.



1,453,548. OVERRUNNING CLUTCH. TYRRELL H. DUNCOMBE, Detroit, Mich. Filed Dec. 16, 1921. Serial No. 522,771. 4 Claims. (Cl. 192—41.)

1. In a device of the character described, the combination with a driving member and a driven member, of a member secured to one of said first named members to turn therewith and having an annular contact surface, a cam member secured to the other of said first named members to turn therewith, a pair of friction shoes interposed between said annular face and said cam member and means interposed between the adjacent ends of said shoes for yieldingly holding said shoes in spaced relation to each other and in yielding contact with said annular face.

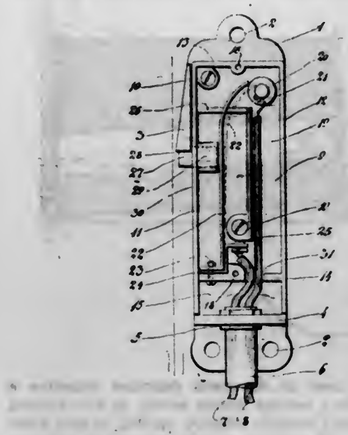


1,453,549. BAG. ARTHUR J. FARNSWORTH and ETHELBERT M. ST. CLAIRE, San Francisco, Calif., assignors to W. S. Beach, San Francisco, Calif. Filed Mar. 15, 1920. Serial No. 366,047. 1 Claim. (Cl. 229—53.)

A relatively tall paper bag formed to leave an oblong opening in the top thereof, the material on two opposite sides of the bag terminating in ends extending beyond the ends of the other two sides to leave relatively long attaching flaps to be received by a bracket for suspending the bag with the opening therein held wide open,

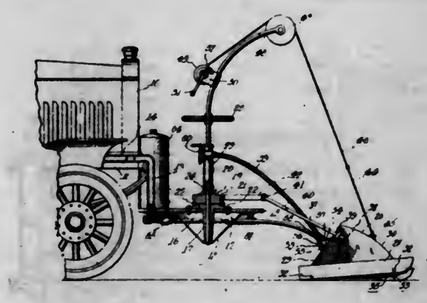
the corners of the bag adjacent said flaps being slit a short length of the corner folds, and patches attached to the bag sides around the corner folds to reinforce the folds at the termination of the slits.

1,453,550. DOOR-OPERATING DEVICE. JOHN E. W. FOGAL, Quincy, Ill. Filed Apr. 9, 1921. Serial No. 460,044. 2 Claims. (Cl. 268—1.)



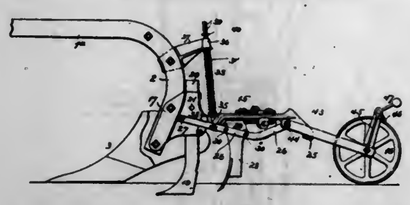
1. The combination with a folding door consisting of a plurality of hingedly connected sections arranged to be edgewise alined in a vertical plane when in closed position of a horizontally disposed rock shaft secured to the upper section of said door and being formed with locking members projecting laterally of the door, cooperating locking members secured at opposite sides of the door in position to be engaged normally by the first named locking members to hold the door against movement from closed position, cables connected to said rock shaft intermediately and to the lower section of said door, and means for operating said cables to release the door and to move the sections thereof toward folded position.

1,453,551. ELEVATOR INTERLOCKING DEVICE. JOHN E. W. FOGAL, Quincy, Ill., assignor to Fogal-Williams Safety Devices, Inc., Quincy, Ill., a Corporation of Illinois. Filed Oct. 19, 1921. Serial No. 508,810. 4 Claims. (Cl. 187—31.)



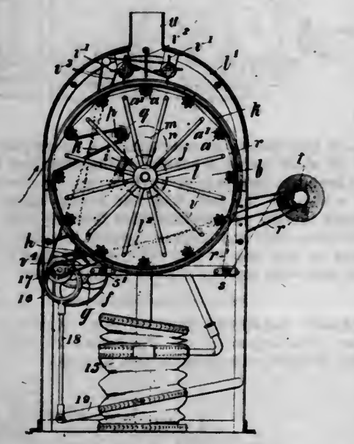
2. A device of the character described comprising a base, a cam surfaced tooth integral with said base, a casing of insulating material carried by said base, a contact post carried by said casing, a spring contact

member carried by said casing and normally out of engagement with said contact post, said casing having an opening therethrough adjacent one end of said cam



tooth, and a plunger slidably disposed in said opening and adapted to move said spring contact member to engage said contact post when pressure is brought to bear thereon.

1,453,552. MACHINE TO MELT SNOW AND ICE. HERVEY L. FULLER, WALTER F. NESBIT, and PER O. PETTERSON, Galesburg, Ill. Filed Nov. 22, 1921. Serial No. 517,042. 2 Claims. (Cl. 126—271.2.)

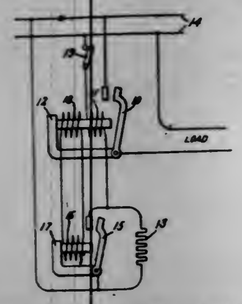


2. In apparatus for melting snow and ice, the combination with a wheeled vehicle, of a substantially horizontal support carried thereby, an upstanding rod pivotally mounted upon the support to turn upon its longitudinal axis, a horizontally swinging member mounted upon the rod, a flame hood arranged upon one side of said member, a pair of arms having their forward ends pivotally connected with the hood and their rear ends pivotally connected with said member to swing in a substantially vertical plane, a pulley secured to the upper portion of said rod, a winding device mounted upon the rod, a flexible element engaging the winding device and extending about the pulley and connected with the hood, a substantially horizontal pipe pivotally mounted upon the rear side of the hood, burner elements carried by the pipe and projecting into the hood, a gear mounted upon the pipe to turn it, means mounted upon the rod to operate said gear, and a flexible connection between the gear operating means and gear.

1,453,553. COMBINED PLOW AND PLANTER. ARTHUR D. GALLAGHER, South Bend, Ind., assignor to Oliver Chilled Plow Works, South Bend, Ind. Filed July 23, 1920. Serial No. 398,354. 3 Claims. (Cl. 111—83.)

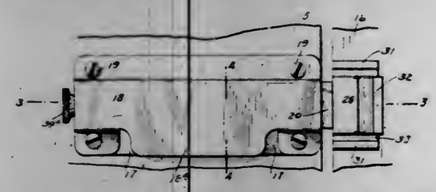
1. The combination with a two wheeled lister plow having lifting means, a planter in rear of the plow, and a presser wheel in rear of the planter, of draw bars attached to the planter and pivotally connected with the plow, draw bars for the presser wheel having pivotal connection with the planter, a part cooperable with the plow and with the planter to raise the latter when the plow is raised, and a part carried by the planter and cooperable with the draw bars of the presser wheel for raising the latter when the planter is raised.

1,453,554. MACHINE FOR USE IN DRYING OR TREATING PHOTOGRAPHIC PRINTS, FILMS, AND THE LIKE. ELLIS GRABER, Tunbridge Wells, England. Filed Dec. 4, 1922. Serial No. 604,937. 10 Claims. (Cl. 34—48.)



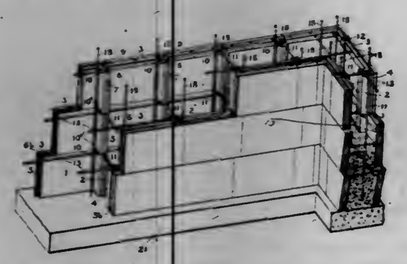
5. In a machine for drying and otherwise treating photographic prints, films and so forth, the combination comprising a hollow shaft, a pair of plates mounted on said shaft, a plurality of rollers revolubly mounted between said plates, driving means for said shaft and said rollers, a plurality of radial pipes communicating with said hollow shaft, and a plurality of perforated pipes connected to said radial pipes, said hollow shaft, radial pipes and perforated pipes serving for directing air on to the prints, films and so forth on their passage between the plates and over the rollers.

1,453,555. ELECTROMAGNET AND CONTROL THEREFOR. GEORGE E. STACK, Ballston Spa, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Dec. 21, 1920. Serial No. 432,331. 7 Claims. (Cl. 175—335.)



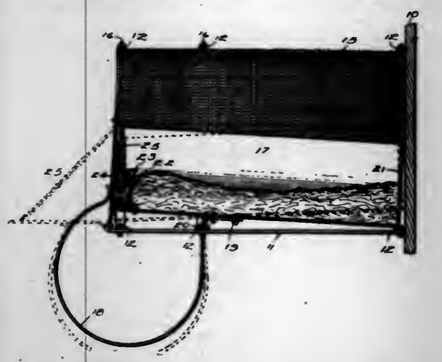
2. The combination with an electromagnet having an operating winding and an auxiliary winding inductively

related thereto, of a movable member operated in response to the energization of the operating winding, and means



operated responsively to the voltage induced in the auxiliary coil for automatically reducing the current in the operating winding.

1,453,556. DOOR LATCH AND LOCK. HENRY A. THEXTON, Minneapolis, Minn., assignor to Thexton Manufacturing Company, Minneapolis, Minn., a Corporation of Minnesota. Filed July 20, 1920. Serial No. 397,626. 15 Claims. (Cl. 70—29.)



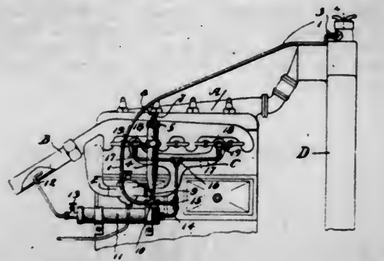
1. A lock having in combination a rectangular boxlike bolt of sheet metal, a boxlike casing enclosing the same and having a tongue bent up from one side thereof forming a stop for the bolt, said bolt having spaced tongues pressed therein at opposite sides forming slots, and an adjustable stop and trigger member adapted to be received in any one of said slots and adapted to contact with said stop member formed in the casing.

1,453,557. MASONRY STRUCTURE. WILLIAM F. WAGNER, Washington, D. C. Filed June 29, 1922. Serial No. 571,799. 14 Claims. (Cl. 72—30.)

1. In a masonry structure, two series of blocks arranged apart so as to leave a space between them, the blocks of each series being provided with inner retaining supports and with sockets on their upper surfaces, in combination with aligning rods engaging the retaining supports and each spanning a number of said blocks, and transverse tie bars, each engaging the sockets of opposite blocks with its ends.

1,453,558. HEN'S NEST. WILLIAM H. WAY, Ankeny, Iowa. Filed June 12, 1922. Serial No. 567,560. 5 Claims. (Cl. 119—50.)

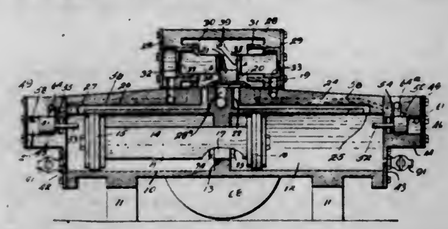
1. A hen's nest of the class described including a housing section, a moving bottom section in said housing section, a closure member hingedly secured to said housing section, a rod mounted on said bottom and extended through said housing section for forming a pivot for said bottom section, the free end of said rod being received against the closure member, whereby movement of said bottom will cause movement of the closure member for the purposes stated.



1,453,559. WINCH. BENJAMIN F. WEBB, Sistersville, W. Va., assignor, by direct and mesne assignments, to Webb Multispeed Winch Manufacturing Company, Sistersville, W. Va., a Corporation of West Virginia. Filed Feb. 14, 1922. Serial No. 536,435. 4 Claims. (Cl. 254—186.)

1. In a mechanism as characterized, a driving shaft, a winding drum loosely mounted on said driving shaft, a planetary gearing interposed between said driving shaft and one end of said drum for effecting the rotation of the latter correspondingly with the rotation of the shaft, and a second planetary gearing interposed between said driving shaft and the other end of said drum for effecting the rotation of the latter in a direction reversed to the direction of rotation of the shaft.

1,453,560. ATTACHMENT FOR INTERNAL-COMBUSTION ENGINES. WALTER W. WHETSTINE, Portland, Oreg. Filed Aug. 20, 1920. Serial No. 404,868. 6 Claims. (Cl. 123—25.)

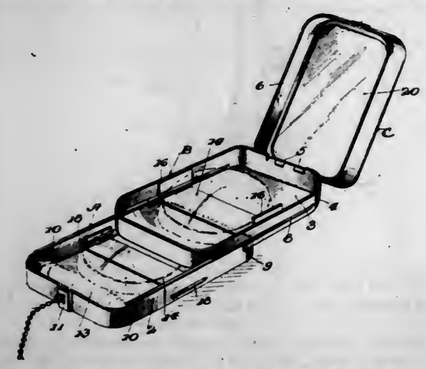


1. The combination with an internal combustion engine having a conventional fuel intake means and exhaust

discharge means, of a reservoir adapted to contain glycerin, moisture supply means for supplying moisture to the glycerin, means connecting said exhaust discharge means with the fuel intake means, and means

connecting said glycerin reservoir with the connecting means between the exhaust discharge means and the fuel intake means whereby glycerin is volatilized and introduced into the explosive mixture passing to the firing chamber.

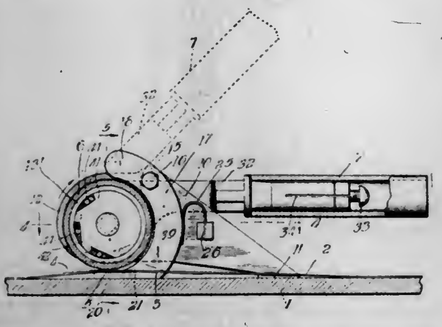
1,453,561. STEAM PUMP. WILLIAM WILLSHAW, Des Moines, Iowa. Filed Sept. 6, 1921. Serial No. 498,930. 6 Claims. (Cl. 103—51.)



4. In a steam pump, a cylinder having a transverse partition, a double-headed piston slidably mounted in said partition, a steam cylinder, passages connecting said steam cylinder with said first-named cylinder on opposite sides of said partition, a slide valve for controlling the flow of steam through said passages, a piston in the steam cylinder operatively connected with said valve, and means controllable by the movement of said first piston for controlling the flow of steam from said steam cylinder and the movement of the second piston.

1,453,562. PROCESS FOR THE PRODUCTION OF ALKALI-EARTH-METAL PERMANGANATES. ROBERT E. WILSON, LEON W. PARSONS, and STANLEY L. CHISHOLM, Washington, D. C. Filed Sept. 27, 1918. Serial No. 255,975. 13 Claims. (Cl. 23—13.)

1. In a process of making permanganates, adding to barium manganate a reagent which reacts therewith to produce permanganate radical and treating the sme with a compound of an alkali-earth metal and forming the corresponding permanganate.



1,453,563. VANITY CASE. SAMUEL ALBERT, New York, N. Y. Filed Oct. 17, 1922. Serial No. 595,177. 6 Claims. (Cl. 132—83.)

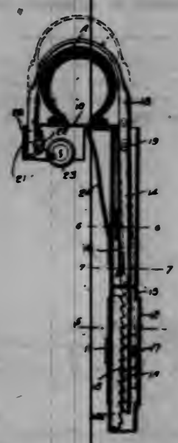
5. A vanity case comprising a main box, a cover box slidably connected with the main box and sliding in the direction of length of said main box into and out of register therewith, the main box having at one end fastening means cooperating with complementary means hereinafter specified and a lid hinged at one end to the end of the cover box opposite the fastening means of the main box and having at the free edge of said lid fastening means cooperating with those on the end of the main box, all substantially as described, whereby when the vanity case is closed the fastening means may operate to secure the two boxes and the lid in closed relation and

when the case is opened the two boxes and the interior of the lid may be exposed in alinement, as and for the purposes set forth.

1,453,564. STRETCHING TOOL. ARTHUR G. G. GUENTHER, Chicago, Ill., assignor to Signode System, Inc., Chicago, Ill., a Corporation of Delaware. Filed July 25, 1918. Serial No. 246,665. 20 Claims. (Cl. 254—51.)

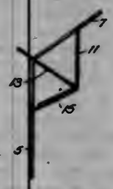
1. A stretching tool of the class described comprising means to engage overlapped strap ends and feed them longitudinally in opposite directions, said means being adapted automatically to grip the strap ends between them with a grip varying according to the tension of the strap.

1,453,565. AGRICULTURAL IMPLEMENT. EDWARD M. HEYLMAN, South Bend, Ind., assignor to Oliver Chilled Plow Works, South Bend, Ind. Original application filed Mar. 14, 1918, Serial No. 222,334. Divided and this application filed Sept. 27, 1918. Serial No. 255,928. 1 Claim. (Cl. 64—10.)



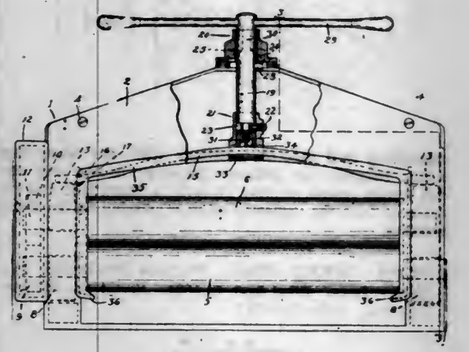
The combination of a supporting member provided with a hub member having two portions differing in diameter, a soil engaging disk, a spindle having a central bore provided with a threaded portion and having two bearing portions differing in diameter, bushings disposed between the hub and the respective bearing portions of the spindle and separated from each other, forming a chamber between them, said spindle having a part fixed to the rear face of the disk, a bolt in the bore of the spindle and headed at its rear end, said bolt terminating at its other end, rearwardly of the disk and engaging the threaded portion of the bore in the spindle, a disk dis-

posed between the head of the bolt and the free end of the spindle and engaging the latter, and a cap entering



said hub and inclosing the free end of the spindle and the headed end of said bolt.

1,453,566. TIRE HOLDER. ELIJAH GORDON JEFFRIES, Tacoma, Wash. Filed July 1, 1921. Serial No. 481,837. 2 Claims. (Cl. 224—24.)



1. A tire holder of the class described, including a rim adapted to receive a tire, clamps having radially disposed shanks movable longitudinally relatively to each other, the respective shanks overlapping, means to lock the shanks against relative movement, said shanks having terminal clamping members in hooked form, sockets on the rim in which the ends of the clamping terminals are receivable, and means to lock the said ends in the sockets.

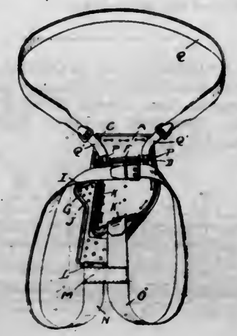
1,453,567. FOLDABLE STRUCTURE. JOHN D. MACDONALD, Boston, Mass., assignor to Forbes Lithograph Manufacturing Company, Boston, Mass., a Corporation of Massachusetts. Filed Aug. 2, 1919. Serial No. 314,955. 6 Claims. (Cl. 206—44.)

1. A foldable structure comprising hingedly associated sheet-like elements of card or the like slitted across the line of junction to provide a relatively movable strip connected at its ends to the sheets and having a hinged brace on one side of the strip.

1,453,568. WRINGER. EDGAR D. MISNER, Detroit, Mich., assignor of one-fifth to Julius J. Battenfeld and one-fifth to Henry Retz, both of Detroit, Mich. Filed May 20, 1921. Serial No. 471,136. 16 Claims. (Cl. 68—32.)

7. In a wringer, the combination with a frame and a pair of rolls mounted thereon, of movable means rotatable in opposite directions for moving one of said rolls toward the other, and means for holding said rotatable means in different predetermined positions when said movable roll is moved toward the other.

12. In a wringer, the combination with a pair of rolls, of a member connected to one of said rolls and adapted to move the same toward the other, a tensioning rod loosely connected to said member and adjustable to move the same and the roll connected thereto toward the other roll, said rod being adapted to be held in an adjusted position, and yieldable means for holding said member in a predetermined position with respect to said rod when said rod is released.

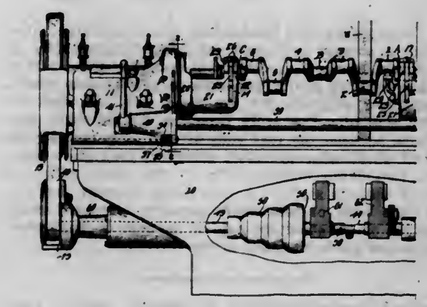


1,453,569. CHICKEN ROOST. WINFIELD E. RANDALL, Eyota, Minn. Filed Aug. 31, 1922. Serial No. 585,463. 2 Claims. (Cl. 119—25.)

1. A chicken roost embodying an elongated body formed with a longitudinal channel opening through the top thereof and having a longitudinal apertured partition in the channel dividing it into small and large communicating compartments, the large compartment being intended to hold absorbent material for the insecticide and the small compartment being intended to be filled with the liquid insecticide to thoroughly and gradually saturate the absorbent by permitting passage of the liquid through the aperture.

1,453,570. TRUSS. WILLIAM SCHUERG, Menard, Tex. Filed Dec. 16, 1921. Serial No. 522,963. 9 Claims. (Cl. 128—117.)

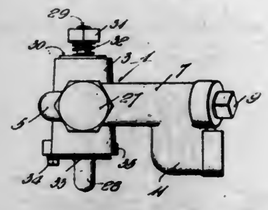
1. A truss including a pad, a back plate consisting of a main section and a separate scrotal section flexibly connected to the main section, and lying in substantially the same plane therewith and flexible attaching con-



nections extending from both of said back plate sections, said pad extending across both the main and scrotal sections of the back plate.

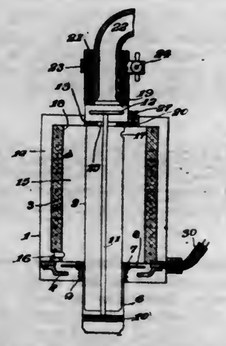
1,453,571. PROCESS FOR TREATING PHOSPHATE ROCK. RAHL P. STEVENSON, Newton, Mass. Filed Jan. 15, 1921. Serial No. 437,579. 3 Claims. (Cl. 71—7.)

1. A process for treating pebble phosphate initially containing tricalcium phosphate, calcium carbonate, moisture and organic matter, which consists in heating the crude phosphate without addition of other materials, to a temperature not over 2,000 degrees Fahrenheit approximately to decompose the calcium carbonate and cause a substantially complete conversion of the free lime resulting from the decomposition of the calcium carbonate, as phosphate.



1,453,572. MACHINE FOR GRINDING CRANK PINS. PAUL STONER, Waynesboro, Pa., assignor to Landis Tool Company, Waynesboro, Pa., a Corporation of Pennsylvania. Filed Nov. 18, 1920. Serial No. 424,901. 23 Claims. (Cl. 51—237.)

1. In a grinding machine, opposed chucks to hold the work, and means for driving said chucks comprising aligned shafts, differential gearing connecting said shafts and connections from the shafts to the chucks.



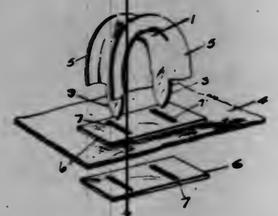
1,453,573. AUTOMATIC CUT-OFF FOR GAS LINES. THEODORE TOLLA and EDGAR WARREN BOOTS, Ellwood City, Pa. Filed May 8, 1922. Serial No. 559,471. 10 Claims. (Cl. 67—115.)

1. An automatic cut-off for gas supply lines comprising a body provided with main and auxiliary passages through which the gas is designed to pass separately and in succession, a valve in said main passage, a runway communicating with both of said passages, a retainer in the run-way for co-operation with said valve, a rotary turn-

plug in said body and having a two-way passage co-operative with said passages, and spring means acting on the valve to automatically maintain it in position so that one of the passages normally communicates with the main passage in the body.

1,453,574. ELECTRIC WATER HEATER. ZOLTAN TROTZER, Budapest, Hungary. Filed Nov. 1, 1921. Serial No. 512,109. 4 Claims. (Cl. 219—39.)

1. In an electric water heating apparatus, a receptacle, an electric heating body therein, a water passage leading along said heating body, and constructed to permit a relatively slow flow of water, another water passage shunting the former passage and constructed to permit a relatively rapid flow of water, a valve inserted in said shunting passage, coupled with a switch inserted in the circuit of the heating body and means tending to open the said valve and the switch.



1,453,575. ABSORBENT-COTTON SUBSTITUTE FOR MEDICAL BANDAGES. JAMES TURNER TONO and JOHN EDWARD BLOSSER, Chester, Pa., assignors to Scott Paper Company, a Corporation of Pennsylvania. Original application filed Apr. 27, 1918, Serial No. 231,229. Divided and this application filed June 19, 1918. Serial No. 240,880. 3 Claims. (Cl. 128—296.)

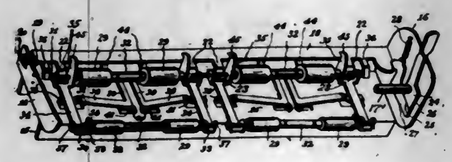
1. A substitute for cotton batting in medical bandages, comprising a plurality of superposed layers of delicate open-mesh webs of vegetable fiber, the open-mesh portions of the fibers being irregularly disposed over each other and providing a spongy honeycombed structure having great absorbent qualities, the said open-mesh layers hav-

ing their contacting surfaces roughened by the fibers being crowded in more or less parallel lines to increase the sponginess without materially decreasing the open-mesh character.

1,453,576. ROPE GUIDE. JOHN R. WEAVER, Baltimore, Md. Filed Aug. 10, 1922. Serial No. 580,850. 1 Claim. (Cl. 156—15.)

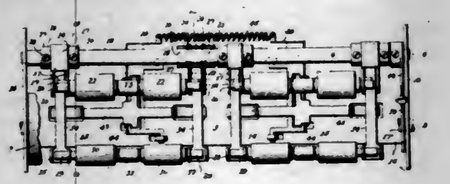
In combination, a rope guide having a semi-circular member offering a toric surface to the path of movement of the rope, said semi-circular member ending in prongs, and clamping plates provided with apertures adapted to receive said prongs.

1,453,577. TYPEWRITING MACHINE. FRANK HURBERT ARMSTRONG, Auburn, N. Y., assignor to Corona Typewriter Company, Inc., Groton, N. Y., a Corporation of New York. Filed Sept. 30, 1918. Serial No. 256,195. 43 Claims. (Cl. 197—128.)



1. In a paper feed mechanism, the combination of a platen support, a platen on said support, front and rear feed-rolls shafts, transverse members supporting said shafts, manually rockable means adjacent the rear feed-roll shaft and having an up-and-down sliding connection with said shaft and adapted to engage and depress the rear ends of said members when rocked in one direction, means for locking the members to said rockable means to rock as a unit therewith after a preliminary depression of the rear ends of the members, and yieldable means connected with said members for normally holding the feed rolls against the platen.

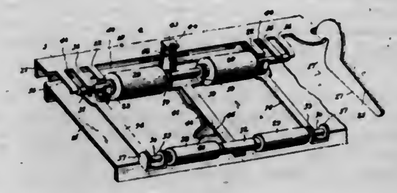
1,453,578. TYPEWRITING MACHINE. FRANK H ARMSTRONG, Auburn, N. Y., assignor to Corona Typewriter Company, Inc., Groton, N. Y., a Corporation of New York. Filed Nov. 9, 1918. Serial No. 261,850. 15 Claims. (Cl. 1[illegible]—38.)



1. In a typewriting machine, a platen carriage, a platen on the carriage, a feed-roll-frame on the carriage having front and rear feed-roll shafts, feed rolls on said shafts, means for forcing the frame downwardly away from the platen, and means for resiliently pressing said frame upwardly toward the platen embodying a rockable yoke-like member pivotally mounted on the platen-carriage, a spring for actuating said member, and a bar supported on said member pivotally connected to one of the shafts of the feed-roll-frame and normally bearing upwardly against the under side of the other shaft.

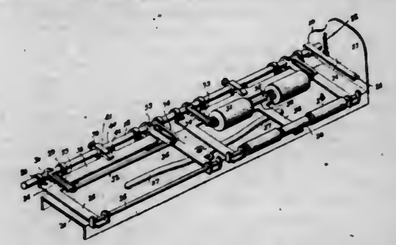
1,453,579. TYPEWRITING MACHINE. FRANK H. ARMSTRONG, Auburn, N. Y., assignor to Corona Typewriter Company, Inc., Groton, N. Y., a Corporation of New York. Filed Nov. 9, 1918. Serial No. 261,851. 19 Claims. (Cl. 197—138.)

1. In a typewriting machine, the combination of a platen carriage, a platen rotatably mounted on the carriage, a feed-roll frame, tandem feed-rolls mounted in the frame, and a pair of spring-urged members engaging opposite ends of the frame and pivotally mounted on the platen carriage to swing about axes extending transversely of the platen.



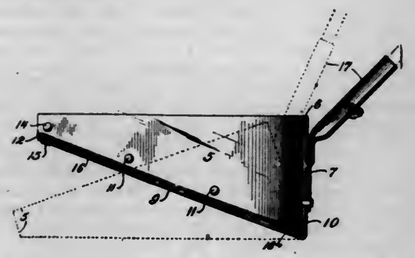
1,453,580. TYPEWRITING MACHINE. FRANK H. ARMSTRONG, Auburn, N. Y., assignor to Corona Typewriter Company, Inc., Groton, N. Y., a Corporation of New York. Filed Nov. 16, 1918. Serial No. 262,828. 22 Claims. (Cl. 197—13[illegible])

1. In a paper feed mechanism, the combination of a platen, a cast-off rock-shaft extending longitudinally of the platen, means for rocking said cast-off shaft, a pair of tandem feed-roll shafts, feed-rolls on said tandem shafts, independent supports for the front and rear feed-roll shafts extending forwardly from the cast-off shaft, connections between the rear ends of said supports and the cast-off shaft whereby either roll-shaft may move away from the platen independently of the other while the cast-off shaft is stationary, and means whereby first one and then both of said shaft supports is rocked away from the platen about the axis of the cast-off shaft when the cast-off shaft is rocked in one direction.



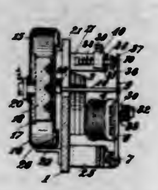
1,453,581. TYPEWRITING MACHINE. FRANK HURBERT ARMSTRONG, Auburn, N. Y., assignor to Corona Typewriter Company, Inc., Groton, N. Y., a Corporation of New York. Filed Dec. 27, 1918. Serial No. 268,578. 24 Claims. (Cl. 197—1[illegible].)

1. In a typewriting machine, the combination of a platen carriage, a platen rotatably mounted on the carriage, a cast-off rock-shaft journalled on the carriage, tandem feed-roll shafts, spaced feed rolls on each of the shafts, means rigid with the rock shaft for supporting one feed roll shaft and having a lost-motion connection with said feed roll shaft permitting independent movement of the feed-roll shaft toward and from the platen, means pivoted directly to the rock shaft to swing toward and from the platen when the rock-shaft is stationary for supporting the other feed-roll shaft, and means engaging



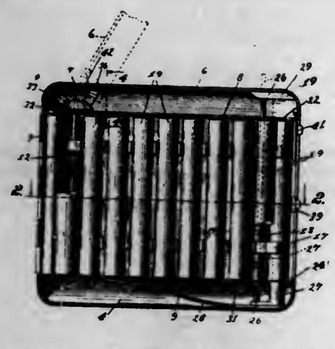
the feed-roll shafts between the spaced rolls thereon for pressing the feed-roll shafts toward the platen.

1,453,582. TYPEWRITING MACHINE. FRANK HURBERT ARMSTRONG, Auburn, N. Y., assignor to Corona Typewriter Company, Inc., Groton, N. Y., a Corporation of New York. Filed Dec. 27, 1918. Serial No. 268,579. 13 Claims. (Cl. 197—138.)



1. In a paper feed mechanism, the combination of a platen, a rockable cast-off shaft, means for rocking said cast-off shaft, a one-piece sheet metal feed-roll frame pivoted directly to the cast-off shaft to swing about the cast-off shaft when said shaft is stationary and provided with bearings for a feed-roll shaft, a tappet on the cast-off shaft adapted to engage and swing the frame away from the platen when said shaft is rocked in one direction, lugs on the frame at opposite sides of the tappet, means for yieldably urging the frame toward the platen, a feed-roll shaft extending through the bearings on the frame, a feed-roll loosely mounted on the feed-roll shaft between said bearings, and integral bendable stops on the frame bendable into alignment with the ends of the feed-roll shaft for holding the shaft in the frame.

1,453,583. ASH SIFTER. PAUL BERMAN, Wilmington, Del. Filed May 2, 1922. Serial No. 557,842. 6 Claims. (Cl. 83—60.)

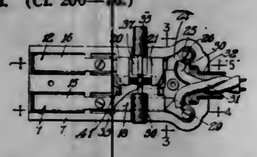


1. A sifting device comprising a body wall open at the front and extending perpendicularly to its top edge, and a reticulated bottom inclined from the rear toward the top edge of the body.

1,453,584. DEVICE FOR AMPLIFYING TELEPHONE CURRENTS AND OTHER ELECTRIC OSCILLATIONS. JOHANNES BLANKENBURG, Berlin, Germany, assignor, by mesne assignments, to Naamlooze Vennootschap Finanzieele Maatschapij "Driebergen," Amsterdam, Netherlands, a Company of the Netherlands. Filed June 17, 1919. Serial No. 304,966. 4 Claims. (Cl. 179—171.)

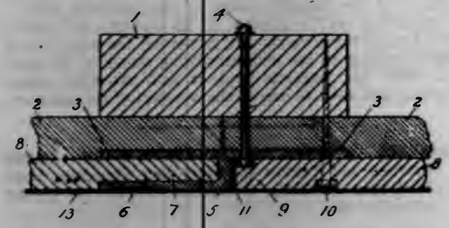
1. In a device for amplifying telephone currents and other electric oscillations a polarized magnet system, the magnet field of which is varied by the electric oscillations, an elongated armature comprising a relatively thick and rigid portion disposed in front of the poles of said polarized magnet system and a relatively elastic portion at a greater distance from said poles, a bearing of the magnetic force of the polarized field, a transmittr for said armature at each of its ends contrary to the action of the magnetic force of the polarized field, a transmitter, and a coupling of the movable electrode of the transmitter with the said armature, the connection of said coupling to the armature being closer to the point at which the magnetic force of said polarized magnet system acts than to one of the bearings of the armature.

1,453,585. DISPENSING CIGARETTE CASE. JOSEPH GIUFFRE and CURTIS W. RICH, San Francisco, Calif. Filed May 14, 1921. Serial No. 469,719. 13 Claims. (Cl. 206—41.)



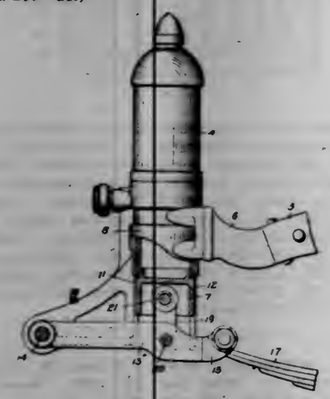
1. A cigarette case comprising a container arranged to receive a plurality of cigarettes; a cover hingedly connected to said container; a cigarette dispensing member slidably and pivotally mounted within the container and arranged to engage one end of a cigarette; a spring mounted within the container in engaging relation with the dispensing member to move said member to dispense said cigarette when the cover is opened; and means actuated by the closing of the cover for moving successive cigarettes into dispensing position after each preceding cigarette has been dispensed.

1,453,586. SOLDERING FLUX. EUGENE M. HEARNE, Brooklyn, N. Y. Filed Jan. 18, 1921. Serial No. 438,259. 5 Claims. (Cl. 148—23.)



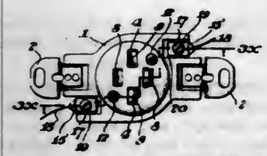
1. A flux for use in connection with solder, comprising an admixture of charcoal and oxide of iron with rosin.

1,453,587. SWITCH-CONTROLLED ELECTRIC APPLIANCE. HARRY HERTZBERG, Brooklyn, N. Y., assignor to Magnus Electric Company, Inc., a Corporation of New York. Filed Mar. 9, 1922. Serial No. 542,362. 10 Claims. (Cl. 200—76.)



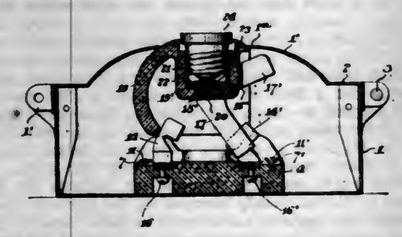
1. In an electrical appliance, a pair of contacts, a movable circuit closer carrying element, a circuit closer carried by said element and adapted to be moved bodily therewith toward said contacts, and means lying in the path of travel of said closer for restraining the ends of the same against movement while said element is being moved a predetermined distance, the ends of said closer being released upon continued movement of said element and thereafter snapped into electrical connection with said contacts.

1,453,588. SHIP CONSTRUCTION. JOSEPH T. L. LAVAGETTO, Portland, Oreg. Filed Oct. 26, 1922. Serial No. 596,981. 6 Claims. (Cl. 114—84.)



1. A copper sheathed wooden hull, comprising wooden ribs, inner planks secured on the wooden ribs, metal ribs on the outer surface of the inner planks adapted to form a seat for the outer planks, and outer planks having one edge grooved for the reception of oakum.

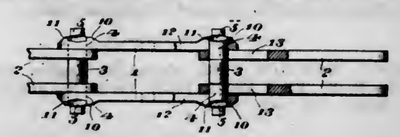
1,453,589. AIR-SPRING SUSPENSION. RICHARD LIEBAU, New Haven, Conn., assignor to The Westinghouse Air Spring Company, a Corporation of Pennsylvania. Filed Feb. 26, 1919. Serial No. 279,428. 2 Claims. (Cl. 267—18.)



1. In combination with the load platform and the steel springs of a vehicle, an air spring comprising two telescopic members, the outer of which is slotted, means for rigidly securing the outer of said members to the load platform, a bracket rigidly secured to the outer member, a lever pivotally secured to said bracket and movable through said slot, and to the steel spring of the vehicle, and a shackle pivotally connected to the other member of the air spring and pivotally connected to said lever.

1,453,590. PLUG-RECEIVING WALL OUTLET. WALTER S. MAYER, Philadelphia, Pa., assignor to Heinemann Electric Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed June 22, 1921. Serial No. 479,484. 4 Claims. (Cl. 173—330.)

2. A plug switch receptacle comprising an insulating base having two pairs of apertures extending therethrough, a pair of one piece contacts having respectively integral bifurcations extending through said apertures, a pair of passages in said base, one piece electrical couplings in the respective passages adapted for direct connection with conducting wires, and means extending through said base for connecting said contacts and couplings together and to said base.

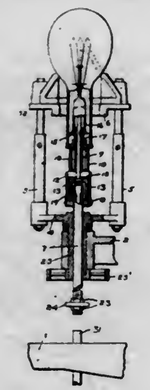


1,453,591. ELECTRIC SWITCH. WALTER S. MAYER, Philadelphia, Pa., assignor to Heinemann Electric Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed July 22, 1921. Serial No. 486,710. 6 Claims. (Cl. 200—114.)

3. An electric switch comprising the combination with a case having a lid with an opening therein and insulated contacts fixed in said case, of a device provided with a fuse plug socket adapted to oscillate in said case, a fuse plug in said socket, contacts fixed to said device and connected through said plug to make and break a circuit through said contacts first named, said fuse plug being in registration with said opening in the open relation of said contacts and out of registration with said opening in the closed relation of said contacts and automatically acting mechanism comprising an arm, an oscillatory slotted link having a spring controlled movable stud arranged to travel in said slot for effecting a quick make and break between said contacts.

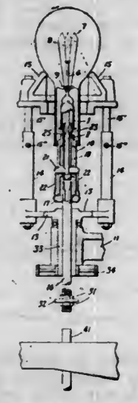
1,453,592. DRIVE CHAIN. CHARLES FREDERICK MEIER, White Haven, Pa., assignor to Wilmot Engineering Company, Hazleton, Pa., a Corporation of Pennsylvania. Filed Dec. 23, 1921. Serial No. 524,347. 2 Claims. (Cl. 74—32.)

1. A chain comprising links, each of which consists of oppositely disposed side members, the opposite ends of the side members of alternate links overlapping the adjacent ends of the side members of adjacent links, and the side members of each of the said links having elongated slots in their opposite ends, which slots extend longitudinally of said members and a pintle for connecting adjacent overlapping ends of the said links, the said pintles each consisting of a central portion oblong in cross section, said portion being of greater width than the width of the said slots, and pivot portions projecting from the opposite ends of said central portion, and means upon



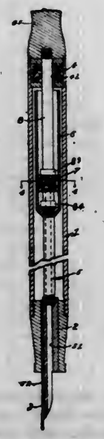
the outer ends of said pivot portions for retaining the links thereon, adjacent links of said chain being adapted to be turned to positions at right angles with respect to each other after which they may be moved inwardly toward each other and the said links after such latter movement being adapted to be moved into alinement with each other to cause movement of the pintle into position to permit removal of the links therefrom.

1,453,593. COATING FOR METAL MOLDS. DANIEL H. MELOCHE, Detroit, Mich., assignor to Earl Holley, Detroit, Mich. Filed Aug. 11, 1922. Serial No. 581,239. 11 Claims. (Cl. 22—189.)



11. A metal mold for the production of ferrous castings, said mold being lined with a smooth adherent coating of fire clay, and a binder of soluble silicate.

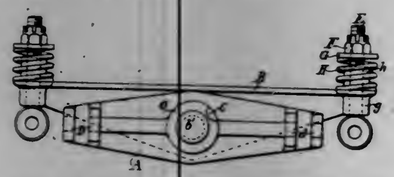
1,453,594. SEALING-IN MACHINE. LORIS EDWIN MITCHELL and ARTHUR JAMES WHITE, Cleveland, Ohio, assignors to General Electric Company, a Corporation of New York. Filed Apr. 24, 1919, Serial No. 292,464. Renewed July 19, 1921. Serial No. 485,846. 16 Claims. (Cl. 49—2.)



6. In an apparatus for sealing into a bulb a mount having an exhaust tube extending longitudinally therefrom, a frame, a head having a hollow extension rotatably supported in said frame and comprising means for supporting the bulb with its neck projecting downwardly and means for supporting the mount in a substantially vertical position within said bulb comprising a support tube closed at the bottom and disposed to receive the end portion of said exhaust tube, said support tube being provided with air outlet openings and being in substantial alignment with said hollow extension, means extending through said hollow extension for supplying air to said support tube and baffling means for permitting the flow of air into said support tube to be discharged through said outlet openings and for preventing said air from entering said exhaust tube.

1,453,595. MANUFACTURE OF INCANDESCENT ELECTRIC LAMPS AND SIMILAR ARTICLES. LORIS EDWIN MITCHELL and ARTHUR JAMES WHITE, Cleveland, Ohio, assignors to General Electric Company, a Corporation of New York. Filed Aug. 3, 1920. Serial No. 400,937. 7 Claims. (Cl. 176—7.)

1. The method of manufacturing an incandescent electric lamp or other electrical device comprising a bulb and a filament or other conductor accurately positioned therein which consists in assembling a bulb and a mount carrying said filament or other conductor and having an exhaust tube extending therefrom and definitely disposed relatively to said filament or other conductor, definitely positioning said bulb, positioning said mount in one direction by means engaging the sides of said exhaust tube and in another direction by means otherwise engaging said mount and then fusing together portions of said bulb and said mount to form a seal.

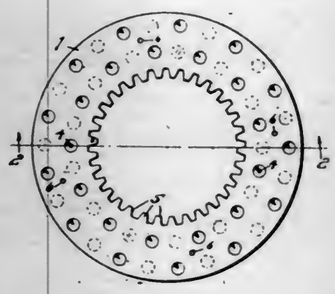


1,453,596. FOUNTAIN PEN. OLIVER MITCHELL, Brookline, Mass. Filed May 27, 1922. Serial No. 564,123. 4 Claims. (Cl. 120—47.)

1. In a fountain pen, a fountain, carrying a feed bar and a pen at its front end; a gland closing the rear end

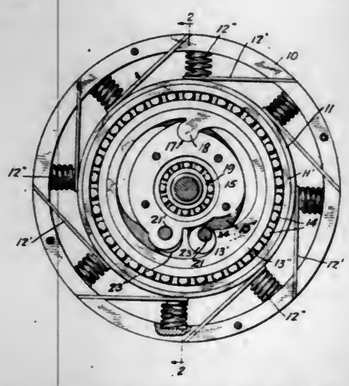
of the fountain; a pipe, within the fountain and arranged longitudinally thereof, opening without the fountain at the front end; a cylinder closed at the front end, mounted upon the rear end of the pipe, the pipe and interior of the cylinder being in communication, through the closed end of the cylinder, the cylinder having an opening at its rear end; a rod hollow at its front end, passing through the gland and into the rear end of the cylinder, its inner hollow end opening into the cylinder and having a side aperture; a pair of stops mounted upon the rod; a disk, mounted upon the rod between the stops and frictionally engaging the inner walls of the cylinder, all organized as described, to cause the air passage through the rod to be alternately opened and closed by the reciprocation of the rod, as and for the purpose described.

1,453,597. BRAKE EQUALIZER. CHARLES MIKESELL MOHLER, Ypsilanti, Mich. Filed Apr. 5, 1922. Serial No. 549,847. 3 Claims. (Cl. 188—204.)



2. In a brake equalizer, the combination with an equalizing bar having at its middle portion an upright stud, the said equalizing bar having at its ends devices for connection with brake side rods, of a base bar having its middle portion pivotally engaging the said stud of the equalizing bar, the said base bar being arranged upon the said equalizing bar whereby one bar is directly over the other, and the said base bar having at its ends devices constructed to engage the levers of an intermediate brake shaft, both of said bars being bowed correspondingly in the middle portions thereof, and the horizontal center lines of the said connecting devices at the ends of the said bars lying in the same horizontal plane.

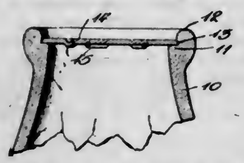
1,453,598. FOLDING SHELF AND PAPER RACK. LAWRENCE T. OBELE, Philadelphia, Pa. Filed Apr. 12, 1921. Serial No. 460,724. 2 Claims. (Cl. 248—19.)



1. In a device of the character stated, a frame consisting of two side bars and upper and lower cross pieces, said side bars each having slots therethrough, each slot comprising two legs at angles to each other with an offset notch communicating therewith at approximately the juncture of the two legs, a shelf, non-collapsible hangers pivoted to the forward end of said shelf and to the bars of the frame above the slots therein, and pivoting trunnions passing through the slots and secured to the rear end of the shelf, said trunnions resting in the lower ends of the slots to hold the shelf in an inclined position, in the offset notches for holding the shelf in a horizontal position and assuming a position at the upper ends of said slots when the shelf is collapsed within the frame.

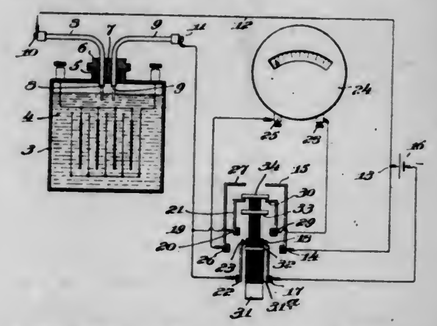
1,453,599. FRICTION DISK. CLARK W. PARKER, New York, N. Y. Filed Aug. 2, 1920. Serial No. 400,700. 4 Claims. (Cl. 192—113.)

2. A new article of manufacture comprising two parallel circular plates, each having a series of integral struck up projections extending toward and contacting with the other plate.



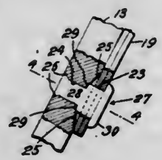
1,453,600. BRAKE. ROBERT W. PERKINS, Norwich, Conn. Filed June 8, 1921. Serial No. 475,972. 14 Claims. (Cl. 188—74.)

1. In a device of the character described, two concentrically mounted members one within the other and one of which is composed of inner and outer rings with a series of springs between the rings and means for displacing one of said members eccentrically of the other to compress the springs at one side.



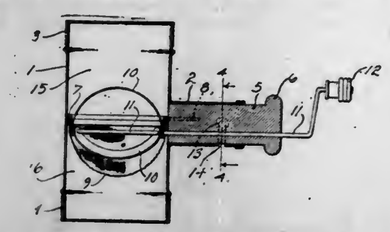
1,453,601. STOPPER. MILTON W. POWELL, Baltimore, Md. Filed Oct. 22, 1921. Serial No. 509,633. 2 Claims. (Cl. 215—51.)

1. A bottle stopper comprising a layer of disk-shaped material having a recess struck therefrom and without rupturing the surface thereof to provide a point of less thickness of material adapted to be readily pierced by



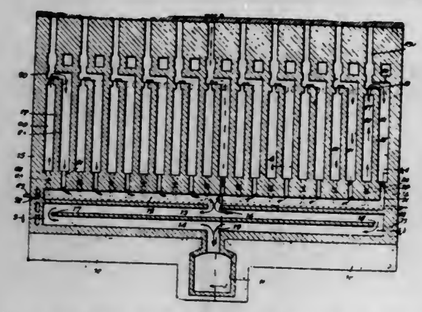
an instrument to facilitate the removal of the disk from the bottle.

1,453,602. LIQUID-LEVEL INDICATOR. DAVID R. PRICE, Newtonville, Mass., assignor of one-half to Leland Powers, Newtonville, Mass. Filed Feb. 13, 1920. Serial No. 358,495. 8 Claims. (Cl. 177—339.)



7. The method of determining the level of an electrolyte in a storage battery or the like comprising momentarily applying a potential across a pair of electrodes which project somewhat below the normal level of the electrolyte and substantially testing the terminals for polarization current.

1,453,603. PRUNING SHEARS AND OTHER IMPLEMENT. CHARLES H. REDMAN, East Orange, N. J., assignor to Boker Cutlery & Hardware Company, Inc., New York, N. Y., a Corporation of New York. Filed Oct. 23, 1920. Serial No. 418,903. 2 Claims. (Cl. 30—11.)

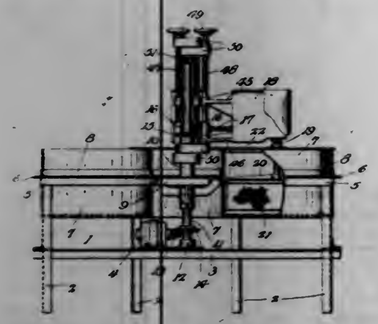


1. Means for securing the opening spring-members to the handle-members of an implement of the character described, comprising, for each handle-member, a hole extending through said member enlarged at opposite sides of its inner end to form a longitudinally elongated polygonal recess, a longitudinally elongated polygonal hole in the spring-member aligned with the enlarged inner end of the hole in the handle-member, and a rivet extending through said holes in said handle and spring-members and having a head engaging the face of the spring, a longitudinally elongated polygonal shank portion engaging the walls of said hole in the spring and those of said recess and a shank-portion fitting the remaining portion of the hole in the handle-member and headed at its outer end.

1,453,604. FLOUR SIFTER. CHARLES J. REPATH, Los Angeles, Calif. Filed May 23, 1922. Serial No. 563,152. 4 Claims. (Cl. 83—60.)

1. In a device of the nature disclosed, a cylindrical body having a laterally extended tubular handle, a reversing member journaled in said handle, an operating shaft journaled in said member and extending exteriorly for manual rotation, an agitator secured upon the shaft within the body, a foraminous sifter member secured to the reversing member and forming a partition across the body on one side of the agitator, the reversing member being operable to alternately position the sifter member on opposite sides of the agitator.

1,453,605. COKE OVEN. WILLIAM E. ROBERTS, New York, N. Y., assignor, by mesne assignments, to Foundation Oven Corporation, New York, N. Y., a Corporation of New York. Filed Aug. 8, 1919. Serial No. 316,009. 2 Claims. (Cl. 202—9.)



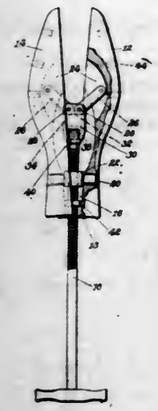
1. A coke oven having a plurality of rows of combustion and waste gas flues which are connected at their upper ends, individual waste gas ducts adapted to carry off the waste gases from each row of combustion flues, said waste gas ducts each comprising a plurality of passages located in the same vertical plane above one another, the lowest passage communicating with an outlet tunnel common to the waste gas ducts for all the rows of combustion flues, the several passages of each waste gas duct being connected by ports so that the waste gases from the combustion flues must flow successively through said passages and to said tunnel, and individual air ducts serving each row of combustion chambers each air duct comprising a plurality of passages located on opposite sides of the waste gas ducts, the said air passages being so connected that the air supplied to each row of combustion flues must flow successively through the passage on both sides of the waste gas ducts so that it is thoroughly preheated.

1,453,606. WASHING MACHINE. ANDREW H. SACKSTEDER, Tiffin, Ohio. Filed Feb. 15, 1922. Serial No. 536,771. 3 Claims. (Cl. 68—18.)

1. In a washing machine, the combination of a tub, a vertically disposed driving shaft arranged adjacent

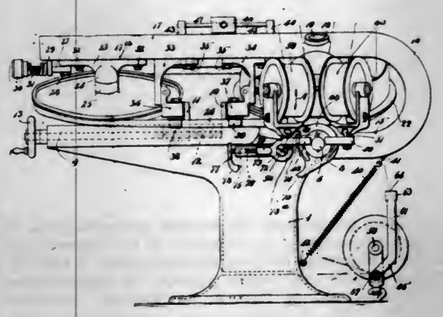
the tub, means for rotating said shaft, a gear casing disposed over the tub, a spindle mounted in and depending from said gear casing, a clothes container carried by said spindle within the tub, gearing within the gear casing operatively connecting the driving shaft with

said spindle, and means supported on the driving shaft for raising and lowering the gear casing whereby to remove the spindle and the clothes container from the tub or dispose the spindle and clothes container within the tub.



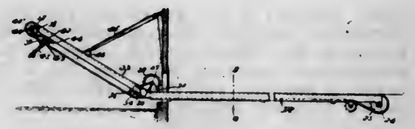
1,453,607. RATCHET SOCKET WRENCH. HENRY LOUIS SAUCIER, Providence, R. I. Filed Feb. 25, 1922. Serial No. 539,265. 2 Claims. (Cl. 81—60.)

1. A ratchet socket wrench, comprising an elongated tubular handle member having a bifurcated end forming oppositely disposed arms, an outer ratchet member pivotally secured to the oppositely disposed arms and having an even inner number of ratchet teeth, an inner rotatable ratchet member having oppositely disposed spring actuated pawls so arranged that when two oppositely disposed pawls are in operative engagement with coinciding ratchet teeth the other oppositely disposed pawls will be only half into engagement with coinciding ratchet teeth and means for locking the outer ratchet member to the handle.



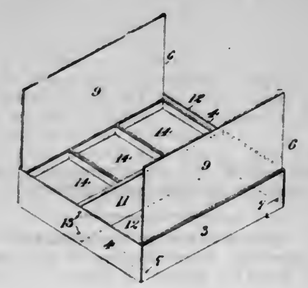
1,453,608. SHOE STRETCHER. WILLIAM A. SPRAGUE, Islington, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Jan. 30, 1922. Serial No. 532,881. 1 Claim. (Cl. 12—123.5.)

In a shoe stretcher, a split foot member, a toggle link connected to each part thereof and an operating block joining the inner ends of the toggle links, the block being slotted to receive the ends of the links in the same plane, and the ends of the links being circular to bear on each other and on the bottom of the slot in the block, pivot pins pivoting the toggle links to the operating block, said pins being spaced from the bottom of the slot at a distance substantially equal to the radius of the circular link ends, and having their centers substantially at the centers of the circles on which the link ends are formed,



there being a slight looseness of the links on the pins to facilitate rolling of the link ends on each other, and positive interaction between the links and the bottom of the slot, an internally threaded member having trunnioned extensions engaging apertures in the foot member parts, and a threaded rod engaging the threads in said member for operating the block to spread or retract the toggle links.

1,453,609. BAND-CUTTER CUTTING MACHINE. BYRON F. STOWELL, Springfield, Mass., assignor to Metal Saw and Machine Co. Inc., Springfield, Mass., a Corporation of Massachusetts. Filed Apr. 23, 1921. Serial No. 463,980. 13 Claims. (Cl. 29—68.)



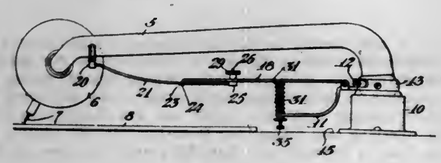
1. A material working machine having thereon means to support the material, a pivotally supported frame, a material working instrumentality carried by said frame and movable in a plane inclined to that of the frame, said instrumentality being movable toward and from the material, and an endless flexible band constructed and arranged to actuate said instrumentality directly in all operative positions thereof.

1,453,610. LITTER CARRIER. JAMES LEE THORNTON, Camp Hill, Pa. Filed Nov. 30, 1920. Serial No. 427,324. 2 Claims. (Cl. 198—204.)

1. In a litter carrier, a trough comprising an upper and lower floor and sides integral with the lower floor, means supported by the sides for holding the upper floor, a conveyer comprising sprocket chains having one course traveling on the upper floor and another course traveling on the lower floor in opposite directions, conveying elements each comprising a plate having integral apertured ears and blades integral therewith and at right angles to the plate, means for pivotally connecting the said carrying elements to the sprocket chains, and means for driving the sprocket chains.

1,453,611. FOLDABLE SHIPPING BOX. GEORGE X. WENDLING, San Francisco, Calif. Filed May 27, 1922. Serial No. 564,071. 10 Claims. (Cl. 217—2.)

1. A container including connected side and end walls adapted for positioning to form a substantially rectangular frame, top and bottom wall forming flaps hinged at one edge with their free edges free to fold toward each other into meeting relation, a part extending across the interior of the frame and secured at its ends to opposing wall members, and means for securing the free edges of said top and bottom wall forming members to opposite edges of said part.

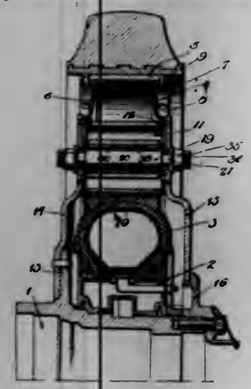


1,453,612. SELECTIVE RECEIVER. ROBERT L. WILLIAMS, Newton, Mass., assignor to Submarine Signal Company, Portland, Me., a Corporation of Maine. Filed Nov. 8, 1917. Serial No. 200,888. 4 Claims. (Cl. 177—386.)

4. A device for receiving submarine signals comprising a water-tight casing, means for anchoring said casing below the surface of the water, a buoy for sustaining said casing above its anchoring means, a series of reeds of different lengths, forming electric terminals, within said casing, said reeds being tipped with carbon, a plate of insulating material mounted adjacent said reeds, within said casing, a series of contacts, also tipped with carbon, mounted on said insulating plate and each so located as to be engaged by a reed when such reed is in vibration, and an indicator electrically connected with all of said reeds and said contacts; whereby vibration set up in any

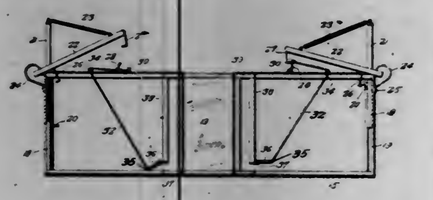
one of said reeds will close the circuit at a contact corresponding to a frequency to which its reed is responsive, and such result be denoted by said indicator.

1,453,613. TONE-ARM SUPPORT. LORENZ R. WOLFF, Los Angeles, Calif. Filed Sept. 29, 1921. Serial No. 504,076. 6 Claims. (Cl. 274—23.)



1. In combination, a tone arm post, a revolvable collar on said post, a tone arm pivotally mounted in said collar, a bracket fixed to said collar, an arm pivotally mounted on said bracket, a pair of wire springs slidably extending through a portion of said arm, means for fixing said springs to said arm, a yoke fixed to the outer end of said springs arranged to receive and support the outer end of said tone arm, a coiled spring interposed between said arm and said bracket and means for varying the tension on said coiled spring.

1,453,614. CUSHIONED VEHICLE WHEEL. RUDOLPH J. BALAZS, and HERBERT S. AUTREY, Cleveland, Ohio, assignors to Houston Pneumatic Puncture Proof Wheel Company, Houston, Tex., a Corporation of Texas. Filed Oct. 14, 1920. Serial No. 417,006. 6 Claims. (Cl. 152—42.)

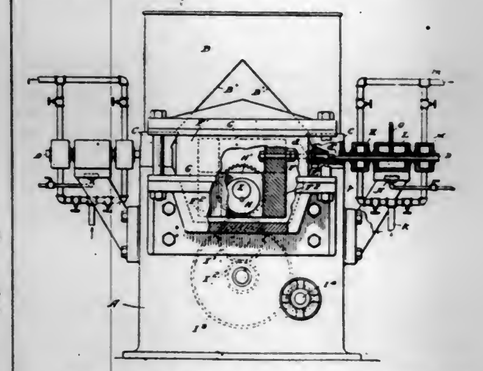


1. In a vehicle wheel, a hub, face plates carried by the hub, a floating rim cushioned with relation to the hub and movable between the face plates, buffer members carried by the said rim, the face plates being formed with openings, bushings having circumferentially roughened portions fitted in the openings and held against rotation

by the coaction of their roughened portions with the walls of the openings, spindles seated at their ends in the bush-

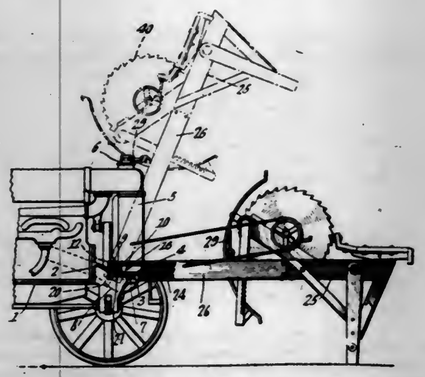
ings, and buffers mounted upon the spindles and coacting with the buffer members of the rim.

1,453,615. ANIMAL TRAP. JULIUS CLEBERT BAUMAN, Miles, Tex. Filed Mar. 19, 1921. Serial No. 453,766. 3 Claims. (Cl. 43—61.)



1. A trap having an inclosed baiting chamber and a compartment leading thereto, a slidable door for said compartment, a spring controlled trigger bar for retaining said door in its raised, set position, a trip rod operatively engaged with said trigger bar and flexible means for releasing said trigger bar from the trip rod whereby the door is released and falls by gravity to close said compartment.

1,453,616. ENVELOP. STELLA BENENATO, Phoenix, Ariz. Filed Nov. 15, 1921. Serial No. 515,360. 2 Claims. (Cl. 229—69.)



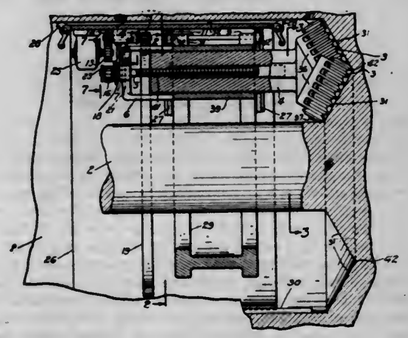
1. The combination with a series of mailable articles each including a substantially flat and rectangular body portion having an address receiving surface of means for temporarily securing the articles together so that the body portions thereof overlap each other and leave the lower portions of the address receiving surfaces exposed.

1,453,617. PROCESS OF AND APPARATUS FOR MANUFACTURING ARTICLES OF COMMINUTED CORK. WILLIAM G. BOND, Wilmington, Del., assignor to Bond Manufacturing Corporation, Wilmington, Del., a Corporation of Delaware. Filed Feb. 14, 1921. Serial No. 444,927. 12 Claims. (Cl. 18—48.)

1. The process of forming articles of comminuted cork, the particles of which are united by a binder which becomes effective under the influence of heat and pressure to unite the cork particles and without destroying the resiliency of the cork, which process consists in forcing loose uncompressed comminuted cork and a small percentage of binder into and through a confining tube whereby it is confined and compressed within the tube during its passage therethrough, and in forming heating and cooling zones in said tube through which the compressed and confined cork passed successively while subjected to confining and compressing pressure.

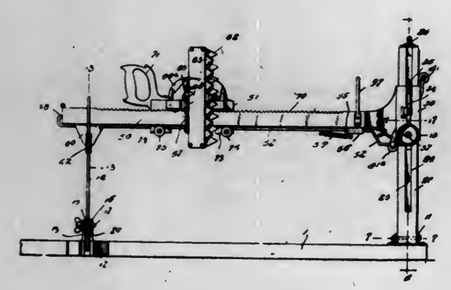
1,453,618. MOTOR-VEHICLE ATTACHMENT. ALLEY CLAUD BOVENDER, Northwilkesboro, N. C. Filed Nov. 8, 1922. Serial No. 599,736. 6 Claims. (Cl. 180—53.)

6. The combination with the radiator base of a motor propelled vehicle, and members extended rearwardly from the base and defining an angle with the base, of a support extended across the vehicle and lodged in said angle, means for holding the support in place in said angle, a



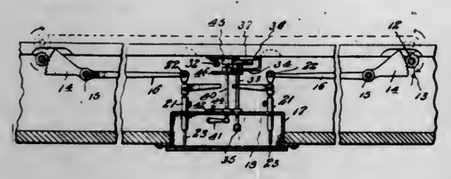
frame located in front of the vehicle of which the base constitutes a part, and means for mounting the frame on the support, for vertical swinging movement.

1,453,619. CAN-HEADING MACHINE. AMOS CALLESON, Brooklyn, N. Y. Filed Apr. 21, 1921. Serial No. 463,337. 11 Claims. (Cl. 113—24.)



1. In a machine for shaping circumferentially non-circular articles of sheet material, the combination, with work-holding means and mechanism to operate on the work including a carrier member, a guiding member shiftable substantially rectilineally in said member and substantially radially with respect to an axis extending through the work, a work-shaping member shiftable rectilineally in the guiding member and also substantially radially with respect to said axis, and lever-including means for transmitting movement to the shaping member, of a plunger for actuating the lever-including means movable longitudinally of said axis, means for effecting rotation around said axis as between the work-holding means and the plunger on the one hand and said mechanism on the other, and shifting means for the guiding member preserving the same in constant relation to the work during such rotation.

1,453,620. STONE-DRILLING MACHINE. ANTHONY E. CARLSON, Los Angeles, Calif. Filed Mar. 30, 1922. Serial No. 548,030. 3 Claims. (Cl. 262—7.)

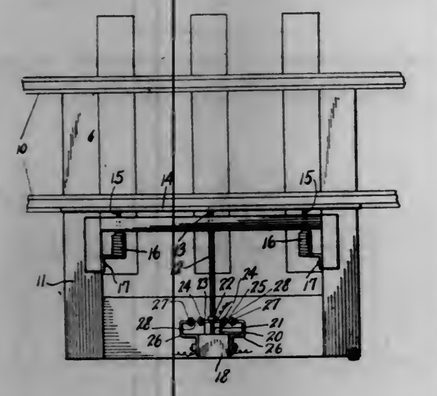


1. In an apparatus for cutting rock, the combination of a supporting frame, adapted to be secured over the surface of the said rock, a revolving frame operatively positioned in the said supporting frame, a tool post operatively positioned in the said revolving frame, a power transmission means, adapted to guide and feed the said tool post, a plurality of rotary cutters in the said tool post, adapted to break away and remove the said rock, as set forth.

1,453,621. HEDGE CLIPPER OR TRIMMER. EVERETTE C. CONRADE, Lewisville, N. C. Filed Feb. 14, 1922. Serial No. 536,426. 11 Claims. (Cl. 56—233.)

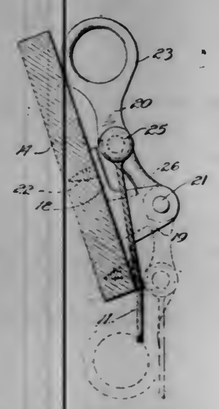
5. In a hedge clipper, the combination of a column, gravitational means associated therewith, a support carried by and extending from said means, means to detachably hold said gravitational means against downward movement, a carriage on the support and carrying cutting mechanism, means to actuate said mechanism, and means operable by the carriage to release the gravitational means, said detachably holding means constructed and arranged to catch and hold the gravitational means following downward movement thereof, and the carriage-operable means including a longitudinal rod below the carriage with an apertured end and a head thereon for the engagement of the carriage, and a spring to move said rod in one direction.

1,453,622. SHUTTER OPERATING AND SECURING MECHANISM. EVERETTE C. CONRADE, Lewisville, N. C. Filed Apr. 14, 1922. Serial No. 552,653. 8 Claims. (Cl. 268—13.)



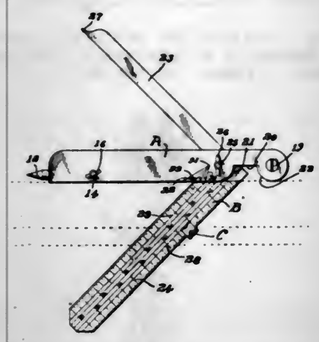
1. The combination of a window casing, shutters hinged thereto, pinions carried by the pintles of the hinges and fixed to the shutters, upright shafts having upper and lower gears, the upper gears meshed with said pinions, and levers fulcrumed in the base portion of the window casing and having gears on their outer arms meshed with the lower gears of the upright shafts.

1,453,623. SIGNAL. FITZHUGH B. GIAVIN and HAYS C. GEE, Georgetown, Tex. Filed May 10, 1922. Serial No. 559,944. 3 Claims. (Cl. 246—246.)



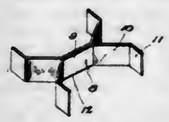
1. In a signal actuating mechanism, a base adapted to be secured adjacent a track, a rock shaft mounted for pivotal movement in the base, a substantially L-shaped crank arm located at one end of the shaft, a ramp located

adjacent one rail of the track and pivotally secured to the crank arm at a point substantially central between the ends of the ramp, crank arms having one of their ends



pivotally secured to the ends of the ramp and having bearings in the base, torsion springs connected to the opposite ends of the last mentioned crank arms and a circuit closer operated by the rock shaft.

1,453,624. CONTROLLING DEVICE FOR MUFFLER CUT-OUTS. JOSEPH HADKA, Oak Park, Ill. Filed Nov. 5, 1920. Serial No. 421,930. 3 Claims. (Cl. 74—39.)

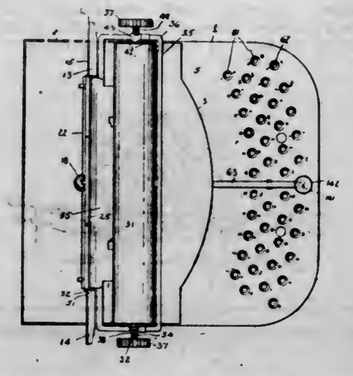


1. A controlling device of the character described comprising a lever, a supporting bracket for the lever adapted to be rigidly secured in position in a motor vehicle within convenient reach of the operator, said bracket having an upstanding lug to which the lever is pivoted, a stud projecting laterally from said lever intermediate its ends and adapted to have a cable secured thereto with the cable leading to a part to be actuated, the stud being swingable in the operation of the lever from a suspended position below the pivotal axis of the lever to a raised position over and a short distance beyond dead center, the cable being free to swing in the movements of the lever unrestricted by the bracket.

1,453,625. COMBINED COMPASSES, SQUARE, ETC. ROBERT H. JOHNSON, Los Angeles, Calif. Filed Nov. 24, 1920. Serial No. 426,154. 5 Claims. (Cl. 33—93.)

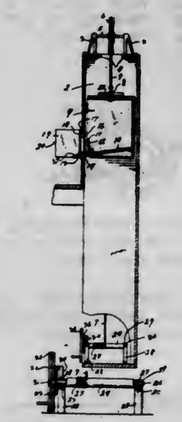
1. A tool comprising a butt, a blade pivoted to the butt, said butt having a notch in one edge thereof, curved parts at each end of the notch arranged to lie at opposite sides of one edge of the blade when said blade is disposed at right angles to the butt.

1,453,626. PARTITION FOR VANITY CASES. WILLIAM G. KENDALL, Newark, N. J. Filed Oct. 14, 1920. Serial No. 416,847. 4 Claims. (Cl. 132—82.)



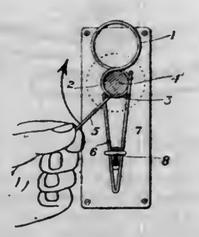
4. The combination with a vanity case having front and rear walls and connecting end walls, and a partition disposed within the case and comprising side members having intermediate portions marginally connected and having terminal portions bearing frictionally against the inner faces of the front and back walls of the case and having their extremities located substantially at the point of juncture of the end walls of the case with the said front and back walls.

1,453,627. AIR FILTER FOR AUTOMOBILES. RALPH A. J. KING, Cherokee, Okla. Filed Apr. 3, 1922. Serial No. 549,245. 2 Claims. (Cl. 183—45.)



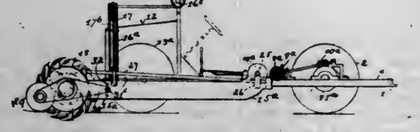
1. In an air filter for automobiles, a substantially rectangular casing, a partition extending longitudinally of the casing from one of its end walls and forming with the outer wall of the casing a passage for air, the said casing being apertured to admit air to the passage, a filtering agent in the said casing outside of the passage, means for retaining the filtering agent against access to the passage, a pipe communicating with the casing at one end and adapted to lead to a carburetor, a pipe communicating with the casing and adapted to extend into the breather tube of a motor, a cover for the said casing, and a flange on the said casing adapted to be engaged by manifold clamps of a motor for retaining the casing in operative relation to the parts of the motor.

1,453,628. TYPEWRITING MACHINE. CARL W. KLAUMINZER, Lakewood, Ohio. Filed Nov. 16, 1922. Serial No. 601,396. 25 Claims. (Cl. 197—57.)



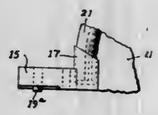
1. In a typewriting machine, the combination of a supporting casing, an intermittently shiftable carriage mounted upon said casing, the top plate of said casing being provided with a printing aperture, a flexible type diaphragm shiftable beneath said aperture, a hammer releasably positioned beneath said diaphragm, and means for causing a trigger action of said hammer to produce a sharp impact upon said type diaphragm.

1,453,629. COAL OR WOOD CARRIER. GRACE M. LEWIS, Keene, N. H. Filed Jan. 9, 1922. Serial No. 528,003. 2 Claims. (Cl. 214—119.)



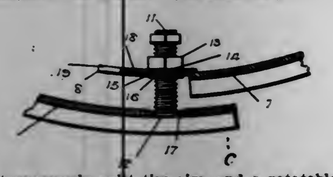
1. In an apparatus for the purpose indicated, a passage way connecting the cellar and the first floor, the front wall of the passage way adjacent the first floor having a door controlled opening, a carrier operable vertically in said passage way and provided with an inclined bottom, said carrier having a discharge opening registrable with the opening of the passage way adjacent the first floor, and a door chute adapted to be lowered to a position in alignment with the inclined bottom and extended through the opening of the passage adjacent the first floor, whereby the contents of the carrier may discharge therefrom, said door chute having side flanges, to keep the contents from discharging to one side, said flanges having slots near their upper portions, and means on the sides of the discharge opening of the carrier to engage said slots to retain the door closure closed.

1,453,630. KEY-LOCKING DEVICE. HENRY E. LORENTS, Washington, D. C. Filed Dec. 8, 1921. Serial No. 520,924. 6 Claims. (Cl. 70—65.)



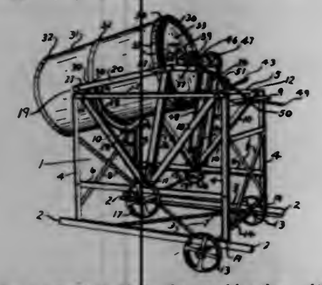
3. A key retaining device, comprising a resilient open ring portion and a pair of diverging legs extending from said open ring, between which the shank of a door knob is wedged for opening said ring during the application of the device, one of said legs being longer than the other and extending downwardly in a position to be inserted into the handle of the key.

1,453,631. AGRICULTURAL MACHINE. WILLIAM MCKENNITT, Duluth, Minn. Filed Feb. 7, 1921. Serial No. 443,202. 1 Claim. (Cl. 97—40.)



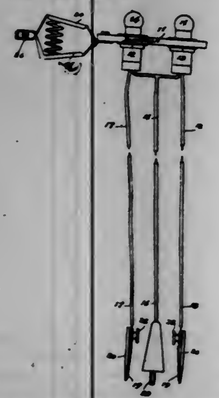
The combination with a vehicle of a yoke pivotally supported near one end upon said vehicle and including a transversely directed rotatable shaft near the forward end of said vehicle, said shaft being supported and adapted to be rotated by internal gears journalled in the side arms of said yoke, means for driving said gears, means for supporting said yoke intermediate of its pivotal point and said shaft, ground disturbing implements mounted on said shaft and adapted to rotate therewith, and means for driving said vehicle.

1,453,632. CONSTRUCTION OF EYEGLASSES. GEORGE W. MCKINSTRY and WILBUR H. SIDDALL, Attleboro, Mass., assignors to Bay State Optical Company, Attleboro, Mass., a Corporation of Maine. Filed Mar. 1, 1920. Serial No. 362,467. 14 Claims. (Cl. 88—47.)



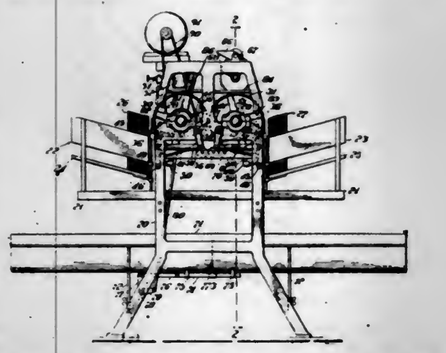
1. In eyeglass construction, in combination, an end piece, a non-metallic rim member terminating adjacent thereto, means mounting said rim member and permitting movement of its end relative to said end piece, and means covering the end joint between said rim member and said end piece.

1,453,633. DEMOUNTABLE TIRE RIM. CLEMENT S. MARTIN, Rockville, Md. Filed Apr. 10, 1922. Serial No. 551,085. 16 Claims. (Cl. 301—33.)



1. A transversely split tire rim, and a rotatable radial member having a screw connection with one end portion of the rim, the other end of the rim having a portion engaging said member to be moved thereby.

1,453,634. CONCRETE MIXER. DAVID BUFFINGTON MARTIN and JOHN WESTERBY, Hagersville, Ontario, Canada. Filed Dec. 15, 1921. Serial No. 522,572. 2 Claims. (Cl. 83—73.)

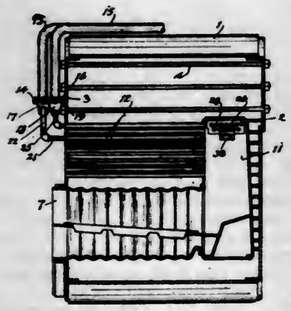


1. In a concrete mixer the combination with the rigid main frame thereof, of a V-shaped rocker guide frame within the main frame, a rocking frame comprising a depending V-shaped portion the apex angle of which is less than that of the aforesaid guide frame, the rocker frame freely mounted within the main frame so that the external apex of the depending V-shaped portion thereof engages the internal apex of the guide frame, the rocking frame being free to be oscillated about the engaging apices, and a mixing drum rotatably carried by the rocking frame.

1,453,635. BREAKER-ARM SYNCHRONIZER. MAYNARD D. MORRIS, Winnipeg, Manitoba, Canada, assignor of one-half to Jesse J. Howe, Dauphin, Manitoba, Canada. Filed Mar. 19, 1921. Serial No. 452,177. 2 Claims. (Cl. 177—339.)

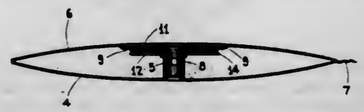
1. A breaker arm synchronizer, comprising a pair of electric lamps, a pair of tongue like contacts mounted on insulating strips, a jaw contact, and electric wire connections connecting the lamps in parallel between the tongue contacts and the jaw contacts.

1,453,636. TAPPING AND WRAPPING MACHINE. PETER PACHTER, Chicago, Ill. Filed Jan. 6, 1919. Serial No. 269,832. 14 Claims. (Cl. 270—58.)



1. In a machine of the class described, a plurality of sheet-gripping members fixed to adjacently positioned cylinders, geared to rotate in opposite directions and place a pair of sheets into juxtaposition between the two cylinders, means whereby the sheets are automatically brought into the path of said gripping members and means whereby adhesive is applied to a portion of the sheets.

1,453,637. PHONOGRAPH STYLUS. THEOPHILUS PARSONS, Camp Dodge, Iowa, assignor to Charles B. Brophy, Rye, N. Y. Filed Apr. 3, 1920. Serial No. 370,942. 3 Claims. (Cl. 274—38.)

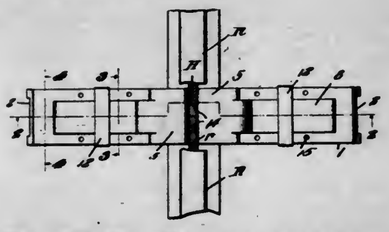


1. In a phonograph, a record-engaging element comprising a freely rotatable disc concave on one face and having a relatively thin sharp edge.

1,453,638. BOILER SUPERHEATER. CYRIL SAMUEL DRAYTON PERRY, Port Arthur, Ontario, Canada. Filed Mar. 29, 1921. Serial No. 456,615. 1 Claim. (Cl. 122—461.)

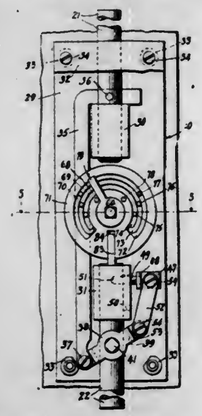
The combination with a boiler having a plurality of furnaces of a super-heater for each furnace comprising a pair of elongated hollow casings supported in the upper part and on opposite sides of the furnace fire box, one of said headers constituting the delivery header and being positioned somewhat higher than the other or receiving header, a plurality of rows of S-shaped super-heating coils connecting the headers of each pair, the coils of one row being located between the coils of the adjoining row, a saturated steam supply pipe, a plurality of distributing conduits extending between said supply pipe and the receiving headers of the super-heaters, a superheated steam conduit, and a plurality of pipes extending between said last mentioned conduit and the delivery headers of the super-heaters.

1,453,639. TATTING SHUTTLE. HAMITAGE L. RICHARDSON, Sebringville, Ontario, Canada. Filed May 16, 1922. Serial No. 561,498. 2 Claims. (Cl. 96—22.)



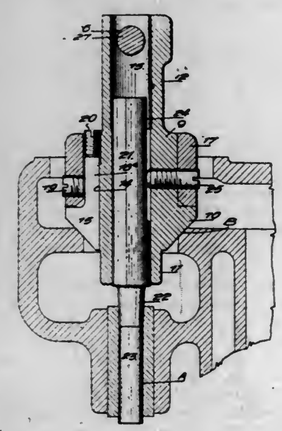
1. A tatting shuttle comprising a shuttle side member, a bobbin carried by said shuttle side member, a removable side member, attaching means for said removable side member and a thread protecting flange carried by said bobbin adjacent the shuttle side.

1,453,640. ELECTRIC HEATER FOR WASHING MACHINES. CHARLES PATRICK RUSSELL, Brandon, Manitoba, Canada. Filed Jan. 7, 1922. Serial No. 527,766. 6 Claims. (Cl. 219—38.)



1. The combination with a washing machine tub, of an electric heater comprising a box like casing contained within the tub and fastened to the bottom of the same and having an outlet passing from the bottom of the casing downwardly through the bottom of the tub, a suitably insulated electric heating coil contained within the casing and suitably insulated contact tips connected electrically to the ends of the coil, said contact tips being directly opposite the outlet aforesaid.

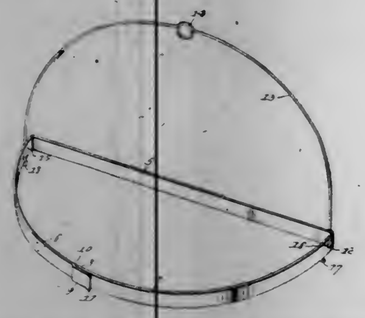
1,453,641. RAIL FASTENER. LOUIS MARTAIN SARTAIN, Pelham, Tenn. Filed Dec. 21, 1922. Serial No. 608,268. 4 Claims. (Cl. 238—209.)



2. The combination with a base plate having communicating recesses in the upper and lower faces thereof, of opposed rail clamping jaws having recesses for the reception of the base flanges of rails, tongues extending from the jaws, projections thereon adapted to be seated in the upper recesses, and ears on the projections insertable into the upper and lower recesses and adapted to be seated in the lower recesses.

1,453,642. COMBINATION LOCK. WILLIAM SCHMITZ, New York, N. Y. Filed Feb. 7, 1922. Serial No. 534,675. 3 Claims. (Cl. 70—53.)

2. A lock comprising manually operated locking bolts slidable in opposite directions, a frame, a sleeve extending into said frame, a plurality of notched discs mounted on said sleeve, a spindle rotatable in the sleeve, a graduated dial attached to the outer end of the spindle, tumbler pins in said discs, means for turning said discs in opposite directions until the notches therein are alined, a flattened extension on the inner end of one of said bolts adapted to enter the notches of said discs when alined, a yoke operatively engaging both of said bolts, and means on said yoke for actuating said bolts simultaneously.



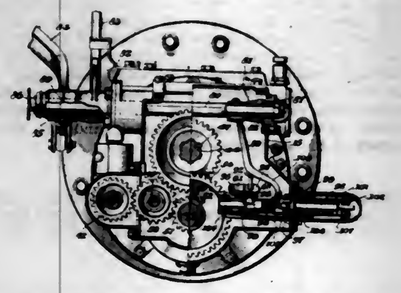
1,453,643. REAMING TOOL FOR TRUING VALVE SEATS. HARRY T. SHEARER, Waynesboro, Pa. Filed Jan. 10, 1922. Serial No. 528,152. 7 Claims. (Cl. 90—12.5.)

1. A tool of the character set forth, comprising a cutter head having a tapered bearing portion and a slot

opening therethrough, a cutting blade adjustably located in the slot having a cutting edge corresponding substantially to the face of the bearing portion, an adjusting screw in the head bearing against the end of the blade opposite to the cutting edge, and a set screw bearing laterally against the blade for clamping it against movement when adjusted.

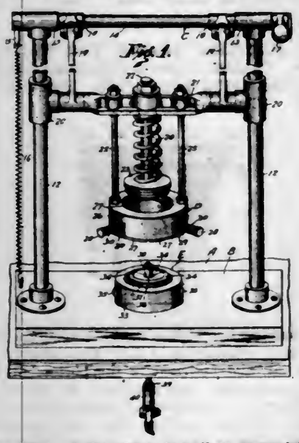
1,453,644. NECKTIE HOLDER. WILLIAM R. TINGLE, Charlotte, N. C. Filed Mar. 30, 1922. Serial No. 548,119. 2 Claims. (Cl. 211—17.)

1. In a necktie holder, a member having extensions projecting outwardly therefrom, the ends of the said extensions overlapping each other, a bail extending through the extensions and pivoted thereon, the said bail having angularly disposed portions underlying the said extensions for limiting the movement of the bail and member with relation to each other in one direction.



1,453,645. SLAT DRIER FOR DRYING PAPER. JOHN WARREN VEDDER, Worcester, Mass. Filed June 23, 1921. Serial No. 479,571. 4 Claims. (Cl. 34—48.)

3. In a rotatable slat drier or drum for drying paper, the combination of a tubular shaft or axle adapted to rotate in suitable supporting bearings and to serve as a conduit for delivery of drying medium within the drum through perforations in the wall of the shaft, two drum heads rigidly secured to said shaft, peripheral slats extending between and rigidly secured to said drum heads, means for communicating driving power to said tubular shaft, connections to one end of said tubular shaft for supplying drying medium from a suitable source, and fan blades attached to and rotating with said shaft and adapted to assist circulation within the drum.



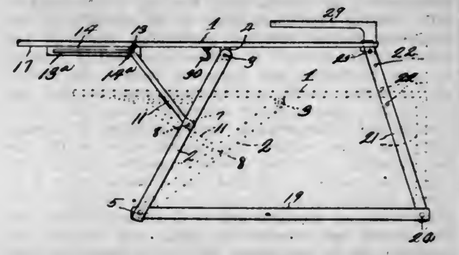
1,453,646. MOTOR VEHICLE. JESSE G. VINCENT, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Original application filed Jan. 31, 1916, Serial No. 75,414. Divided and this application filed Nov. 27, 1918. Serial No. 264,436. 9 Claims. (Cl. 74—39.)

1. In a mechanism of the class described, the combination of a plurality of rectilinearly shiftable elements arranged side by side and having transverse grooves therein, a member pivotally mounted for rocking movement having two arms and adapted to be moved axially of its pivot one arm traveling through said grooves to be operatively connected with said elements in succession, a locking bolt movable transversely of the direction of movement of said elements and cooperating with the lat-

ter to lock all of the elements except the one which is operatively connected with said member, the second arm engaging said bolt whereby the bolt is shifted when the member is moved axially of its pivot and spring means associated with said bolt to assist shifting said elements.

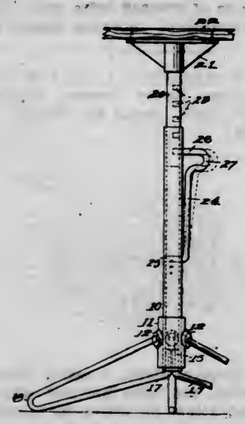
1,453,647. DISTRIBUTING-GATE MACHINE. WILLIAM A. WATERMAN, Exeter, Calif. Filed Nov. 9, 1921. Serial No. 513,976. 8 Claims. (Cl. 113—48.)

1. A machine of the class described comprising a base having an expansible plug provided with prongs to upset a flange and tube from the interior, means to expand said plug, an expansible ring for engaging the exterior of a tube, and means to move said ring downwardly over said plug into engagement with said base to contract said ring.



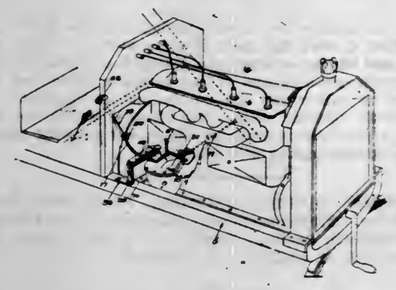
1,453,648. TIE FASTENER. JOSEPH GEORGE WHITEACRE, Vancouver, British Columbia, Canada. Filed Sept. 17, 1921. Serial No. 501,426. 2 Claims. (Cl. 24—59.)

1. A tie fastener comprising an anchor member having an attaching loop and fitted with a pair of forwardly



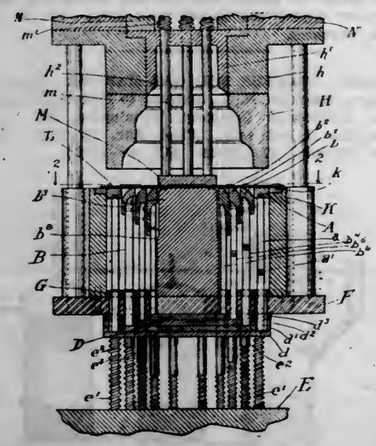
extending legs and having the forward ends of the legs connected by a cross member, a tie carrying member pivotally carried by the cross member and a spring associated with the tie carrying member.

1,453,649. IRONING TABLE. EDWIN H. WILKINSON, Omaha, Nebr. Filed Jan. 12, 1922. Serial No. 528,609. 1 Claim. (Cl. 68—10.)



An ironing table comprising a top, spaced legs pivoted to the under side of said top at points spaced from its ends, a brace pivotally and slidably connected to the under side of said top, and at a point spaced from its under face, said brace extending downwardly and having its lower end pivotally connected to the pivoted legs, connecting bars pivoted to the lower end of said legs and terminating beyond the rear end of the table top, upwardly and inwardly extending legs pivoted to the rear ends of said connecting bars, transversely disposed rods carried by said last named legs and adapted to be received by a transversely disposed groove in the under face of the rear end of the table top, means for maintaining said rods in said grooves, means for holding said top in various positions, said means comprising a gravity actuated detent cooperating with notches in the under face of the top, said gravity actuated detent being carried by a clamping bolt, and held against movement thereby when tightened.

1,453,650. BASE FOR TOOLS AND OTHER FURNITURE. HOWARD C. WILLSON, Worcester, Mass. Filed Mar. 27, 1922. Serial No. 547,145. 2 Claims. (Cl. 155—138.)

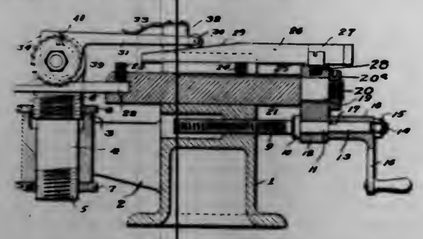


1. In an article of furniture, the combination of a hollow vertical standard, a casting secured to the bottom thereof having a plurality of radiating arms each provided with an inclined passage extending in through the arm to the vertical external surface of the standard, and the same number of legs each consisting of a wire bent near the center and having two separate arms in a vertical plane, one loosely fitting in one of said passages and having a vertical end surface provided with an angular upper end engaging said vertical surface of the standard and the other secured to the bottom of the standard and extending up into it and into the bottom of said casting, whereby when pressure is applied to the standard the angular top of the loose arm will project inwardly and grip the side of the standard.

1,453,651. FOOT ACCELERATOR. ALBERT MERFEY ALEXANDER, Valley Mills, Tex. Filed Dec. 29, 1921. Serial No. 525,644. 3 Claims. (Cl. 74—8.)

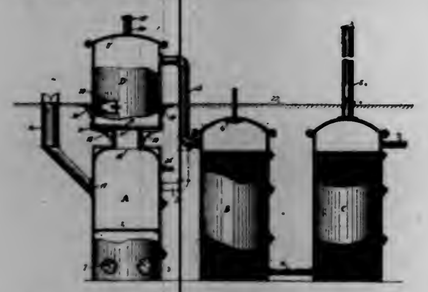
3. A foot accelerator comprising an arm having its intermediate portion offset and its forward portion arranged in L-shaped formation to provide upwardly and forwardly extending branches, the forwardly extending branch being adapted to overhang the throttle arm of the carburetor, said forwardly extending branch being provided with means whereby the same may be pivotally connected to the throttle arm of the carbureter, the rear portion of said arm being curved longitudinally and provided with an apertured ear, and a longitudinally movable pedal slidable through the floor board of the vehicle and having its forward portion connected to the apertured ear.

1,453,652. METHOD AND APPARATUS FOR FORMING SHEET-METAL ARTICLES. JAMES H. AUBLE and JAMES L. AUBLE, Cincinnati, Ohio, assignors to The Auble Die and Stamping Company, Cincinnati, Ohio, a Corporation of Ohio. Filed June 27, 1919. Serial No. 307,153. 5 Claims. (Cl. 113—48.)



1. An apparatus for molding objects from sheet metal blanks comprising concentric dies, means adapted to mount them fixedly and a means adapted to be actuated by each die for releasing adjacent dies.

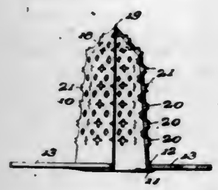
1,453,653. PUMP. FRED C. BERG, Coalinga, Calif., assignor to Eli P. Plaugher, Coalinga, Calif. Filed Sept. 11, 1919. Serial No. 323,079. 2 Claims. (Cl. 103—177.)



2. In combination, a wall casing, a barrel therein extending a relatively short distance above the wall casing and having its upper end threaded, a nipple mounted upon the threaded end of the barrel, a valve seat situated in said nipple and on the end of the barrel, an upwardly opening check valve situated within the nipple, a pipe leading from the nipple and pumping mechanism communicating with said pipe.

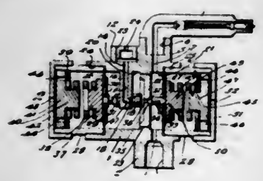
1,453,654. MILLING MACHINE. JOHAN ERIK BERGSTRÖM, Christiania, Norway, assignor to Gustaf Stahle, Stockholm, Sweden. Filed Jan. 24, 1921. Serial No. 439,670. 2 Claims. (Cl. 90—13.1.)

1. In a milling machine of the class described, a support, a sleeve mounted in a bearing of the support and provided with an eccentric bore, a spindle mounted in said bore and provided with driving means and also with a milling cutter, a work holder, a support therefor on which the work holder is mounted for sliding movement, means to actuate the work holder, and means, including an element having limited movement with the work holder, to partly turn the said sleeve and thereby vertically adjust the spindle and cutter as the work holder advances.



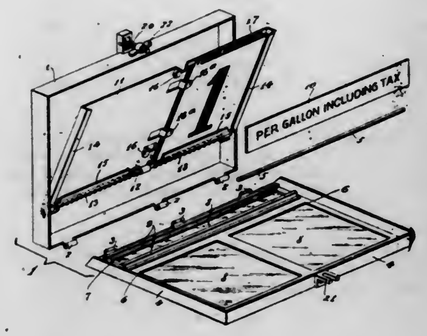
1,453,655. PROCESS FOR GAS MAKING. HAROLD R. BERRY, Brooklyn, N. Y., assignor to Petroleum Research and By-Products Company, Wilmington, Del., a Corporation of Delaware. Filed Mar. 22, 1923. Serial No. 626,909. 17 Claims. (Cl. 48—204.)

14. A process for modifying and enriching carbon monoxide containing gas, which consists in converting carbon monoxide into carbon dioxide by any suitable means with hydrogen release and enriching the modified gas.



17. A process for producing a non-toxic combustible gas from carbonaceous material and steam, greater in volume and thermal value than that of water gas produced from like quantities, which consists in operating a water gas generator during the gas-making run to low temperature, to substantially that at which reaction fails, causing thereby increase of the quantity of carbonaceous matter entering gas-making reactions and decreasing the amount of carbonaceous matter required for heat production and increasing thereby the production of carbon dioxide and hydrogen quantities and converting the reduced carbon monoxide values into carbon dioxide and hydrogen, the hydrogen being of substantially the same volume and thermal value as the carbon monoxide converted, through reaction within a reagent zone suitably equipped and operated with a reagent material and steam so that the reagent is oxidized releasing hydrogen and is dioxidized forming carbon dioxide and rejuvenating itself, and enriching the resultant gas by contacting with carbonaceous material and removing therefrom by suitable means the carbon dioxide content to selected amount and effecting, to necessary extent, elimination of any toxic quantities and impurities present through the agency of washers, scrubbers and purifiers.

1,453,656. GASEOUS-FUEL MIXER. DOROTHY BONNELL, Winchester, Ky. Filed Aug. 25, 1921. Serial No. 495,192. 5 Claims. (Cl. 48—180.)

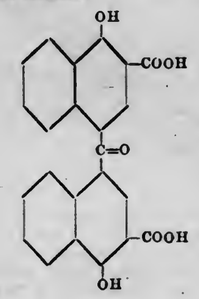


4. A gaseous fuel mixer of the character specified, comprising a tubular body portion having a plurality of encircling rows of punched holes, each of said holes presenting a plurality of projecting jagged edges.

1,453,657. LOW-PRESSURE ALARM FOR PNEUMATIC TIRES. WALTER HENRY BROWN, Pasadena, Calif. Filed Aug. 24, 1922. Serial No. 584,132. 3 Claims. (Cl. 116—34.)

2. In a low pressure alarm, a casing attachable to a source of pressure, and being provided with an outlet, a valve disposed within the casing for controlling communication between the source of pressure and the outlet, a spring reacting against the valve to tend to hold the latter in open position, a diaphragm supported within the casing and connected with the valve to move the latter to closed position when the diaphragm is actuated by definite fluid pressure, a second valve disposed within the casing and controlling communication between the first valve and the source of pressure, a spring reacting against the second valve tending to hold it in closed position, and a second diaphragm supported within the casing and connected with the second valve for moving the latter to open position when the second named diaphragm is actuated by a definite fluid pressure.

1,453,658. PRICE INDICATOR. GEORGE B. CLOUGH, Meriden, Conn. Filed Feb. 23, 1922. Serial No. 538,446. 7 Claims. (Cl. 40—13.)

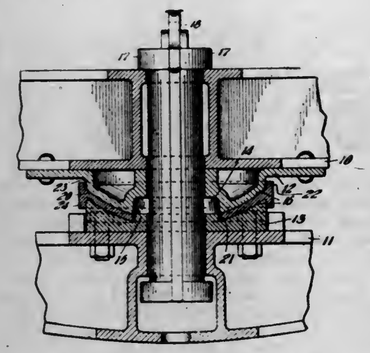


1. An indicator comprising a casing, a perforated cover hinged to said casing, a card holder hinged within said casing, tensioning means for said card holder operating to force said card holder against said casing, and a plurality of digit cards within said holder.

1,453,659. INTERMEDIATE PRODUCT FOR THE MANUFACTURE OF DYESTUFFS AND PROCESS OF MAKING SAME. GUILLAUME DE MONTMOLLIN, JOSEF SPIELER, and GERALD BONHÔTE, Basel, Switzerland, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Filed Apr. 4, 1922. Serial No. 549,550. 2 Claims. (Cl. 260—64.)

1. The herein described process for the manufacture of the 4 : 4'-dioxydinaphthyl-1 : 1'-ketone-3 : 3'-dicarboxylic and 1-oxynaphthalene-2 :4-diacarboxylic acids, consisting in separating these compounds from the mixture which is produced by acting on 1-naphthalene-2-carboxylic acid with tetrahalogenated methane derivatives in presence of agents capable of neutralising the acids by virtue of the characteristic solubilites of the alkali metal and alkaline earth metal salts of the said compounds.

2. As a new product, the 4 : 4'-dioxydinaphthyl-1 : 1'-ketone-3 :3'-dicarboxylic acid constituting a whitish powder fusing, when quickly heated to near 259° C., dissolving in caustic alkalies with a yellow coloration and corresponding to the formula:



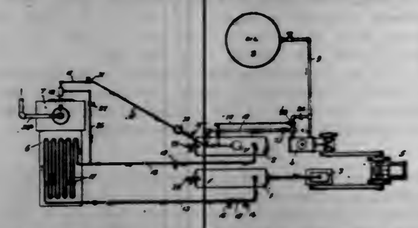
1,453,660. AZO DYESTUFFS AND PROCESS FOR THE MANUFACTURE OF SAME. GUILLAUME DE MONTMOLLIN, GÉRALD BONHÔTE, and JOSEF SPIELER, Basel, Switzerland, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Filed Feb. 6, 1923. Serial No. 617,385. 17 Claims. (Cl. 260—76.)

12. The herein described new dyestuffs resulting from the action of unsulfonated diazo-compounds on the unsulfonated derivatives of the 4-oxynaphthalene-1-arylketones corresponding with the general formula

$$(R'-N=N-)_nR$$

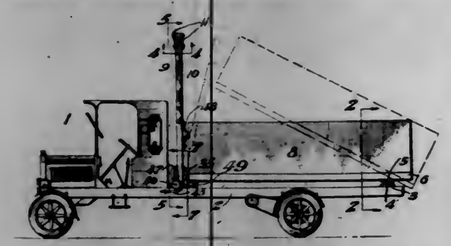
wherein n signifies a whole number smaller than 3, R an unsulfonated aromatic complex comprising, besides other eventual substituents, a group—O—R (wherein R may represent an alkyl, aryl, and aralkyl radical) in orthoposition to the azo-groups, and R' the radical of an unsulfonated 4-oxynaphthalene-1-arylketone, which dyestuffs constitute orange to dark black blue powders insoluble in water, producing on the fiber to which they are applied orange to violet blue tints.

1,453,661. SHIM FOR CENTER-BEARING PLATES. CHARLES E. DATH, Chicago, Ill., assignor to William H. Miner, Chazy, N. Y. Filed Feb. 16, 1920. Serial No. 359,042. 2 Claims. (Cl. 64—64.)



1. A shim adapted to be interposed between the body and truck center bearing plates of a car, wherein the center bearing plates are provided with co-operating male and female formations; said shim having a web of uniform thickness centrally perforated to accommodate the male formation of the center bearing plate therein and provided with upwardly and downwardly extending exterior peripheral annular flanges, the diametrical distance between the interior faces of each of said flanges being substantially the same as the exterior diameter of the bearing face of the corresponding bearing plate, whereby said flanges are adapted to overlie the peripheral outer faces of the body and truck center bearing plates, respectively, and retain the shim in assembled relation to both of said center bearing plates when interposed therebetween.

1,453,662. FIRING BOILERS BY MEANS OF FUEL OIS. WILLIAM P. DUNHAM, Copperas Cove, Tex., assignor to Nebulizer Oil Burning Company, a Corporation of Delaware. Filed July 16, 1920. Serial No. 396,700. 14 Claims. (Cl. 158—36.)



1. In the art of firing boilers, that improvement which consists in maintaining a continuous flow of compressed air, into and through an atomizer and also upon oil in a storage vessel to force the oil to the atomizer in a column at a speed which is not greater than the speed of the atomizing air, said oil column being then, within the nozzle of said atmoizer, retarded by the stream of pres-

sure air there passing, at its higher speed, across the face of the oil column, said air also, within the confines of the

burner, finely dividing the oil and in said condition ejecting the so treated oil particles with the speed of the emerging air.

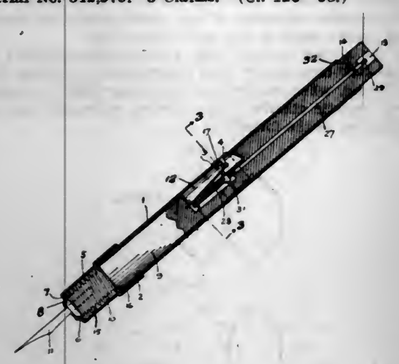
1,453,663. DUMP-BODY HOIST. WILLIAM B. ENGLER, Youngstown, Ohio. Filed Nov. 27, 1920. Serial No. 426,716. 3 Claims. (Cl. 298—19.)

1. In a dump body hoist, a vehicle frame, a dump body pivotally mounted on said vehicle frame, a mast freely swinging rearwardly and pivotally mounted on the base of said hoist, fixed stops so located as to prevent said mast from swinging forward, arms attached to the forward end of said body, a pivotal pin carried by said arms and located forwardly of a vertical plane through the pivots of said mast, a flexible cable, a series of sheaves and a winding drum connecting said pin with said mast, by the manipulation of which, the front end of said body may be hoisted and whereby when said pin in its upward and rearward travel has crossed approximately the center line of said mast, the direction of pull of said cable maintains said mast in a state of stable equilibrium and causes its rearward movement to conform to that of said body.

1,453,664. LEAF UPSETTING AND SUPPORTING DEVICE. CHARLES R. FARGO, Chicago, Ill., assignor to Wilson-Jones Loose Leaf Company, a Corporation of Illinois. Filed Aug. 13, 1917. Serial No. 185,976. 16 Claims. (Cl. 129—18.)

1. The combination of leaf upsetting means for a loose leaf receptacle, comprising an independent device adapted to be placed in the receptacle so as to support the leaves thereon at successively higher elevations.

11. The combination with a loose leaf receptacle having a longitudinal guide at each side thereof, of a follower movable along said guide and comprising a pair of transverse members engaging the guides, one of said transverse members being adjustable to and from the other transverse member to clamp the guides between the transverse members and lock the follower in adjusted positions.

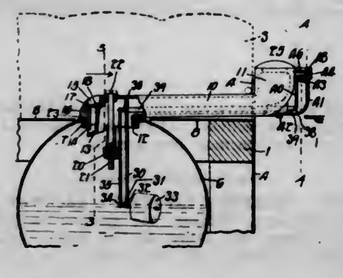


1,453,665. ATTACHMENT TO GAS STOVES. GERALD FOLL, Winnipeg, Manitoba, Canada. Filed Mar. 13, 1922. Serial No. 543,451. 3 Claims. (Cl. 126—39.)

1. An attachment to the oven outlet collar of a gas stove comprising an extending casing fitting the collar, a layer of steel wool suspended within the casing, a layer of asbestos above the wool and a deodorizing material.

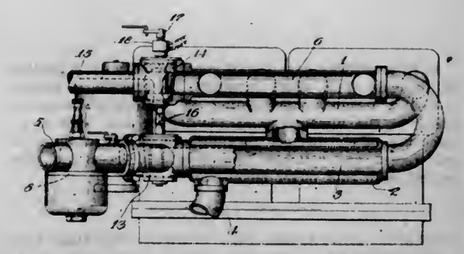
1,453,666. DRY DOCK. DOMINICK FRANOVICH, Venice, La. Filed Jan. 13, 1922. Serial No. 529,061. 5 Claims. (Cl. 214—1.)

1. In a dry-dock, the combination of a support, a ship-receiving dock arranged on the support and means for moving the front and rear portions of the dock longitudinally with respect to each other and on the support and other means for rocking a portion of the dock transversely with respect to the support.



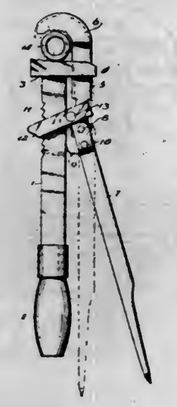
1,453,667. PENHOLDER. JAMES JOHN GILLIS, Vancouver, British Columbia, Canada. Filed Mar. 11, 1922. Serial No. 542,975. 5 Claims. (Cl. 120—98.)

3. A pen holder for the purpose described having a barrel with a spring cover extension, a compression spring



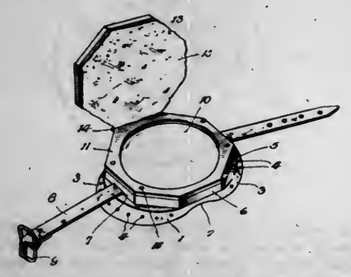
therein, a clip member removably sprung upon the barrel having a tongue projecting through the side wall of the barrel to limit the sliding movement of the pen holding member, said clip member having a pair of spring legs projecting towards the transverse centre of the barrel, which legs terminate in semi-spherical knobs for releasing engagement with an adjustable wedge block mounted upon a spring, a block slidably movable under said spring, having screw rod means of positioning same for the tensioning of said spring, and key means of retaining the screw rod in endwise position and means for rotating same.

1,453,668. FILLER AND GAUGE. GEORGE R. GOIN, and REXFORD E. HITE, Highland Park, Mich.; said Goin assignor to said Hite. Filed Mar. 24, 1919. Serial No. 284,739. 5 Claims. (Cl. 220—85.)



5. A tank filler comprising a substantially horizontal tube extending from a tank beneath the seat of an automobile to a point beyond the seat, said tube having an upward bent at the outer end and a downwardly bent part at the inner end to fit in the filling opening of the tank, said tube having at its inner end a thickened portion, an air vent extending upward through the said thickened portion and a bolt extending downward through the tube, and a yoke within the tank straddling the filling opening and engaged by the bolt to hold the tube in place, substantially as set forth.

1,453,669. ENGINE PREHEATER. JOHN GOOD, Garden City, N. Y., assignor to Good Inventions Co., Brooklyn, N. Y., a Corporation of New York. Filed Oct. 20, 1917, Serial No. 199,012. Renewed Sept. 29, 1922. Serial No. 591,412. 9 Claims. (Cl. 123—122.)

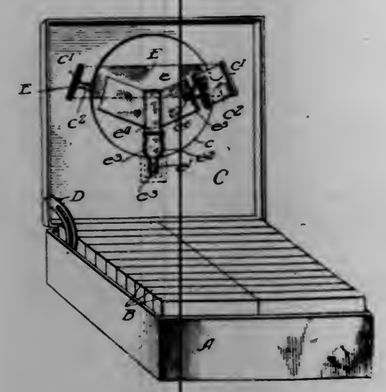


1. The combination in an engine, of means for introducing fuel and air for internal combustion therein including an intake passage, and independent means including a source of fluid pressure for non-explosively burning liquid fuel in said passage.

1,453,670. WRENCH. BENJAMIN J. GREER, Poynor, Tex. Filed Apr. 3, 1922. Serial No. 549,082. 7 Claims. (Cl. 81—89.)

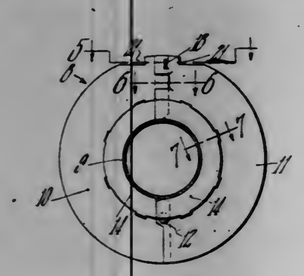
1. A wrench including an arm, a jaw fixed with respect thereto, a second jaw movably mounted with respect to the fixed jaw, a lever pivoted to the movable jaw, an abutment adjustably mounted on the arm, and a pivoted link on the lever for engaging said abutment.

1,453,671. WRIST MIRROR. SHERMAN HARROLD, Hartford City, Ind. Filed Nov. 19, 1921. Serial No. 516,409. 3 Claims. (Cl. 224—28.)



1. An article of the character described comprising a base block, a backing secured upon the outer side of the base block, a mirror resting upon the backing, a rim secured upon the outer surface of the backing and overhanging the edge of the mirror, and a retaining strap passing between the backing and the base block and over the edges of the base lock.

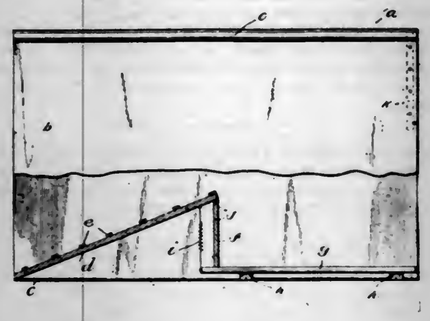
1,453,672. DISPLAY BOX. CLARENCE E. HEATON, Chicago, Ill., assignor to Wilson Brothers, Chicago, Ill., a Corporation. Filed Nov. 7, 1921. Serial No. 513,253. 3 Claims. (Cl. 206—44.)



1. Means for displaying garters comprising a flat part having in its upper portion slots placed at a distance apart through which slots the leg band of the garter may pass and having at a distance below said slots a hole to admit the button of the garter tab, and

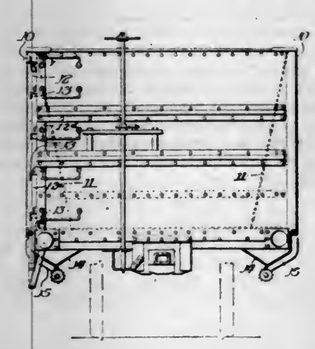
having also a relatively large opening above said hole and between said slots, through which opening the body

of the garter may be exposed and through which the button loop of the garter may be passed to enable said loop to engage said button.



1,453,673. OIL SHIELD FOR BELT PULLEYS. ALBERT H. HEBERT, Holyoke, Mass. Filed Oct. 1, 1921. Serial No. 504,622. 7 Claims. (Cl. 64—22.)

1. A device of the character described comprising an absorbent washer, a disk, a separate retaining ring, the disk being of greater diameter than the washer and the washer being interposed between the disk and the ring and means on the ring for securing the ring and washer to the disk, the device as a whole being adapted to be fixedly secured upon a shaft with the inner peripheral face of the washer in contact with the shaft, and with the inner peripheral faces of the ring and disk spaced from the shaft.

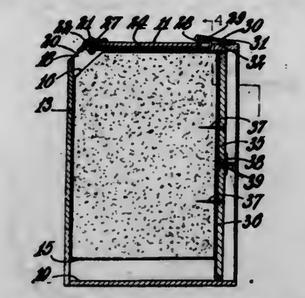


1,453,674. POULTRY-DIPPING MACHINE. CLARENCE ELLIOTT HEDRICK, Newton, Kans. Filed Dec. 15, 1921. Serial No. 522,687. 2 Claims. (Cl. 119—158.)

1. A poultry dipping device comprising in combination with a dipping tank, a box like structure consisting of side and top walls, and having one end entirely open and the opposite end closed at its upper portion by a transverse wall, the front portion having a stationary inclined floor, the rear portion having a sectional floor consisting of sections hingedly connected at their outer edges with said side walls and their opposing edges meeting in the center, a transverse partition separating the inclined floor portion from the sectional floor portion, said sections extending beneath and beyond said parti-

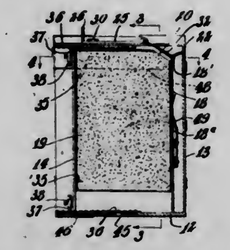
tion, and springs connected at one end to the said ends of said doors or sections, and at their other ends to the underside of said inclined floor section.

1,453,675. MAXIMUM-CAPACITY RAILWAY CAR. DAVID HINDAHL, Chicago, Ill., assignor to Harry S. Hart, Chicago, Ill. Filed Jan. 3, 1922. Serial No. 526,547. 4 Claims. (Cl. 105—406.)



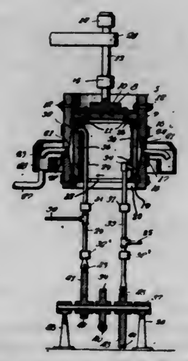
1. In a railway car, a wall constructed with a portion of its side wall offset inwardly to provide a ladder-receiving recess corresponding in dimensions substantially to the dimensions of the ladder and with a reinforcing offset member forming one of the confines of said recess, and a ladder located in said recess and supported upon said offset member.

1,453,676. CONTAINER FOR PACKED POWDER AND FOODSTUFFS. JEREMIAH HORAN, New York, N. Y. Filed July 21, 1921. Serial No. 486,456. 3 Claims. (Cl. 206—56.)



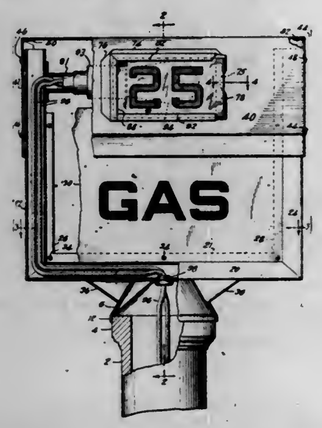
1. A container for packaged foodstuffs comprising a rectangular casing having a discharge opening at the top of one wall thereof, the opposite wall of the casing being in the form of a movable plate, and means for locking said plate at varying distances from the first wall,

said means comprising a locking bar pivoted between its ends to said plate and adapted to bear outwardly



against the inner faces of the side walls of the container at its ends.

1,453,677. BOOK CONTAINER FOR PACKAGED FOODSTUFFS. JEREMIAH HORAN, New York, N. Y. Filed Dec. 2, 1921. Serial No. 519,337. 5 Claims. (Cl. 206—56.)



1. In a container for packaged foodstuffs, a movable wall element, a pair of rack members at opposite ends thereof, and bolts carried by said movable wall element, and engaging said racks, springs normally urging said bolts to released position, ratchet fingers fixed to said bolts, and spring pressed pins engaging said ratchet fingers to hold said bolts in locking position.

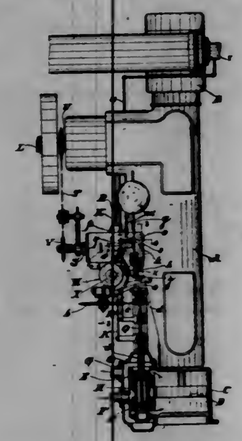
1,453,678. CENTRIFUGAL SEPARATOR. SYLVESTER S. HOWELL, Chicago, Ill., assignor to United Chemical and Organic Products Company, Chicago, Ill., a Corporation of Delaware. Filed June 12, 1920. Serial No. 388,674. 6 Claims. (Cl. 210—66.)

1. A centrifugal separator comprising a cylinder having a filtering side wall against which the material is held by centrifugal action and having an open bottom thru which the material is free to fall when the rotation of the cylinder is stopped; an axially movable nozzle for projecting the material against the filtering side wall when the cylinder is being rotated and a means axially movable in alternate timed relation with the nozzle to loosen the material from the side wall.

1,453,679. DISPLAY SIGN. DAVID ISHBIA, Palisades, N. J.. Filed Dec. 9, 1921. Serial No. 521,178. 7 Claims. (Cl. 40—130.)

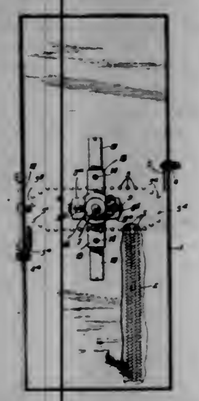
1. A display sign comprising a base having uprights secured thereto, a hood carried by said uprights, a sign beneath said hood secured to said uprights and a single lamp within said hood adapted to illuminate said sign, the inner surface of said hood serving as a reflector to direct the rays of light to both sides of said sign.

1,453,680. HOOK. EINER JOHNSON, Duluth, Minn. Filed July 1, 1922. Serial No. 572,280. 2 Claims. (Cl. 292—95.)



1. A hook of the character described suspended within a screw eye having means formed integral therewith to prevent lateral movement of the hook.

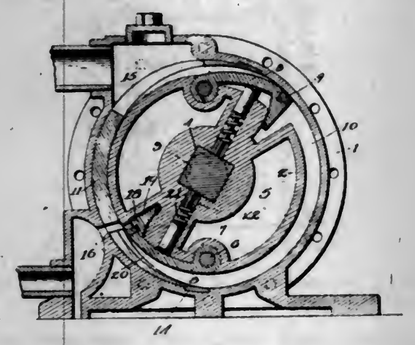
1,453,681. OIL GOVERNOR FOR COMPRESSOR ENGINES. JOSEPH W. JONES, Corning, N. Y., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed May 27, 1922. Serial No. 564,101. 3 Claims. (Cl. 103—12.)



1. In an engine driven compressor, a discharge line pressure and speed controlled regulator, comprising a chamber, a fluid actuated plunger therein connected to an inlet valve of the engine, a pump responsive to the engine speed for supplying fluid to said chamber, a by-pass pilot valve for controlling the supply of fluid to said chamber, means responsive to discharge line pressure for

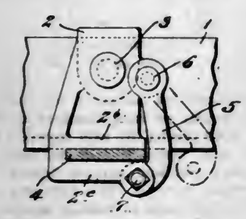
moving said pilot valve in a direction to increase the supply of fluid to the plunger chamber, and opposing means actuated by the plunger, and including a cam and

follower, operatively connected to move said pilot valve in the opposite direction tending to decrease the supply of fluid to the plunger chamber.



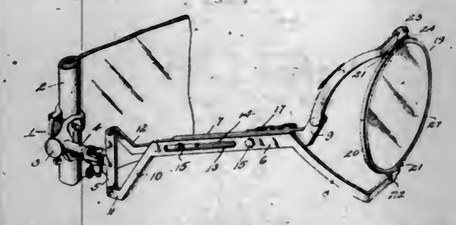
1,453,682. RHEOSTAT. LEONARD KEBLER, Bronxville, N. Y., assignor to Ward Leonard Electric Company, a Corporation of New York. Filed Dec. 20, 1920. Serial No. 431,828. 15 Claims. (Cl. 219—48.)

1. A rheostat comprising a rotatable contact arm, a series of fixed contacts, and resistance elements connected to said contacts, a portion of said series of contacts being nearer the axis of said arm than another portion of said contacts.



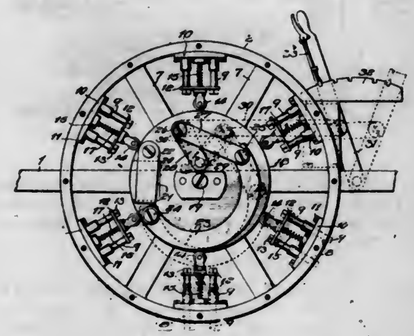
1,453,683. ROTARY ENGINE. SIRIUS EDWARD KOCHENDARFER, Washington, Pa. Filed Nov. 28, 1919. Serial No. 341,032. 1 Claim. (Cl. 121—95.)

A rotary engine comprising a stator having inlet and exhaust openings, a rotor peripherally spaced from the stator to provide a working chamber, a crescent inserted to fill one side of the working chamber and cover said openings, the crescent being tapered at the ends to provide cam approaches, one having a large exhaust port fitting over the exhaust opening, the other having a narrow inlet port fitting over the inlet opening and merging with a recess in the face of the crescent which tapers and



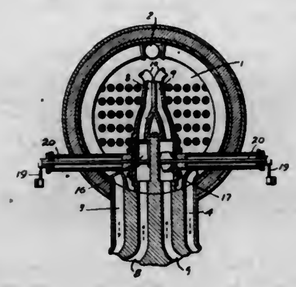
diminishes in depth in the direction of rotation of the rotor; and a pair of pistons carried by the rotor having means to keep them in contact with the working chamber wall.

1,453,684. THIRD OR FOURTH POINT SUSPENSION SUPPORT MOUNT OR BRACKET FOR BRAKE BEAMS. ERNEST A. LE BEAU, Chicago, Ill., assignor to Chicago Railway Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 2, 1921. Serial No. 489,241. 9 Claims. (Cl. 188—213.)



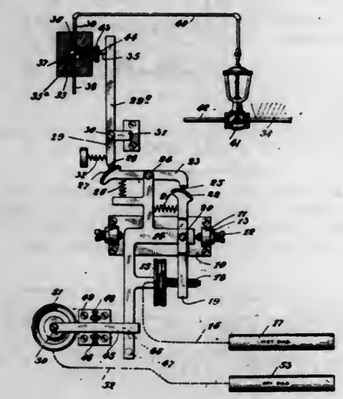
5. A brake beam third or fourth point suspension support-mount comprising a member having a recess adapted to receive the support and a permanently connected member movable at an angle, relative to the support, for holding it in said recess.

1,453,685. SHIELD FOR MOTOR VEHICLES. CHARLES A. LONGENBAUGH, Columbus, Ohio. Filed Apr. 10, 1922. Serial No. 551,385. 5 Claims. (Cl. 296—97.)



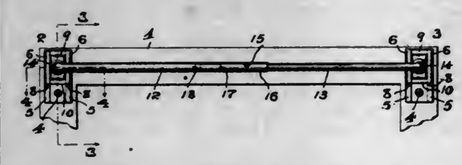
4. In a device of the class described, a pair of longitudinally sliding bars, means for supporting the bars on a vehicle, a glare shield pivotally associated with the bars and capable of swinging automatically on its horizontal axis when sliding movement is imparted to the bars.

1,453,686. TRACTOR OR TRUCK WHEEL. LOUIS LOOK, Chicago, Ill. Filed Apr. 17, 1922. Serial No. 554,062. 10 Claims. (Cl. 301—48.)



3. In combination with a vehicle, a pair of supporting wheels, a series of pins slidable radially through the rim wall of said wheels, a stationary concentric disc operatively engageable with the pins to prevent their accidental withdrawal from the rim wall and having a radial recess in its periphery, an insert fitting into said recess flush with the disc periphery, means for removably holding said insert in place whereby it may be removed to permit one of said pins to be withdrawn radially inwardly from the rim, a cam carried on said disc and operatively engageable with said pins in succession to actuate them radially through said wheel rim and means for detachably locking said cam to adjustably limit the outward radial movement of said pins.

1,453,687. MEANS FOR REUTILIZING STEAM. FREDERICK L. MCGAHAN, Los Angeles, Calif.; Viola K. Walker, administratrix of said Frederick L. McGahan, deceased, assignor to The Purposed Mind Development Security Association of the World, a Trust Company. Filed June 16, 1919. Serial No. 304,454. 3 Claims. (Cl. 105—38.)

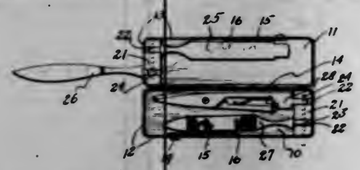


1. In combination with the driving engine of a locomotive, a turbine and means for supplying exhaust steam from the driving engine on each side of the locomotive to said turbine, said means comprising a plurality of passages, each passage constituting connection between a locomotive engine and the turbine.

1,453,688. INSTRUMENT OF PRECISION. HERBERT P. MILKER, Brooklyn, N. Y., assignor to Charles J. Tagliabue Manufacturing Co., Brooklyn, N. Y., a Corporation of New York. Filed Dec. 2, 1921. Serial No. 519,365. 15 Claims. (Cl. 236—44.)

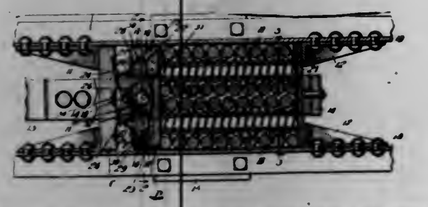
2. In an apparatus capable of transmitting movements generated by pressure changes, a member movable in one plane by pressures from one source and also movable in another plane by pressures from another source, and means controlled by said member.

1,453,689. CURTAIN-SUPPORTING ATTACHMENT. VITO NOLE, Newark, N. J. Filed Jan. 14, 1919. Serial No. 271,061. 2 Claims. (Cl. 156—22.)



2. A curtain-attachment for windows, and the like, comprising a pair of rectangularly-shaped supporting elements adapted to be secured in fixed positions, each supporting element having its vertically disposed margins bent over into positions parallel with the face of said supporting element, the upper portions of said bent margins being spaced from said face to provide guideways, thereby to provide a stop between each tightly forced down portion and the guide-way, the lower portion of each supporting element beneath said stops being provided with an exposed perforation for the reception of a receiving means, a pair of slide-plates movably disposed between the guide-ways of the respective supporting elements, said slide-plates normally resting upon said stops, and a supporting rod connected at its ends with said slide-plates, said rod comprising a pair of telescopically arranged tubular members, and a pointed inserting member extending from one of said tubular members.

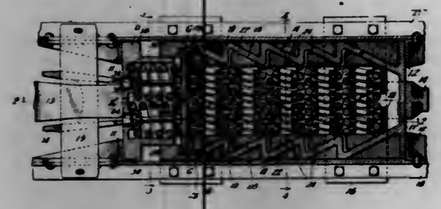
1,453,690. TOILET ACCESSORY. VINCENT O'CONNELL, New York, N. Y. Filed Aug. 9, 1922. Serial No. 580,648. 2 Claims. (Cl. 132—79.)



1. A casing comprised of two equal oblong rectangular halves, a hinge connecting said halves along one of their longer edges, releasable snap fastenings on the opposite edges of each half, slotted blocks fixed in the opposite ends of each half casing, the slots extending through the

end walls of the casings, and a plurality of various implements hingedly engaged within the mentioned slots of

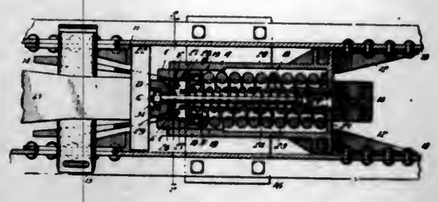
said blocks, said implements being adapted to extend individually outward or fold within the casing.



1,453,691. FRICTION SHOCK-ABSORBING MECHANISM. JOHN F. O'CONNOR, Chicago, Ill., assignor to William H. Miner, Chazy, N. Y. Filed Oct. 30, 1919. Serial No. 334,568. 6 Claims. (Cl. 213—36.)

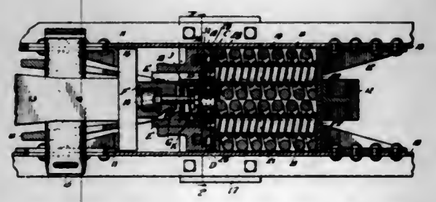
2. In a friction shock absorbing mechanism, the combination with a friction shell having oppositely inclined sets of friction surfaces on each side of the center line thereof, of a spring resistance, a follower engaging one end of said spring resistance, two sets of friction elements co-operable with said friction surfaces of the shell, one element of each set of friction elements engaging said follower, and a second follower, a different element of each of said sets of friction elements engaging said second follower

---



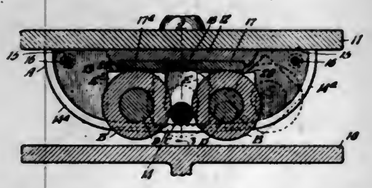
1,453,692. FRICTION SHOCK-ABSORBING MECHANISM. JOHN F. O'CONNOR, Chicago, Ill., assignor to William H. Miner, Chazy, N. Y. Filed Oct. 4, 1920. Serial No. 414,663. 2 Claims. (Cl. 213—39.)

2. In a friction shock absorbing mechanism, the combination with a longitudinally movable friction shell having a pair of opposed sets of interior friction surfaces; of a pair of friction shoes within the shell, each shoe having a plurality of outer friction surfaces cooperable with those of one set of the shell; a plurality of transversely arranged coil springs interposed between said shoes; and a removable block detachably mounted on the outer end of each shoe, said block having its interior conformed to center the adjacent transversely extending coil spring.



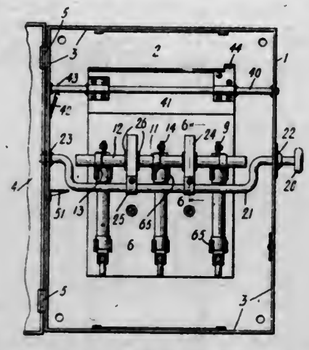
1,453,693. FRICTION SHOCK-ABSORBING MECHANISM. JOHN F. O'CONNOR, Chicago, Ill., assignor to William H. Miner, Chazy, N. Y. Filed June 13, 1921. Serial No. 476,990. 5 Claims. (Cl. 213—32.)

1. In a friction shock absorbing mechanism, the combination with a friction shell; of a spring resistance; friction shoes cooperable with said shell; a pressure transmitting wedge; and rollers having ribs, interposed be-



tween said wedge and shoes, said wedge and shoes having faces provided with ribs co-operable with the first named ribs, said faces of said wedges and shoes diverging uniformly from end to end.

1,453,694. FRICTION SHOCK-ABSORBING MECHANISM. JOHN F. O'CONNOR, Chicago, Ill., assignor to William H. Miner, Chazy, N. Y. Filed July 11, 1921. Serial No. 483,668. 11 Claims. (Cl. 213—32.)

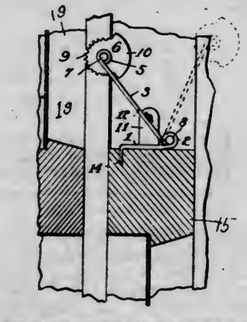


1. In a friction shock absorbing mechanism, the combination with a friction shell; of wedge friction elements cooperable with the shell; a main spring resistance including nested inner and outer coils; and means interposed between said friction elements and the adjacent ends of said coil springs, actuated by the friction elements upon movement of the latter inwardly of the shell, said means compressing one coil only of each set of inner and outer nested coils initially for a limited distance and thereafter all of the nested coils.

1,453,695. ANTIFRICTION SIDE BEARING. JOHN F. O'CONNOR, Chicago, Ill., assignor to William H. Miner, Chazy, N. Y. Filed Feb. 18, 1922. Serial No 537,427. 7 Claims. (Cl. 64—64.)

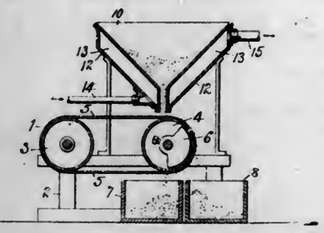
1. In an anti-friction bearing, the combination with a retaining member having longitudinally separated bearing surfaces; of a pair of anti-friction rollers each normally adapted to roll on one of said bearing surfaces; means for elevating one of said rollers when the bearing is actuated in one direction and for elevating the other roller when the bearing is actuated in the opposite direction; and journal bearings for each roller movable therewith and normally inactive but adapted to be operative when the corresponding roller passes off of its bearing surface to a point between the bearing surfaces.

1,453,696. ELECTRICAL SWITCH. ALBERT P. BALL, Royal Oak, and FREDRICK ZENKER, Highland Park, Mich., assignors to Square D Company, Detroit, Mich., a Corporation of Michigan. Filed Oct. 24, 1917. Serial No. 198,297. 8 Claims. (Cl. 200—50.)



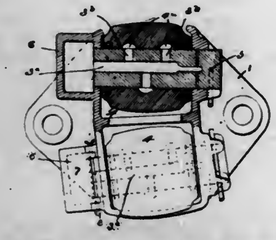
1. In a device of the character described, in combination, a casing having a movable cover, a switch contained in said casing and comprising fixed and movable contacts, a handle outside the casing having operating connections with said movable contacts, a baffle plate pivotally mounted within said casing and spring urged toward a position to obstruct closure of the switch, means operative upon closure of the cover to move said baffle plate out of obstructing position, and means independent of said baffle plate for locking said operating connections in open switch position with the cover closed.

1,453,697. PRESSER FOR VELOUR, BOLIVIA, ETC. RUBIN BASS, Brooklyn, N. Y. Filed Oct. 4, 1922. Serial No. 592,241. 4 Claims (Cl. 68—11.)



3. A flexible pressing device comprising a cloth foundation having needles extending therethrough from the back and a fine mesh wire backing secured to the foundation over the backs of the needles at close intervals to prevent the needles from working loose.

1,453,698. WINDOW-SASH LOCK. FRANK R. BODNAR, Bridgeport, Conn. Filed Apr. 1, 1922. Serial No. 548,621. 7 Claims. (Cl. 292—239.)



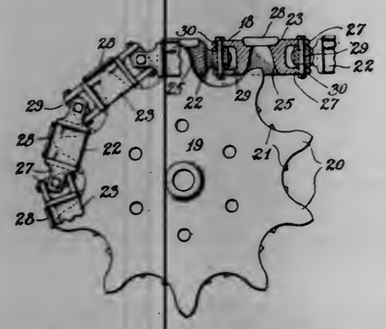
1. An window lock comprising a base plate having attaching means, a lever plate hinged to one end of the base plate, and a cam wheel eccentrically pivoted on the free end of the lever plate with its axis parallel with the lever axis.

1,453,699. METHOD FOR SEPARATING MAGNETIC MATERIALS. OSCAR BROPHY, Philadelphia, Pa. Filed Sept. 28, 1921. Serial No. 503,883. 6 Claims. (Cl. 83—71.)

1. The method of separating two magnetic substances by means of a magnetic separator, comprising the heating of the substances to a sufficient temperature to render one of said substances non-magnetic without change of composition and passing the substances through the separator while heated.

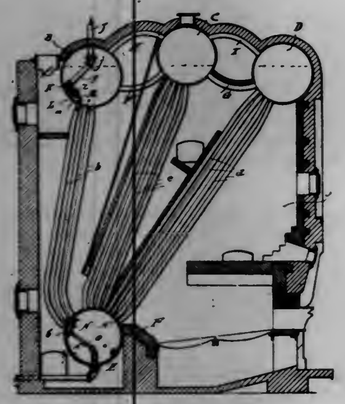
1,453,700. LUBRICATED ROLLER SIDE BEARING. EDWIN G. BUSSE, Chicago, Ill., assignor to Chicago Railway Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 27, 1922. Serial No. 539,479. 3 Claims. (Cl. 64—27.)

2. In a bearing, the combination of supports, a ported roller pin mounted in said supports, a side bearing roller rotatably mounted on said pin, an externally arranged lubricant chamber formed integral with said support at one end of, and in axial alinement with, said pin and in communication with the ports of said roller pin, and a closure for said chamber.



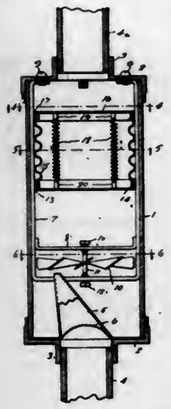
1,453,701. CAR - DOOR - OPERATING MECHANISM. ARGYLE CAMPBELL, Chicago, Ill., assignor to Enterprise Railway Equipment Company, Chicago, Ill., a Corporation of Illinois. Original application filed Dec. 27, 1921, Serial No. 525,105. Divided and this application filed July 10, 1922. Serial No. 573,848. 4 Claims. (Cl. 105—300.)

1. In a dump car, the combination with a pair of oppositely swinging pivoted floor doors separated by an in-



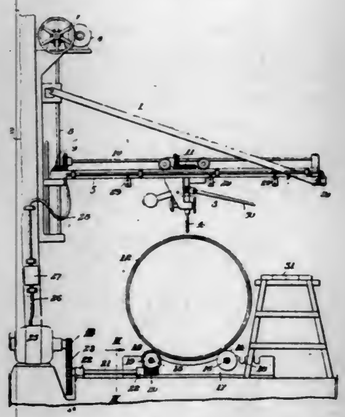
terminate fixed floor section, said doors having their pivots extending transversely of the car; of an operating shaft located beneath said floor section and on a level below the plane of the door when the latter are in closed position, said shaft extending parallel to the pivotal axes of the doors, and oppositely extending flexible connections from said shaft to both doors.

1,453,702. UNIVERSAL CONVEYER CHAIN. GEORGE CARSTENS, Jersey City, N. J., assignor of one-fourth to Harold E. Muller, Jersey City Heights, N. J. Filed Nov. 5, 1921. Serial No. 512,968. 11 Claims. (Cl. 198—189.)



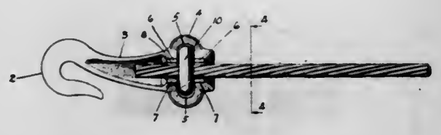
1. A chain of the class described composed of two sets of links alternately arranged and universally coupled together to form a complete chain, the separate links being of approximately the same form and construction and provided on one face thereof with means whereby predetermined devices may be mounted in connection therewith, the other faces of said links being provided with recesses adapted to receive the teeth of a drive wheel or sprocket.

1,453,703. BOILER. RAGNAR CEDERBLOM, Youngstown, Ohio. Filed Mar. 8, 1920. Serial No. 363,977. 3 Claims. (Cl. 122—444.)



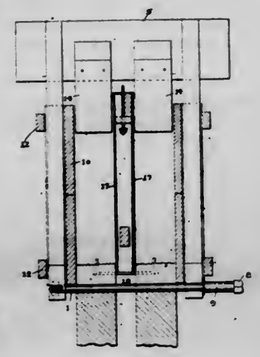
1. A boiler of the class described, comprising a plurality of drums having tubular connections with each other, of means for feeding liquid into certain of the tubular connections, said connections being coupled to a header and feed water pipe in one drum and communicating through a chamber in another drum formed by an adjustable and removable partition therein, whereby the liquid in the said tubular connections is caused to circulate independently of the liquid contained in the drums, said tubular connections passing through the heating zone of the boiler.

1,453,704. PRESSURE REGULATOR. IRVING R. COWIN, Cleveland, Ohio, assignor of one-half to William Carmack and one-half to F. C. Werk, both of Cleveland, Ohio. Filed Dec. 23, 1921. Serial No. 524,435. 2 Claims. (Cl. 50—14.)



1. A gas pressure regulator comprising a casing having an inlet at one end and an outlet at the other, a cylindrical bellows supported in the casing between the inlet and the outlet, a plate extending across the end of the bellows nearest the outlet, and springs connected to said plate, the plate being movable according to the pressure in the bellows, toward and from said outlet.

1,453,705. BOILER-TURNING CRADLE. JAMES CROMBIE, St. Louis, Mo. Filed Dec. 30, 1921. Serial No. 525,951. 2 Claims. (Cl. 77—63.)

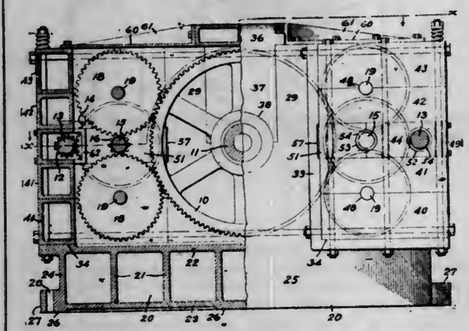


1. In combination, a boiler turning cradle for a drill-press comprising a set of supporting rolls two of which are connected to rotate as a pair, a reversible electric motor connected to said pair of rolls to positively rotate the same in either direction, and controls for said motor located on the drill press convenient to the drill controlling mechanism.

1,453,706. CLIP HOOK. OLIVER CROSBY, St. Paul, Minn. Filed Dec. 27, 1921. Serial No. 525,063. 4 Claims. (Cl. 24—135.)

1. The combination, with a hook having a flattened side and a cable receiving recess on said flattened side extending longitudinally of the shank of the hook whereby a pull on the cable will be transmitted longitudinally of the hook shanks, pairs of projections extending outwardly from said flattened side on opposite sides of said recess, said flattened sides having openings extending therethrough on opposite sides of said recess and between said projections, a U-bolt straddling said recess and having threaded legs extending between said projections and through the openings in the hook shank, and nuts engaging the threaded legs of said U-bolt.

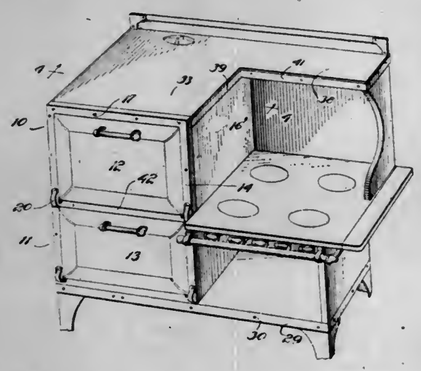
1,453,707. METHOD OF AND APPARATUS FOR FORMING CONCRETE STRUCTURES. HIRAM C. J. DEEKS, Sea Cliff, N. Y., and MAURICE DEEKS, Rochelle Park, N. J., assignors to Joseph Deeks, Sea Cliff, N. Y. Filed Sept. 18, 1920. Serial No. 411,238. 7 Claims. (Cl. 25—131.)



2. In apparatus for forming hollow concrete structures the combination of a core having overlapping upright retaining members, a tapered spacing member between said retaining members, and a core cover consisting of a plurality of longitudinally tapered members having depending flanges in overlapping arrangement and adapted to engage the upper edges of the upright retaining members, and means for supporting said core in operative position.

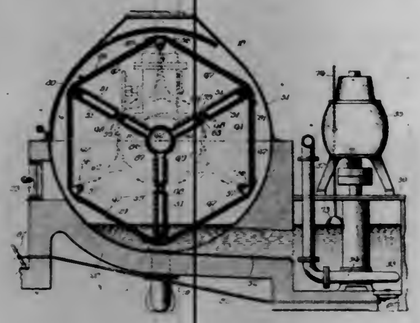
1,453,708. FINGER RING AND SETTING. GEORGE GASCHKE, Newark, N. J., assignor to American Platinum Works, Newark, N. J., a Corporation of New Jersey. Filed Apr. 16, 1921. Serial No. 461,896. 3 Claims. (Cl. 63—15.)

1. A finger ring comprising an integral band having a transverse recess in its periphery, a pair of integral retaining prongs extending outward from said band, a base element fitted to be received in the mentioned recess, lugs on said base engageable with the sides of said band, and a plurality of retaining prongs extending from said base.



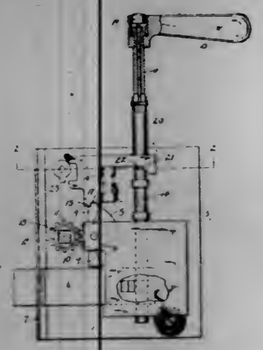
1,453,709. GEARING. CHARLES L. HEISLER, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Feb. 10, 1921. Serial No. 443,020. 10 Claims. (Cl. 74—7.)

1. In a gearing, the combination of a base, uprights carried by the base and spaced from one end of it, a gear wheel carried by said uprights, a plurality of supporting and spacing members mounted on the end of said base and fastened to it and said uprights, said members being horizontally divided and built up one above another to form a unitary construction, and a gear wheel arrangement carried by said members and cooperating with said gear wheel.



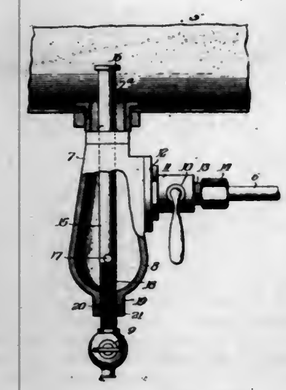
1,453,710. STOVE CONSTRUCTION. RUDOLPH HOFFMAN, Kankakee, Ill., assignor to Sears, Roebuck and Co., Chicago, Ill., a Corporation of New York. Filed Mar. 24, 1922. Serial No. 546,335. 22 Claims. (Cl. 126—1.)

1. In a stove construction, a sheet metal oven comprising a wall having an inturned edge portion, another



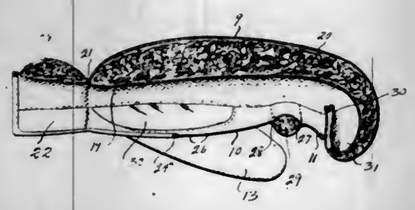
wall having a portion disposed in the plane of said first mentioned wall and having an inturned edge portion adapted for abutment with said first mentioned portion within said oven and means for fastening said inturned edge portions together inside said oven.

1,453,711. COMBINED WASHER AND DRIER. HANS C. HOTING, Chicago, Ill., assignor to Troy Laundry Machinery Co., Ltd., Chicago, Ill., a Corporation of New York. Filed Apr. 7, 1919. Serial No. 288,112. 11 Claims. (Cl. 68—18.)



1. In a washer, a rotatable clothes container, radially extending longitudinal perforated partitions mounted therein for dividing said container into compartments, longitudinal perforated pipes for directing a plurality of streams of washing medium toward a common region in each of said compartments, said region being spaced from the longitudinal walls of said compartment, and means forming a receptacle for holding a quantity of washing medium with which said compartments are adapted to communicate successively.

1,453,712. LATCH FOR VEHICLE DOORS. RICHARD V. KAIMER, New Haven, Conn., assignor to The English & Mersick Co., New Haven, Conn., a Corporation. Filed July 12, 1922. Serial No. 574,446. 2 Claims. (Cl. 292—164.)

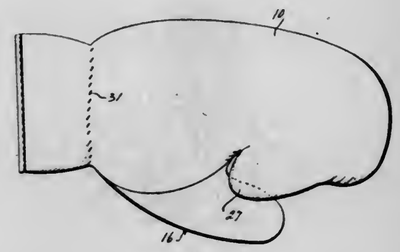


1. A latch for vehicle doors, comprising a bolt having an operating arm, a cam mounted in the casing and adapted to move the arm when turned in either direction, the said cam formed with teeth, and a hub mounted in the case forward of the said cam and provided with teeth meshing with the teeth on said cam and adapted to be turned by a handle-spindle.

1,453,713. RESERVE-SUPPLY DEVICE FOR GASOLINE TANKS. EDWARD W. KRUSE, Chicago, Ill. Filed Mar. 31, 1921. Serial No. 457,397. 3 Claims. (Cl. 158—46.5.)

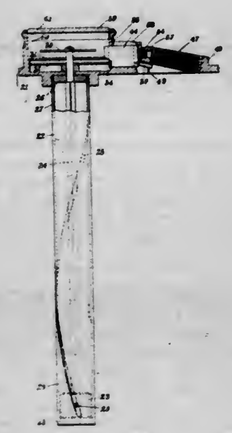
1. The combination with a gasoline tank, and a chambered supply pipe coupling communicating with the bottom of said tank, of a supply pipe section extending through the bottom of said tank and lying partly in said tank and partly in the chamber of said coupling, said supply pipe section having an upper opening communicating with said tank and fixing the level of the reserve supply and a lower opening communicating with said supply pipe coupling, and means for adjusting said supply pipe section downwardly to bring said upper opening substantially flush with the bottom of said tank whereby to drain therethrough the reserve supply of gasoline.

1,453,714. FIGHTING GLOVE. SOL LEVINSON, San Francisco, Calif. Filed Jan. 12, 1921. Serial No. 436,749. 4 Claims. (Cl. 2—196.)



1. A boxing glove of the character described having on the palm of the glove a transversely extending padded strip and having adjacent the extremity of the glove upon the inside thereof and outward of said padded strip a transversely extending flexible rib defining a pocket for the extremities of the fingers, said rib and the transversely extending padded portion constituting a double grip for the glove.

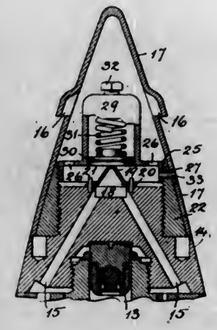
1,453,715. FIGHTING GLOVE. SOL LEVINSON, San Francisco, Calif. Filed Jan. 12, 1921. Serial No. 436,750. 2 Claims. (Cl. 2—196.)



1. A boxing glove having a thumb portion and a padded body portion with which said thumb portion is

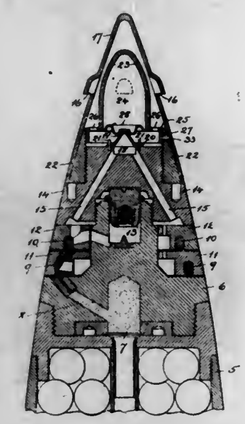
connected, said body having an angular protuberance integrally formed therewith and adapted to extend from

the side of the glove inwardly toward the crotch of the thumb to protect the knuckle of the user disposed within said thumb portion.



1,453,716. FLUID-REGISTERING MECHANISM. CHARLES F. MACGILL, Cambridge, Mass. Filed Aug. 16, 1921. Serial No. 492,818. 3 Claims. (Cl. 235—94.)

1. In combination with a fluid container, a rotary shaft having indicator means controlled by the rotation of said shaft, said shaft being axially slidable, a float in said container, intermediate mechanism, whereby the rising of the float causes said shaft to rotate, said container having a filling opening, a cap for said filling opening, and means actuated by the closing down of the cap to move said shaft axially out of operative relation to the rotating mechanism therefor.

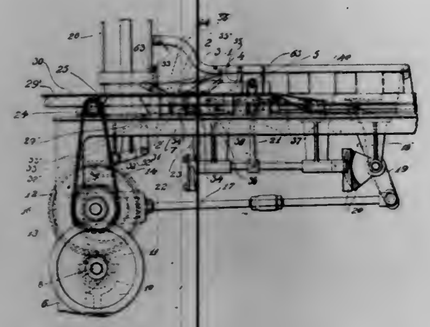


1,453,717. TIME FUSE. ALTEN S. MILLER, Baltimore, Md. Filed Sept. 28, 1917, Serial No. 193,690. Renewed Nov. 27, 1922. 9 Claims. (Cl. 102—36.)

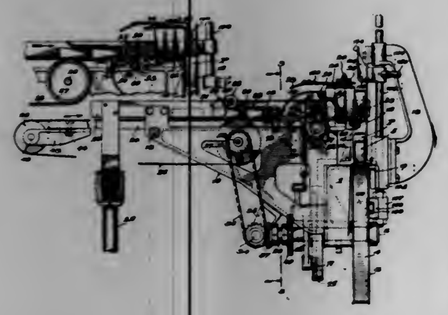
9. A time fuse having a vent from the interior to the exterior in combination with a time powder train, a valve and valve-closing means to control the escape of gases from the fuse said valve and valve-closing means having balanced surfaces that are subject to atmospheric

pressure and said valve-closing means maintaining a uniform closing pressure on the valve irrespective of variations of atmospheric pressure.

1,453,718. ART OR PROCESS OF CONTROLLING THE BURNING OF TIME-POWDER TRAINS. ALTEN S. MILLER, Baltimore, Md. Filed Sept. 28, 1917. Serial No. 193,691. 5 Claims. (Cl. 102—36.)



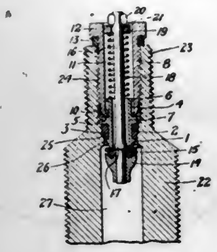
5. The method of controlling the burning of time powder trains in fuses, consisting in igniting a powder train, carrying a predetermined pressure in the fuse that is separate and independent of the exterior atmospheric pressure and utilizing the carried pressure to determine the pressure of the gases to be maintained on the powder train and venting only the generated gas pressure in excess of the carried pressure.



1,453,719. CARTON-WRAPPING MACHINE. JOHN J. MILLIN, New York, N. Y. Filed June 24, 1920. Serial No. 391,501. 4 Claims. (Cl. 93—53.)

4. In combination with a packing machine, a carton refolding device comprising a bending member, a refolding member adapted to partially refold a carton side around

said bending member, another refolding member adapted to finish the refolding operation of the first refolding member, and regulating means for defining the degree of the final operation of said other refolding member.



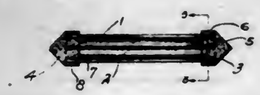
1,453,720. PACKAGE-FEED MECHANISM. CHARLES H. NITSCH and WILLIAM A. WEIGHTMAN, Logan, Philadelphia, Pa., assignors to Stokes & Smith Company, Summerdale, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 1, 1922. Serial No. 540,289. 27 Claims. (Cl. 198—20.)

1. Package or article feed mechanism, comprising a conveyor belt adapted to frictionally advance a row of packages, means for stopping a package row, means for repositioning a package row, and means for discharging a repositioned package row.

1,453,721. TIRE VALVE. ALBERT B. NORWALK, New York, N. Y., assignor of one-half to Conrad Hubert, White Plains, N. Y. Filed Jan. 3, 1918. Serial No. 210,134. 1 Claim. (Cl. 152—12.)

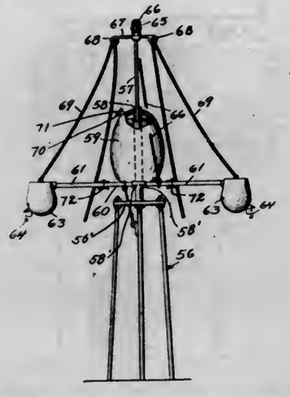
The combination in a tire valve comprising a tubular body, a plug having a valve seat, a valve member having a pin and a spring of an abutment on the outer end of the alve pin, adapted to permit lateral self-adjusting movement of the outer end of the valve pin in the plug member, said abutment being in the form of a plate having therein an aperture of larger diameter than the valve pin and through which the valve pin loosely passes for lateral self-adjusting movement relative thereto.

1,453,722. SLED ATTACHMENT FOR CARRIAGES AND THE LIKE. OTTO NUOFFER, New York, N. Y. Filed July 8, 1922. Serial No. 573,698. 3 Claims. (Cl. 280—13.)



1. A sled runner for a wheeled vehicle comprising a coasting bar adapted to extend the length of the wheel base and support said vehicle, a channelled member secured to the coasting bar and adapted to receive the wheels of said vehicle, and means for preventing the vehicle from starting from a position of rest.

1,453,723. COMPOSITION FOR USE IN FINISHING DRY-CLEANED LEATHER. VICTOR O. OLSEN, Chicago, Ill., assignor to Charles McAdam Company, Chicago, Ill., a Corporation of Illinois. Filed July 1, 1920. Serial No. 393,469. 2 Claims. (Cl. 134—7.)

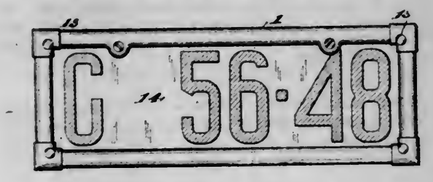


2. A paste for use with a solvent, in the finishing of dry cleaned leather goods, comprising petrolatum, cottonseed oil and zinc oxide in substantially the following proportions: petrolatum, thirty pounds, cottonseed oil, fifteen pounds, and zinc oxide, fifty pounds.

1,453,724. GRID LEAK. EDWIN L. POWELL and CHARLES E. MOTTO, Washington, D. C. Filed June 26, 1922. Serial No. 570,941. 12 Claims. (Cl. 219—75.)

1. A grid leak comprising a resistance element, means enclosing said element, and moulder members adhering to both the inside and outside of said enclosing means and supporting said element within said enclosing means.

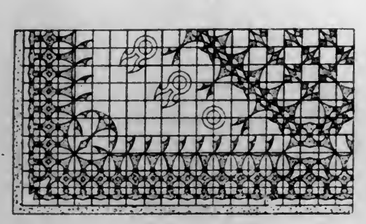
1,453,725. PORTABLE DRINKING FOUNTAIN. GEORGE R. PRATT, Richmond, Va. Filed July 25, 1916, Serial No. 111,315. Renewed Sept. 15, 1922. Serial No. 588,513. 3 Claims. (Cl. 221—67.)



1. A water dispenser comprising a standard, a sleeve slidable on said standard, a receptacle carried by said sleeve, a hollow arm extending laterally from the sleeve and communicating with the receptacle, and a water dispensing means at the outer end of said arm.

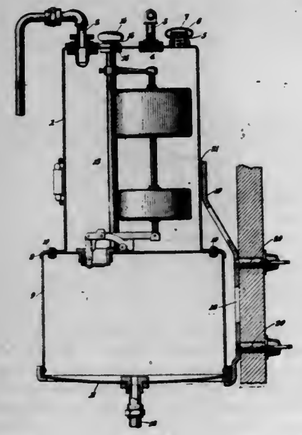
1,453,726. INSULATING COMPOSITION AND METHOD OF MAKING SAME. THEODORE C. PROUTY, Los Angeles, Calif., assignor to Prouty-line Products Company, Hermosa Beach, Calif. Filed Apr. 13, 1920. Serial No. 373,500. 32 Claims. (Cl. 18—48.)

1. In a process of forming a composition of matter, the operations of mixing dry powdered talc with a temporary binder free of water and heating the mixture.



1,453,727. ADJUSTABLE LICENSE-PLATE HOLDER. WILLARD V. PUMPHREY, Oakland, Calif. Filed Feb. 23, 1922. Serial No. 538,662. 2 Claims. (Cl. 40—125.)

1. A vehicle license plate holder comprising a plurality of frame forming members substantially L-shaped in cross section, said frame forming members adapted for arrangement about the periphery of a license plate with their ends in cooperating relation, a slotted part for receiving with a longitudinal movement the cooperating ends of the respective frame forming members, and with which the same have interlocking relation and securing means passing through said respective parts and license plate for holding the license plate within the frame and the frame sections in interlocking relation.

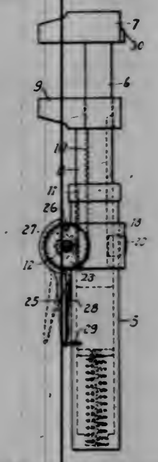


1,453,728. MEANS FOR DEVISING ORNAMENTAL DESIGNS. FERNAND JOSEPH RHODES, Paris, France. Filed June 1, 1921. Serial No. 474,112. 5 Claims. (Cl. 35—12.)

1. Units of square form presenting ornamental surfaces and capable of being grouped together having in each square curves of arcs for the purpose of producing a variety of ornamental designs, the said curves or arcs having their centres located on the sides or diagonals of

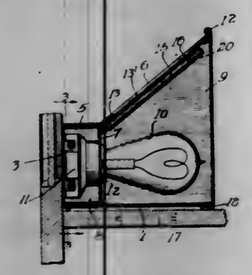
the squares or upon prolongations of these lines and their radii being polynomial functions having integral coefficients of the side of the square and of the half-diagonal.

1,453,729. MEANS FOR SUPPORTING VACUUM FEEDING SYSTEMS. EDWARD A. ROCKWELL, New York, N. Y., assignor, by mesne assignments, to Stewart-Warner Speedometer Corporation, a Corporation of Virginia. Filed June 4, 1919. Serial No. 301,825. 3 Claims. (Cl. 211—20.)



1. In combination, a bracket having a vertical portion with means for securing it to a support, a single supporting flange at the bottom of the bracket extending outwardly therefrom so that a container may be laterally placed thereon, a clamping means attached to the upper end of the bracket, and a hook and loop at the respective ends of the clamping means with a ring connected to the loop, and a yoke fastening the ring and hook in operative engagement.

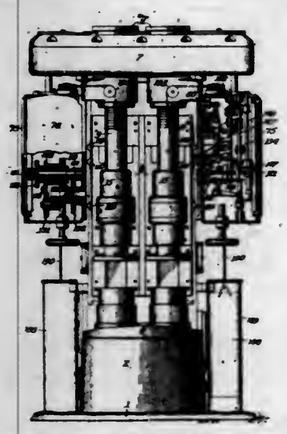
1,453,730. WRENCH. EMIL STAEHELIN, Chicago, Ill. Filed Apr. 6, 1920. Serial No. 371,685. 11 Claims. (Cl. 81—133.)



1. A wrench comprising a handle, two pinions mounted for rotation in said handle, said pinions being non-rotatable relatively to each other, two shanks slidably mounted in said handle, each of said shanks having a gear rack

thereon, and each of said shanks projecting out of said handle, said rack-meshing with the respective pinions,

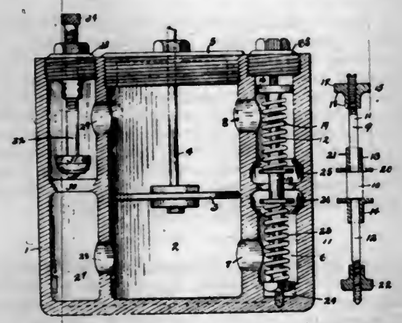
each of said shanks having a wrench jaw fixed to its outer end, one of said pinions being smaller than the other.



1,453,731. DISPLAY LIGHT. GEORGE E. STEPHENSON, Chicago, Ill. Filed Mar. 30, 1922. Serial No. 548,067. 3 Claims. (Cl. 40—130.)

1. In a device of the kind described and in combination, a sheet metal casing having an opening through one of its sides and having bounding edges of said opening bent back upon itself, channel members at the edges of said opening, each having one leg secured between the casing wall and said bent-back edge of the opening, and a window arranged to removably slide in said channels to cover said opening and adapted to have an advertisement superimposed thereon.

1,453,732. AUTOMATIC MACHINE TOOL. WILLIAM N. STEVENS, Madison, Wis., assignor to Gisholt Machine Company, Madison, Wis., a Corporation of Wisconsin. Filed Aug. 26, 1921. Serial No. 495,707. 26 Claims. (Cl. 29—38.)



1. In a machine of the character described, the combination of a bed, a rotary table on said bed, a series of work holders carried by said table, an upright frame structure in rear of said bed, a plurality of slides mounted to reciprocate vertically on said frame structure, a corresponding plurality of vertical spindles journaled in said slides, a power shaft, independent driving connections from said power shaft to said spindles, independent power transmission mechanisms from said power shaft to said slides for reciprocating the latter, and means actuated from said power shaft for indexing said table.

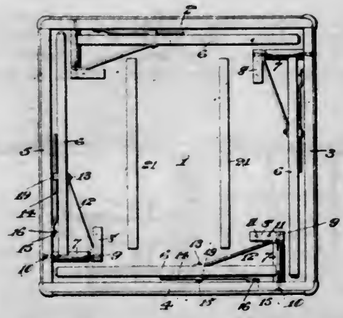
15. In a machine of the character described, the combination of a hollow upright frame structure, a pair of vertically reciprocable slides mounted on said frame structure, a pair of spindles carried by said slides, means for rotating said spindles, a vertical drive shaft journaled in said frame structure, a pair of control boxes mounted on opposite sides of said frame structure, independent sets of feed works for said slides mounted in said control boxes, a pair of cross shafts geared at their inner ends to said drive shaft and at their outer ends to said feed works, and another pair of cross-shafts geared at their outer ends to said feed works and at their inner ends to said slides to reciprocate the latter.

24. In a machine of the character described, the combination with a frame structure, of a spindle slide mounted thereon, a hollow spindle journaled in said frame structure and slide and formed with a transverse slot, a yieldable clutch connecting said spindle to said slide, a stop nut on the outer end of said spindle to limit the inward travel of the latter, a facing slide mounted on the inner end of said spindle, a feed bar slidably mounted in the inner end portion of said hollow spindle, a key extending through said spindle slide and feed bar and traveling in the slot of said spindle, and rack and pinion mechanism for actuating said facing slide from said feed bar.

1,453,733. DASHPOT. EDWARD G. THOMAS, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed Oct. 7, 1918. Serial No. 257,090. 8 Claims. (Cl. 188—97.)

1. In a dash pot, the combination of a container having a cylindrical chamber and a passage paralleling the chamber and connected therewith adjacent the bottom and top of said chamber, fluid contained in said chamber and passage, a piston movable in said chamber, and automatic means controlled by the flow of fluid through said passage for restricting the section of said passage upon sudden movement of said piston in either direction.

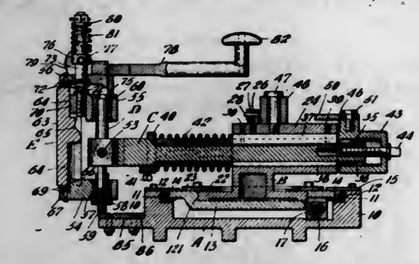
1,453,734. METHOD OF REFINING IRON AND STEEL. HENRY THOMAS, Cleveland, Ohio. Filed Oct. 28, 1920. Serial No. 420,226. 2 Claims. (Cl. 75—49.)



1. In a method of refining iron and steel, the step which consists in fusing the iron and steel with a flux consisting of glass, lime, borax and fluorspar.

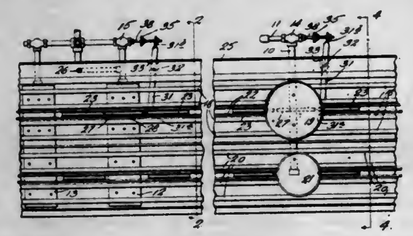
1,453,735. DISTILLATION APPARATUS. RALPH H. TWINING, Marquette, Mich. Filed Jan. 20, 1922. Serial No. 530,532. 4 Claims. (Cl. 195—13.)

1. In a column, a diaphragm plate provided with a plurality of perforations therethrough to permit the upward passage of the vapor in the column, rivet shaped check valves in said perforations to prevent the downward flow of the liquid therethrough, and means for retaining said valves in said perforations.



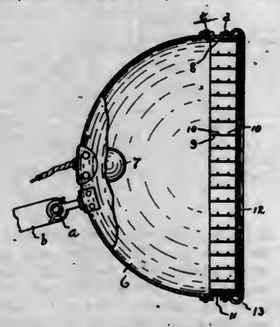
1,453,736. TABLE. ANDREW WAGNER, West Hoboken, N. J., assignor to Ferguson Brothers Mfg. Co., Hoboken, N. J., a Corporation of New Jersey. Filed Feb. 9, 1921. Serial No. 443,637. 3 Claims. (Cl. 45—11.)

1. A folding table comprising a top having a peripheral frame, blocks secured to the underside of the table top and spaced from the peripheral frame, to permit the free ends of the legs to fold against the table top between the blocks and peripheral frame, foldable legs, each leg having a laterally extended hub located between the frame and block, screws extending through the frame and block respectively, into the ends of the hub for pivoting the leg to the frame and block, a rigid diagonal brace leading from the end of the hub adjacent the block to the leg, and a swinging brace pivoted to the table and arranged to engage the leg for locking the leg in its unfolded position.



1,453,737. JIG FOR GRINDING PURPOSES. KEITH WILLIAMS, Chicago, Ill., assignor to William H. Miner, Chazy, N. Y. Filed June 13, 1921. Serial No. 476,992. 15 Claims. (Cl. 51—217.)

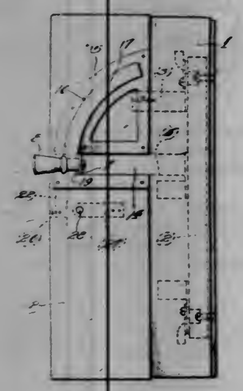
1. In a jig of the character described, the combination with clamping plates, one relatively axially movable toward the other; of a spindle on which said plates are mounted; a slidable plunger on which said spindle is swiveled to freely oscillate about an axis at right angles to the axis of the spindle; and a support on which said



plunger is slidably mounted, said support being rotatable about an axis perpendicular to the line of sliding movement of the plunger.

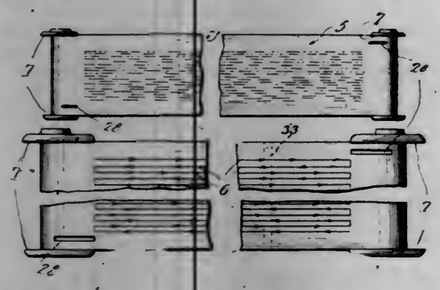
1,453,738. MACHINE FOR WASHING CANS AND THE LIKE. FRANK F. WOLF, Buffalo, N. Y., assignor to Rice & Adams Corporation, Buffalo, N. Y. Filed Dec. 31, 1921. Serial No. 526,156. 7 Claims. (Cl. 141—7.)

1. In a machine of the character described, the combination of means for supporting articles to be treated while traveling through the machine, a reciprocatory conveyor for moving the articles on said supporting means through the machine, means for discharging a medium to said articles, a valve controlling the discharge of said medium, an operating member for opening said valve, and a device which is mounted on said reciprocatory conveyor and is shifted by an article in operative relation to said discharge means to a position for engaging said valve operating member, said device moving said operating member to open said valve during movement of said conveyor in one direction.



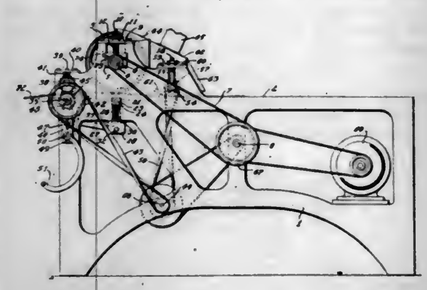
1,453,739. LAMP-REFLECTOR ATTACHMENT. FREDERICK BEDFORD, Stratton, Nebr. Filed June 19, 1922. Serial No. 569,369. 6 Claims. (Cl. 240—48.4.)

1. The combination with a lamp reflector of concavo-convex form, of horizontal blades disposed in spaced



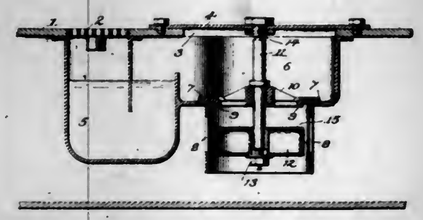
relation in the reflector, said blades being provided inwardly of their longitudinal edges with rectilinear ribs for obstructing rays of light directed from the reflector and lamp.

1,453,740. EXTERNALLY-OPERABLE INCLOSED SAFETY-TYPE SWITCH. ERNEST L. BRENK, Cicero, Ill. Filed Jan. 17, 1921. Serial No. 437,671. 2 Claims. (Cl. 200—50.)



1. A casing open on one side, a door extending across said open side, said door being hinged at one edge to the casing and having at the other edge a wide flange extending inwardly at right angles thereto and lying in proximity to one of the side walls of the casing when the door is closed, a switch device in said casing, said flange and said side wall of the casing having registering arc-shaped slots therethrough, an operating handle for said switch device projecting through said slots, and said flange having a second slot extending from one end of the arc-shaped slot therein outwardly through one edge of the flange and possessing a width sufficient to permit the opening and closing of the door when said handle is brought into registration therewith.

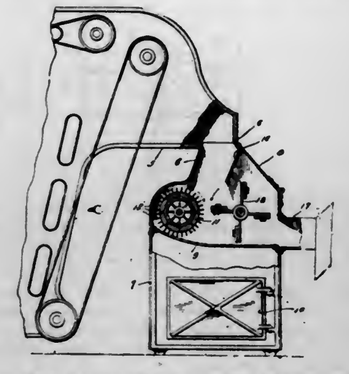
1,453,741. APPARATUS FOR TRANSMITTING WORDS. MAURICE BRODEUR, Montreal, Quebec, Canada. Filed May 7, 1921. Serial No. 467,706. 5 Claims. (Cl. 35—12.)



1. A device of the character described, comprising a pair of shafts, a sheet wound around said shafts and adapted to be wound from one to the other, an opening through said sheet, a pair of electrical contacts on opposite sides of the sheet in line with said opening and adapted to allow the passage of an electric current through them when registering with said opening, a two faced clutch mounted upon one of said shafts, a shifting piece between the faces of said clutch, and means electrically connected with said contacts for moving said shifting piece from one face to another when said contacts are in register with said opening.

1,453,742. ABRADING MACHINE. FLETCHER W. BROWNING, Kingsport, Tenn. Filed Aug. 28, 1922. Serial No. 584,796. 11 Claims. (Cl. 51—78.)

1. In a machine for abrading flexible strip material, in combination, a table, an abrading drum adjustably mounted above said table, a presser roller yieldably mounted below said drum, cam means for varying the pressure of said presser roller, manual means for operating said cam means, feed rollers for gripping and feeding said material, and means under the control of the operator for manipulating said feed rollers.

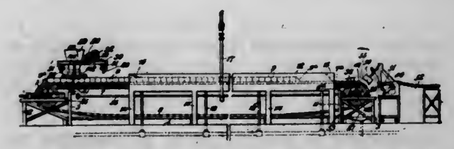


1,453,743. DRAIN TRAP. WILLIAM J. WILLETT BRUCE, Cheshire, England. Filed Dec. 30, 1920. Serial No. 434,108. 4 Claims. (Cl. 182—12.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

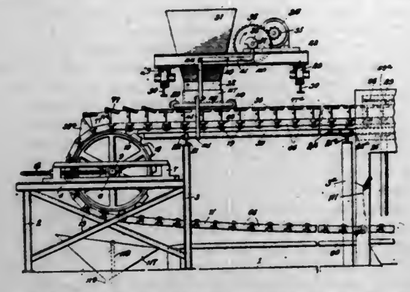
1. In a structure of the class described, the combination of a casing having a trap at one end, said trap at its lower end communicating with a normally unsealed chamber formed to one side thereof; a valve seat located in the lower portion of the chamber; and a float valve mounted below the seat for movement toward and from said seat.

1,453,744. COTTON CLEANING AND CONDITIONING MACHINE. JAMES C. BYERS, Hickory, N. C. Filed June 7, 1921. Serial No. 475,770. 5 Claims. (Cl. 19—93.)

4. In a cotton cleaning and conditioning machine, a chamber having a cotton receiving opening in the top thereof and an outlet opening in the forward wall thereof, a toothed element arranged at one end of the chamber, a fan also journaled in the chamber forwardly of the toothed element and adapted to force the cotton through the teeth, an angularly disposed deflector plate depending from the upper end of the chamber and disposed to one side of the inlet opening and adapted to direct the coton toward the toothed element, and a grating extending horizontally across the chamber beneath the toothed element and fan through which waste products pass.

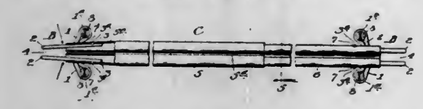


1,453,745. CONNECTOR FOR MOPS AND THE LIKE. CHARLES CÁBANA, Buffalo, N. Y., assignor to Buffalo Specialty Company, Buffalo, N. Y., a Corporation of New York. Filed Mar. 27, 1920. Serial No. 369,189. 7 Claims. (Cl. 15—229.)



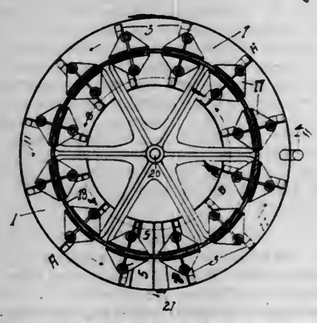
1. A connector of the kind described, comprising a socket portion adapted to receive a handle and having a slit formed longitudinally therein and gradually widened toward one end, a pair of integral clamping members projecting from said socket portion, and a clamping device to draw said clamping members toward each other and simultaneously clamp said socket portion on said handle.

1,453,746. PROCESS OF MAKING CONCRETE BLOCKS. WILLIAM H. CAREY, Wisconsin Rapids, Wis. Filed Apr. 15, 1922. Serial No. 552,979. 10 Claims. (Cl. 25—155.)



1. That process of making concrete blocks which consists in filling molds with concrete mixture, packing the mixture into a compact mass therein and subsequently conveying the filled molds into a closed compartment and subjecting the concrete while still in the molds to the action of artificial heat for curing the same.

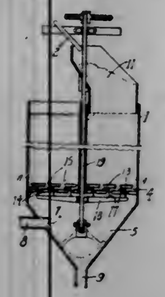
1,453,747. MACHINE FOR MAKING CONCRETE BLOCKS. WILLIAM H. CAREY, Wisconsin Rapids, Wis. Filed Apr. 15, 1922. Serial No. 552,980. 96 Claims. (Cl. 25—99.)



1. In a machine for making concrete blocks, a traveling carrier having molds, a hopper mounted above the molds and adapted to fill the same, means for jarring and ramming the concrete in the molds, a closed chamber into which the traveling carrier with the molds are admitted for curing the blocks, means for supplying the chamber with steam, means for causing the contraction of the molds after leaving said chamber, and means for picking the cured bricks from the open molds of the traveling carrier.

1,453,748. CURTAIN ROD. GUSTAV A. CARLSON, Chicago, Ill., assignor to The Boye Needle Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 19, 1920. Serial No. 425,191. 5 Claims. (Cl. 156—19.)

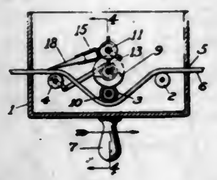
2. A curtain rod bracket comprising a wire having its intermediate portion forming a base portion provided with attaching eyes, having curved members extending from the base portion and forming a curved body portion, and having said members extended parallel with the base portion and affording resilient arms, said arms being provided with lateral lugs adapted to engage recesses in the socket of a curtain rod.



1,453,749. APPARATUS FOR THE DEWATERING, CLASSIFICATION, AND COUNTERCURRENT WASHING OF SOLID PARTICLES MIXED WITH LIQUIDS. NIELS C. CHRISTENSEN, Salt Lake City, Utah. Filed Jan. 3, 1921. Serial No. 434,606. 22 Claims. (Cl. 23—31.)

3. The apparatus for dividing a mixture of solid particles and a liquid into separate different parts, which

consists of a number of similar sectors of an annular trough arranged in a ring with similar parts in the same order around the ring and each one of which sectors is closed at one end only and has a bottom which slopes upward around the circle from a lower level adjacent to said closed end to a higher level at the open end so as to contain a body of liquid in the sector adjacent to said closed end and has an outflow device in last said sector arranged to maintain the surface level of a body of liquid therein below said upper end of said bottom, together with radial scrapers arranged to continuously move horizontally around an annular path substantially parallel to and in horizontal projection within said ring in a direction from said closed ends toward said open ends of said sectors and arranged to move vertically in such a manner as to dip into each one of said sections of trough in the lower portion thereof adjacent to said closed end and to maintain a position slightly above the bottom of said trough in moving towards said open end so as to drag material settled out of a body of liquid in above said lower portion of trough up over said sloping bottom and out of said sector of trough at its open upper end, and means for feeding such above said mixture into each of said sectors.

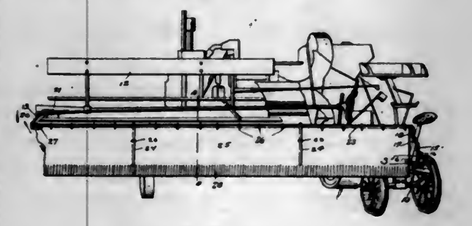


1,453,750. APPARATUS FOR DRYING GRANULAR PRODUCTS. NIELS C. CHRISTENSEN, Salt Lake City, Utah. Filed Mar. 8, 1921. Serial No. 450,679. 8 Claims. (Cl. 34—34.)

6. The apparatus for continuously drying grains and granular material which consists of a vertical shaft for containing a bed of such above said material, said shaft being closed at the bottom, means for continuously feeding such above said material onto such above said bed in said shaft and means for maintaining the top of a such said bed substantially level, a discharging device in said shaft above said closed bottom arranged to support a such above said bed and arranged to allow the passage of a current of gaseous medium up through said device in such a manner that said current of gaseous medium will be substantially uniformly distributed over the entire horizontal section of said bed and arranged to continuously discharged such above said material from the bottom of such above said bed in such a manner as to secure a substantially continuously uniform downward movement of the material in all parts of said bed, means for continuously introducing a current of gaseous medium under pressure into the closed space beneath said discharge device, and means for continuously removing the such above said material removed from the bottom of such above said bed from the lower part of said apparatus.

1,453,751. RAZOR-STROPPING MACHINE. ERNEST D. CLARK, Worcester, Mass. Filed Jan. 5, 1921. Serial No. 435,179. 5 Claims. (Cl. 51—153.)

1. In a razor stropping machine, the combination with a strop, and a blade holder longitudinally movable thereon, of means for imparting transverse movement to said blade holder always in the same direction across the strop as said holder is moved back and forth in

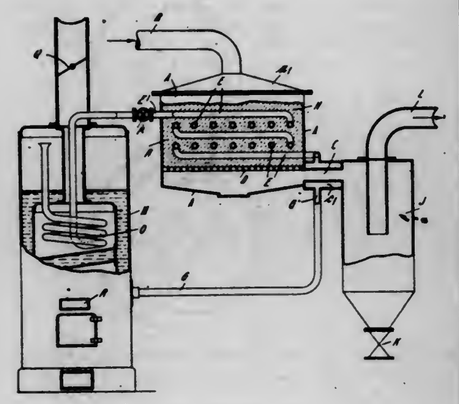


engagement with the strop, whereby resulting diagonal movements of said holder on the strop are in different paths.

1,453,752. FOOD COMPOUND AND PROCESS OF PRODUCING THE SAME. HAROLD E. COLLVER, Simcoe, Ontario, Canada, and CHARLES R. MABEE, Buffalo, N. Y. Filed Oct. 5, 1917. Serial No. 194,970. 8 Claims. (Cl. 99—11.)

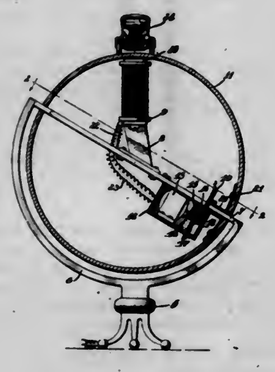
2. A semi-solid colloidal mass, consisting of cabbage from which a substantial portion of the water content has been removed, and to which a milk product and a flavoring product has been added, and a protecting covering of fat.

6. The process of producing an improved food compound, which consists of cooking cabbage, separating the cabbage from the cooking water, compressing the cabbage to separate the cabbage juice from the cabbage pulp, condensing the cooking water and cabbage juice to a high consistency by removing a substantial portion of the water content, adding a milk product to the condensed product, and thereafter, while in a heated condition, adding thereto the cabbage pulp and thoroughly comingling the particles of the mass to form when cooled a semi-solid mass.



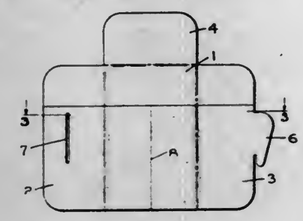
1,453,753. HARVESTER THRASHER. ALBERT CONVERSE, Pampa, Tex. Filed May 25, 1921. Serial No. 472,323. 5 Claims. (Cl. 56—1.)

1. The combination with a harvester thrasher, of supports carried by the harvester, and a curtain carried by the supports and having its lower edge disposed at substantially the same height as and in advance of the sickle of the harvester.



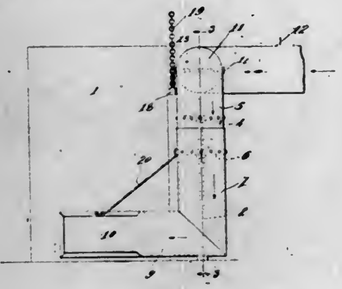
1,453,754. APPARATUS FOR GAS PURIFICATION. KENNETH COX, Putney, London, ROBERT PRICE KERR, Gateshead-upon-Tyne, and ERNEST JOCELYN BATY, Luton, England. Filed Mar. 3, 1923. Serial No. 622,684. 1 Claim. (Cl. 23—10.)

In apparatus for purifying gas by the removal of sulphur compounds and for the recovery of sulphur, the combination of;—a containing vessel having an inlet for the gas to be treated and an outlet for the treated gas; a bed of contact material arranged across the path of flow of the gas from the inlet to the outlet; hollow heat exchanging surfaces embedded in the said material; means for supplying an attemperating fluid to the interior to the heat exchanging surfaces; means for separating the sulphur from the effluent gas; a passageway connecting the outlet from the vessel to the inlet of the



said separating means; and a jacket space surrounding the said passageway through which the attemperating liquid is circulated.

1,453,755. ADVERTISING DEVICE. THOMAS G. CRAVER, Mount Hope, W. Va., assignor of one-fourth to M. L. Parker, Mount Hope, W. Va., and one-fourth to Lem Dougless, Scarboro, W. Va. Filed Oct. 6, 1922. Serial No. 592,744. 1 Claim. (Cl. 40—126.)

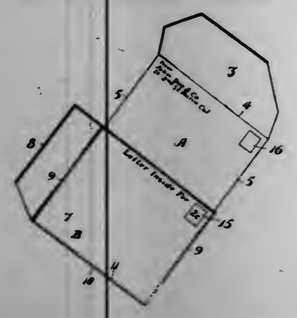


In a device of the character described, a globe, a support for the globe, said support including hollow curved arms, a hollow shaft connected with the curved arms, said globe having openings to receive the hollow shaft, a tubular shaft surrounding the hollow shaft and secured to the inner surface of the globe, a gear secured to the inner surface of the globe, a housing supported by the hollow shaft, a motor in the housing, gearing in the housing and in mesh with the first mentioned gear to revolve the globe, an electro-magnet supported by the hollow shaft, the attracting end thereof being disposed in proximity to the inner wall of the globe, and an article positioned on the outer surface of the globe to be attracted by the electro-magnet.

1,453,756. HAIRPIN CONTAINER. EDWARD B. DEWEY, Washington, D. C. Filed Jan. 25, 1921. Serial No. 439,729. 4 Claims. (Cl. 229—87.5.)

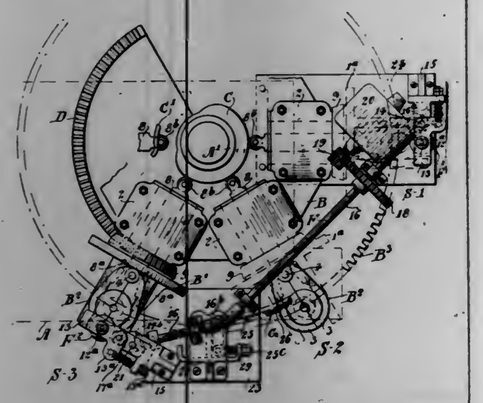
1. A foldable container of the character described, formed of a blank of suitable material having one portion folded back upon itself and fastened at its sides to the other portion so as to form a pocket therebetween; a flap on the opposite end thereof adapted to be folded toward the top end of said pocket; a flap at one side of said pocket adapted to be folded over the pocket; a flap at the other side of the pocket adapted to be folded over the pocket; and means for detachably attaching the side flaps together when folded, substantially as described.

1,453,757. DRAFT REGULATOR. FREDERICK C. EVANS, Ithaca, N. Y. Filed Nov. 26, 1921. Serial No. 517,932. 3 Claims. (Cl. 110—72.)



1. The combination with a furnace having an opening communicating with the ash pit thereof, of a supporting standard arranged adjacent the furnace, a rotatable tubular member mounted upon the standard having a horizontal projection, a housing at the outer end of the projection normally closing the opening in the furnace, an outlet pipe communicating with the rotatable member, an inlet pipe having communication with the main outlet pipe at a point adjacent the rotatable member and means located within the outlet pipe and manually operated for controlling the passage of air from the inlet pipe to the furnace through the rotatable member and between the inlet pipe and the outlet pipe, as and for the purpose specified.

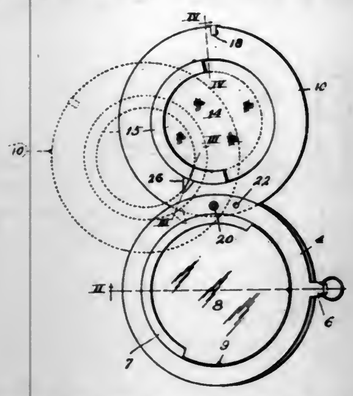
1,453,758. ENVELOPE. ALAN D. FIELD, Oakland, Calif., assignor to The Field-Ernst Envelope Co., San Francisco, Calif., a Partnership. Filed Dec. 21, 1921. Serial No. 523,812. 3 Claims. (Cl. 229—72.)



1. An envelope of the character described having a comparatively large rectangular shaped compartment formed therein for the reception of printed matter less than first class, and a comparatively small rectangular shaped letter compartment formed on the front of the large compartment and at the lower end thereof, a flap

on one end of the envelope foldable over the rear thereof and adapted to close the large compartment, and a flap

formed on the side of the envelope and also foldable over the rear side thereof to form a closure for the small compartment.

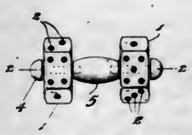


1,453,759. MACHINE FOR MAKING BOTTLES, ETC. WARREN E. GLASPEY, Bridgeton, N. J., assignor to Spring Stopper Company, New York, N. Y., a Corporation of Delaware. Filed Dec. 8, 1921. Serial No. 520,978. 15 Claims. (Cl. 49—36.)

12. In a machine of the character set forth the combination of a rotary mold table, a series of independently rotatable mold-supports carried thereby, molds mounted on said mold-supports, nuts mounted on said mold-supports beneath said molds, threaded tubular mandrels working through said nuts and having tip portions equipped with threads, gear elements mounted on the lower portions of said mandrels, a bubble blow-head located beneath the path of said mandrels and adapted to be elevated to admit air through the mandrels, and local gear devices located at different stations, one of said gear devices serving to elevate the mandrels and the other serving to lower the mandrels.

1,453,760. COMBINATION MIRROR AND TELEPHONE MOUTHPIECE. JOHN HAUENSTEIN, Kansas City, Mo. Filed Dec. 31, 1921. Serial No. 526,310. 2 Claims. (Cl. 179—185.)

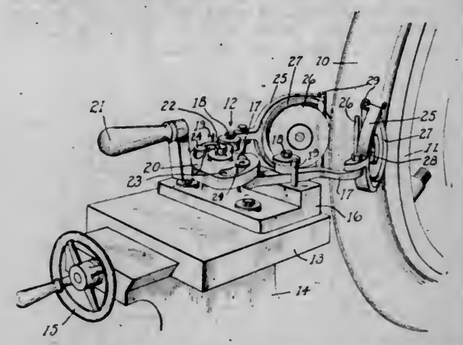
2. A device of the character described, consisting of two circular members spaced apart and united by a peripheral connection, an annulus mounted to swing between and be held in outward position by frictional engagement with said circular members, a screen covering the opening in said annulus, and clips on the annulus



for engaging the two circular members to reliably secure said annulus when swung inward between the two circular members.

1,453,761. COMBINATION EGG BEATER AND CREAM REMOVER. WILLIAM F. LANGE, Elgin, Ill. Filed Oct. 9, 1922. Serial No. 593,270. 12 Claims. (Cl. 259—27.)

1. A device for the purpose specified, comprising a tubular casing open at top and bottom, and a tubular plunger slidably mounted in said casing and adapted to be reciprocated therein, and to be closed at the top by the thumb of the operator, substantially as described.

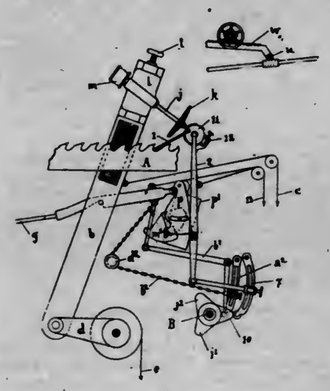


1,453,762. DICE. HARRY D. MOSAUER, New York, N. Y., and LEON LAUB, Newark, N. J. Filed Oct. 15, 1921. Serial No. 507,972. 1 Claim. (Cl. 46—36.)

In a device of the character described, the combination of a pair of independently rotatable dice members having relatively short axes compared to their diameters, a connector having ends adjacent the said dice members, said ends having relatively short diameters compared to the diameters of said dice members, whereby

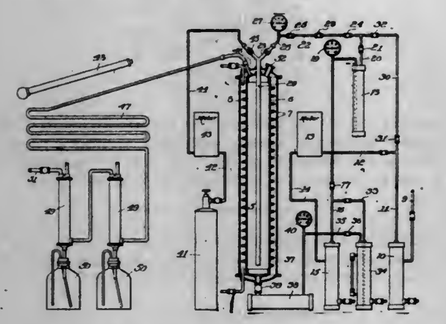
said dice members may rotate freely with minimum friction; and means on said connector rotatably supporting said dice members through said axes.

1,453,763. TIRE-MAKING MACHINE. JOHN M. MYLROIE, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed July 28, 1919. Serial No. 313,958. 16 Claims. (Cl. 154—10.)



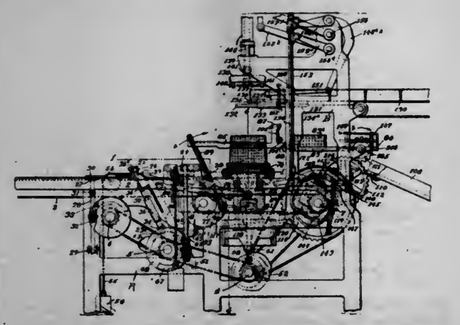
1. In an apparatus of the character described, a stitcher bearing element, a stitcher member revolubly mounted on said element, a guiding core-engaging member also mounted on said element, and means for pivotally supporting said element, the axis of the pivot extending intermediate the stitcher member and guiding member.

1,453,764. LIQUID FOR TREATING FABRICS. ALBERT NEUSELLA, Chicago, Ill., assignor of one-half to Arthur A. Patterson, Chicago, Ill. Filed Jan. 19, 1922. Serial No. 530,446. 2 Claims. (Cl. 134—19.)



2. A liquid for treating articles of fabric materials comprising acetone 100 parts, cellulose triacetate 6 parts, a plasticing agent 3 parts, castor oil one-fourth to one-half part, zinc white and lithopone, 3 parts, and barium sulphate one-half part.

1,453,765. AUTOMATIC MACHINE FOR GRINDING THE SAW BLADES WITH REVOLVING GRINDING WHEELS. ANATOLE OCTAVE, Herblay, France. Filed Mar. 30, 1921. Serial No. 456,980. 8 Claims. (Cl. 76—42.)

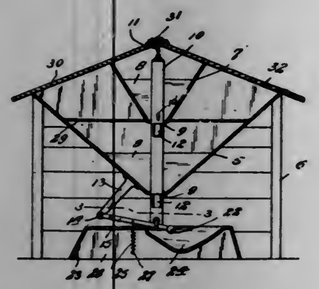


1. A machine for automatically sharpening saws, which comprises a movable frame, a grinding wheel thereon, means to move said frame and wheel to cause the wheel to follow and grind the under side of a saw tooth, means to then move said frame and wheel to cause the latter to follow the contour of and grind the other side of said tooth and its end, and means to thereafter step the saw one tooth preparatory to grinding the next tooth, whereby said grinding is effected without shaping the grinding wheel to the contour to be ground.

1,453,766. CATALYST AND METHOD OF MAKING THE SAME. ELMER H. PAYNE and SAMUEL A. MONTGOMERY, Woodriver, Ill., assignors to Standard Oil Company, Whiting, Ind., a Corporation of Indiana. Filed Aug. 18, 1920. Serial No. 404,318. 8 Claims. (Cl. 260—160.)

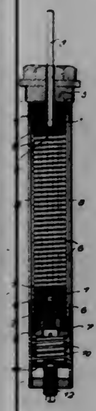
1. The process of preparing a catlytic material which consists in passing chlorine thru a hydrocarbon material while maintaining a temperature of about 300° F. and continuing such passage of chlorine to the formation of a coal-like solid mass.

1,453,767. SUGAR-PACKING MACHINE. CHARLES C. REESE, San Francisco, JOSEPH T. BUZZO, Oakland, and ROBERT S. WOODFORD, Crockett, Calif. Filed Sept. 7, 1920. Serial No. 408,489. 33 Claims. (Cl. 226—14.)



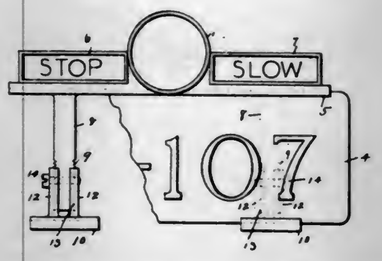
1. In a machine of the character described, a feeding belt adapted to continuously deliver a single layer of sugar cubes, means cooperating with the belt adapted to form separated blocks of sugar each containing a predetermined number of cubes, means for removing the blocks from the belt in successive order, and means for stacking the blocks in superposed layers.

1,453,768. ANIMAL-CONTROL FEEDER. WILLIAM T. ROBBINS, Mayfield, Ky. Filed Jan. 16, 1923. Serial No. 612,941. 3 Claims. (Cl. 119—54.)



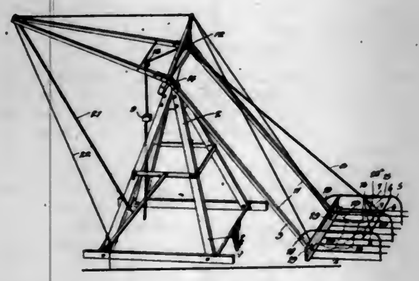
1. In an animal feeder of the class described including a main and auxiliary feed hopper, spaced alined open-

ings within the bottom wall of the hoppers, a vertically movable hollow feed pipe disposed within these openings, inlet openings within said pipes and normally disposed



beneath the bottom walls of said hoppers and animal controlled means for moving said pipes vertically for permitting the discharge of the feed from the hoppers into a trough beneath the lower ends of said feed pipes.

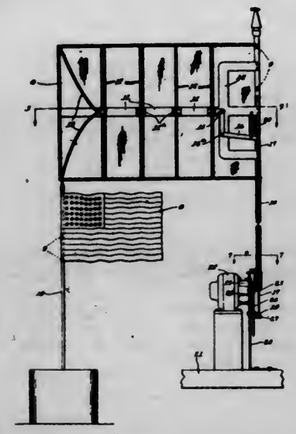
1,453,769. THERMOSTAT. HERMANN SANDVOSS, Frankfort-on-the-Main, Germany. Filed Aug. 29, 1921. Serial No. 496,565. 1 Claim. (Cl. 297—8.)



A thermostat of the character set forth, comprising in combination, an accordion member of relatively small diameter and narrow individual corrugations in close relation, and an accordion member of substantially larger diameter and respectively larger individual corrugations spacedly surrounding the first said accordion member, a fluid-tight joint between the two said accordion members at one end, a fluid-tight closure at the other end of said larger accordion member somewhat below the respective extremity of said inner member, a piston head forming a fluid-tight closure at the relatively shortened accordion member end, an expansible fluid within the space formed between said two accordion members and the said closures at either end thereof, a piston rod in rigid connection with said piston head and extending through said inner accordion member and out beyond the respective fluid-tight joint between the said two accordion members, an apertured protective casing spacedly surrounding said outer accordion member, and safety means for compensating excessive pressure in said expansible fluid, comprising a fixed bottom in said casing, a screw bolt centrally threading therein, a washer in said casing adapted to be axially displaced therein by said screw bolt, and said fluid-tight closure at the free end of said larger accordion member adapted for axial sliding displacement within said protective casing in close guiding contact therewith, and resilient means interposed between said larger accordion member and said bolt-operated washer.

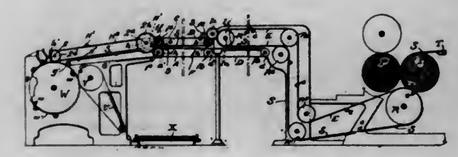
1,453,770. COMBINED LICENSE-PLATE, TAIL-LIGHT, AND SIGNAL-LIGHT BRACKET. ROLAND SHIELDS, Baltimore, Md. Filed Mar. 21, 1922. Serial No. 545,489. 2 Claims. (Cl. 40—131.)

1. The combination of a metal piece having a groove in its lower surface and two downwardly-projecting arms each provided with teeth on their opposite edges, a rest on each of said arms each having a groove therein and teeth on their inner surfaces adapted to co-operate with the teeth on the said arms, and means to hold the said rests in position on said arms.



1,453,771. AUTOMATIC RETAINER FOR HAY-STACKERS. LEWIS B. TAYLOR, Gooding, Idaho. Filed Mar. 22, 1920. Serial No. 367,810. 8 Claims. (Cl. 214—144.)

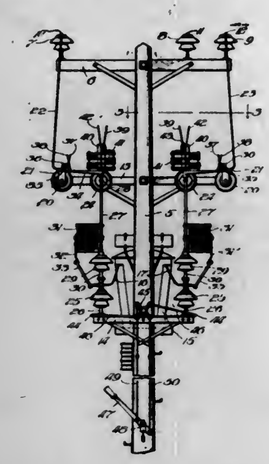
1. A derrick comprising a pivoted beam with a carrier, a pivoted retainer for holding material on said carrier, and means for disengaging said retainer automatically upon a predetermined change in position of said carrier, said means including a counterweight of predetermined weight connected with the retainer by means of a cable and a pulley adjacent the pivot of the beam for directing the cable.



1,453,772. MECHANICAL FLAG WAVING DEVICE. SAMUEL TRACHTENBERG, Cleveland, Ohio. Filed Apr. 10, 1922. Serial No. 551,415. 8 Claims. (Cl. 116—175.)

6. The combination of a hollow flag staff, a flexible flag casing attached thereto, a series of hinged arms supported on the staff and projecting outwardly within the casing, and means extending through the staff and connected to

said arms to swing the same on their hinges, and means carried by said arms to distend the flag casing, including rods projecting from the arms at the hinge joints thereof.

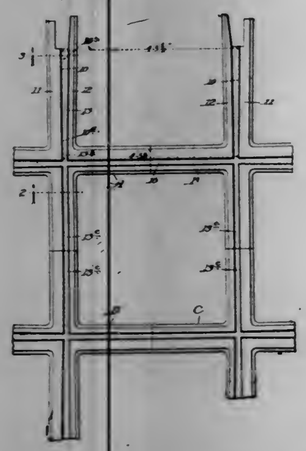


1,453,773. MECHANISM FOR TRANSFERRING AND TIMING SHEETS. BURT FROST UPHAM, Brookline, FRANK R. BELLUCHE, Mansfield, and KURT F. HORNIG, Amesbury, Mass., assignors to United Printing Machinery Company, Boston, Mass., a Corporation of Massachusetts. Filed June 21, 1920, Serial No. 390,500. Renewed July 16, 1921. Serial No. 485,401. 43 Claims. (Cl. 271—50.)

5. In mechanism of the character specified; a first means for operating upon sheets; and means for delivering sheets therefrom; a second means for operating upon sheets, and means for feeding sheets thereto; with sheet transferring mechanism receiving sheets from the said delivery means and moving them toward the said feeding means; said transferring means operating at approximately twice the speed of the second sheet operating means; and means adapted to retard the movement of the sheets upon the transferring means.

1,453,774. HIGH-TENSION CUT OUT SYSTEM AND THE LIKE. FRANK C. VAN ETTEN, Chicago, Ill., assignor to Delta-Star Electric Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 9, 1920. Serial No. 350,269. 7 Claims. (Cl. 175—30.)

7. A high-tension cut-out station comprising in combination a rod or the like, a pivotal insulating support therefor permitting said rod to rotate only on a vertical axis, an axially extending lightning arrester horn on one end of the rod and rotating therewith, a stationary lightning arrester horn adjacent to the lightning arrester horn aforesaid, an outstanding contact arm swinging with the rotations of the rod, a stationary contact in position to be engaged by said contact arm, a suitable insulating support for the stationary contact, means for

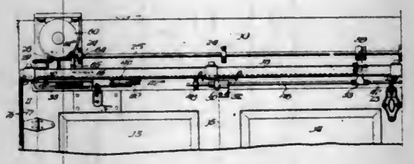


rotating the arm on its pivotal mounting, and means for insulating said rotating means from the rod, substantially as described.

1,453,775. WINDOW SHADE. WILLIAM E. WHITEHURST, Midville, Ga. Filed Oct. 10, 1922. Serial No. 593,509. 3 Claims. (Cl. 156—10.)

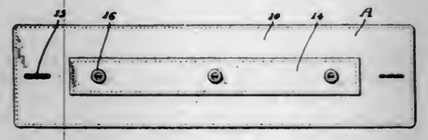
3. In a window shade, rollers mounted at the top and center, respectively, of the window frame, an endless shade section on said rollers, a second shade section secured to the inner run of the first mentioned section at one end thereof, a pull ring secured to the outer run of said endless shade section at the relatively opposite end thereof, antifriction bearing members supporting the ends of each of said rollers, each bearing member comprising a circular head formed with an opening on its inner side and with a counter-sunk depression at the center of the inner wall of said opening and a disk-like enlargement adjacent to the end of said roller engaging in said opening, the end of said roller being circumferentially reduced and fitting into said depression and antifriction bearing members between said disk-like enlargement and the wall of said opening.

1,453,776. RAILROAD CROSSING. GEORGE T. WISWELL, Evanston, Ill., assignor to The Wiswell Improved Railroad Crossing Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 14, 1923. Serial No. 618,925. 2 Claims. (Cl. 246——457.)



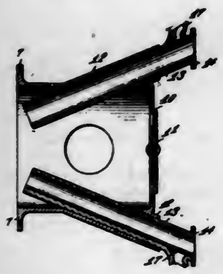
1. A railroad crossing comprising two main rails crossing each other, guide rails inside said main rails and parallel thereto, a groove between each main rail and its guide rail, said groove near its bottom having ledges adapted to contact the sides of the flanges of the wheels running over the crossing, said grooves being inclined upwardly as the crossing is approached so as to raise the wheels clear of the main rails at the point of crossing

1,453,777. HOUSEHOLD UTENSIL. ARTHUR ZIMMERMAN, Brooklyn, N. Y. Filed Feb. 8, 1922. Serial No. 535,111. 6 Claims. (Cl. 132—29.)



1. A device of the character described comprising a fabric portion for cleansing purposes, and a resilient handle removably attached thereto adjacent the corners whereby the fabric portion is placed under transverse tension.

1,453,778. DOOR-OPENING MECHANISM. HARRY A. ADAMS, Danville, Ill., assignor to Allith-Prouty Company, Danville, Ill., a Corporation of Illinois. Filed June 2, 1917. Serial No. 172,362. 28 Claims. (Cl. 268—9.)

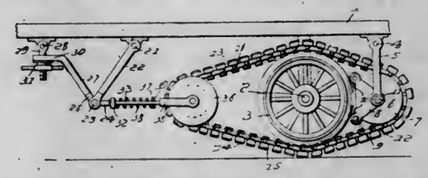


1. In a device for operating folding doors, the combination with a doorway, of hinged folding doors mounted therein, a track across the top of said doorway, hangers on said doors cooperating with said track, an electric motor for opening and closing said doors, and other means operated by said motor for locking said doors when in closed position.

1,453,779. SHIRT SLEEVE WITH DETACHABLE CUFF. ARTHUR C. ALTENBURG, Milwaukee, Wis. Filed Oct. 27, 1921. Serial No. 510,731. 6 Claims. (Cl. 2—79.)

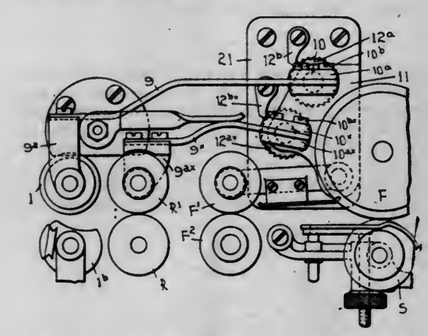
1. A detachable cuff comprising an elongated cuff body having cuff button receiving openings formed adjacent the terminals thereof at the longitudinal center of the body, and a plurality of connecting members carried by said body at the longitudinal center thereof, certain of said connecting members adjacent to said button holes.

1,453,780. BURNER. DELANEY ARKWRIGHT, Jr., Newton Falls, Ohio. Filed Feb. 24, 1922. Serial No. 538,927. 1 Claim. (Cl. 110—104.)



In combination with a furnace, a body portion in communication with the furnace, a fuel supply pipe in communication with the body portion, pipes extending at angles with respect to the body portion and having their outer ends disposed in a plane beyond one end of the body portion, angularly disposed air delivering pipes positioned in the first mentioned pipes and adjustable longitudinally thereof, and having their delivering ends disposed towards each other, and terminating at points in spaced relation with the fuel supply pipe.

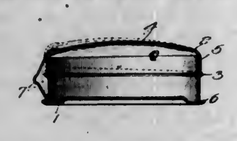
1,453,781. PROCESS OF PEELING FRUITS AND VEGETABLES. CHARLES S. ASH, San Francisco, Calif., assignor to California Packing Corporation, San Francisco, Calif., a Corporation of New York. Filed Sept. 19, 1922. Serial No. 589,241. 4 Claims. (Cl. 146—14.)



4. A process of peeling fruits and vegetable products consisting of exposing the products to the action of a corrosive acid and neutralizing the acid by the use of an alkaline solution substantially as described.

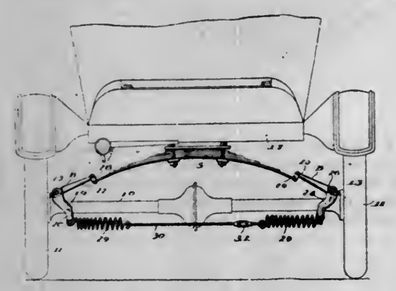
1,453,782. TRACTOR APPLIANCE FOR TRUCKS. JOHN THOMAS BELL, Redford, Mich. Filed June 18, 1921. Serial No. 478,554. 3 Claims. (Cl. 305—3.)

1. The combination with a vehicle having a drive wheel, of an endless tractor chain engaging the drive wheel at diametrically opposite portions, a spring retracted wheel mounted upon the vehicle forward of the drive wheel and over which the chain passes, a wheel yieldably mounted upon the vehicle rearward of the drive wheel and around which the chain passes, and thrust rollers associated with the last named wheel and bearing against the periphery of the drive wheel.



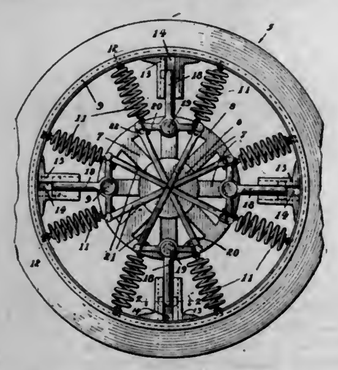
1,453,783. YIELDABLE SUPPORT FOR ROLLERS OF POSTMARKING AND STAMP-CANCELING MACHINES. WALTER H. BOWES, Stamford, Conn. Original application filed May 13, 1921, Serial No. 469,305. Divided and this application filed Nov. 18, 1921. Serial No. 516,120. 7 Claims. (Cl. 101—407.)

1. In mechanism of the character specified, the combination of a printer, a coacting impression roller, a bracket carrying the roller, a flat spring carrying the bracket at one end, a rock shaft to which the other end of the spring is attached, and a helical spring having one end connected with the shaft and the other end to a relatively fixed support, whereby the flat spring is caused to hold the roller yieldingly in position.



1,453,784. RECEPTACLE. COURTLAND J. CRAWLEY, Chicago, Ill. Filed Nov. 28, 1921. Serial No. 518,443. 2 Claims. (Cl. 220—43.)

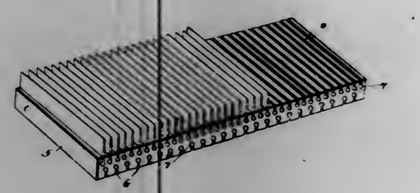
1. In a device of the kind described and in combination, a container, a cover therefor, said container having a circumferentially-extending bead spaced downwardly of the open end against which bead said free end of the cover is adapted to abut when the box is closed, and a flexible spring strip secured to the top of one of said members and projecting downwardly of the side thereof, said container having a peripheral bead thereon adapted to abut the free end of said spring, said spring having an



outwardly-extending projection therein adapted to overlie said first-mentioned bead when said spring is pressed inwardly into contact with said cover and container to separate said members.

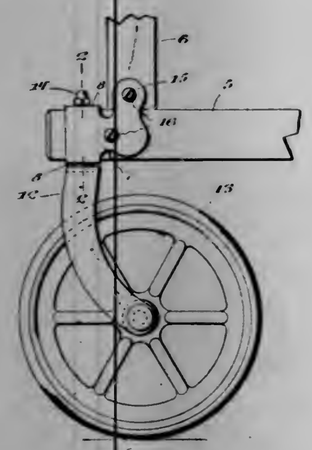
1,453,785. SHOCK ABSORBER FOR MOTOR VEHICLES. JUAN OLIVEROS DELGADO, El Paso, Tex. Filed Apr. 4, 1922. Serial No. 549,552. 2 Claims. (Cl. 267—17.)

1. In an apparatus of the character described, in combination, an axle, a bell crank lever comprising a casting including a hub portion terminating at each end in a radially extending arm, said arms being disposed at an angle to each other, and said hub portion being substantially semi-circular in shape adjacent its one end, a perch secured to the axle and extending upwardly therefrom, said perch having a head adapted to fit within the semi-circular portion of the bell crank hub, and means for pivotally connecting the perch to said hub portion of the bell crank lever.



1,453,786. RESILIENT WHEEL. GEORGES ARTHUR DUFRESNE, Trois Rivieres, Quebec, Canada. Filed June 13, 1921. Serial No. 477,224. 3 Claims. (Cl. 152—38.)

2. The herein described resilient wheel, comprising an inner and an outer rim, a hub formed upon the inner



rim, a tire carried by the outer rim, springs connecting said rims, bars pivoted to the inner rim and extending outwardly therefrom, guides secured to the outer rim, said guides having channels formed therein, heads formed upon the bars slidable within the channels, rock arms upon the inner ends of said bars, and links connecting the rocker arms upon opposite sides of the inner rim, substantially as and for the purposes set forth.

1,453,787. APPARATUS FOR SETTING RULE FORMS. CARROLL JOHNSON FARRAR, Kirkwood, Ga., assignor of one-half to B. W. Farrar, Summerville, Ga. Filed Dec. 27, 1921. Serial No. 524,902. 3 Claims. (Cl. 101—400.)

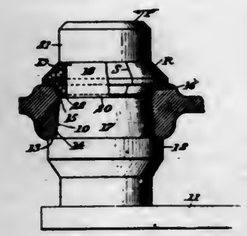
1. A reversible rule base having retaining means on opposite sides thereof adapted to maintain rules engaged with one side spaced apart a distance greater or less than that maintained between rules engaged with the opposite sides.

1,453,788. BRACKET. ABRAHAM G. FELDMAN, Chicago, Ill. Filed Mar. 31, 1922. Serial No. 548,510. 3 Claims. (Cl. 280—49.)

1. In a bracket for connecting two angularly disposed members, the combination of a U-shaped portion for the reception of one of said angularly disposed members the sides of said U-shaped portion and the angularly disposed member enclosed thereby being transversely apertured to form a bearing, a rotatable stem carried in said bearing, said stem preventing displacement of said member from said U-shaped portion, and an integral offset portion carried by said U-shaped portion for securing the other angularly disposed member.

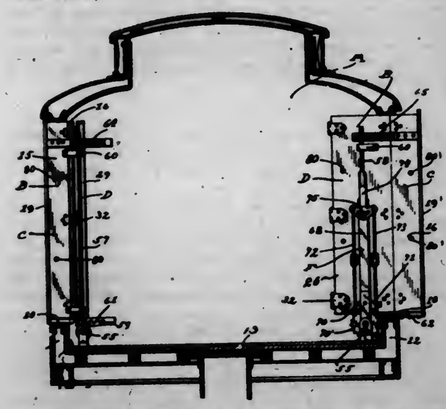
1,453,789. PREPARATION OF PURE SELENIUM OXYCHLORIDE. GAIL J. FINK, Niagara Falls, N. Y., and EDMUND DUNCAN GIAUQUE, Niagara Falls, Ontario, Canada, assignors to Hooker Electrochemical Company, New York, N. Y., a Corporation of New York. Filed Jan. 27, 1921. Serial No. 440,404. 2 Claims. (Cl. 23—10.)

1. Method of refining crude selenium oxychloride which consists in distilling the same in an atmosphere containing an excess of chlorin.



1,453,790. CRUTCH ARMREST. JOHN B. GLOWACKI, Chicago, Ill. Filed July 3, 1920. Serial No. 393,792. 2 Claims. (Cl. 135—52.)

1. A crutch arm rest, comprising a body portion having grooves therein, a resilient cushion engaged over the body portion, and inwardly directed ridges on the cushion engaged in the grooves in the body portion.

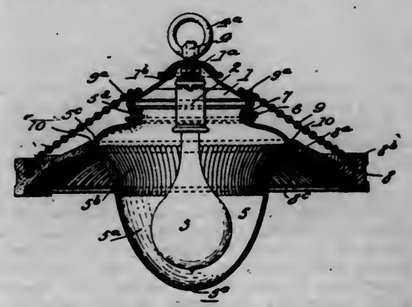


2. A crutch arm rest comprising a body portion, a cushion thereon, and projecting fasteners securing said body portion to the remainder of the crutch, each of said fasteners having a head by which a cover may be detachably held in place over said cushion.

1,453,791. POST AND COVER CLAMP AND SEAL. WALTER E. GOSSLING, New York, assignor, by mesne assignments, to The Prest-O-Lite Co., Inc., Indianapolis, Ind., a Corporation of New York. Filed July 30, 1920. Serial No. 400,012. 11 Claims. (Cl. 214—29.)

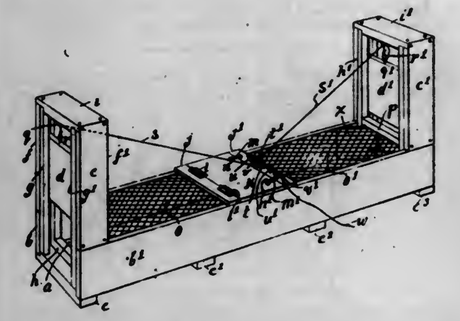
1. A post and cover clamp and seal for storage batteries comprising, in combination, a cell cover having an opening therethrough, a storage battery terminal post extending through said opening and having an integral shoulder thereon above the upper side of said cover, and securing means bearing against the upper side of said cover and against said shoulder and interlocking said post and said cover against separating movement and clamping them in sealing relation with one another.

1,453,792. ARMAMENT FOR MAIL AND EXPRESS CARS. ERNEST ALBION GROSS, Lamoille, Minn. Filed May 24, 1922. Serial No. 563,208. 9 Claims. (Cl. 105—304.)



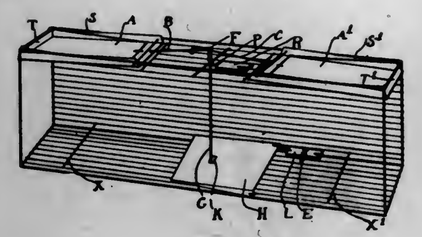
1. The combination with a railroad car, of an armament device therefor including a bullet proof box slidably associated with the car for moving exteriorly and interiorly thereof.

1,453,793. ELECTRICAL CONNECTION. VICTOR C. HAMISTER, Cleveland, Ohio, assignor to National Carbon Company, Inc., a Corporation of New York. Filed June 30, 1921. Serial No. 481,648. 3 Claims. (Cl. 171—326.)



1. In combination, a block or prism having a cavity therein, a conductor having a portion within said cavity, compacted conducting material within said cavity electrically connecting said brush and said conductor, and a seal of a hard phenolic condensation product arranged to retain said compacted material in place.

1,453,794. ELECTRIC-LIGHT FIXTURE. JOHN WALLACE HANCOCK, Denver, Colo. Filed Apr. 18, 1922. Serial No. 554,631. 1 Claim. (Cl. 240—78.)

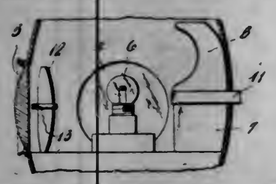


A lighting fixture including a globe holder suspended from a ceiling, a translucent globe secured thereto, lighting means within the globe, an opaque reflector of relatively small height surrounding said globe and spaced therefrom, said globe projecting above and below said reflector whereby diffused light is thrown on the ceiling by that portion of the globe above the reflector, and diffused light from that portion of the globe below the reflector is reflected downwardly toward the floor, the relatively small height of the reflector allowing light rays to meet on each side thereof, whereby shadows from the reflector are dispelled, said reflector being supported from the globe holder.

1,453,795. ANIMAL TRAP. THOMAS MARK HOVELL, Elstree, England. Filed Aug. 31, 1921. Serial No. 497,278. 1 Claim. (Cl. 43—61.)

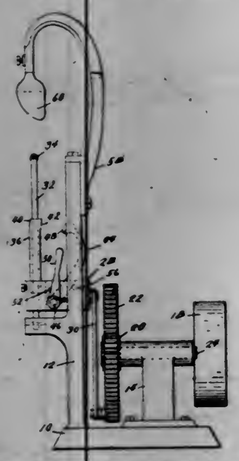
A trap comprising a frame including two side boards; slide doors vertically slidable at each end of said frame and having cords secured thereon; cross bars secured at the center of said frame intermediate the slide doors; a door hinged on one of said cross bars and adapted to latch on said other cross bar; eyelets secured to the last named cross bar; and a pin adapted to slide in said eyelets and be associated with said cords in order to control said doors.

1,453,796. ANIMAL TRAP. THOMAS MARK HOVELL, Elstree, England. Filed Aug. 31, 1921. Serial No. 497,279. 1 Claim. (Cl. 43—61.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



An animal trap comprising a wire frame; pivotally mounted doors secured at the top of and near the ends of said frame; a lever pivoted at the top of said frame, and midway between said doors, said lever having a counter weight thereon; guards pivotally secured at the top of and at the ends of said frame, the free end of said guard being adapted to be associated with said doors; rods on said doors for association with said lever; and means for releasing said lever so that said doors will drop and said guards will lock the doors in place.

1,453,797. PROCESS OF OBTAINING SOLUBLE POTASSIUM COMPOUNDS IN THE MANUFACTURE OF CEMENT. FREDERICK W. HUBER, Riverside, Calif., assignor, by mesne assignments, to Western Precipitation Company, a Corporation of California. Filed Dec. 15, 1917. Serial No. 207,367. 5 Claims. (Cl. 23—22.)

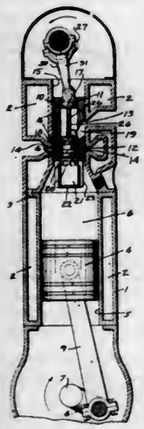


1. A process of producing water-soluble potassium salts which comprises burning a potassiferous cement-making raw mix, and collecting flue dust containing potassium compounds not readily soluble in water, producing therefrom a mixture containing such not-readily-soluble-potassium compounds, and calcareous material having a $CaO:SiO_2$ ratio of not less than 2:1, and containing carbonaceous material of a reducing character, at least about equal in amount to the K_2O content, and heating the mixture, to a temperature of at least 600° C., but below the temperature at which any large part of the potassium compounds would be volatilized, and thereafter extracting the readily soluble potassium compounds therefrom.

1,453,798. LANTERN. CHARLES J. JENSEN, North Plainfield, N. J. Filed Mar. 27, 1922. Serial No. 547,197. 1 Claim. (Cl. 240—11.)

In a lantern comprising a housing having windows in the front and side walls thereof, lenses positioned in each of said windows, a main reflector immovably positioned within the housing adjacent its rear wall intermediately of said side windows and in direct alignment with the front window, said reflector comprising a body substantially V-shaped in cross section in its lower portion and having one face of the upper portion thereof vertically curved and extending throughout its width at substantially right angles to the V-shaped lower portion of the same, and secondary reflectors fixedly secured within the housing at points in proximity to the opposite sides of the lenses in the front wall thereof.

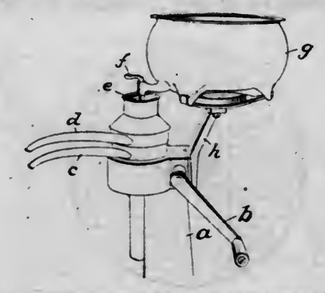
1,453,799. SHOE-TURNING MACHINE. EUCLID I. LA CHAPELLE, Brockton, Mass. Filed Mar. 27, 1920. Serial No. 369,311. 27 Claims. (Cl. 12—57.)



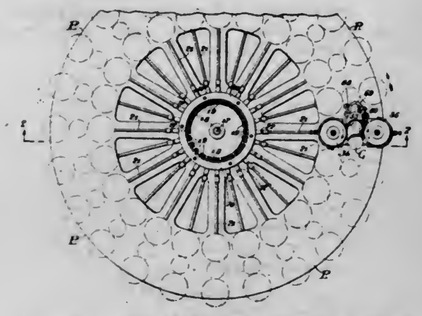
1. A shoe turning machine, having, in combination, a plurality of shoe turning elements comprising, a shoe forepart turning member and co-acting clamping members, adapted to engage the sole of a shoe at its shank part, and actuating means for at least one of said plurality of shoe turning elements, said shoe forepart turning member and said co-acting clamping members being so relatively positioned and arranged that the operator may cause disengagement of the shoe therefrom and may remove the shoe from the machine during the actuation of said actuating means.

1,453,800. TANNING OF HIDES AND SKINS. PIERRE JULIEN CLÉMENT MARGOTTON, Niort, France. Filed July 26, 1921. Serial No. 487,622. 5 Claims. (Cl. 149—4.)

1. A process of tanning, comprising the steps of subjecting the dehaired skins to the action of a tanning bath containing chromic acid; treating the skins with sulfurous acid gas in a closed receptacle to transform the chromic acid into sulfate of chromium sesquioxide; subjecting them to the action of ammoniacal vapors to force out the sulfurous acid gas; washing the skin with water until the ammonia is removed, and then expelling the excess water; then subjecting them to the action of alcohol vapors; submerging the skins in oil; evaporating the alcohol from the skins and leaving the oil therein to be oxidized in the presence of the chromium sesquioxide and to effect a fresh tanning action; and finally drying the skins.



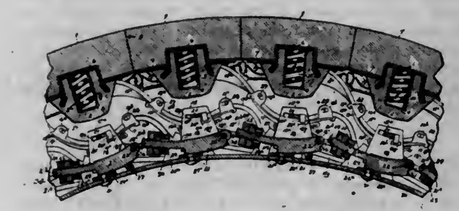
1,453,801. VALVE MECHANISM FOR INTERNAL-COMBUSTION ENGINES. CONRAD H. MATTHIESSEN, Jr., Irvington-on-Hudson, N. Y. Filed Sept. 9, 1920. Serial No. 409,183. 13 Claims. (Cl. 123—188.)



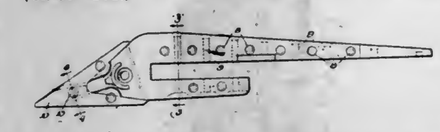
1. A telescoping slide valve mechanism for four cycle gas engines, one part sliding within the other, the outer members forming a pocket into which the inner member slides, the pocket being provided with a closed bottom in combination with inlet and exhaust ports, two of the slide members by their relative motion controlling the inlet and the outer slide alone controlling the exhaust.

1,453,802. COMBINED MILK RESERVOIR AND BOWL-CLAMP SUPPORT FOR CREAM SEPARATORS. THEODORE H. MILLER, Poughkeepsie, N. Y., assignor to The De Laval Separator Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 29, 1922. Serial No. 591,254. 2 Claims. (Cl. 233—1.)

2. A bracket for a cream separator having an elliptical-shaped tray with an upstanding rim and radially disposed reservoir supporting arms extending therefrom, and a pair of bowl clamping band anchoring studs extending upward from the floor of the tray and positioned near the rim on opposite sides of the shorter diameter of the tray.

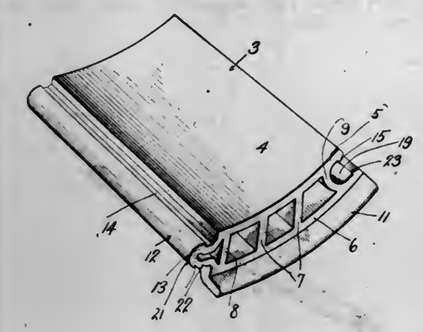


1,453,803. GLASSWORKING APPARATUS. JOHN A. Milliken, Bayonne, N. J., assignor to John E. Marsden, Egg Harbor City, N. J. Filed June 30, 1921. Serial No. 481,501. 29 Claims. (Cl. 51—107.)



1. Glass working apparatus comprising a rotating supporting member, a plurality of glass cutting units thereon, a shaft for each unit, and means common to the shafts of all the units for rotating the same during rotation of said supporting member.

1,453,804. RESILIENT VEHICLE TIRE. JOHN E. MOTE, Dayton, Ohio. Filed Apr. 4, 1918. Serial No. 226,721. 47 Claims. (Cl. 152—8.)

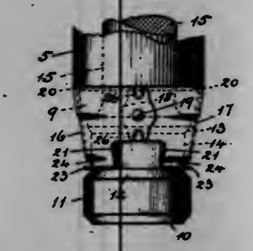


20. In a vehicle tire comprising a rigid inner rim, an outer rim comprising a plurality of sections, universal joints connecting the sections, each section being divided longitudinally into two parts, means for hinging the two parts together, means for limiting the movements of the two parts with relation to each other, a tread section secured to each of the sections of the outer rim, cantilever springs connected to the inner rim, and means for connecting the springs to the outer rim sections.

1,453,805. DIPPER TOOTH. WESLEY G. NICHOLS, Chicago Heights, Ill., assignor to American Manganese Steel Company, Chicago, Ill., a Corporation of Maine. Filed Dec. 30, 1918. Serial No. 268,817. 9 Claims. (Cl. 37—142.)

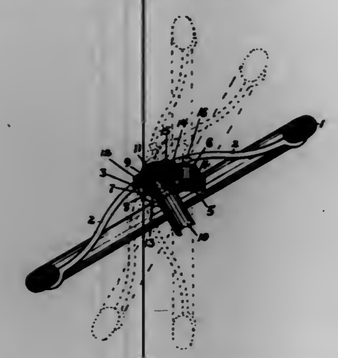
1. A dipper tooth base comprising a plurality of relatively thin sections of substantially uniform thickness and similar shape, with the flat sides of the sections secured together so that when said base is in position on a dipper body the sections will be in edgewise relation with respect to said body.

1,453,806. BUILDING BLOCK. NELS A. NORD, Red Wing, Minn. Filed Nov. 14, 1921. Serial No. 515,018. 1 Claim. (Cl. 72—41.)



A building block comprising a body provided at one edge with a tongue portion which is curved along the plane of its axis beyond the adjacent edge face of the body, said tongue portion being provided at one side with a recess and at its opposite side with V-shaped grooves, the body of the block being provided at its opposite edge with a substantially U-shaped socket the mouth of which is of the same transverse breadth as the transverse breadth of the tongue portion at its base line, the intermediate portion of the socket being of greater transverse breadth than the intermediate and end portions of the tongue, the socket being of greater depth than the length of the tongue, the mouth portion of the socket being provided at one side with an inwardly disposed flange adapted to fit snugly in the recess upon the tongue of an adjacent block, the relative dimensions of the tongue portion and the socket being such that when two of the blocks are placed edge to edge together the tongue portion of one block is completely received in the socket of the other block, with the face surfaces of the adjacent blocks in close contact with each other and sufficient space being left between one side of the tongue portion only and the adjacent surface of the socket to receive and completely enclose a filling of cement.

1,453,807. TOOL RETAINER. SAMUEL OLDHAM, Philadelphia, Pa., assignor to George Oldham and Son Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Apr. 15, 1920, Serial No. 374,116. Renewed Sept. 29, 1922. Serial No. 591,398. 11 Claims. (Cl. 121—32.)

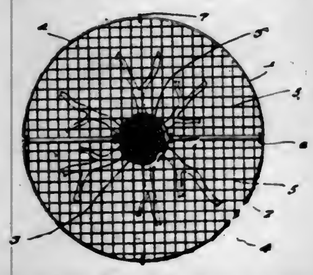


1. A working-tool retainer for pneumatic tools said retainer comprising a plurality of pivotally-connected seg-

ments with flange-means at the upper end of the connected segments and yielding means at the lower end

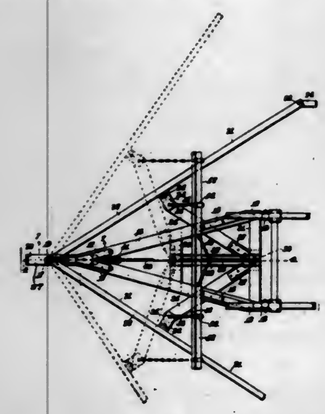
thereof said segments being capable of rocking on their pivot connections whereby to move the flange-means toward or from each other.

1,453,808. STEERING WHEEL. WILLIAM C. RASTETTER, Fort Wayne, Ind. Filed Apr. 7, 1921. Serial No. 459,442. 2 Claims. (Cl. 74—33.)



1. In a device of the class described, a steering wheel having a hollow hub with an opening in one side thereof; a lock controlled bolt in connection with the hub at one side thereof; a steering stem extending up into the hub; and a ball rigidly fixed on the end of the steering stem within the hub, and having a recess adapted to receive the lock bolt when the wheel is in normal position, and having also an annular groove adapted to receive the lock bolt when the wheel is in tilted position.

1,453,809. COLLAR BUTTON. HARRY SIROT, New York, and HYMAN SIROT, Brooklyn, N. Y. Filed Nov. 21, 1922. Serial No. 602,367. 3 Claims. (Cl. 24—108.)

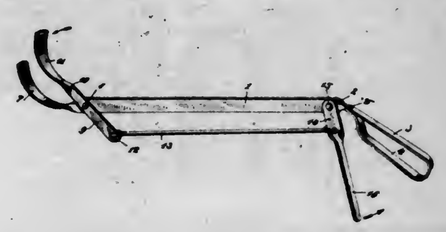


1. A device of the class described comprising a pair of interlocking members, each member having a pair of spaced apart flanges thereon, the outer flange of each member having a quadrant cut out, said cut out quadrant being adapted to enter and slip helically thru a bottom hole, means for closing said cut out portion, and means for interlocking both members.

1,453,810. TREE PROTECTOR. OTTO SLEEN, Rocky Mountain House, Alberta, Canada. Filed Apr. 15, 1922. Serial No. 552,883. 2 Claims. (Cl. 47—38.)

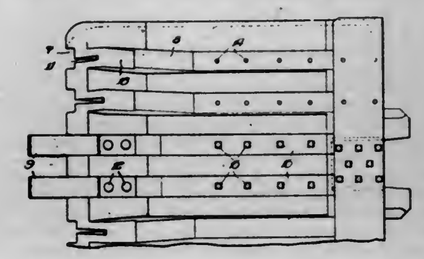
1. A tree protector designed to be arranged on the ground at the opposite sides of the trunk of a tree comprising two flat semi-circular members each having a semi-circular notch centrally of its straight edge to receive the trunk of a tree therein and the rounded edges of each of the members having ground entering elements.

1,453,811. SNOWPLOW. OSCAR H. STARKWEATHER, Needham, Mass. Filed Nov. 3, 1921. Serial No. 512,551. 6 Claims. (Cl. 37—44.)



1. In a snow plow, the combination of two moldboards hinged together; a push frame extending rearwardly from the apex of the blow; hinged members on the rear of said push frame; coacting members secured to a motor vehicle and connected to said hinge members by horizontal alined pins; a frame-work on the front of the motor vehicle, and means supported thereby for raising the apex of said plow.

1,453,812. TRAP PLACER. ARTHUR THOMAS, Bailey, Mich., assignor to Triumph Trap Co., Inc., Oneida, N. Y., a Corporation of New York. Filed May 17, 1919. Serial No. 297,894. 1 Claim. (Cl. 294—22.)

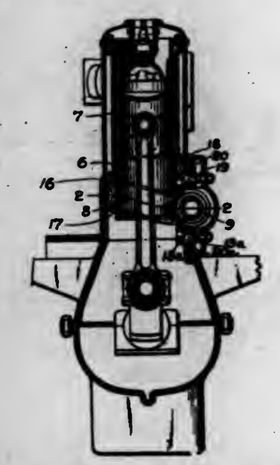


A trap placer comprising a digging implement having a body composed of a main flat bar of metal provided at one end with a handle, the said main bar having a portion near its other end twisted upon itself at right angles and the end portion of the bar beyond the said twist being curved to form a flat curved jaw, a second and relatively shorter bar of flat metal constituting a jaw lever pivotally attached to the said main bar near the twisted portion thereof, the end portion of the said second

bar being twisted upon itself at right angles to form a flat curved jaw corresponding to the said curved jaw of the main bar whereby the said jaws may be closed to-

gether to reenforce each other for digging, a hand lever pivotally attached to the said main bar near the said handle, and a rod pivotally connecting the said hand lever and the pivoted jaw lever.

1,453,813. DIPPER FRONT. ELLISON EDWARD VANDERHOEF, Jerome, Ariz., assignor to American Manganese Steel Company, Chicago, Ill., a Corporation of Maine. Filed Oct. 29, 1920. Serial No. 420,554. 4 Claims. (Cl. 37—141.)



1. A single piece cast metal front for excavating dippers having a plurality of longitudinally extending ribs formed integrally therewith and on the outer surface of the front, said ribs having seats at the upper ends thereof whereby a series of detachable dipper teeth may be secured to the ribs, the cutting edge of the front extending beyond said seats and being notched whereby said dipper teeth may lie flush with the ribs, and means for securing said teeth in place on said seats.

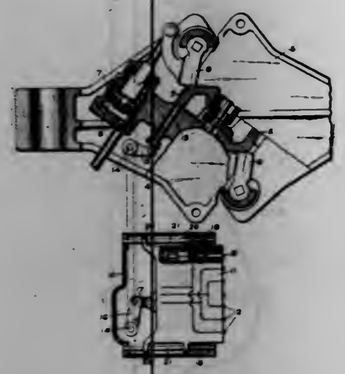
1,453,814. LENS MOUNTING. JOHN R. VAN TASSEL, Geneva, N. Y., assignor to The Standard Optical Company, Geneva, N. Y., a Corporation of New York. Filed Jan. 4, 1922. Serial No. 526,936. 4 Claims. (Cl. 88—47.)

1. In a lens-mounting, a tubular nose-piece, and lens-holders having tangs inserted telescopically in the ends of the nose-piece, the telescoping parts being bent to form similar angles.

1,453,815. MECHANICAL MOVEMENT. RAYMOND WARE, Ithaca, N. Y. Filed Mar. 16, 1920. Serial No. 366,227. 7 Claims. (Cl. 74—14.)

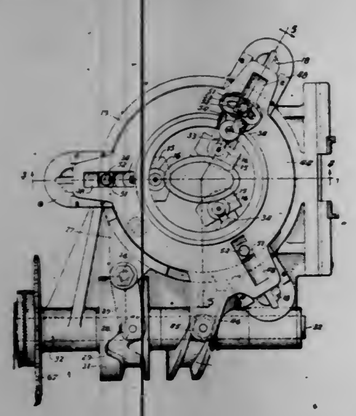
4. The combination with a rotatable worm, of a worm wheel movable longitudinally on its axis of rotation and having a recessed threaded portion extending completely around said wheel, the toothed portion of the worm projecting within said recess, and meshing with the threaded portion of the wheel to produce both rotary and longitudinal movement of said wheel.

1,453,816. TOOTHBRUSH HOLDER. WALTER W. WELPLEY, Detroit, Mich. Filed Nov. 14, 1921. Serial No. 514,875. 5 Claims. (Cl. 248—63.)



1. A tooth brush holder comprising a flanged back plate having a shelf, and a compartment plate on said back plate and providing individual brush compartments which have the upper ends thereof closed by the shelf of said back plate, said compartment plate possessing a resiliency which permits of its side edges being sprung under the flanges of said back plate.

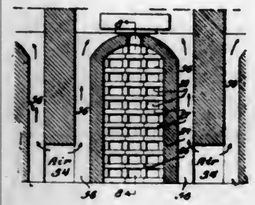
1,453,817. ELECTRIC COUPLING FOR CARS. HENRY HERMAN WESTINGHOUSE, New York, N. Y., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed July 5, 1918. Serial No. 243,350. 5 Claims. (Cl. 173—332.)



1. The combination with a car coupler, having a projection, of an electric coupler suspended beneath the car

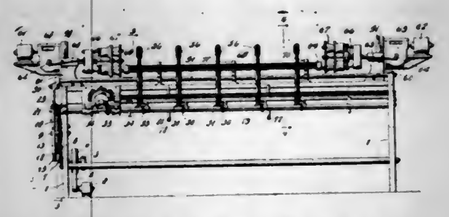
coupler, and having a movable electric contact carrier, a yielding tappet movably mounted in the car coupler

adapted to be engaged by the projection of a counterpart coupler, and a mechanical connection from said tappet for projecting the contact carrier.



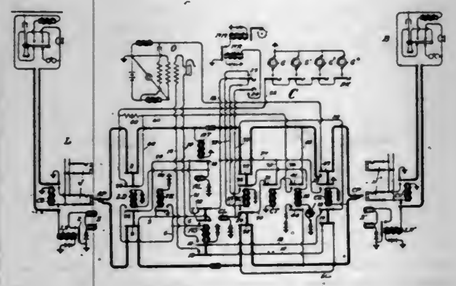
1,453,818. END FEED FOR DOUBLE SEAMERS. MAGNUS E. WIDELL, Maywood, and ARTHUR A. JAHR, Forest Park, Ill., assignors to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Nov. 17, 1920. Serial No. 424,696. 9 Claims. (Cl. 113—114.)

1. A can end feeding mechanism comprising a stack holder for holding accumulated can ends, and a plurality of retractable blades and separating knives and rolls, said blades and rolls being alternately projectable into the path of the can ends, and means for reciprocating said rolls with said plurality of strokes.



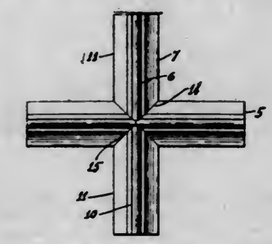
1,453,819. COMBINATION APPARATUS FOR DRYING, BURNING, AND COOLING BRICK. THOMAS M. WILSON, Greensburg, Pa. Filed Feb. 7, 1921. Serial No. 442,948. 15 Claims. (Cl. 25—2.)

1. Apparatus of the character described including a drier; a kiln, said drier having tunnels for bricks to be dried and sub-tunnels; means for directing products of combustion from said kiln into said sub-tunnels; and



means for conducting radiated heated air from said kiln directly into said first tunnels of the drier, substantially as described.

1,453,820. MACHINE FOR TYING BUNDLES OF WIRES. PARVIN WRIGHT, Chicago, Ill. Filed Feb. 18, 1922. Serial No. 537,610. 10 Claims. (Cl. 100—31.)



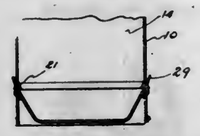
1. In a machine for tying a bundle of wires the combination of a fixed support for said bundle; a needle arm provided with a wire; means to hold one end of said wire in the machine as it passes through said needle; a second support for said bundle so located that when said bundle is brought from said first to said second mentioned support, it will strike said wire and cause the latter to partially encircle said bundle; a shaft carrying said needle arm; means to oscillate said shaft and cause said needle arm to complete the encircling with wire of said bundle; a second shaft; means operated from said second shaft to twist together two bights of the wire encircling said bundle; and a pair of cutter bars operated from said second shaft to cut the wire at two places, substantially as described.

1,453,821. TELEPHONE SYSTEM. GEORGE A. YANOCHOWSKI, Chicago, Ill., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill., a Corporation of Illinois. Filed June 20, 1921. Serial No. 478,795. 7 Claims. (Cl. 179—58.)

1. A telephone system including a calling subscriber's line and a called subscriber's line, an operator's link circuit for use in interconnecting said lines, a source of ringing current, operator controlled means for connecting said ringing current to the said called subscriber's line, a relay controlled over the calling line, and means including a link disconnect relay controlled by said relay for cutting down the flow of ringing current to the called subscriber's line by directing the ringing current through a high resistance circuit which is normally shunted prior to the operation of said disconnect relay.

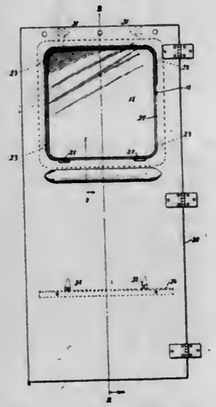
1,453,822. STEEL SASH CONNECTION. MATHEW ZEMAN, Cleveland, Ohio. Filed July 23, 1921. Serial No. 487,047. 2 Claims. (Cl. 189—76.)

1. A joint of the character described comprising a pair of strips, one of said strips having a slot extending inwardly from its front longitudinal edge, another of said strips having a slot extending inwardly from its rear longitudinal edge, the rear longitudinal edge of the first mentioned strip and the front longitudinal edge of the second mentioned strip having small recesses, the front longitudinal edge of the first mentioned strip and the rear longitudinal edge of the second mentioned strip having extensions extending therefrom adjacent the slot of each strip, said slots permitting interengagement of the strips with each other whereby the extensions project respectively beyond the front longitudinal edge of the second mentioned strip and the rear longitudinal edge of the first mentioned strip, the extensions being adapted to be forced into the recess of the adjacent strip.



1,453,823. HOSE CONSTRUCTION. CASSIUS M. CLAY BAIRD, Chicago, Ill. Filed Mar. 24, 1919. Serial No. 284,737. 3 Claims. (Cl. 137—90.)

1. In a device of the character described, a rubber tube having secured thereto on opposite sides a pair of reinforcing strips of rubber containing non-woven fibers adapted to prevent tearing, said tube being formed with a longitudinal fold-set adapted to assure folding of the tube along the central axes of said strips when collapsed.



1,453,824. NONBREAKABLE REFUSE CAN. CHARLES BAUER, New York, N. Y. Filed July 8, 1922. Serial No. 573,704. 1 Claim. (Cl. 220—66.)

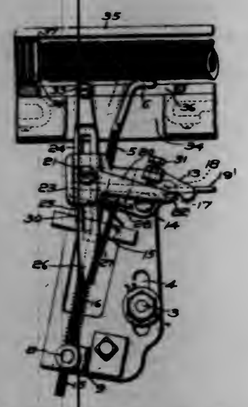
A refuse can comprising an annular body shell, a removable cover therefor, an internal shoulder in said shell, a bottom member, a flanged rim on said bottom, a convergent wall joining said flanged rim and bottom, said flanged rim adapted to be inserted into the body shell to engage said shoulder, resilient pawls formed integral with said shell and projecting thru slitted portions of said can, lips on said pawls adapted to normally engage the flanged rim of said bottom, and swing

arms secured to said pawls and adapted to release the latter from engagement with said flanged rim when removing said bottom member.

1,453,825. VEHICLE SASH DOOR. KENNETH S. BAXTER, Michigan City, Ind., assignor to Sheet Steel Products Company, Michigan City, Ind., a Corporation of Indiana. Filed Oct. 15, 1920. Serial No. 417,110. 4 Claims. (Cl. 296—44.)

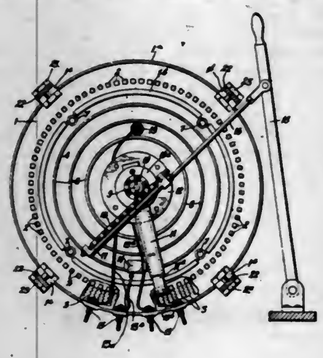
1. A sash comprising, in combination, spaced sash members adapted to be pressed against opposite sides of a pane of glass, one of said members having a hole therein, a cushion member adapted to form a seat for the edge of said glass, a knob on said cushion projecting through said hole, to cushion the sash against lateral jars.

1,453,826. SHEET-METAL SPOOL. CHARLES AUGUSTUS BEAUJON, Canaan, Conn. Filed Jan. 5, 1922. Serial No. 527,108. 5 Claims. (Cl. 242—77.)



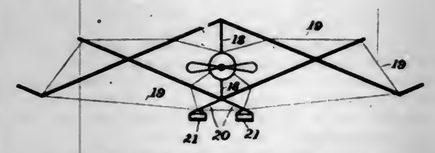
1. A sheet metal spool comprising a hub or body made up of a plurality of rectangular panels each connected to the next along a rounded edge, the body comprising tongue and slot means for locking the same in definite form when assembled, the spool also including a plurality of wings on each end of the body located in approximately the same plane and each wing being integral with and constituting an extension of the end of an adjacent body panel.

1,453,827. ELECTRIC-LAMP SOCKET. REUBEN B. BENJAMIN, Chicago, and PAUL D. PHILLIPS, Elmhurst, Ill., assignors to Benjamin Electric Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 21, 1920. Serial No. 375,484. 3 Claims. (Cl. 173—356.)



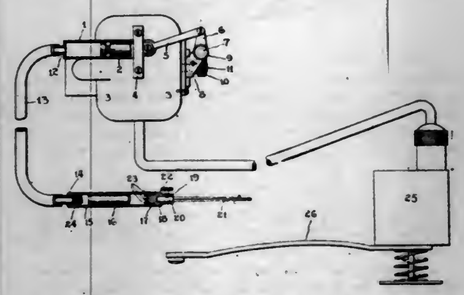
2. A lamp locking socket comprising a plate, a threaded shell contact mounted on said plate, a second plate mounted on said first plate and spaced therefrom, said plates having aligned bearing openings therein, a pivot pin mounted in said bearing openings, and a dog mounted on said pivot pin for engaging the lamp base, said pivot pin being provided with key-engaging means, whereby a key may be used to turn said pivot pin to control said dog.

1,453,828. FEELER MECHANISM FOR LOOMS. CARL D. BROWN, Hopedale, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Apr. 6, 1922. Serial No. 550,103. 11 Claims. (Cl. 139—85.)



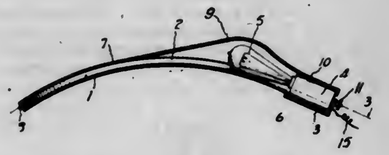
1. In a feeler mechanism for looms, the combination of a feeler mounted for movement towards and from the front of the loom and also in a direction longitudinally of the shuttle, a feeler lock which prevents replenishment of the filling in the shuttle until the filling is substantially exhausted, a bobbin engaging member which is moved in a direction longitudinally of the shuttle by the frontward pressure upon it when the filling is substantially exhausted on a detecting beat to trip the lock and free the feeler, and means actuated by movement of the feeler for effecting replenishment of filling.

1,453,829. RHEOSTAT. GEORGE WARREN CAMP, Mount Vernon, N. Y., assignor to Ward Leonard Electric Company, a Corporation of New York. Filed Jan. 10, 1921. Serial No. 436,024. 9 Claims. (Cl. 219—48.)



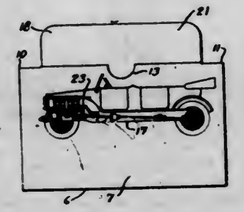
1. A rheostat comprising a plate, resistance conductors and fixed contacts on one side of said plate, resistance conductors and fixed contacts on the reverse side of said plate within the other set of resistance conductors and fixed contacts, heat radiating flanges on both sides of said plate and located opposite said resistance conductors respectively, and controlling means on each side of said plate.

1,453,830. AIRPLANE. HENRY COAKLEY, New York, N. Y. Filed Sept. 15, 1920. Serial No. 410,465. 3 Claims. (Cl. 244—12.)



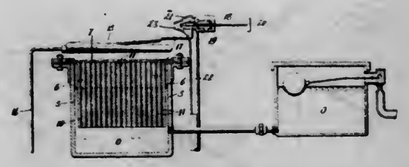
1. An airplane having superposed supporting units, respectively angled and intersecting in dihedral and reverse dihedral relation, characterized by the central portion of a lower unit having dihedral angularity, and laterally extended portions of said units having like symmetrical angularity.

1,453,831. VIBRATORY TOOL. EDWARD P. DIETERLE, New York, N. Y., assignor of one-half to Albert G. Barker, New York, N. Y. Filed June 8, 1921. Serial No. 476,058. 1 Claim. (Cl. 29—10.)



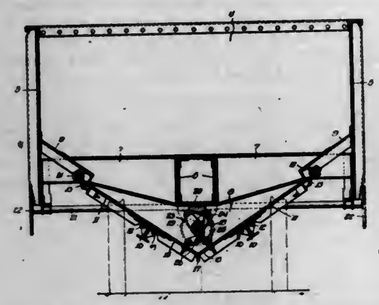
A pressure applying device to be manually held and directed comprising a hollow cylinder, a tool fixedly carried thereby, a free piston within said cylinder, and pneumatic means for reciprocating the piston throughout the cylinder extent to vibrate the device.

1,453,832. ELECTRIC HEATER. ELIZABETH C. DONALDSON, Highland Park, Mich., assignor to Charles S. Davis, Ray P. Johnson, J. Carl O'Hara, John F. McNaughton, A. Earl Boyce, and Henry C. Gordon, all of Muncie, Ind. Filed Nov. 22, 1920. Serial No. 425,682. 4 Claims. (Cl. 219—45.)



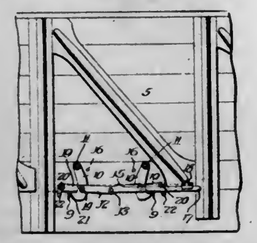
1. In an electric heater, a body contacting member shaped to fit portions of the human body, a series of incandescent lamps releasably secured in the said body contacting member, a cover hinged to the said first named member fitting over the said lamps, electric circuits for the said lamps, and means for separately energizing the said circuits.

1,453,833. DISPLAY FOLDER. CLARENCE C. FLEMING, Amityville, N. Y., and HAROLD L. MYERS, Morristown, N. J. Filed Sept. 7, 1922. Serial No. 586,724. 8 Claims. (Cl. 40—65.)



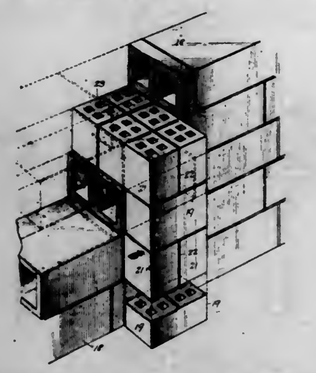
1. A display-folder comprising a body portion having a pocket, a bent-over flap closing the pocket and intermediately slitted along the fold, an opening formed in the outer face of the pocket, and a display card held in the pocket by the flap with a tongue projectable through the slit to shift the card in the pocket relatively to said opening.

1,453,834. OIL BURNER. ALBERT EDWARD GRANT, New York, N. Y. Filed Apr. 16, 1921. Serial No. 461,854. 4 Claims. (Cl. 158—92.)



1. In an oil burner the combination with flame forming means adapted to mix hot oil gases and air by means of a steam jet, of an oil supply having a level below said flame forming means, and means for feeding the oil from said supply to said flame forming means by capillary action.

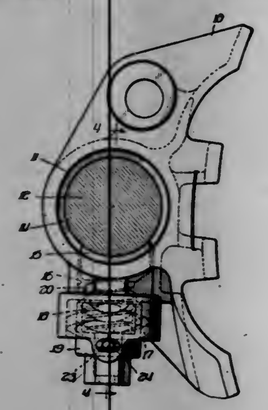
1,453,835. HOPPER-CAR ARRANGEMENT. HARRY S. HART, Chicago, Ill. Filed Aug. 4, 1921. Serial No. 489,698. 10 Claims. (Cl. 105—251.)



1. In a dump car, a bottom comprising inwardly sloping side portions, each said side portion comprising outwardly opening doors for side dumping and inwardly opening doors for center dumping, and means for operating said doors.

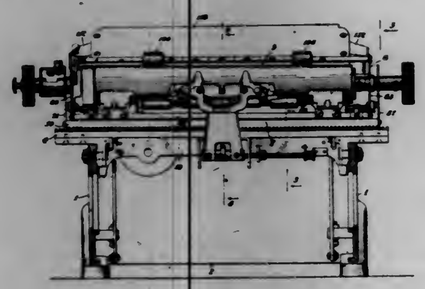
1,453,836. DUMP-CAR-DOOR LATCH. HARRY S. HART, Chicago, Ill., assignor to National Dump Car Company, Chicago, Ill., a Corporation of Maine. Filed May 6, 1922. Serial No. 558,980. 6 Claims. (Cl. 105—308.)

1. In combination with a dump car door and its latch, a toggle lever pivotally connected with and adapted to impart latching and unlatching movement to said latch, and a toggle actuating arm angularly rigid with a member of the toggle lever.



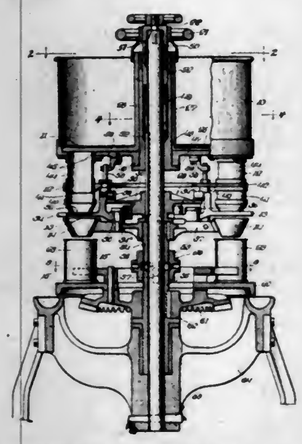
1,453,837. PILASTER CONSTRUCTION. FREDERICK HEATH, Tacoma, Wash. Filed May 1, 1920. Serial No. 378,056. 6 Claims. (Cl. 72—41.)

1. A pilaster construction, comprising wall blocks and pilaster blocks arranged in interbonding relation in super-



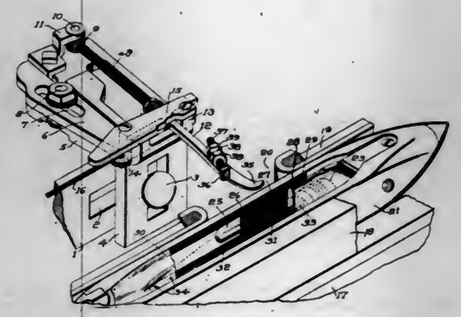
posed courses, the width of each pilaster block being slightly less than one half its length, one of said courses including a pilaster block disposed parallel with and entirely outside of the wall face and the next superposed course including a pilaster block disposed at right angles to and overlapping said subjacent block and also overlapping a wall block within the wall body to securely bond the wall and pilaster together.

1,453,838. ADJUSTABLE BRAKE HEAD. WILLIAM C. HEDGCOCK, Chicago, Ill., assignor to American Steel Foundries, Chicago, Ill., a Corporation of New Jersey. Filed Aug. 8, 1921. Serial No. 490,503. 3 Claims. (Cl. 188—229.)



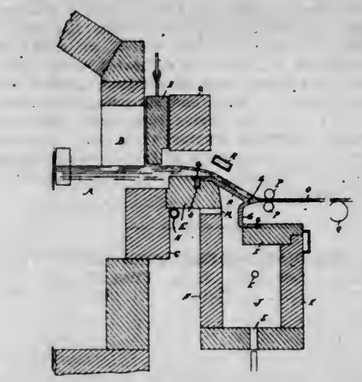
2. In brake mechanism, the combination of a brake head having an opening, the walls of which are provided with helically formed portions, a block for frictionally engaging an associated brake beam trunnion, a spring cooperating with said block, means having lugs cooperating with said helically formed portions for compressing said spring and forcing said block into operative association with the brake beam trunnion, said helically formed portions having depressions whereby said means is prevented from accidentally moving into an inoperative position.

1,453,839. TYPEWRITING MACHINE. EDWARD B. HESS, Brooklyn, and LEWIS C. MYERS, Freeport, N. Y., assignors to Royal Typewriter Company, Inc., New York, N. Y., a Corporation of New York. Original application filed May 11, 1920, Serial No. 380,601. Divided and this application filed June 19, 1922. Serial No. 569,321. 3 Claims. (Cl. 197—143.)



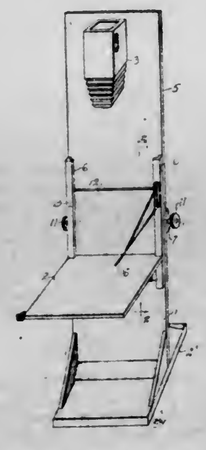
1. In a typewriting machine: a platen, a shiftable carriage having end walls and supporting said platen, a transverse brace rod mounted in the end walls of said shiftable carriage, a paper pan, a paper table, a pair of arms carried by said paper table and supported on said brace rod, and means for normally urging said paper table into a lowered position including a spring and a curved link connected to the spring and loosely pivoted to one of the arms of the paper table at a point above the brace rod, said link spanning the brace rod when the paper table is in its elevated position.

1,453,840. FILLING MACHINE. AUGUST HOLMQUIST, Hoopeston, Ill., assignor to Sprague Canning Machinery Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 3, 1921. Serial No. 434,441. 4 Claims. (Cl. 226—97.)



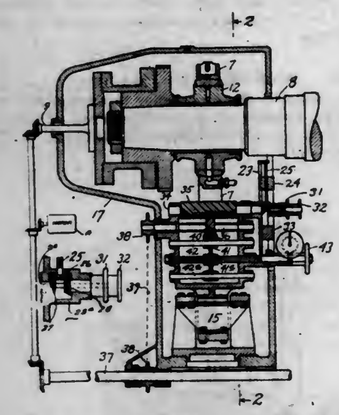
1. A can filling machine comprising a rotatable tank, a stationary cut-off plate in said tank, a series of measuring pockets rotatable with said tank, and supplied with material from said tank, said stationary cut-off plate serving to cut off the supply of material from said tank to said pockets, and a plurality of laterally swinging gate valves, one for each of said measuring pockets, for controlling the discharge from said measuring pockets, and means for intermittently forcing said laterally swinging gate valves upwardly into sealing engagement with the outlet from said measuring cups as said measuring cups are being filled from said rotatable tank.

1,453,841. FEELER MECHANISM FOR LOOMS. PATRICK J. HUNT, New Bedford, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Mar. 29, 1922. Serial No. 547,620. 11 Claims. (Cl. 139—85.)



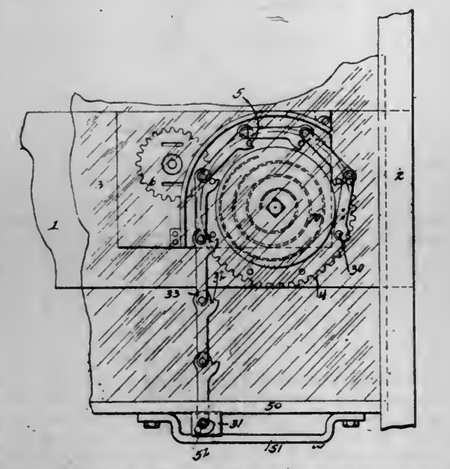
1. In a feeler mechanism for looms, the combination of a feeler that is mounted for side-slipping movement and also for movement toward and from the front of the loom, a shuttle having a side opening through which the feeler passes on a detecting beat, and a protector curtain of flexible material interposed between the end of the feeler and the filling carrier in the shuttle and along which the feeler slides in a direction longitudinally of the shuttle when filling is substantially exhausted on a detecting beat thereby protecting the filling and the filling carrier from injury by the feeler during both its feeling action and side-slipping movements.

1,453,842. APPARATUS FOR DRAWING SHEET GLASS. WILLIAM J. JACOBS, Toledo, Ohio, assignor, by mesne assignments, to The Libbey-Owens Sheet Glass Company. Filed Jan. 4, 1919. Serial No. 269,577. 6 Claims. (Cl. 49—17.)



1. In a sheet glass drawing apparatus, the combination with a means for supplying molten glass continuously, of a metallic slab onto which the glass from the supply is adapted to flow in a continuous sheet, means for cooling the glass while on the slab, and means for stretching it from the edge of the slab into a sheet of predetermined thickness.

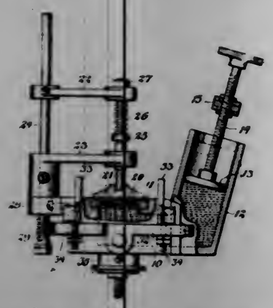
1,453,843. FOCUSING MECHANISM. ROY W. JOHNSTON, Chicago, Ill. Filed Sept. 22, 1921. Serial No. 502,474. 2 Claims. (Cl. 88—24.)



1. A device of the class described comprising an adjustable support movable toward and away from a predetermined focus point located between said support and a camera, and a gage located at said focus point and arranged to swing in a plane at substantially right angles to the axis of the camera so as to be movable into and out of the range of the camera.

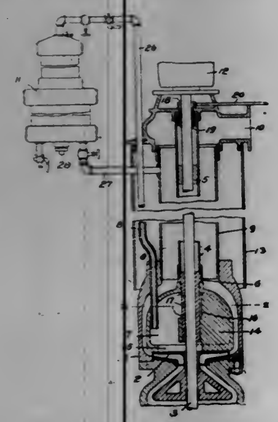
1,453,844. BALANCING MACHINE. DAVID KILGOUR, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 4, 1920. Serial No. 356,342. 5 Claims. (Cl. 73—51.)

1. In combination in a balancing machine, a movable support on which the body to be balanced is rotatively mounted, means for rotating said body, a rotatable weight associated with said support and means for rotating said weight in synchronism with said body including a pair of intermeshing gears having inclined teeth, and means for moving one of said gears longitudinally with relation to the other to cause said weight to lead or lag with respect to said body during the period of operation of said means and while the body and weight are in motion.



1,453,845. MECHANICAL WINDOW LIFT. WILLIAM KOPP, Detroit, Mich., assignor to Joseph N. Smith & Co., Detroit, Mich., a Corporation of Michigan. Filed Apr. 26, 1918. Serial No. 230,866. 5 Claims. (Cl. 268—4.)

1. In a mechanical window lift the combination with a frame and sash slidable therein, of a sprocket, a chain

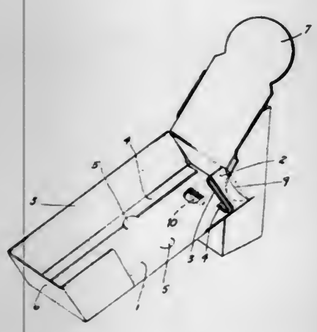


connected therewith and with the sash in such manner that rotation of the sprocket in one direction or the other causes upward or downward movement of the sash in the frame, a gear for driving the sprocket, a plate fixedly supported in spaced relation with the gear and having a central aperture, a pair of spring-actuated locking bars supported between the plate and the gear, means engaged by the bars when released to action by the springs preventing rotation of the gear, and a handle device for rotating the gear, said handle device being adapted upon turning thereof to first withdraw the locking bars from locking position and upon release of the handle to release the bars to return to locking position by action of their springs.

1,453,846. TUBE-MAKING MACHINE. ROMEO LA CROIX, Holyoke, Mass., assignor to Samuel M. Langston Company, Camden, N. J., a Corporation of New Jersey. Filed Feb. 17, 1921. Serial No. 445,597. 17 Claims. (Cl. 93—80.)

1. A tube making machine including a mandrel on which a strip of paper is wound helically to form the tube, and in respect to which the completed tube slides lengthwise as formed, a reservoir for lubricant and means for forcing lubricant out of said reservoir and delivering the same into the path of movement of the surface of the strip going to make up the inner surface of the tube.

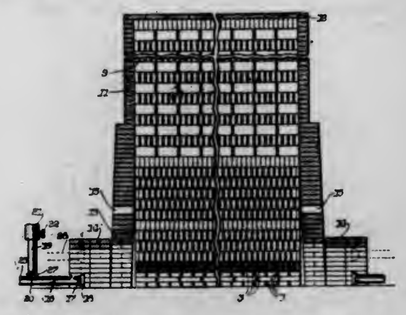
1,453,847. WELL MECHANISM. MAHLON E. LAYNE, Los Angeles, Calif. Filed Sept. 8, 1920. Serial No. 408,946. 12 Claims. (Cl. 103—102.)



1. In combination in a well mechanism a centrifugal or rotary pump provided with an oil reservoir adjacent the pump neck and with impellers, and upwardly extending discharge casing, a shaft casing extending upwardly from the pump neck, a shaft connected to the impellers and extending upward through the shaft casing, a bearing at the pump neck extending into said oil reservoir, and means for forcing oil into said reservoir and thence upward through the shaft casing.

1,453,848. AGAR-AGAR COMPOSITION AND METHOD OF PRODUCING THE SAME. CHOKICHI MATSUOKA, Los Angeles, Calif. Filed Nov. 17, 1921. Serial No. 515,816. 7 Claims. (Cl. 99—11.)

3. The process set forth of preparing a product from agar-agar produced by drying a quantity of the appropriate seaweed, adding chlorine thereto until bleached, treating the bleached substance with a solution of sodium thiosulphate, removing the substance from the solution and washing the same in clear water, subjecting the cleansed substance to the action of heated water until a homogeneous and viscid mass is obtained, passing such viscid mass through a sieve and spreading such sieved substance on a tray, and drying such sieved substance, which process comprises dipping such dried substance into cold water for the purpose of further bleaching and then drying such bleached substance, thus producing a transparent product.

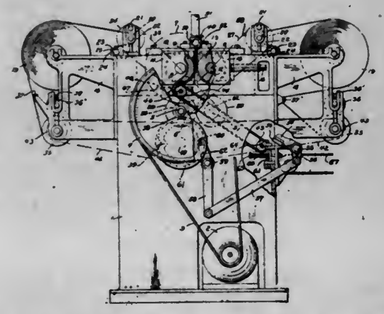


1,453,849. FOLDING ADVERTISING BOX. FRANK XAVIER LIST, New York, N. Y. Filed Feb. 18, 1922. Serial No. 537,364. 3 Claims. (Cl. 206—44.)

1. A display container having doubled side walls and ends, a separate hollow pedestal member, insert tongues and angular recesses on side walls of the pedestal, said tongues adapted to be slipped between the doubled wall members at adjacent end edges of the container when the latter is arranged for display, the end edges of the outer walls being concavely curved at adjacent corners providing guides for said tongues, and means for retaining the container in inclined position on the pedestal.

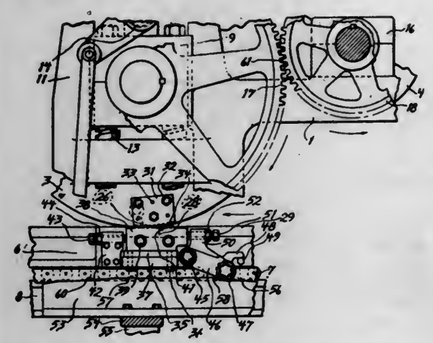
1,453,850. METHOD OF AND MEANS FOR BURNING BRICKS. GRAFTON E. LUCE, Chicago, Ill., assignor, by mesne assignments, to Charles A. Brown, Hinsdale, Ill. Filed July 25, 1917. Serial No. 182,653. 14 Claims. (Cl. 25—157.)

1. In a kiln, a stack of green bricks and a foundation of burned bricks, said foundation of burned bricks having a furnace therein and said stack of green bricks having a furnace therein adjacent the furnace in the foundation,



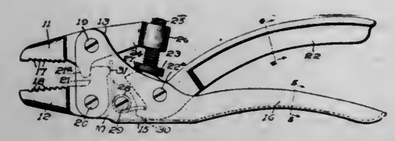
said furnaces being connected at intervals through a foraminous wall of burned bricks.

1,453,851. ROTARY KILN. SYLVESTER S. MCGRATH, West New Brighton, N. Y. Filed Mar. 30, 1921. Serial No. 456,886. 5 Claims. (Cl. 222—7.)



2. A cement burning apparatus embodying an inclined kiln mounted for rotation, said kiln being cylindrical and of a uniform interior diameter for the major portion of its length from the feed end thereof and the remainder of its length being of circular frusto conical shape diverging toward the discharge end of the kiln which is unobstructed so that material traveling down the frusto conical portion of the kiln will not be arrested but flow freely from the discharge end thereof, and a lining for the kiln, said lining being of greater thickness within the frusto conical portion of the kiln than within the cylindrical portion of the kiln.

1,453,852. TUBING MACHINE. JEREMIAH L. MAHONEY, New Haven, Conn., assignor to Goodyear's India Rubber Glove Manufacturing Company, a Corporation of Connecticut. Filed Nov. 7, 1919. Serial No. 336,294. 8 Claims. (Cl. 154—5.)



4. A machine for making tubing from sheeted plastic stock comprising means for joining two sheets of stock by pressure along a series of narrow parallel areas and simultaneously substantially severing them within said areas, and stationary means independent of the formed tubing for treating it to prevent adhesion of its walls between said areas.

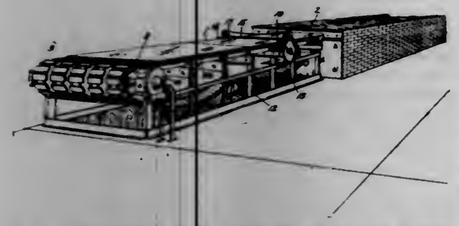
1,453,853. CYLINDER PRINTING PRESS. ROBERT F. MIEHLE, Jr., Chicago, Ill. Filed Apr. 6, 1921. Serial No. 458,894. 9 Claims. (Cl. 101—191.)

1. A printing press including a printing couple, one of the members of which is a rotating cylinder, mechanism for driving the couple members in unison throughout the cycle of operation thereof, cooperating register elements mounted to move with respective couple members, one of said register elements being mounted for movement with respect to its couple member into and out of a predetermined registering position in a path to cooperate with the other register element to effect necessary relative movement of said couple members to register the same when moved into said registering position, a stop limiting movement of said movable register element in one direction of its said movement with respect to its couple element, and cam mechanism operating in timed relation with the operation of said couple members and adapted to move periodically said movable register element against said stop to effect the positioning of this register element in such predetermined registering position.

1,453,854. PIPE WRENCH. BURTON H. PARKER, Detroit, Mich., assignor to Trimont Manufacturing Company, Roxbury, Mass., a Corporation of Maine. Filed Jan. 24, 1922. Serial No. 531,382. 6 Claims. (Cl. 81—78.)

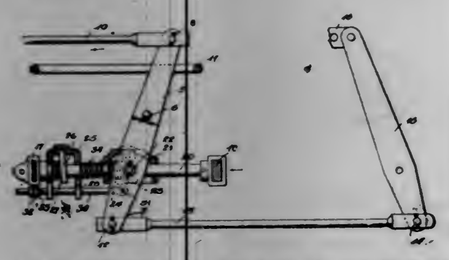
1. In a tool having opposing jaws for engaging the work, a head having a handle extending therefrom, a pair of pivoted jaws, each having a pivot pin extending directly through the body of the jaw and into the head for pivotally connecting each jaw to the head, a projection formed integral with each jaw and extending radially from the pivotal mounting of the jaws into overlapping relation, and a handle pivoted to the head and having a cam surface for operating one of the jaws to grip the work.

1,453,855. HEATER FOR MOTOR-PROPELLED VEHICLES. CLYDE S. PELTON, Cleveland Heights, Ohio, assignor to The Perfection Heater and Manufacturing Company, Cleveland, Ohio, a Corporation of Ohio. Filed May 8, 1920. Serial No. 379,818. 3 Claims. (Cl. 12.3.)



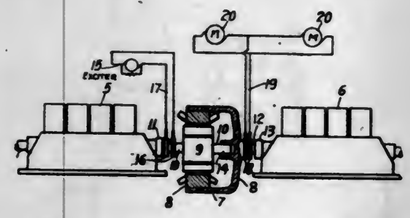
2. In an automobile, the combination with two independent exhaust pipes of an engine, of a radiator having

two parallel sets of heating pipes located side by side, each set of heating pipes being operatively connected at



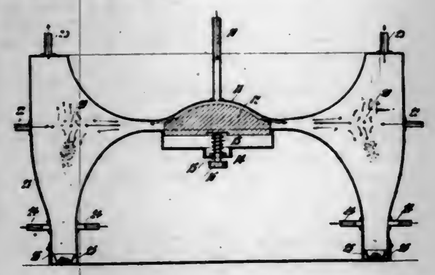
one end to one of the exhust pipes and discharging the exhaust gas at its opposite end.

1,453,856. APPARATUS FOR CUTTING SHEET GLASS. CLIFFORD A. ROWLEY and JOSEPH A. REECE, Toledo, Ohio, assignors to The Libbey-Owens Sheet Glass Company, Toledo, Ohio, a Corporation of Ohio. Filed Feb. 4, 1922. Serial No. 534,235. 40 Claims. (Cl. 33—32.)



1. In combination with a conveyor for carrying a sheet of glass longitudinally, an automatic apparatus for transversely cutting the glass sheet, comprising a cutting tool, a carrier for the tool, means for drawing the tool across the sheet, means for moving the carrier with the sheet while the cutter is operating, and means for returning the parts to the starting position.

1,453,857. SLACK ADJUSTER. WILLIAM H. SAUVAGE, New York, N. Y., assignor, by mesne assignments, to Gould Coupler Company, New York, N. Y. Filed Nov. 25, 1921. Serial No. 517,630. 12 Claims. (Cl. 188—199.)

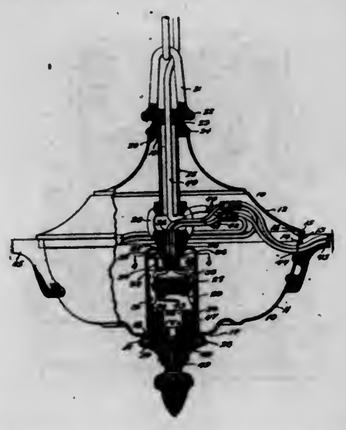


5. In an automatic slack adjuster, in combination, a brake beam having a tension member, a strut interposed between the beam and tension member, a live lever having a bifurcated portion enclosing said strut, and permanent and temporary take up and holding means mounted upon the strut and associated with the live lever, one of said means being operative on application of the brakes to temporarily take up the slack and operate upon the other of said means to permanently take up the slack on release of the brakes, said temporary and permanent take up and holding means including a housing, a dog coacting with the strut, and a spring holding the dog in canted relation whereby it is freely moved in one direction relatively to the strut to hold it against movement in the opposite direction.

1,453,858. POWER-DEVELOPING APPARATUS. HENRY F. SCHMIDT, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Co., a Corporation of Pennsylvania. Filed July 21, 1919. Serial No. 312,295. 2 Claims. (Cl. 290—4.)

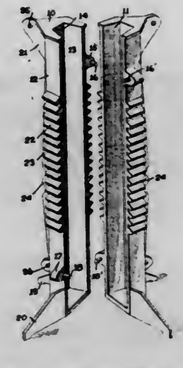
1. In a power-plant installation, the combination of two motors having casing elements and axially-alined power shafts adapted to rotate in opposite directions, a generator of the double-rotation type interposed between the motors, axially-alined shafts connected to the armature and field elements of the generator, and extending from opposite sides of said generator and alined with said power shafts, means for connecting one of said generator shafts to one of the power shafts, and a clutch for connecting the other of said generator shafts to the other power shaft or to the corresponding casing element, whereby, when both generator shafts are connected to the oppositely-rotating power shafts, the generator operates at high frequency, and, when one generator shaft is coupled to a casing element, the latter shaft is held stationary and the generator operates at a lower frequency.

1,453,859. MILK PRODUCT AND PROCESS OF MAKING THE SAME. CLARENCE S. STEVENS, Sheboygan, Wis. Filed Aug. 7, 1918. Serial No. 248,674. 8 Claims. (Cl. 99—11.)



1. The process of making a powdered milk product, which consists in homogenizing the milk and then immediately thereafter and before precipitation of the homogenized milk particles, subjecting the homogenized milk to the action of steam at atmospheric pressure, to thereby evaporate the moisture of the homogenized milk and coagulate the albumen of the milk in the form of a dry enveloping sheath around the fat globules of the milk.

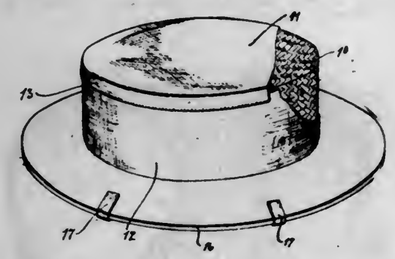
1,453,860. ATTACHMENT DEVICE FOR ELECTRIC FIXTURES. JOHN EDWARD WATSON, Philadelphia, Pa. Filed May 26, 1922. Serial No. 563,895. 6 Claims. (Cl. 240—78.)



1. In combination with an electric fixture of the character described having a fixture body including two sections, with electric lamp-supporting means, of a connecting device for binding said sections together, one of said sections having a hole therein, said device having a casing extending through said hole and a part on the casing

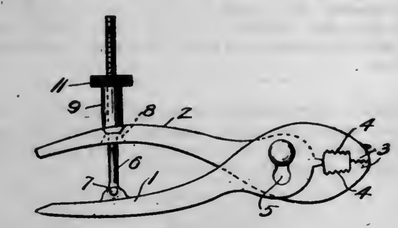
for binding abutment with said latter section, said device including a portion connected to the other section, said

device having auxiliary electric attachment means connected thereto and located within the confines of said casing.



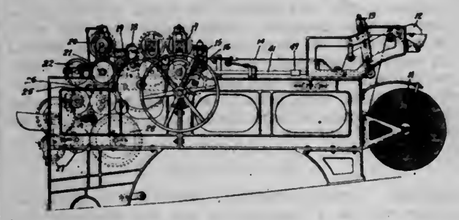
1,453,861. METAL-MOLDING APPARATUS. HENRY C. ZENKE, Richmond Hill, N. Y. Filed Nov. 14, 1921. Serial No. 514,918. 9 Claims. (Cl. 22—142.)

1. In apparatus of the character described, in combination, a mold including a pair of cooperating and separable parts adapted when in assembled relation to receive a molten metal, a member interposed between said parts for dividing the molten charge received by said parts into two pigs, means for aligning each of said parts with the said member and thereby with the other part, and means for clamping said parts and said interposed member together.



1,453,862. HAT PROTECTOR. JOSEPH M. CHECK, Wilkes-Barre, Pa. Filed Nov. 3, 1921. Serial No. 512,440. 1 Claim. (Cl. 2—108.)

In combination with a hat, a hat covering comprising a disc of waterproof material shaped to be disposed over the brim of the hat, said disc having an opening through which the crown of the hat extends, an upturned flange formed integral with said disc tightly fitting the crown, a band encircling said crown and flange, a cover over the top of the hat, a downturned flange formed at the edge of said cover overlying said band, strips secured to said disc, said strips extending under the brim of the

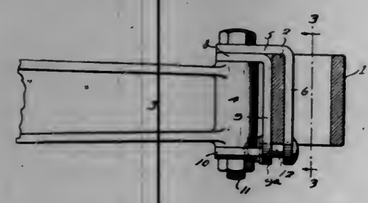


hat, snap fastener elements carried by said strips, and engaging means for said fastener elements permanently fixed in the brim of the hat.

1,453,863. PLIERS. RICHARD W. CONARD, Atlantic Highlands, N. J. Filed July 21, 1921. Serial No. 486,463. 3 Claims. (Cl. 294—41.)

1. In a hand tool of the type having hinged handle members, means for restricting the degree of separation of said handle members comprising a threaded bolt having one end pivotally attached to one of the handle members, the other handle member being provided with an opening having a greater diameter than the diameter of the bolt and through which the bolt extends, said opening having an outward.y flaring formation at each end, and a nut having threaded engagement with said bolt and having a reduced end formed for seating engagement with the outer end of said opening.

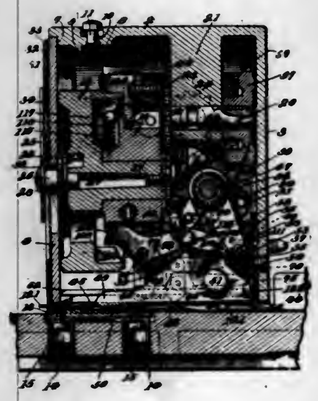
1,453,864. TUBING MACHINE. ALFRED C. COTY, Toledo, Ohio, assignor to The Watertown Bag Machine Co., Inc., Toledo, Ohio, a Corporation of New York. Filed Aug. 20, 1921. Serial No. 493,871. 11 Claims. (Cl. 93—11.)



1. In tube-forming apparatus, the combination with means for applying paste along a predetermined line, of means for removing paste from the line at predetermined points.

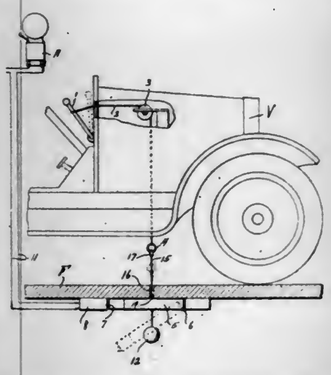
1,453,865. METHOD OF CONSTRUCTING PNEUMATIC TIRES. FREDRICK S. DICKINSON, New York, N. Y., and JOHN SPRINGER, Atlantic Highlands, N. J., assignors to said Dickinson. Filed May 8, 1919. Serial No. 295,660. 15 Claims. (Cl. 154—14.)

1. The method of constructing the internal body fabric for the shoe or casing of pneumatic tires, which comprises laying a plurality of cord strip units, each consisting of a plurality of cord lengths assembled together side by side, and in contact throughout their length over a core or mandrel in successive position and contact side by side, whereby the plurality of respective multiple cord strip units will collectively cover the surface area of the core and anchoring the ends of said strip units at the bead-edge.



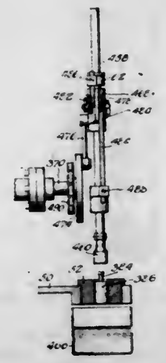
1,453,866. AUTOMOBILE BUMPER. WAYNE E. DUNSTON, Kalamazoo, Mich., assignor to Christian Girl, Kalamazoo, Mich. Filed Aug. 10, 1921. Serial No. 491,110. 6 Claims. (Cl. 293—55.)

4. The combination, with an arm having a sleeve or eye thereon, of a bumper bar and means for securing the same to said sleeve or eye, the said means comprising an inner U-shaped member adapted to receive said sleeve or eye between the upper and the lower ends thereof and having openings registering with the bore of such sleeve or eye, an outer member comprising an upper body portion and a portion bent at an angle thereto and provided with an opening adapted to register with the openings in the first member, the upper portion of the second member being of greater length than the upper end portion of the first member to provide a vertical slot therewith, the body portions of said members being provided with aligned apertures in the lower ends thereof, and one or more bolts in said apertures connecting the body portions of said member and extending across the bottom of said slot.



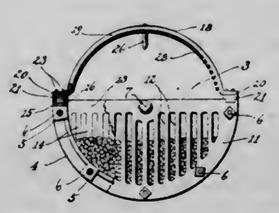
1,453,867. CHECK WRITER. BENJAMIN O. FANSLOW, New York, N. Y., assignor to New Era Manufacturing Company, New York, N. Y., a Corporation of New York. Filed Apr. 30, 1921. Serial No. 465,801. 19 Claims. (Cl. 197—6.4.)

1. A check writer including in combination, a printing wheel, a platen, means for moving the printing wheel toward and from the platen, a feeding mechanism, a gage wheel, and means for positively locking the gage



wheel prior to the movement of the printing wheel toward the platen for printing.

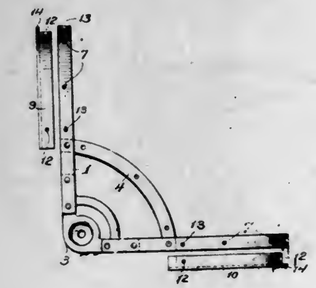
1,453,868. STARTING DEVICE. RODNEY C. FROHOCK, Augusta, Me. Filed Mar. 8, 1922. Serial No. 542,179. 1 Claim. (Cl. 177—383.)



In combination with a movable member for closing the operating circuit of a starter of an engine and an alarm circuit, a member supported for swinging movement, a weighted member carried by the swinging member, a flexible member engaged with the movable member, the second flexible member engaged with the swinging member, a tension clamp carried by the second flexible member and engageable with the first named flexible member, means for holding the swinging member in one position and against movement under the influence of the weighted member carried thereby, means operatively engaged with the alarm circuit for releasing said holding means upon sounding of the alarm to permit the weighted member to drop, the dropping of the weighted member imposing sufficient pull upon the first named flexible member to move in closed position the member for closing the operating circuit of the starter, the tensioning clamp disengaging the first named flexible member upon pull being imposed upon the first named flexible member in addition to the pull created by the weighted member.

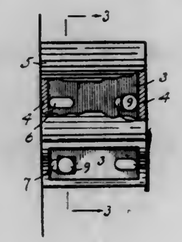
1,453,869. EJECTING MECHANISM FOR BATTERY-CORE-MAKING MACHINES. JOHN GRAVES, Madison, Wis., assignor to French Battery & Carbon Company, Madison, Wis., a Corporation of Wisconsin. Original application filed July 5, 1918, Serial No. 243,503. Divided and this application filed Mar. 14, 1921. Serial No. 452,072. 5 Claims. (Cl. 18—5.)

1. In a device of the class described, the combination of a fixed support, a plunger rotatable and reciprocatable with reference thereto, means for rotating said plunger, means for reciprocating said plunger, a spring member in connection with the rotating device adapted to apply spring tension to said plunger as it rotates.



1,453,870. SIFTING GRATE. JOHN W. HARTMANN, Brooklyn, N. Y. Filed Oct. 14, 1920. Serial No. 416,925. 8 Claims. (Cl. 197—138.)

1. A grate comprising segmental end portions and intervening fuel-sustaining bars, combined with a removable arcuate and open-ended ash sifter arranged to receive materials from said fuel-sustaining bars when said grate is inverted.

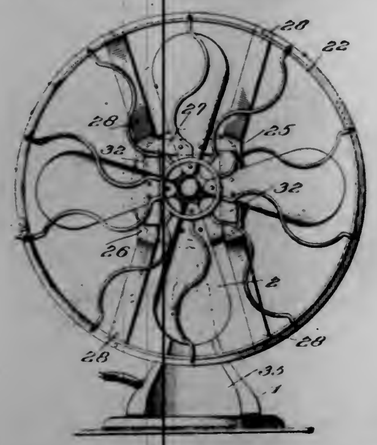


1,453,871. HOOD FOR CHILDREN'S CARRIAGES AND DOLL CARTS. AXEL W. HAWKINSON, Washington, Pa., assignor to Topliff-Ely Company, Washington, Pa. Filed Jan. 24, 1922. Serial No. 531,414. 3 Claims. (Cl. 296—135.)

1. A hood of the character described comprising a woven reed body, outer metal bows disposed upon the exterior of said woven reed body along the front and rear margins thereof, inner metal bows disposed against the inner surface of the body along the marginal front and rear portion of said woven reed body, and fastening means securing said bows in place, said inner bows each

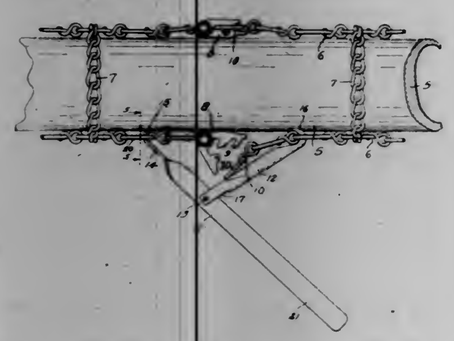
having a flange at its outer edge lying across and abutting the front and rear marginal edges of the woven reed body.

1,453,872. GROUSER. ROE C. HAWKINS and ERNEST S. HIXSON, Long Beach, Calif. Filed May 23, 1922. Serial No. 562,974. 1 Claim. (Cl. 301—44.)



The combination with the wheels of a tractor having oppositely diagonal rows of apertures, of grousers having laterally elongated oppositely diagonal pairs of apertures adapted for respective alinement with said diagonal rows of apertures of the respective wheels, the spacing of said wheel apertures from the side edges of the wheels, with relation to the spacing between said wheel apertures and the width of said grousers, being such as to aline said oppositely diagonal pairs of elongated grouser apertures with said wheel apertures at opposite ends of said elongated apertures when said grousers are positioned at the respective side edges of a wheel with the outer sides of said grousers in alinement with the outer edges of said wheel, and fastening means adapted to be received through the alined apertures.

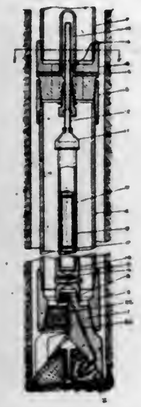
1,453,873. CONVERTIBLE FAN. DU VAL Q. HICKS, Fredericksburg, Va. Filed Apr. 2, 1921. Serial No. 458,144. 5 Claims. (Cl. 230—1.)



1. A device of the class described comprising a support, a motor mounted thereon having a shaft and a pair of spaced guideways, a fan, means forming a quick-detachable connection between said motor shaft and

said fan, a fan guard provided with an open peripheral portion and a pair of spaced guidestrips adapted to fit

into said guideways on said motor whereby said fan guard may be quickly detached from said fan.

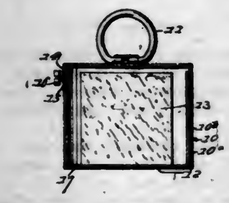


1,453,874. TOOL FOR ATTACHING AND REMOVING TIRE CHAINS. HOWARD F. HOTCHKISS, Bridgeport, Conn., assignor to The Bridgeport Chain Company, Bridgeport, Conn., a Corporation of Connecticut. Filed Feb. 20, 1922. Serial No. 537,713. 1 Claim. (Cl. 254—78.)

As a new article of manufacture, a device for use in applying and removing anti-skid chains comprising a flat strap member with a portion at one end twisted so that it will extend transversely to the remaining portion and provided with means for engaging a chain link, and a second member pivoted to the first member and substantially U-shaped in cross section with the portion between the legs removed at the opposite ends thereof, said legs being adapted at one end to straddle the first member at said pivot and at the other end curved to form hooks to engage another chain link.

1,453,875. LUBRICATOR FOR EARTH-BORING DRILLS. HOWARD R. HUGHES, Los Angeles, Calif. Original application filed June 8, 1920, Serial No. 387,299. Divided and this application filed May 28, 1921. Serial No. 473,225. 9 Claims. (Cl. 255—71.)

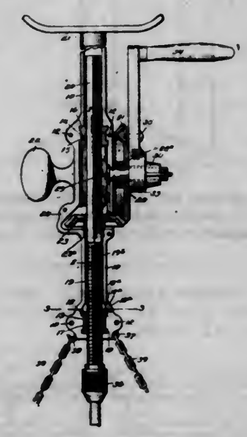
1. In a rotary earth-boring drill, a drill head having rotary cutters thereon, a drill stem operatively engaged with the upper end of said head, a lubricator barrel attached to said head inside said drill stem, and connected with the bearings of said cutters, a piston on the lubricant therein, means to approximately equalize the fluid pressure in said lubricator during the operation of the



drill, and additional means to force said piston downwardly in the barrel.

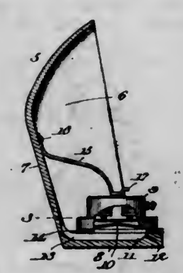
1,453,876. MEASURING DEVICE. WILLIAM C. HUNTER, St. Louis, Mo. Filed Apr. 27, 1922. Serial No. 556,963. 1 Claim. (Cl. 33—143.)

A device of the class described comprising a strip of sheet metal having inturned side edges to provide guides, a fixed pointer extending laterally from one side edge thereof and a movable pointer also extending laterally in the same direction as the fixed pointer and including a plate mounted to slide in said guide, said plate having a rolled outturned finger grip for manipulating the pointer.



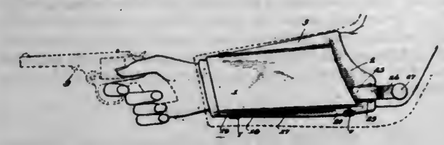
1,453,877. CUE-CHALK HOLDER. ROBERT SPENCER JOHNSON, New York, N. Y. Filed Apr. 20, 1921. Serial No. 462,851. 1 Claim. (Cl. 46—8.)

A chalk holder consisting of a receptacle comprising a pair of telescoping sections of which one is provided with



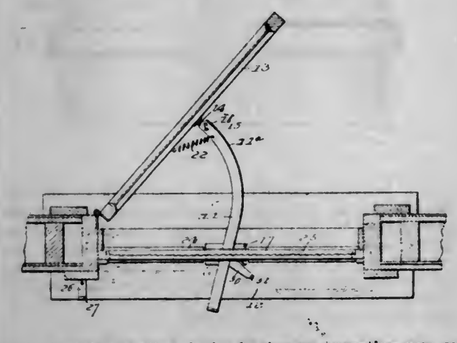
a closed end and equipped with means for attachment to a support, the other section being formed with an inturned angular flange defining an opening by which access is had to a contained block of chalk, the two members being formed with registering holes, and a set screw engaged in said holes and positively precluding relative longitudinal and angular movement of the members.

1,453,878. DRILL. GUSTAV P. LAGEMANN, Luverne, Minn. Filed July 19, 1921. Serial No. 485,854. 2 Claims. (Cl. 77—7.)



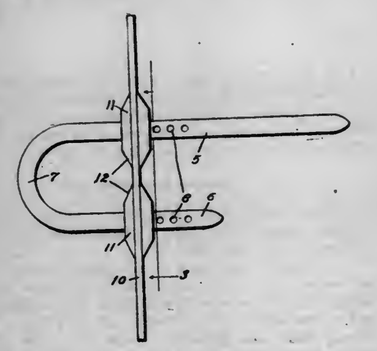
1. In an implement of the class described, a combined frame and casing having bearings arranged in spaced relation, a guide collar having an irregular bore of other form than round and mounted for rotation in one of said bearings, an internally threaded collar mounted for rotation in the other of said bearings, a stock member adapted to support a chuck device at one end and with a portion threaded to engage the threaded collar and another portion conforming to and slidable through the bore of the other collar, means supported by said casing for rotating said stock, means for locking said threaded bearing to the stock, and means for locking said threaded bearing to the casing.

1,453,879. AMPLIFIER. EDWARD A. LEFEBRE, Astoria, N. Y. Filed May 19, 1922. Serial No. 562,174. 8 Claims. (Cl. 181—27.)



1. A sound amplifier embodying a sound board having grooved means, said means formed so that the groove thereof when associated with an acoustical instrument will define therewith a sound propagation duct opening directly to the sounding board.

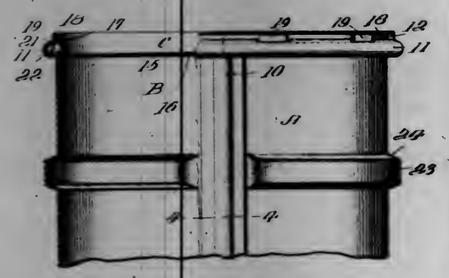
1,453,880. PISTOL HOLSTER. OTTO F. LUDWIG, Zillah, Wash. Filed Apr. 13, 1922. Serial No. 552,140. 6 Claims. (Cl. 224—2.)



1. A pistol holster comprising a casing adapted to be carried upon the forearm and to receive a pistol therein, means for projecting the pistol from the casing into the hand, and yieldable means for normally holding said last named means from operation, substantially as described.

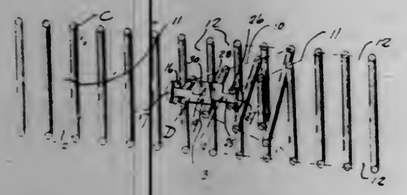
1,453,881. WINDOW-OPERATING DEVICE. SAMUEL T. MCCLARREN, St. Petersburg, Fla. Filed July 9, 1921. Serial No. 483,523. 3 Claims. (Cl. 268—15.)

1. A sash operating device having an operating arm or lever pivotally connected with the sash, a stationary guide on the casing through which the said arm or lever slides and means for locking the arm or lever in its adjusted positions, said means consisting of a cam disposed in contacting relation with a portion of the guide, the pivotal connection between the operating arm and the sash consisting of a stud on the latter and an obliquely disposed slot in the former, said end of the arm being yieldingly held with the stud in one end of the slot.



1,453,882. AUTO LOCK. JAMES N. MCHUGH, Lexington, Ill. Filed Apr. 5, 1921. Serial No. 458,709. 1 Claim. (Cl. 70—90.)

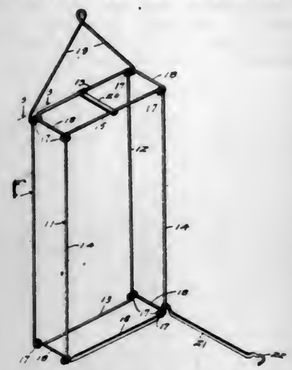
A lock for wheels including a body portion, said body portion comprising a length of metal bent intermediate



its ends to provide a relatively long arm and a short arm, the arms being provided with spaced openings, a movable arm having enlargements formed thereon, said enlargements being provided with openings to accommodate the first mentioned arms, said enlargements having tapered extremities, said movable arm having lateral extensions extending an appreciable distance beyond the side edges of the first mentioned arms, said lateral extensions forming hand-holds.

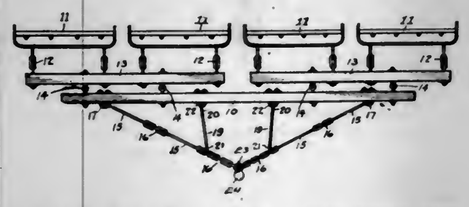
1,453,883. BARREL OR KEG. GEORGE EUGENE MITTINGER, Youngstown, Ohio. Filed Mar. 29, 1922. Serial No. 547,682. 3 Claims. (Cl. 220—55.)

1. A barrel or keg or the like, comprising a body portion having an outwardly extending flare adjacent its ends, a head having extending tongues, the tongues of the barrel heads inserted within openings provided in the upper face of the body flare portions, and the extending tongues adapted to be rolled backwardly upon themselves within the body flare portions for locking the heads in place to close the ends of the body.



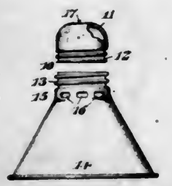
1,453,884. TIRE FILLER. VAN O. MOUTRAY, Muskogee, Okla. Filed June 3, 1921. Serial No. 474,615. 8 Claims. (Cl. 152—8.)

4. A tire filler of spiral spring formation having one end thereof receding in tapered formation, and the opposite end thereof outwardly projecting in tapered formation said projecting end adapted to be seated in said receding end for providing a filler of uniform diameter.



1,453,885. NECKTIE HOLDER. ANNA J. NELSON, Nome, Alaska. Filed Dec. 1, 1921. Serial No. 519,235. 3 Claims. (Cl. 223—19.)

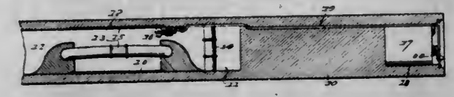
1. A holder comprising a rear frame having side bars and upper and lower bars, a forward frame adapted to swing relatively thereto and from a collapsed position and having side bars and upper and lower bars, said bars having their end portions formed into eyes, connecting bars extending between the forward and rear frames and having their end portions formed into eyes registering with the eyes of the forward and rear frames, fasteners extending through the registered eyes to pivotally connect the connecting bars with the forward and rear frames whereby the forward frame may have vertical swinging



movement, means for limiting the downward swinging movement of the forward frame and means for clamping ties in engagement with the forward frame.

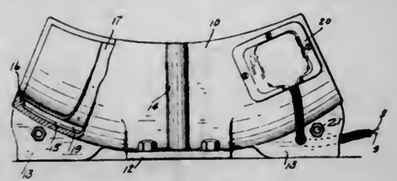
1,453,886. DRAFT EQUALIZER. ROY L. NOBLE, Sac City, Iowa. Filed Mar. 30, 1922. Serial No. 548,124. 1 Claim. (Cl. 55—84.)

A draft equalizer comprising a main evener beam, shorter evener beams coupled to the main evener beam at opposite sides of the center thereof and adapted to be hitched to the implements to be drawn, a draft appliance coupled at its ends near the ends of the main evener beam, and stay members each coupled at one end to the draft appliance at one side of the center thereof and at their other ends to the main evener beam intermediate the ends of the same.



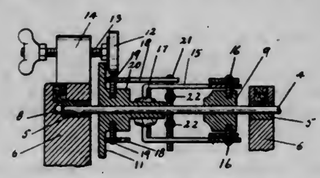
1,453,887. ELECTRIC-LAMP FIXTURE OR SUPPORT. NORMAN W. NUTT, Trenton, N. J. Filed Mar. 1, 1922. Serial No. 540,256. 1 Claim. (Cl. 240—115.)

An electric lamp husk comprising a hollow upper section cylindrical throughout and having a top portion formed with a central opening, the lower terminal portion of said section being threaded internally and externally and with the threads thereof terminating at the lower edge of said section, a lower section including a cylindrical upper portion and a flaring lower portion, said



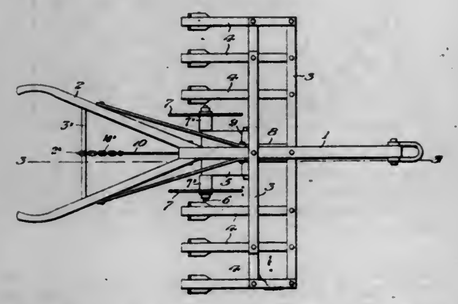
upper portion having its upper part threaded internally and externally for engagement with the threads of the upper section and further for engagement with the threads of a lamp socket and said upper portion having the lower part thereof formed with a series of openings spaced from said flaring portion of said lower section.

1,453,888. SPIRIT LEVEL. WILLIAM EARL WINNER and CHARLES C. PATTERSON, Lowell, Mass. Filed Feb. 16, 1921. Serial No. 445,380. 1 Claim. (Cl. 240—8.4.)



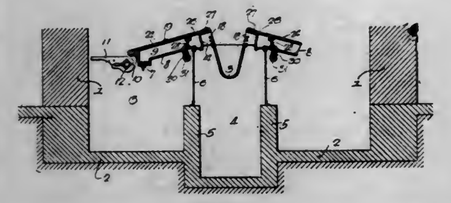
A leveling instrument having a stock or bar having a longitudinal slot forming a bubble glass chamber, transparent panels disposed on opposite sides of the stock and enclosing said chamber, a bubble glass disposed in said chamber and in longitudinal alignment with the stock, mirrors disposed in the chamber above and below the plane of the bubble glass and facing the same so that when the stock is either above or below the horizontal plane of the eye the reflection of the bubble glass will be apparent in one or the other of said mirrors, and a lighting unit disposed in the chamber in overlapping relation to one of the mirrors and adjacent one end of the bubble glass.

1,453,889. TIRE VULCANIZER. EVEN J. ROHNE, Minneapolis, Minn. Filed Jan. 8, 1921. Serial No. 435,921. 11 Claims. (Cl. 219—19.)



1. A vulcanizing apparatus comprising a plurality of heating circuits permanently connected to the current supplying members and adapted to supply a suitable degree of heat but not capable of overheating the vulcanizer, and a plurality of additional controlled circuits each separately and automatically controlled for supplying additional heat to the vulcanizer and to be cut out when the temperature rises beyond a determined point.

1,453,890. SPEED-REGULATING DEVICE. CYRUS C. SHIGLEY, Grand Rapids, Mich., assignor to Electric Phonograph Company, Kalamazoo, Mich. Filed May 14, 1920. Serial No. 381,356. 5 Claims. (Cl. 188—187.)

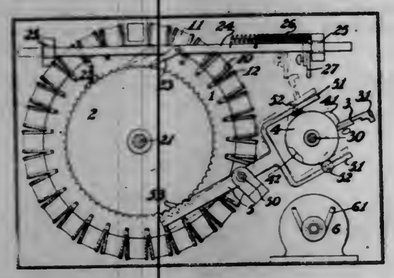


3. In a structure of the class described, the combination of a driven governor spindle, a friction disk slidably mounted on said spindle, a collar fixed to said spindle, a pair of U-shaped governor arms having governor weights on their cross portions disposed with their arms embracing said collar and pivotally mounted thereon, a link connecting each of said governor arms to said friction disk, said links being disposed oppositely, screws extending across said governor arms and constituting attaching pivots for said links, a pair of coiled springs disposed on the opposite sides of the spindle with their ends engaged with said screws, and a friction member mounted for adjustment to coact with said friction disk.

1,453,891. CULTIVATOR FENDER. JOSEPH W. SIVLEY, Trinity, Ala. Filed May 11, 1920. Serial No. 380,573. 1 Claim. (Cl. 97—188.)

In a cultivator, the combination of a beam, handles fixed thereto, transverse bars fixed to and extending laterally at opposite sides of the beam, a metallic bar fixed to the undersides of the said transverse bars and arranged in the same vertical plane as the beam, cultivator teeth carried by the said transverse bars and arranged at opposite sides of a space extending at opposite sides of the vertical plane of the beam, a vertically-swinging plate-like hanger hingedly connected at its forward end to the said metallic bar and having portions arranged at opposite sides of the rear end of said bar and also having a barrel at its lower end, a shaft in said barrel, rolling toothed disks on said shaft and maintained in spaced relation to the edges of the hanger, means carried by the handles, and means connected to the hanger and constructed and arranged to be adjustably connected to the said means on the handles.

1,453,892. UNDERFEED STOKER. PETER E. SMITH, Philadelphia, Pa. Filed Feb. 21, 1922. Serial No. 538,244. 14 Claims. (Cl. 110—47.)

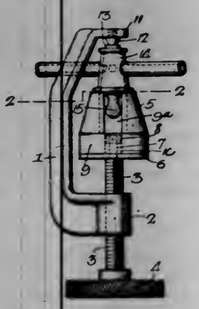


1. The combination in a stoker of a retort; a series of stationary air boxes extending at right angles to said retort; tuyère plates longitudinally slidable on the air boxes respectively; means for supplying air under pressure to the air boxes; and means for reciprocating the tuyère plates.

1,453,893. LANTERN-SLIDE PROJECTING APPARATUS. RICHARD C. SMITH, Seattle, Wash. Filed Apr. 20, 1921. Serial No. 462,874. 7 Claims. (Cl. 88—27.)

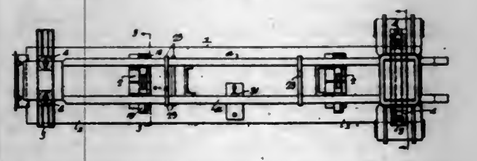
1. In a lantern slide projecting apparatus, in combination with a slide-carrying member, intermittent feed

mechanism therefor, operable to advance the slide-carrying member and to maintain it advanced momentarily after an advance, cams movable in conjunction with said feed mechanism, and a locking member engageable with



said slide-carrying member while it is held in advanced position and controlled by said cams to secure the slide-carrying member in fixed position during the inaction of the feed mechanism and to release it to permit its advance.

1,453,894. ROLLER-SKATE ROLL. ARTHUR L. STAPLES, New Haven, Conn., assignor to Winchester Repeating Arms Company, New Haven, Conn., a Corporation of Connecticut. Filed May 6, 1921. Serial No. 467,234. 7 Claims. (Cl. 46—52.)



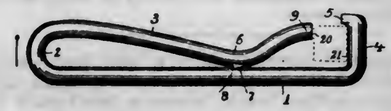
1. A skate roll comprising two side plates having inwardly bent rim portions abutting in edge-to-edge contact only, intermediate annular web portions disposed in closely adjacent parallel relation, and outwardly bent hub portions, said hub portions having inner concave faces to provide ball races, said rim, web and hub portions being integral in each side plate, and means for rigidly securing together said side plates at the parallel web portions thereof.

1,453,895. STOPCOCK REMOVER. CLEMENT K. SWIFT, Highland Park, Pa., assignor of one-half to Milton I. Hartman and Andrew Hartman, both of Philadelphia, Pa., trading as H. S. Laboratory. Filed Dec. 22, 1921. Serial No. 524,173. 3 Claims. (Cl. 29—86.1.)

1. In a device of the character described, the combination with two relatively movable elements, of a head secured to one of the elements and adapted to engage the body of a stop cock and to receive and retain the plug of the cock when the latter leaves the body, a member on the other element adapted to engage the base of said plug, and means for effecting a relative movement of the elements to create an axial pressure upon the plug tending to force it from the body.

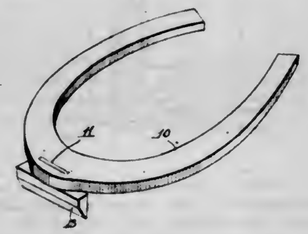
1,453,896. JIG FOR ASSEMBLING LOCOMOTIVE FRAMES. JOHN P. SYKES, Wallingford, and HARMON E. STOVER, Philadelphia, Pa., assignors to The Baldwin Locomotive Works, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Apr. 6, 1922. Serial No. 550,015. 7 Claims. (Cl. 29—89.)

1. The combination in a jig for assembling locomotive and other frames, of saddles, each saddle having a standard; and a bracket projecting at each end of the standard and shaped to extend into an axle box space of the frames and of such a width that, when the cap plates, which close the bottoms of these spaces, are removed, the frames with the assembled parts thereon, can be raised clear of the saddles.



1,453,897. POCKETKNIFE. FRANZ VINCENT, Bridgeport, Conn. Filed July 2, 1921. Serial No. 482,060. 9 Claims. (Cl. 30—10.)

2. In a device of the class described, a tubular handle, an instrument guided to slide within said handle to exposed or retract the same, a spring blade in the handle secured thereto and extending longitudinally thereof and provided with longitudinally spaced stop shoulders adapted to cooperate with the instrument to detain it in either extended or retracted position, and means including a cam element operable exteriorly of the handle to control the operation of said spring.



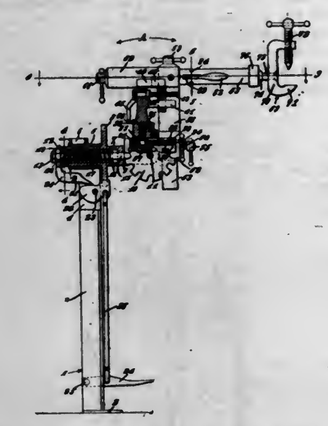
1,453,898. WRENCH. FREDERICK E. WALDEN, Worcester, Mass., assignor, by mesne assignments, to Walden-Stax Manufacturing Co., Stoneham, Mass., a Corporation of Massachusetts. Filed Dec. 18, 1920, Serial No. 431,735. Renewed Nov. 11, 1922. Serial No. 600,475. 4 Claims. (Cl. 81—119.)

1. A wrench comprising two resiliently united but substantially parallel members, one having an elbow at its outer extremity, and the other presenting its end to the outer part of said elbow but spaced therefrom, means

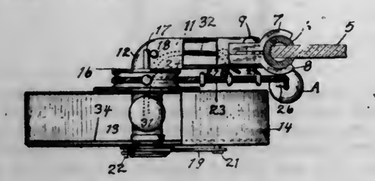
being provided for preventing said elbow from being bent away from the end surface of the other member.

1,453,899. METHOD OF SECURING CALKS TO HORSESHOES. DOUGLAS YENSEN, Roseberry, Idaho. Filed Feb. 26, 1920. Serial No. 361,538. 1 Claim. (Cl. 59—61.)

The method of securing a toe calk to a horseshoe which consists in forming the shoe with an elongated wedge-shaped slot and flaring the mouth of the slot at the narrow end to provide a bead pocket, forming the calk with a wedge-shaped tenon to fit through the slot, heating the shoe and calk simultaneously, and welding the tenon in place by beading it on the end to provide a head filling the flared mouth or pocket of the slot and locking the calk to the shoe.



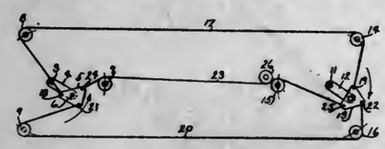
1,453,900. RULER ATTACHMENT. JOHN J. AHEARN, Palmer, N. Y. Filed Apr. 27, 1921. Serial No. 464,829. 1 Claim. (Cl. 120—1.)



A ruler attachment comprising a ruler body having a portion at one end cut away to provide a tongue, a blade having its side edges and one end sharpened and its other end enlarged and offset and secured to the top face of the body with the portion of the blade having the cutting edges disposed within the cut out portion of the body, said blade lying within the sides of the body and transversely tilted to permit the tongue to engage an envelope while being cut by said blade.

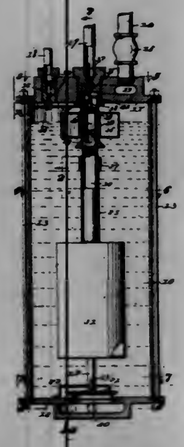
1,453,901. WORK SUPPORT. CHRISTIAN S. ANDREASEN, Dwight, Ill. Filed Apr. 20, 1922. Serial No. 555,750. 11 Claims. (Cl. 78—101.)

11. In a device of the class described, a pair of arms; means for connecting the arms adjustable; a first slide; means for mounting the first slide for adjustment transversely of one arm; means for holding the slide in adjusted positions; a second slide adjustable on the first slide transversely thereof; a workholder; a ball and socket connection between the work holder and the second slide; a work holder on the other arm and cooperating with the first specified work holder; and a support carried by one arm.



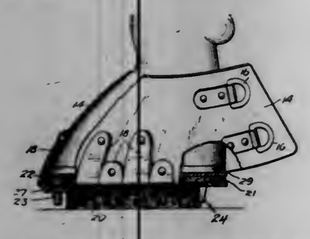
1,453,902. DIRECTION INDICATOR. HOMER L. ARNOLD, Arcata, Calif. Filed Oct. 2, 1922. Serial No. 591,909. 1 Claim. (Cl. 116—47.)

In a device of the character described, the combination with a support, a tubular member extending outwardly from said support and having a hub portion thereof formed at right angles thereto, a drum rotatably mounted on said hub, a window formed in said drum, a pulley secured to said drum, a cable having one end secured to said pulley and extending thereabout, said cable extending to a point remote from said drum, rings secured to said cable for the purpose of retaining said cable in adjusted position, a spring coiled about said hub and having its opposite end abutting a pin mounted on said drum, a segmental member mounted upon said hub and within said drum, said segmental member being formed of wire gauze, characters formed on said segmental member, and means for illuminating the interior of said drum.



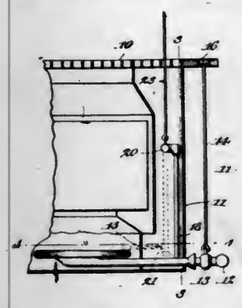
1,453,903. POWER-TRANSMITTING MECHANISM. GEORGE M. ASK, Corning, Calif. Filed July 24, 1922. Serial No. 577,126. 2 Claims. (Cl. 74—14.)

1. A mechanism of the character indicated, comprising a plate mounted to revolve upon its own center and to revolve as a whole about a given center, supports lying



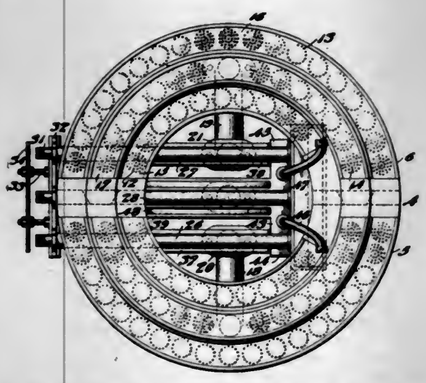
in a circle concentric with said given center, cables engaging said supports and attached at equally spaced points to said plate, a second plate operatively mounted to revolve on its own center and to revolve as a whole about a given center, supports lying in a circle concentric with said last named given center, the said cables engaging said last named supports and attached at equally spaced points to said last named plate.

1,453,904. PNEUMATIC PUMP. ERASMUS W. BECK, Griffin, Ga. Filed Apr. 24, 1920. Serial No. 376,248. 4 Claims. (Cl. 103—248.)



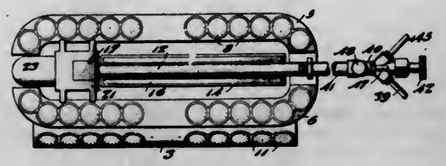
1. A pneumatic pump having a submerged reservoir provided near its bottom with an inlet and outlet for liquid, the former being controlled by an inwardly opening valve, pressure inlet and relief valves controlling pressure inlet and exhaust ports in communication with the reservoir near its top, said inlet and relief valves being respectively mounted for inward seating and unseating movements, a trip mechanism arranged in operative relation with the inlet valve, an operating member mounted for reciprocatory movement and having an element of said trip mechanism arranged in the path of upward movement thereof, a cushioned connection between said operating member and the relief valve, a buoyant member for said operating member, a retainer for securing the operating member in its depressed position, and a float movable into and out of the plane of the retainer for alternately locking and releasing the same.

1,453,905. OVERSHOE FOR HORSES. MABEL BLACKMAN, New York, N. Y., assignor to Arthur S. Joseph, New York, N. Y. Filed May 5, 1921. Serial No. 466,964. 2 Claims. (Cl. 168—1.)



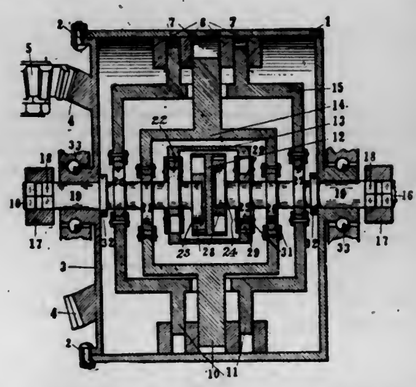
1. An overshoe for horses comprising a boot having a flexible top and rigid bottom; a wearing plate shaped in correspondence with the bottom of said boot; means for removably attaching said plate to said boot for service in connection therewith; and a flexible pad mounted on said plate for engaging the road-bed on which the said overshoe is worn.

1,453,906. LIGHTING DEVICE FOR GAS. ROBERT BOONE, Asbury Park, N. J., assignor, by mesne assignments, to Boone Heater Corporation, New York, N. Y., a Corporation of New York. Filed Sept. 13, 1921. Serial No. 500,376. 3 Claims. (Cl. 158—115.)



3. In a device of the class described, the combination with the burner of a floor heater, a frame provided with an aperture and arranged over said burner, a manifold, a vertical pipe connected with said manifold, a pilot light pivoted to said vertical pipe, and means extending above the floor for moving said pilot light into register with said aperture.

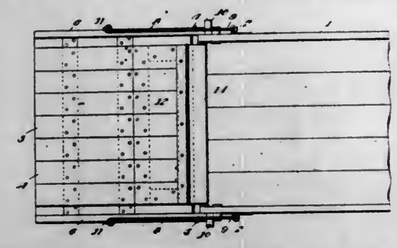
1,453,907. OIL BURNER FOR FURNACES. WILLIAM H. BOZARTH, Vineland, N. J. Filed Sept. 4, 1920. Serial No. 408,159. 3 Claims. (Cl. 158—61.)



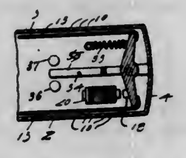
3. An oil burner for furnaces including with a gas consuming burner to be fitted in the fire pot of the furnace, supporting legs by which said burner is maintained at an elevation above the furnace grate, an air box supported beneath the burner at one side, horizontally disposed generator tubes to be connected with an oil supply having their inner ends extended into the air box and provided with gas discharge openings, gas supply pipes receiving gas from the discharge openings of the generator tubes and extended to conduct the gas to the burner, a subgenerator tube, a subgenerator burner located beneath the subgenerator tube provided with an extension head adjacent the air box, pilot burners on said extension head beneath the generator tubes, pipes from said extension head provided with pilot tips adjacent the burner openings of the main burner, and a gas conveying pipe conducting gas formed in said subgenerator tube to the subgenerator burner and the extension head thereof.

1,453,908. OIL BURNER FOR STOVES. WILLIAM H. BOZARTH, Vineland, N. J. Filed July 26, 1921. Serial No. 487,714. 9 Claims. (Cl. 158—61.)

9. An oil burner including with gas consuming burners, a gas generator, a generator burner, a manifold to which the gas is discharged from the generator connected to supply gas to the main and generator burners, a steam generating coil within the casing of the generator burner, a valve casing connected with the generator and having oil and steam passages opening thereinto through the valve seat, a connection from the steam generating coil to the steam passage, an oil supply connection to the oil passage, and a needle valve to close against the seat within the casing and to give equal control at the oil and steam passages.



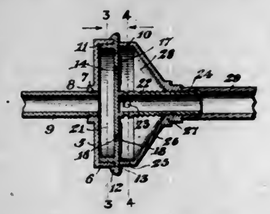
1,453,909. DIFFERENTIAL FOR MOTOR VEHICLES. HENRY E. BRIAIS, New York, N. Y. Filed Apr. 6, 1922. Serial No. 550,083. 8 Claims. (Cl. 74—7.)



1. A differential mechanism comprising driving mechanism, a plurality of shafts to be driven, cams on said shaft, and a plurality of nested blocks between said shafts and driving mechanism, said blocks being operable by said cams as and for the purpose set forth.

1,453,910. WAGON ATTACHMENT. ALBERT E. BRIGHT, Idagrove, Iowa, assignor of one-half to William Auchstetter, Idagrove, Iowa. Filed Aug. 10, 1922. Serial No. 580,936. 1 Claim. (Cl. 296—59.)

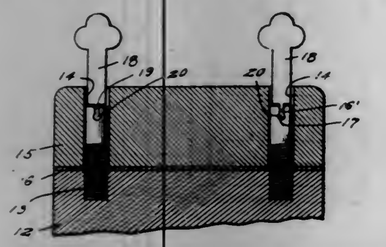
In combination with a wagon box, an end gate consisting of bottom and side parts, a hinged door in the bottom, latch means for the same, a hinged flap at the bottom of the door for engaging the end edge of the bottom of the box, links pivoted to the sides of the gate, swiveled eyelets on the sides of the wagon box for receiving said links, said links having their outer ends of hook-shape, latches on the sides of the gate for receiving parts of the links to hold the gate in closed position, projections at the sides of the box and notches in the sides of the gate for engaging the projections for swingingly supporting the gate upon the box.



1,453,911. AUTOMOBILE SIGNAL. NORTON BROWNE, Chelan, Wash. Filed Mar. 26, 1920. Serial No. 368,974. 4 Claims. (Cl. 177—337.)

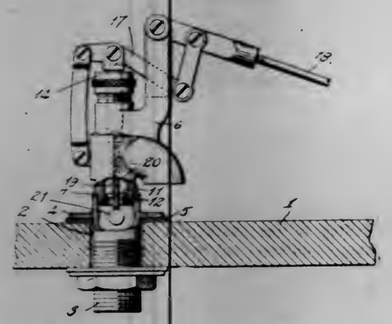
3. An automobile signal comprising a casing having slotted front and rear walls, supporting members pivoted in said casing, screens secured to the supporting members, groups of characters applied to the screens, said casing having its front and rear walls of a color corresponding to the characters, illuminating means in said casing of different colors and means for illuminating the illuminating means and for imparting movement to the supporting members.

1,453,912. FUEL MIXER. MCKIM C. BUCKLEY and HARRY KENDRICK, Franklin, Pa. Filed Sept. 7, 1922. Serial No. 586,718. 6 Claims. (Cl. 251—119.)



1. An air intake device for the purpose set forth comprising means to provide a pair of air chambers communicating with each other and having the points of communication normally closed, and a pair of suction operated elements for controlling communication between said chambers, one of said elements operated from each end thereof and the other of said elements operated from one end thereof.

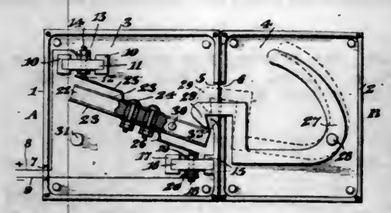
1,453,913. CYLINDER-HEAD GUIDE STUD AND REMOVING KEY. ARTHUR G. BURDICK, New London, Conn. Filed Mar. 15, 1921. Serial No. 452,438. 2 Claims. (Cl. 29—84.)



1. In combination with a head adapted to be secured in place by a detachable fastening which occupies holes in

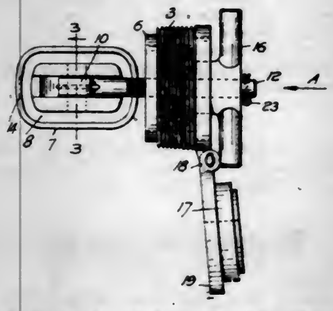
the head and in the element which the head engages, a positioning stud disposable in said holes in the assembling of the head, and means separably engageable with the

stud to lift the same from the holes after positioning of the head, and said stud being of less length than the depth of the hole of the head.



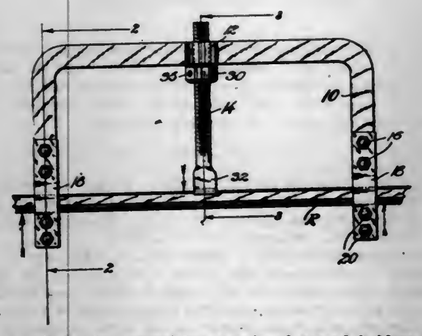
1,453,914. FLUSH-TANK VALVE. JOHN H. CABLE, Montclair, N. J. Filed July 8, 1919. Serial No. 309,269. 1 Claim. (Cl. 137—104.)

A flush tank valve comprising a body having a bore therein, a chamber communicating with said bore, an inlet and an outlet communicating with said chamber, a removable valve seat arranged at the inlet end of said chamber, a valve stem slidable in said bore, said valve stem having a reduced extension projecting through the chamber and below the valve seat, a removable globular member secured to the lower end of said reduced extension for cooperation with said valve seat, a plurality of vertical grooves arranged in the reduced extension, said grooves extending below the valve seat when the globular member is in a fully open position, a coupling having a watertight connection with the body, and means responsive to the rise and fall of water comprising a lever which is pivotally connected to said stem and has pivotal connection with a pair of links one of which is pivoted to said body and the other of which is a floating link, and a pivoted float lever having connection with said floating links.



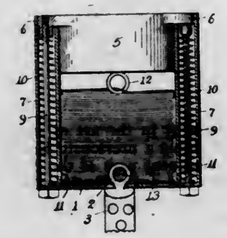
1,453,915. ELEVATOR-DOOR LOCK. CHARLES W. CARR, ROBERT J. DIXON, and PETER W. CONOVER, Ogden, Utah. Filed Mar. 2, 1922. Serial No. 540,425. 3 Claims. (Cl. 187—31.)

2. An elevator door lock comprising two coacting castings, with one casing on the door and the other casing carried by and movable with the elevator, a pivoted, overbalanced catch carried by the first named casing and movable into the second named casing, and a rockable contact arm carried by the second named casing and having spaced contact terminals in the path of the opposite ends of the rockable contact arm, and bridged by said contact arm when rocked by engagement therewith of the overbalanced catch, each of the spaced contacts being fixedly mounted in the casing appertaining thereto and



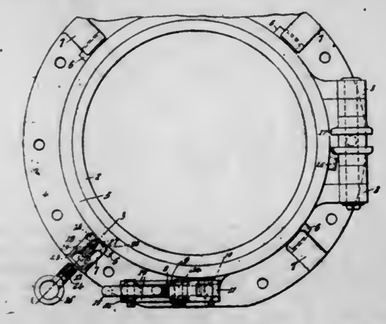
the rockable contact arm having joined contact fingers at opposite ends movable into engagement with the spaced contacts to bridge them.

1,453,916. WASHOUT PLUG FOR BOILERS. JACOB CASHMER, Denver, Colo., assignor, by mesne assignments, to Universal Safety Washout Plug Company, a Corporation of Colorado. Filed Mar. 9, 1921. Serial No. 450,957. 12 Claims. (Cl. 137—76.)



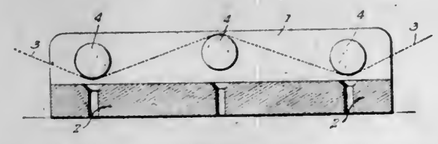
1. A device of the character described comprising a hollow body member adapted to be secured in an opening of a boiler wall, a cover member movable through said body member and adapted to close the same by engagement with an end thereof, a retaining screw pivoted on the cover member, and a nut on the screw acting upon the opposite end of the body-member to hold the cover member in its closing position.

1,453,917. RAIL-BENDING DEVICE. PAUL E. CHAMBERS, Walsen, Colo. Filed July 18, 1921. Serial No. 485,607. 1 Claim. (Cl. 153—38.)



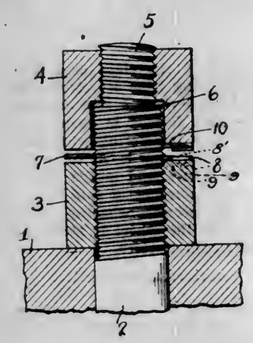
A rail bender comprising a pair of spaced holders to prevent movement of a rail in one direction and a movable member connected with said holders and adapted to move an intermediate portion of the rail in the opposite direction, each holder comprising a pair of spaced jaws forming a closed loop, said jaws being secured together at their outer ends and being shouldered to receive the ball of the rail and spread to receive the base of the rail with said base directed toward said member for engagement thereby.

1,453,918. MEANS FOR SALVAGING VESSELS. EWEN A. CLARK, Revere, Mass., assignor of one-half to Alfred J. Berg, Kittery, Me. Filed May 3, 1922. Serial No. 558,071. 3 Claims. (Cl. 114—50.)



2. The combination of a receptacle designed to be attached to a vessel and having two diametrically opposite chambers, a float fitted to the upper part of the receptacle and having ears located in the upper ends of said chambers, releasable means for holding said ears in place, a spring located in each chamber acting against said ears for throwing the float outward when the ears are released, and a cord attached to said float and receptacle and packed in the latter.

1,453,919. LOCKING DEVICE FOR COVERS OF PORT-HOLES OF SHIP'S OR OTHER OPENINGS. JOHN H. CLARKE, London, England. Filed Dec. 6, 1921. Serial No. 520,429. 1 Claim. (Cl. 114—178.)

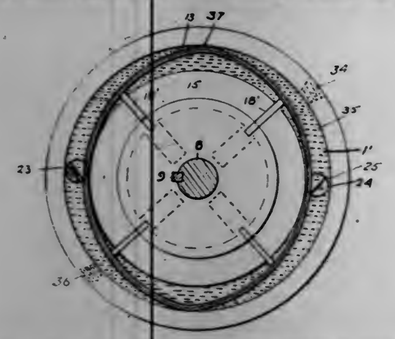


Means for closing and opening openings in the sides of ships, the said means comprising in combination a fixed base ring, a locking ring rotatably mounted in said carrier ring, dogs spaced round said base ring, wedge shaped lugs on said locking ring, a socket hinged to a lug of said locking ring, a lever screw-threaded in said socket, a link connected by a triaxial joint to said carrier and by a biaxial joint to said lever, one of said dogs having a bore, a bolt slidable in said bore and having a bevel and a straight shoulder on its free end, the wedge-shaped lug with which said bored dog is associated having a notch and a straight shoulder and provided on its leading edge with a bevel to engage, when in the closing position, with the bevel on the end of said bolt, and the straight shoulder on the notch engaging in the closed position with the straight shoulder on the end of the bolt, and a spring in said bore adapted to force said bolt into engagement with said notch and lock said locking ring against rotation in one direction.

1,453,920. FILM-WAXING MACHINE. MAURICE E. CLARK, Grenada, Miss. Filed Nov. 22, 1921. Serial No. 517,068. 2 Claims. (Cl. 91—10.)

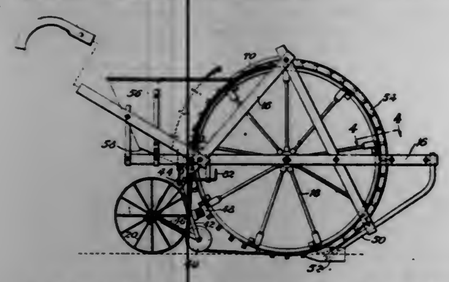
2. In a waxing means for motion picture film ribbons, a guide comprising parallel side members, which are spaced from each other only a slightly greater distance than the width of the film to be drawn therebetween, said sides having opposed round openings arranged adjacent to its ends and at its center, the central openings being arranged slightly above the end openings, rounded paraffin sticks inserted through the openings from the outer sides of the guide and projected through the openings a distance to engage with the marginal edges of the film ribbon, and the said film ribbon being threaded between the projecting edges of the paraffin sticks whereby the upper marginal edges of the films will be in contact with the end sticks and the lower marginal edges of the said films will be in contact with the center sticks.

1,453,921. NUT LOCK. CHARLES W. CLINE, Augusta, Kans. Filed Sept. 23, 1921. Serial No. 502,743. 1 Claim. (Cl. 151—17.)



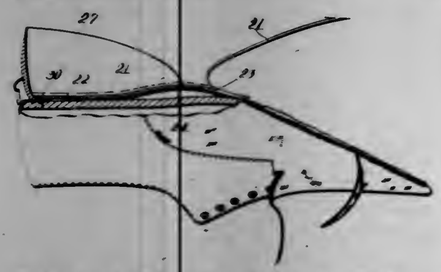
A lock nut of the class described comprising a bolt having a reduced end having left hand screw threads thereon, a main nut engaging the bolt and having a notch in its outer end, a nib in said notch, a second nut having left hand screw threads for engaging the reduced end and teeth on its inner face and a split spring washer having a bent end engaging the notch with a notch therein to engage the nib, the other end of the washer engaging one of the teeth.

1,453,922. COUPLING DEVICE. LE ROY P. CLUTTER, Uniontown, Pa. Filed Feb. 5, 1921. Serial No. 442,613. 3 Claims. (Cl. 192—58.)



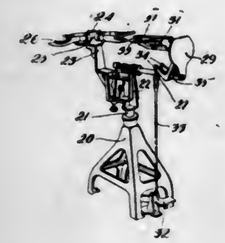
3. A coupling device comprising a driving element, a driven element, a body of fluid interposed between said elements, a laminated resilient annulus interposed between said elements in said fluid, and a pair of simulta-

neously operable cams for shifting the annulus to impact at two points against the driven element causing thereby



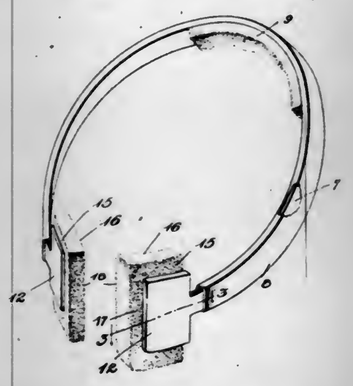
a compacting of the fluid whereby the driven element is operated from the driving element.

1,453,923. BULB PLANTER. TEUNIS DE YOUNG, Jr., South Holland, Ill. Filed Mar. 6, 1922. Serial No. 541,537. 4 Claims. (Cl. 221—125.)



1. In mechanism of the class described, a rotatable wheel having projecting from its circumference suitably spaced bulb carrying devices, a rope enclosing said wheel and entering recesses formed in each of said bulb carrying devices without interfering with bulbs carried by said devices while the rope is in contact with the circumference of the wheel, and means carrying said rope away from the circumference of said main wheel during a certain arc of its rotation, whereby as the rope leaves the circumference of the wheel it strips bulbs and dirt from the sucessive bulb carriers.

1,453,924. TURN SHOE. MILTON L. DODGE, Newburyport, Mass. Filed Sept. 25, 1920. Serial No. 412,780. 9 Claims. (Cl. 36—76.)

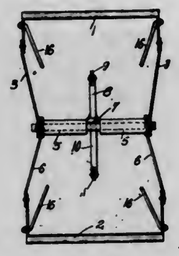


3. As a new article of manufacture, a combined counter stiffener and shank piece, said shank piece having its heel portion split parallel to its face.

1,453,925. MANUFACTURE OF TURN SHOES AND APPARATUS FOR USE THEREIN. MILTON L. DODGE, Newburyport, Mass. Filed Dec. 11, 1920. Serial No. 429,854. 11 Claims. (Cl. 12—57.)

1. That improvement in the art of making turn shoes which comprises holding a previously molded form, adapted to become a permanent part of the finished shoe, in a stationary position and unattached to the shoe, and then turning the partially completed shoe over and about such form to inclose it.

1,453,926. DEVICE FOR REMOVING FACIAL WRINKLES. HONOR L. EAGER, Brooklyn, N. Y. Filed Feb. 6, 1922. Serial No. 534,351. 2 Claims. (Cl. 128—76.)

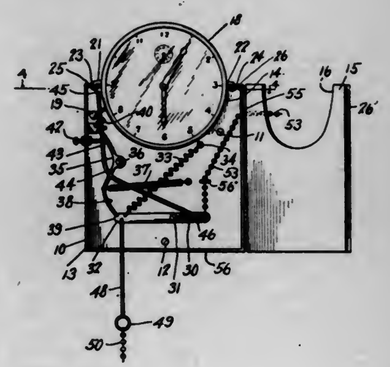


1. In a device for removing facial wrinkles, in combination, a resilient band, an envelope for said band terminating short of the ends thereof, face engaging pads, a pad pressing member coacting with each pad, the edges of said members spaced from the ends and one side edge of each pad, the ends of the band engaging the central portions of said members whereby to equalize the pressure over the whole surface of each pad, an envelope for said members surrounding the ends of said band and overlapped by said band envelope whereby to adjust the effective length of said device.

1,453,927. GRAB BUCKET. WARREN J. EATON, Midland, Pa. Filed May 2, 1921. Serial No. 466,063. 2 Claims. (Cl. 37—185.)

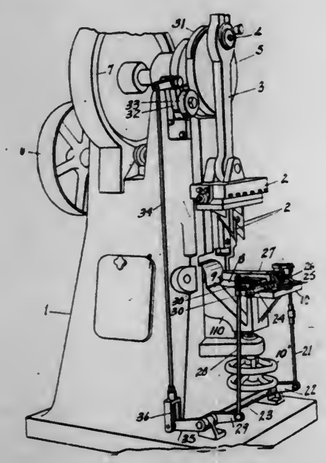
1. In a device of the character described comprising companion spade members, a pivot secured to one of said spade members, sleeves surrounding the pivot and being secured to the other spade member, a bridge element connecting the confronting ends of the sleeves, an

operating arm carried by the bridge element, an operating arm carried by the pivot and adapted to swing in



the same plane with the first mentioned arm, and means associated with the arms to operate the spade members in unison.

1,453,928. ALUMINUM-SILICON ALLOY AND METHOD OF MAKING IT. JUNIUS D. EDWARDS, Oakmont, Pa., assignor to Aluminum Company of America, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Mar. 18, 1922. Serial No. 544,950. 14 Claims. (Cl. 75—1.)

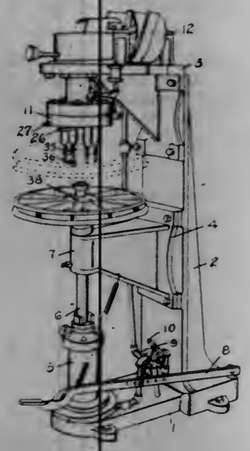


1. In the art of making articles of an aluminum alloy containing a substantial amount of silicon, the improvement comprising incorporating in a finely divided state in the molten alloy a metalloid of the fifth group of the periodic system of the elements, having an atomic weight greater than 100, and thereby favorably affecting the strength and ductility of the resulting alloy.

1,453,929. TIME-CONTROLLED DRAFT REGULATOR. MARK B. FERMANIAN, Troy, N. Y. Filed Apr. 10, 1922. Serial No. 551,112. 2 Claims. (Cl. 161—8.)

2. A device of the class described comprising a pivoted actuating arm, a spring for throwing said arm, flexible devices connected with opposite ends of the arms and adapted for connection with the draft elements of a heating apparatus, a trigger for retaining the arm in position with the spring under tension, the trigger being pivoted at the point intermediate of its ends, a spring for retaining the trigger in operative position, the upper end of the trigger including an offset portion, a clock including an alarm mechanism, one element of which is positioned for imparting a blow to the trigger on the offset end thereof upon the operation of the alarm, a stop for limiting the movement of the trigger, and a device operated by the release of the actuating arm for retaining the alarm mechanism inactive and acting to obstruct the path of movement of said element of the alarm mechanism, and prevent impact on the trigger.

1,453,930. BILLET HOLDER FOR SPOKE-MITERING MACHINES. HENRY FLICK, Jackson, Mich., assignor to Hayes Wheel Company, Jackson, Mich. Filed Oct. 4, 1921. Serial No. 505,246. 6 Claims. (Cl. 144—202.)



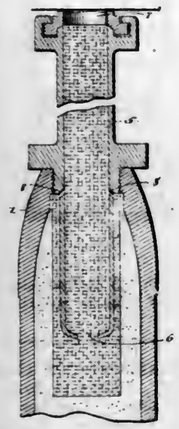
1. In a spoke mitering machine, the combination with a table and reciprocating mitering knives with driving disk, wrist pin and pitman therefor, of a spoke billet support with an upwardly projecting end stop at its inner end, a clamping finger to force the billet endwise against the end stop, a rock shaft carrying said finger with yielding connection means to actuate the same, a stationary jaw at one side of said support, a movable jaw to cooperate therewith, a bent lever with connections for operating said movable jaw timed to act after the operation of said clamping finger, an actuating rock shaft with connecting rods to the said parts, a cam on the driving disk of said knives, and a lever with a cam follower timed to be actuated by the said cam connected to operate to clamp the billet in place in advance of the cut of the knife, coacting as specified.

1,453,931. MULTIPLE DRILL FOR DRILLING WOOD WHEELS FOR HUB FLANGES. HENRY FLICK and CLARENCE M. BUCK, Jackson, Mich., assignors to Hayes Wheel Company, Jackson, Mich. Filed Oct. 4, 1921. Serial No. 505,283. 5 Claims. (Cl. 144—110.)

1. In a multiple drill, the combination of a suitable base with standard, a work support with an engine cylinder for actuating the same, a multiple spindle head with a central gear and bracket for supporting the same, means for driving the said central gear, multiple gears symmetrically disposed on suitable spindles around the said driving gear, drill spindles carried on suitable arms pivoted to the spindles of said multiple gears, intermeshing pinions on the said spindles to drive the drill spindles, a plate with slots embracing the said arms and disposed to actuate the same simultaneously out and in towards the center, means for adjusting the said

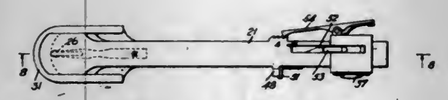
disk, a central plunger part for embracing the hub of a wheel, a plunger disposed symmetrically with the said drill spindles with a head containing a depression to

engage a single bolt inserted in the hub flange, all coacting substantially as described for the purpose specified.



1,453,932. MUFFLER. THOMAS E. GENTHNER and ADELBERT L. STEVENS, Boston, Mass. Filed Sept. 15, 1920. Serial No. 410,466. 6 Claims. (Cl. 137—160.)

1. A muffler of the class described consisting of two members of substantially like structure adapted to be secured together to form a chamber therebetween; a gas inlet and a water inlet in one of said members; a gas outlet and a water outlet in the other of said members; a baffle plate attached to each of said members adapted to partially divide said chamber; and means to rotatably adjust said members whereby said inlets and outlets may be relatively angularly arranged to align with pipes previously installed and adapted to coact therewith.

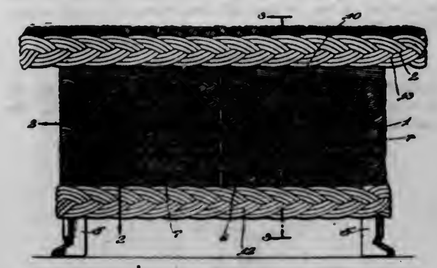


1,453,933. METHOD OF LOADING HIGH-EXPLOSIVE SHELLS. WILLIS A. GIBBONS, New York, N. Y., and ARTHUR GIVEN, Newark, N. J. Filed Nov. 8, 1919. Serial No. 336,611. 3 Claims. (Cl. 86—18.)

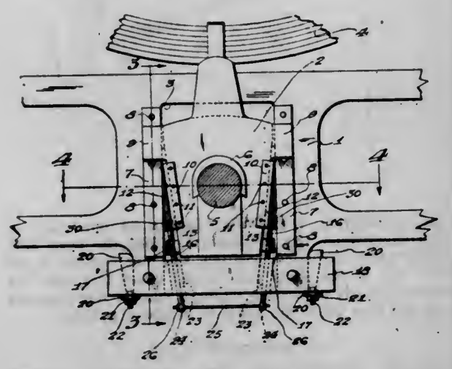
2. The method of loading high explosive shells, using an explosive mixture including a fusible substance, consisting in partly filling the shell with solid material leaving a cavity therein, introducing the fusible material

in a liquefied state to percolate through the solid material and partly fill the cavity and allowing the fusible material to solidify.

1,453,934. SURGICAL INSTRUMENT. DOMENICK LO GIUDICE, Brooklyn, N. Y., assignor to George Tiemann & Company, New York, N. Y., a Corporation of New York. Filed May 3, 1921. Serial No. 466,506. 6 Claims. (Cl. 128—309.)



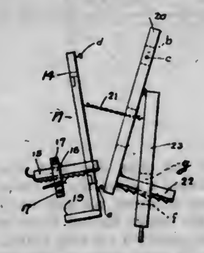
1. A surgical instrument including a base, a crushing blade, a severing blade and means for sliding the blades on the base, said means including a single lever to be manually actuated a plurality of times to operate the blades for a single crushing and severing operation, controlling means for automatically causing the first actuation of the lever to project the crushing blade a predetermined distance and thereupon to further project the crushing blade while projecting both blades, detent means for holding the blades projected as just described while permitting a retraction of said lever, and secondary controlling means formed in part by the first mentioned controlling means for automatically causing a second actuation of said lever to move the severing blade relative to the crushing blade to further project the severing blade.



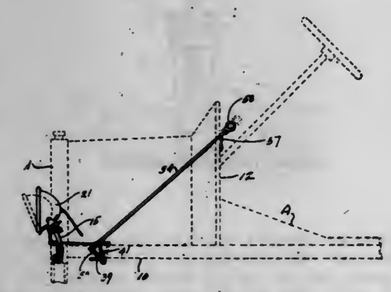
1,453,935. CHEST. DANIEL L. GOODRICH, Chicago, Ill. Filed June 19, 1922. Serial No. 569,282. 3 Claims. (Cl. 217—122.)

1. As a new article of manufacture, an article of furniture comprising a plurality of strips formed of braided

strands of fabric, said strips interlaced in alternate relation with transversely extending reeds, said reeds having certain of their ends bent transversely and into interlocking engagement to provide a spiral appearing edging.

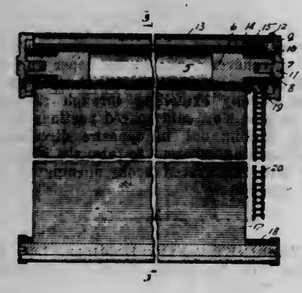


1,453,936. ADJUSTABLE BEARING BOX. JOHN J. GUNN, Chicago, Ill. Filed Oct. 7, 1922. Serial No. 593,076. 5 Claims. (Cl. 105—81.)



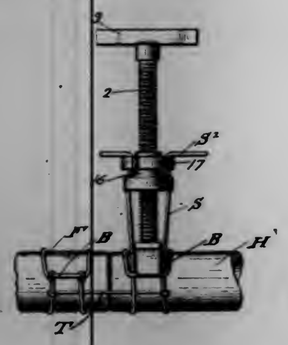
1. In a device as set forth, the combination with a frame, of a bearing box having its edges tapering inwardly as they extend downwardly, adjusting wedges, adjusting bolts carried by said bearing box and connected to said wedges, said wedges engaging the facing surfaces of the bearing box and frame.

1,453,937. MECHANICAL NURSE. REUBEN N. HARRISON, Plains District, Va. Filed Oct. 11, 1921. Serial No. 507,012. 5 Claims. (Cl. 45—82.)



4. In a reading rack of the type described, the combination of a post, a member suspended from the upper end of said post and mounted to swing in vertical plane, means for adjusting said member vertically relative to the post, a book rest having its lower end pivotally mounted on the lower end of said member, and means for adjustably securing said book rack in adjusted positions relative to said member.

1,453,938. ADJUSTABLE HEADLIGHT ARRANGEMENT FOR MOTOR VEHICLES. CORDA A. HART and HENRY E. HART, Danville, Ill. Filed Apr. 27, 1922. Serial No. 556,902. 7 Claims. (Cl. 240—61.)



1. In a head light arrangement for vehicles, the combination of lamps having lugs projecting therefrom, a shaft oscillatively mounted upon said vehicle, members adjustably positioned upon said shaft for detachably receiving the lugs of said lamps, and means for oscillating said shaft to move said lamps in a vertical plane.

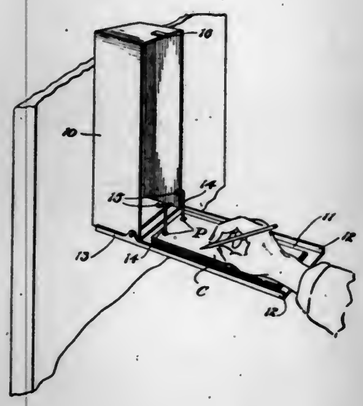
1,453,939. ROLLER SCREEN. FRANK R. KOENIG, Brooklyn, N. Y., assignor to W. H. Jackson Company, New York, N. Y., a Corporation of New York. Filed Feb. 2, 1922. Serial No. 533,697. 1 Claim. (Cl. 156—39.)

A roller screen for fireplaces comprising a hollow roller, cap members fitted on the respective ends of said roller, each cap member having an inwardly-projected lug, a plug mounted in each end of said roller and having a recess receiving the lug of its respective cap, each plug member having a reduced portion on the outer end thereof, and a coil spring carried by each reduced portion and engaging the shoulder at the base thereof at one end and its respective cap at the other end to produce friction sufficient to hold the roller normally against movement, and means for rotating said roller against said friction.

1,453,940. HOSE-CLAMPING TOOL. JOHN R. LOWREY, San Pedro, Calif., assignor of one-half to John A. S. Rogers, San Pedro, Calif. Filed May 16, 1922. Serial No. 561,294. 4 Claims. (Cl. 81—93.)

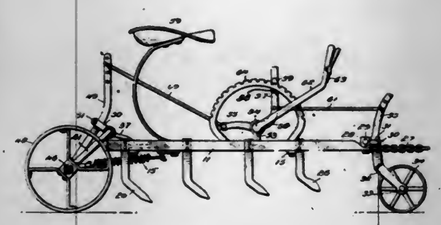
1. A tool for clinching wire hose binders in place on hose ends, said tool consisting of a threaded shank having a presser foot at one end adapted to pivot upon a cross-bar of a bight of the wire binder, and means mounted on the screw shank for holding shanks of the binder while the binder coils are tensioned about the hose, said means consisting of a nut having slots in its sides and a ring fitting over the nut and between which the binder shanks are adapted to be held.

1,453,941. THREAD GUIDE. JESSE F. MADDEN, Brooklyn, N. Y. Filed Nov. 29, 1922. Serial No. 604,038. 2 Claims. (Cl. 242—157.)



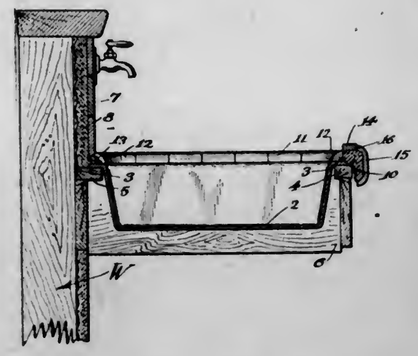
1. In a device of the character described, an elongated body having a transverse slot in its upper end to form said end into two spaced sections, the device also having an elongated opening extending through the same at right angles to said slot, said spaced portions having individual slots leading out in opposite directions from said elongated opening, whereby to form the upper part of said member into two spaced hooks opening at opposite sides of the member.

1,453,942. BASSINET. NEVA I. MILLS, Los Angeles, Calif. Filed Oct. 31, 1921. Serial No. 511,550. 1 Claim. (Cl. 224—6.)



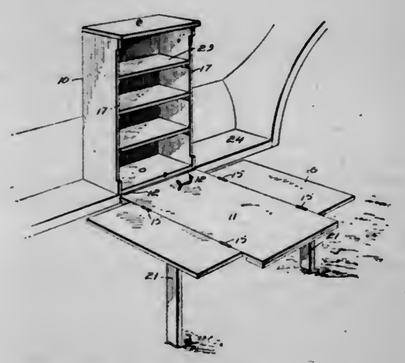
A bassinet comprising a skeleton body including a frame of elongated form having rounded ends, rods extending longitudinally at spaced intervals transversely with respect to the frame, said rods having their ends curved upwardly and connected at a common point to the frame, brace rods engaging the first rods and secured to said frame, and yokes swingingly supported on said frame between the brace rods.

1,453,943. RECORD-FILING DEVICE. CHARLES F. MITCHELL, Torrance, Calif. Filed Dec. 22, 1921. Serial No. 524,154. 1 Claim. (Cl. 45—2.)



In combination, a container having an open side, a panel pivoted on the container to close the open side thereof when in vertical position, and pins secured to the inner side of the panel and having offset free ends for retaining sheets of writing material against displacement from the pins when the panel is in closed position.

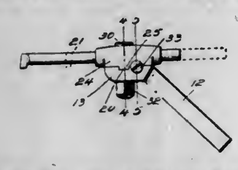
1,453,944. CULTIVATOR AND HARROW. URBANO PEDROARENA, Gardnerville, Nev. Filed Apr. 6, 1922. Serial No. 550,089. 3 Claims. (Cl. 55—19.)



1. An implement of the class described comprising a supporting frame including a plurality of beam members carrying earth engaging elements, an axle carrying bearing wheels, a rock shaft device having downturned ends engaging said axle and mounted on said frame, an operating lever connected to said axle, a clip device connecting said lever to said rock shaft device, and means for actuating said rock shaft device to cause the vertical adjustment of said bearing wheels.

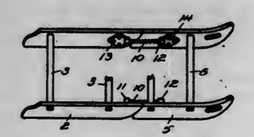
1,453,945. TILED SINK AND DRAIN BOARD. ALFRED G. S. PETERSON, Los Angeles, Calif. Filed Feb. 8, 1923. Serial No. 617,706. 6 Claims. (Cl. 4—36.)

1. In combination, a sink having a flange, a supporting frame for the flange, a plaster base laid on and along the flange and its frame, a tile framing laid on the flange corners and said base, and an apron tiling along the vertical portion of the said base.



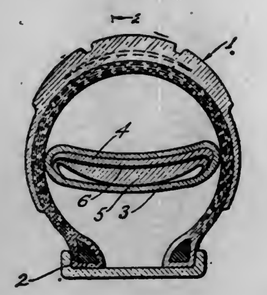
1,453,946. COMBINED CABINET AND TABLE. HARRY B. PIND and CLAUD W. CISNEY, Phoenix, Ariz. Filed Sept. 12, 1922. Serial No. 587,769. 2 Claims. (Cl. 190—12.)

2. In a device of the class described, a casing open at one side, a closure for said open side movably connected thereto, a leaf member hingedly connected to each side edge of said closure and foldable upon the inner face of the same, cleat elements pivoted at one end to the closure and adapted to be moved into position beneath the leaves when distended, and a leg member hinged to the free end of each of the cleat elements, and foldable upon the cleats when the latter are in withdrawn position.



1,453,947. TOOL HOLDER. HENRY O. POHAT, Flint, Mich. Filed Dec. 19, 1922. Serial No. 607,785. 3 Claims. (Cl. 29—99.)

1. A tool holder comprising a head piece provided with a slot and further provided with a pair of alining grooves separated by a lug formed with threads, and a tool carrying element formed with a groove opposing said pair of grooves and having the wall thereof provided with a pocket, a shiftable means arranged in the grooves of said head piece and element and engaging said lug and



further extended into said pocket for adjusting said element, and means carried by said element and extended through said slot for clamping the element to said head piece.

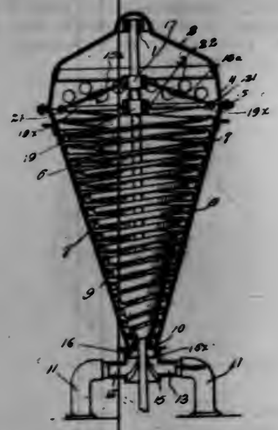
1,453,948. SLED. JOHN POTTALA, Fitchburg, Mass. Filed Jan. 17, 1922. Serial No. 529,817. 2 Claims. (Cl. 280—16.)

1. A steerable sled composed of front and rear sections and connected only by coiled springs arranged adjacent and in close proximity to one face of the runners thereof, said springs being secured at one end to the rear section and at the other to the front section.

1,453,949. INNER TUBE. HENRY CLAUDE PRIVETT, Long Beach, Calif., assignor of one-half to Charles R. Privett, Burbank, Calif., three-sixteenths to Helen E. Privett, and one-sixteenth to Hollis F. Privett, both of Long Beach, Calif. Filed Apr. 11, 1921. Serial No. 460,369. 4 Claims. (Cl. 152—13.)

4. An inner tube for tires having inelastic members arranged transversely of and embedded within the tread portion of the tube, and inelastic material embedded in the tread portion and associated with the members to prevent the tearing away of the terminals of the members when the tube is inflated.

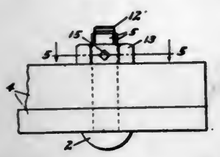
1,453,950. SHOE. EMIL PUHAKKA, Hancock, Mich. Filed June 16, 1920. Serial No. 389,375. 1 Claim. (Cl. 36—48.)



In a high-pac shoe, an upper of a height to extend over the calf of the leg of the wearer and formed of a pair of side portions of unequal length having projecting from the forward termini thereof a continuous seamless toe portion extending inwardly and rearwardly with respect

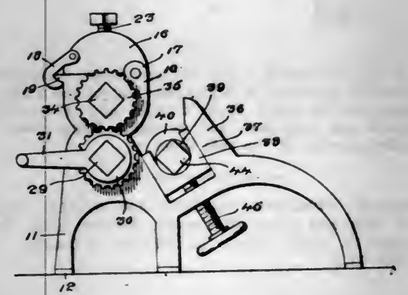
to the front of the shoe and of less width than the forward termini of said side portions, that side portion of shorter length of a length to extend a considerable distance above the ankle of the wearer, an extension secured to the upper edge of and projecting upwardly from that side portion of shorter length and of a length to provide the side portions of a shoe of equal length, a vamp having

its lower portion centrally split, said split lower portion of said vamp completely extended against and secured to the inner face of said toe portion and the remaining portion of said vamp extended rearwardly from the toe portion and between and secured to the inner face of the lower part of the side portions, and a tongue secured to the upper end of the vamp and of a length to extend to the top of the side portions.



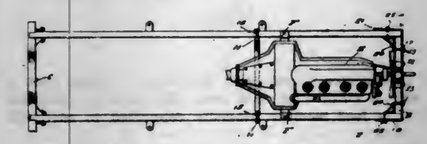
1,453,951. FLYING-MACHINE PROPELLER. JOHN MORTIMER RAYMOND, New Orleans, La. Filed Oct. 28, 1921. Serial No. 511,209. 1 Claim. (Cl. 244—18.)

In a propeller, the combination of a shaft, spiral blades associated with the shaft, rods connected with ends of said blades, a collar adjustable on the shaft and to which said rods are connected, a collar fixed on the shaft adjusting rods interposed between said collar and the outer ends of the first-named rods, and a casing enclosing said shaft, blades and connections.



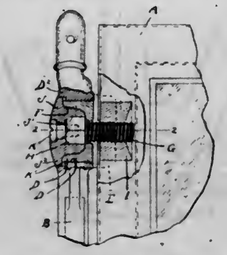
1,453,952. LOCK BOLT. ANDREW SAMANICH, Los Angeles, Calif. Filed Aug. 22, 1921. Serial No. 494,324. 2 Claims. (Cl. 85—5.)

1. A lock bolt comprising a shank split longitudinally to provide a plurality of locking members, transverse projections formed interiorly of the locking members, a locking stem insertable into the shank between the mem-



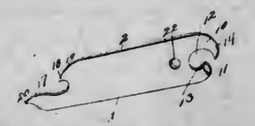
bers, and a nut embracing the members for the purpose described.

1,453,953. ANGLE-IRON MACHINE. WILLIAM NOALES SCHNEIDER, Cincinnati, Ohio. Filed May 28, 1921. Serial No. 473,464. 4 Claims. (Cl. 123—56.)



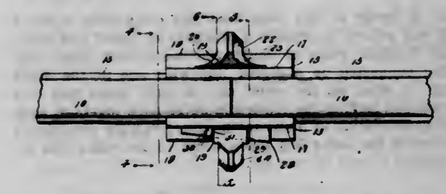
1. A device of the character described comprising end frames, bearings located at the intermediate portions of said frames, a lower roller having reduced ends journaled within said bearings, a bearing at the upper end of each of said end frames, a roller journaled within said second named bearings and designed for cooperating with said first named roller, means for adjusting the bearings of said second named roller, and a third roller detachably journaled within the end frames at the rear of said first named rollers and interchangeable with said second named roller.

1,453,954. CHASSIS BRACE. ALBERT J. SCHOLTES, Mobile, Ala. Filed Nov. 29, 1921. Serial No. 518,659. 4 Claims. (Cl. 280—106.)



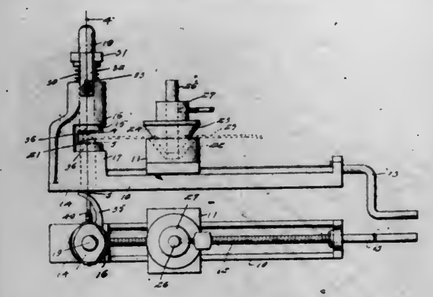
1. In combination with the frame of a motor vehicle, a transverse truss structure comprising a substantially V-shaped bar having its ends secured against the underside of the longitudinal frame bars, a second bar secured to the vertex of said first named bar at the underside thereof, blocks disposed between the ends of said first and second named bars, U-bolts embracing the side bars of the frame and passing through said first and second named bars, said U bolts carrying clamping nuts, and longitudinally extending adjustable truss rods connected with the front and rear cross members of the frame and engaged against said second named bars between said nuts.

1,453,955. WINDSHIELD-PIVOT CONSTRUCTION. HALSTEAD H. SEELEY, Detroit, Mich., assignor to Motor Products Corporation, Detroit, Mich., a Corporation of New York. Filed May 9, 1921. Serial No. 468,195. 10 Claims. (Cl. 296—92.)



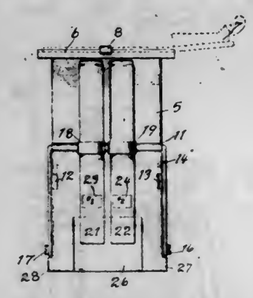
1. In a pivot construction, the combination with a pivotal member and a support therefor, of a pivot member carried by said pivotal member, a bolt securing the pivot member to the pivotal member, a finishing piece surrounding a portion of said bolt and concealing both said bolt and said pivot member, and a screw retaining said finishing piece engaging the head of said bolt.

1,453,956. RECEPTACLE OPENER. JAY HUNGERFORD SMITH, Rochester, N. Y. Filed July 21, 1921. Serial No. 486,469. 5 Claims. (Cl. 81—3.)



1. A receptacle opener for forcing the rubber from "anchor" tops, comprising a handle portion having curved pointed projections facing inwardly toward one another, one projection terminating within the curvature of the other and being offset to one side thereof, said inwardly terminating projection being used as a fulcrum against the edge of the flange of an "anchor" top, and the outer projection constituting a puncturing element for the transverse portion of said flange when the opener is swung on its fulcrum.

1,453,957. BOLTLESS RAIL JOINT. ANDY O. SPENCER, Sheffield, Ala. Filed Dec. 12, 1922. Serial No. 606,417. 2 Claims. (Cl. 238—203.)

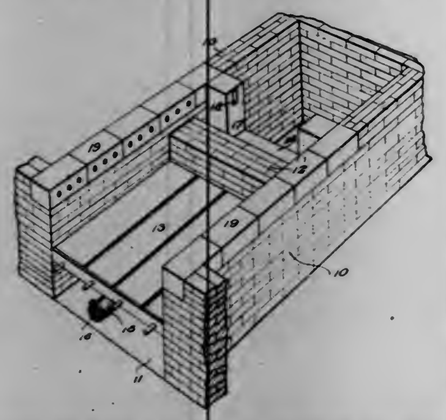


1. A joint for rails consisting of fish plates to embrace the adjacent ends of the rails, said fish plates having grooves and flanges, said flanges adapted to extend outwardly beyond the base flanges of the rails and having notches therein, a substantially U-shaped clamp having upstanding legs one longer than the other, said legs adapted to be disposed in said notches, a projection on one of the legs entering the groove of the adjacent fish plate, the other leg having a notch and a projection overlapping the same, and a fastening key insertable through the last mentioned notch, and the groove of the other fish plate.

1,453,958. SAW SET. HAYNES L. THOMAS, Brunswick, Ga. Filed Sept. 19, 1921. Serial No. 501,685. 6 Claims. (Cl. 76—70.)

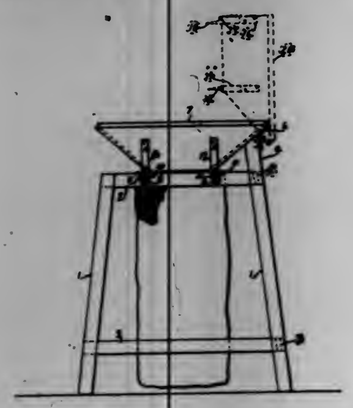
1. A saw setting apparatus having, in connection with saw supporting means, a pedestal provided with spaced jaws, plunger and anvil elements rotatably mounted in seats in said jaws with their operative faces exposed in the interval therebetween, the plunger element being reciprocable to bring its operative face into operative relation with the anvil, and means for simultaneously and correspondingly turning said anvil and plunger element to vary the relation of the operative or die faces thereof with reference to the saw supporting medium.

1,453,959. BRUSH HOLDER. PAUL R. THOMAS, Berkeley, Calif. Filed Oct. 7, 1922. Serial No. 593,041. 1 Claim. (Cl. 248—63.)



In a device of the character described, a support comprising a board-like portion, a bail pivoted to the sides of said support at a point near its lower extremity, a shelf mounted on the upper extremity of said support, receptacles pivoted to said bail in such a manner as to normally lie parallel to said support and being further adapted to have their upper extremities in close proximity to the under surface of said shelf, a groove formed in said shelf, and a spring secured to said shelf and adapted to overlie a portion of said groove, substantially as and for the purpose specified.

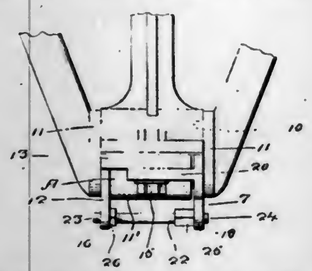
1,453,960. FURNACE CONSTRUCTION. ALFONS H. VAN DE POL, Philadelphia, Pa., assignor of one-half to John J. Bridgeford, Philadelphia, Pa. Filed Feb. 12, 1921. Serial No. 444,425. 1 Claim. (Cl. 110—75.)



The combination of a furnace including a grate and a baffle wall extending transversely across the furnace at the rear end of the grate; a conduit arranged horizontally across the bottom of the furnace in the rear of the baffle wall, an air supply pipe arranged below the grate thence disposed through the baffle wall and communicating with the conduit intermediate its ends, a vertically

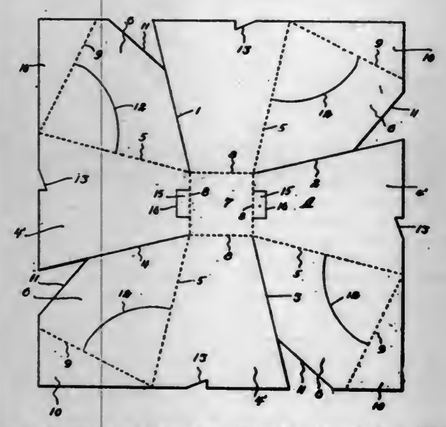
disposed conduit communicating and rising from each end of the horizontal conduit and being provided with air escape openings designed to face each other and to direct the air across the furnace to form a wall so as to

retard the escape of products of combustion, perforated conduits arranged horizontally within each side wall of the furnace and being designed to communicate with the vertically arranged conduits and extending forwardly therefrom to the front of the furnace.



1,453,961. SACK HOLDER. CARL WALLDOW, San Jose, Calif. Filed Sept. 19, 1922. Serial No. 589,122. 3 Claims. (Cl. 83—26.)

1. A sacker comprising a frame, a hopper having downwardly and inwardly inclined sides pivotally mounted thereon, spaced pins arranged on each of two opposite sides of said hopper to assume a vertical position when the hopper is in an operative position, and means carried by a portion of said pins for engaging said frame to support said hopper thereon.

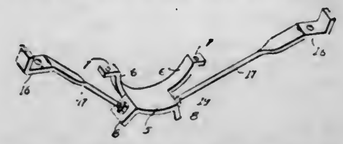


1,453,962. ADJUSTABLE BEARING CAP. HERBERT R. WESTWELL, Methuen, Mass. Filed Nov. 28, 1921. Serial No. 518,268. 1 Claim. (Cl. 64—25.)

An extension cap for bearings of the character described comprising two parts, apertured attaching flanges formed on one of said parts, a wall rising from said part at one end thereof, and having a threaded opening, the other of said parts having a threaded opening arranged in a line with the first mentioned opening, slotted extensions projecting from the second part and arranged beneath said flanges, fastening elements adapted to be passed through

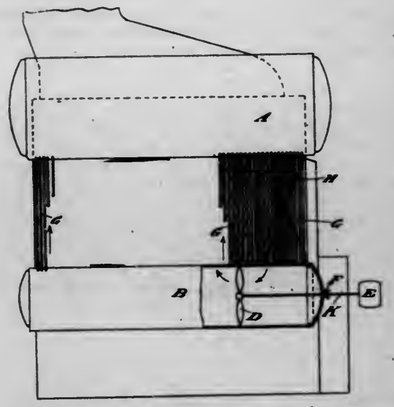
said openings and slots of the respective parts, an attaching bar having oppositely threaded extremities received by the threaded openings of said respective parts, and a lock nut associated with one of said extremities as and for the purpose specified.

1,453,963. PLANT PROTECTOR. ALFRED WILBERDING, Jacksonville, Fla. Filed July 30, 1921. Serial No. 488,670. 3 Claims. (Cl. 229—35.)



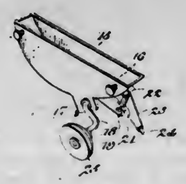
1. A device of the class described comprising a blank cut and scored to provide a plurality of inner and outer flaps forming walls of double thickness, each inner flap being connected by a scored line with one of the outer flaps, a wing on the outer end of each inner flap and means for locking the inner and outer flaps together, such means consisting of a slit in the inner flap for receiving a corner of the outer flap and a notch in the outer flap for engaging a part of the slit.

1,453,964. CRANK-CASE SUPPORT. EVERETT D. WOLBERT, San Francisco, Calif., assignor of one-half to Everett J. Perigo, San Francisco, Calif. Filed Jan. 10, 1921, Serial No. 436,303. Renewed Sept. 30, 1922. Serial No. 591,668. 1 Claim. (Cl. 180—64.)



In a device of the character described, the combination with the sectional flanged crank case and frame of an automobile, of a support connected to said frame and positioned beneath said crank case whereby vertical displacement of the same is prevented, said support consisting of a main body portion conforming to the contour of the lower part of said crank case and having integrally

formed thereon lateral extensions and curved arms terminating in apertured flanges, brace rods disposed between and connecting said support and frame whereby horizontal displacement of said crank case and said frame



is prevented, friction means interposed between said crank case and said support, and L shaped bolts connecting the flanges of the sectional crank case and the apertured flanges of the curved arms of said support for the purpose of assisting in preventing the vertical displacement of said crank case.

1,453,965. CIRCULATION OF WATER IN WATER-TUBE BOILERS. HAROLD E. YARROW, Scotstoun, Scotland. Filed Dec. 15, 1919. Serial No. 344,804. 3 Claims. (Cl. 122—411.)

1. In a water tube boiler, a water drum and a steam and water drum placed at a higher level than said water drum, nests of tubes connecting said water drum with said steam and water drum, said nests of tubes being arranged along the longitudinal axis of said water drum, some of said tubes being nearer the source of heat than the others, a propeller placed in said water drum, a circulation produced by said propeller flowing up the more highly heated tubes and down the less highly heated tubes.

1,453,966. REPEATING MECHANISM FOR PHONOGRAPHS. KNUT EMIL YUNGSTROM, White Plains, N. Y. Filed Apr. 15, 1922. Serial No. 553,172. 5 Claims. (Cl. 214—15.)

1. A device of the class described comprising attaching means for securing the device to a sound box, a rocker shaft supported thereby, means on one end of said shaft for tilting the same, and means on the other end of said shaft adapted to co-act with the grooves of a record disk as and for the purpose specified.

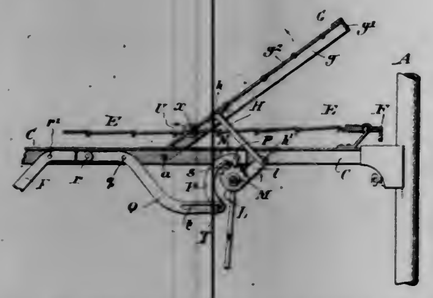
1,453,967. STEAMING CABINET. LOUIS ANGELUS, New York, N. Y. Filed Nov. 25, 1921. Serial No. 517,822. 5 Claims. (Cl. 26—7.)

1. A steaming cabinet which comprises a casing having a steaming chamber in the bottom thereof, said casing adapted to receive rolls of material to be steamed, and a spacing frame mounted on and extending around the inner walls of the casing near the upper end thereof to maintain the rolls out of contact with the walls.

1,453,968. MUSICAL TOY. WILLIAM BARTHOLOMAE, New York, N. Y., assignor to Bar Zim Toy Manufacturing Co. Inc., New York, N. Y., a Corporation of New York. Filed May 4, 1922. Serial No. 558,459. 15 Claims. (Cl. 46—46.)

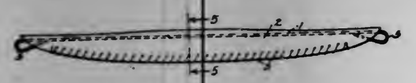
14. In a sounding device of the character described, a sounding member flexible for the purpose of varying its tone formed substantially wedge-shaped with a finger or thumb engaging end, and with an offset portion at the opposite end for receiving a support.

1,453,969. ACOUSTIC DEVICE. HAROLD DAVID BROWN, New York, N. Y. Filed Feb. 3, 1921. Serial No. 442,244. 2 Claims. (Cl. 181—23.)



1. A device of the character described comprising means adapted to enclose the ear, and having an opening

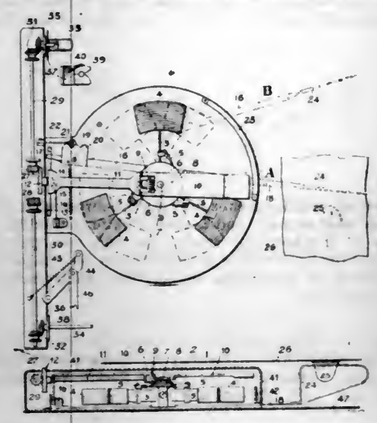
therein for the admission of sound, said means having the characteristics of a diaphragm and having contact



with the head of the wearer at a point behind the ear, whereby vibrations are transmitted to the petromastoid portion of the temporal bone.

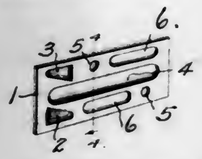
1,453,970. INVALID BED. FRANK B. BUMGARDNER, Fort Smith, Ark. Filed Apr. 19, 1922. Serial No. 552,829. 3 Claims. (Cl. 5—77.)

1. The combination with the side rails of a bed, of a head rest frame pivotally connected therewith, hangers attached to the side rails, a rock shaft supported by the hangers, ratchets carried by the rock shaft and having forwardly projecting arms, links connecting these arms with the head rest, pawls pivotally connected with the hangers and engaging the ratchets, a rod connecting the powls on opposite sides of the bed, slotted levers through which the rod extends, and a handle for operating said levers.



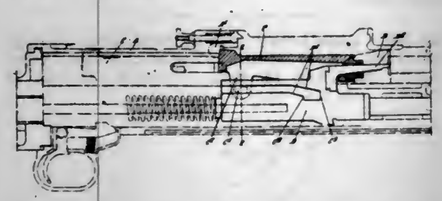
1,453,971. HAIR CURLER. ELIZABETH CALKINS, St. Joseph, Mo. Filed July 25, 1922. Serial No. 577,395. 3 Claims. (Cl. 132—43.

1. A hair curler, comprising a single bendable wire, a cover on the main portion of the wire and having tapering ends, and the ends of the wire bent into looped form and having the looped ends projecting beyond the ends of the cover.



1,453,972. DEVICE UTILIZING THE TREPIDATIONS OF VEHICLES. MARIO AUGUSTO CANALE and RICARDO FRIAS, Buenos Aires, Argentina. Filed Apr. 23, 1921. Serial No. 463,925. 6 Claims. (Cl. 40—94.)

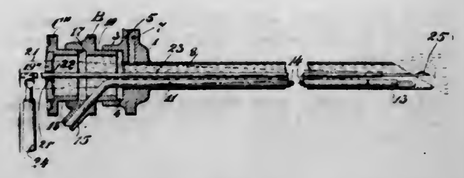
1. In an apparatus for operating advertising tapes, weights mounted on springs and adapted to vibrate therewith, pawls carried by the springs and engaging a ratchet wheel having a bevel gear which engages a pinion, an arm, an axle therewithin extended from said pinion to an attached toothed wheel, an arm fulcrumed above said first arm adapted to move said first arm to engage said toothed wheel with a gear wheel when moved in one direction and with another gear wheel when moved in an opposite direction, arms and gear means extended from said gear wheels meshing with gears attached to rollers



positioned at right angles to said arms, a curtain attached to said rollers having a flap at each end adapted to engage an extension of the fulcrumed arm.

1,453,973. CLIP FOR CORNER BEADS. WILLIAM CLAYTON CORYELL, Youngstown, Ohio, assignor to The General Fireproofing Company, Youngstown, Ohio, a Corporation of Ohio. Filed May 10, 1922. Serial No. 559,887. 3 Claims. (Cl. 72—121.)

1. A clip for corner beads consisting of a body having bead engaging lugs, a reinforcing rib formed at the central portion of the clip, and key openings at opposite sides of the rib.

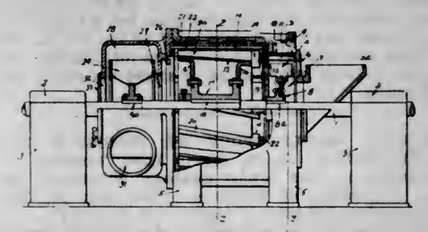


1,453,974. MACHINE GUN. ARTHUR TREVOR DAWSON and GEORGE THOMAS BUCKHAM, Westminster, England, and GEORGE DOTSON HASKELL, Boston, Mass., assignors to Vickers Limited, Westminster, London, England, a British Company. Filed Sept. 21, 1922. Serial No. 589,657. 2 Claims. (Cl. 89—2.)

1. In a machine gun of the kind referred to, the combination with the bolt, the striker-post, and a movable locking block adapted to co-operate with a fixed part of the gun to hold the bolt in the forward position, said locking block having a longitudinal recess between the side walls of which part of said striker-post is disposed, of a rearward extension of said striker-post, said extension being formed with a slot which passes through it from

side to side and which has cam or inclined surfaces on its upper and lower walls, and a pin carried by the side walls of said locking block, this pin passing through said slot and engaging with the cam or inclined surfaces thereof.

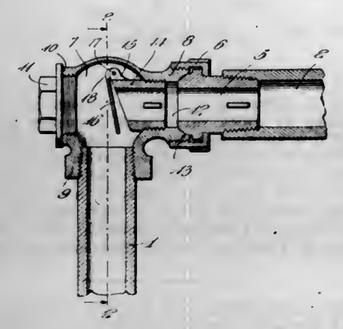
1,453,975. URETHROSCOPE. GEZA GREENBERG, New York, N. Y., and WILLIAM A. WINTER, East Orange, N. J. Filed Oct. 18, 1919. Serial No. 331,550. 7 Claims. (Cl. 125—7.)



6. A urethroscope comprising an open ended tube; a lens closure for the proximal end of said tube having an optical curvature such that when said tube is filled with a suitable liquid in inner contact with said lens, the focus of said lens will approximate the distal end of said tube.

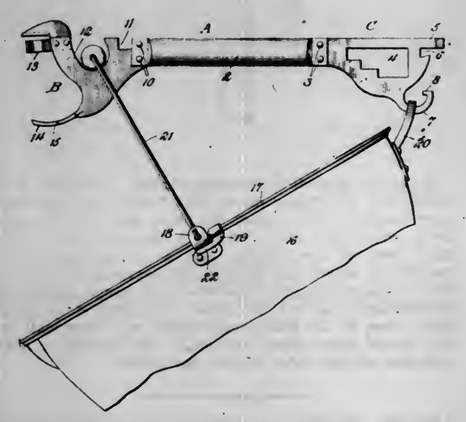
1,453,976. COMPOSITION FOR DETONATORS. BENNETT GROTTA, Tamaqua, Pa., assignor to Atlas Powder Company, Wilmington, Del., a Corporation of Delaware. Filed Oct. 16, 1922. Serial No. 594,979. 5 Claims. (Cl. 52—3.)

1. The brisance or detonating value is greatly increased. The inner capsule, which is essential in a mercury fulminate-tetryl detonator, may be dispensed with, and a smaller priming charge used effectively.



1,453,977. METHOD OF TREATING AND FEEDING FUEL AND APPARATUS THEREFOR. PAUL A. HIRSCH, Erie, Pa., assignor to Aero Pulverizer Company, New York, N. Y., a Corporation of Delaware. Filed Apr. 22, 1921. Serial No. 463,625. 43 Claims. (Cl. 83—11.)

1. In an apparatus for trenting and feeding fuel, the combination of a crushing chamber; a pulverizing chamber leading from the crushing chamber; a rotary beater in the crushing chamber; a rotary pulverizer in the pulverizing chamber the clearance between the walls of the crusher chamber and the beater being greater than the clearance between the walls of the pulverizer chamber and the rotary pulverizer; and an obstruction between the chambers preventing the passage of larger particles from the crushing chamber to the pulverizing chamber.

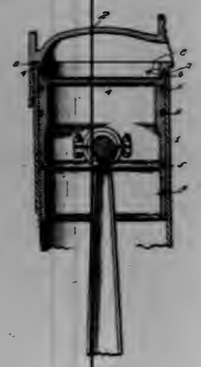


1,453,978. CHECK VALVE. JOHN AUGUST HOLMBERG, Lindsborg, Kans. Filed May 23, 1921. Serial No. 471,753. 1 Claim. (Cl. 251—123.)

A coupling comprising a body having an inlet passage and an opening opposite thereto, and intermediate its length provided with a side opening, a removable closure for the opening opposite the inlet, the inlet passage being internally threaded from its inner end to a point intermediate its length, a tubular valve seat inserted into the body through the opening opposite the inlet, and a check valve pivotally connected with the inner end of said seat, the valve seat having its other end

portion threaded and screwed into the inner end portion of the inlet passage and mounting the valve seat for axial adjustment whereby when the coupling is in use, the valve seat may be adjusted to position the pivot of the valve uppermost with the valve hanging in a substantially vertical position and by gravity normally held out of closing engagement with the valve seat.

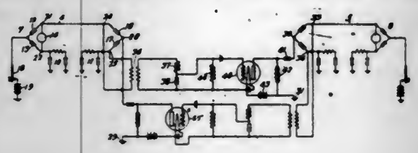
1,453,979. COMBINATION TOOL. JOSEPH J. HOLSEN, Manitowoc, Wis. Filed Mar. 20, 1919. Serial No. 283,901. 3 Claims. (Cl. 294—2.)



1. A combination kitchen tool, for use in connection with a vessel having a pair of ears, a hinged bail and a looped handle, and wherein the vessel is provided with a cover having hooks adapted to be slid into engagement with the ears to retain it in place, said tool comprising a hook at one end to be engaged with the looped handle, and a seat at the other end to receive said bail, whereby the vessel may be tilted with the cover in place so as to protect the hand of the operator.

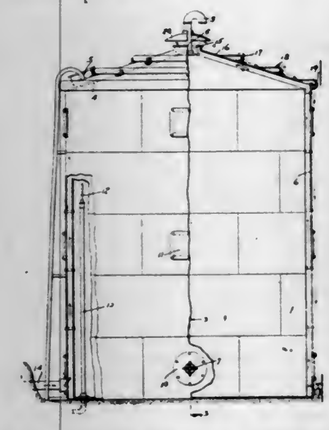
1,453,980. ATTENUATION EQUALIZER. RAY S. HOYT, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed June 29, 1918. Serial No. 242,567. 15 Claims. (Cl. 178—44.)

15. In a transmission system, a transmission line the attenuation of which varies with frequency in accordance with a known law, and an auxiliary network the attenuation of which is predeterminable at different frequencies, said auxiliary network being localized with respect to the line and so designed and so associated with the transmission line at a point along the length thereof that the resultant attenuation varies with the frequency in accordance with a predetermined law.



1,453,981. CYLINDER AND PISTON CONSTRUCTION. ELIAS JOHNSON and SIMON PETERSON, Newhall, Iowa, Filed Apr. 13, 1922. Serial No. 552,094. 3 Claims. (Cl. 74—108.)

1. In an internal combustion engine, a cylinder provided with an interior flange, said flange being provided upon one side with a recess, the outer wall of said recess being cylindrical and forming a continuation of the inner wall of the cylinder, and a piston mounted to reciprocate within the cylinder and provided at one end with a flange integral therewith, said flange projecting longitudinally beyond the piston and adapted to enter said recess in the first named flange, the outer wall of the piston flange being cylindrical and forming a continuation of the outer wall of the piston.



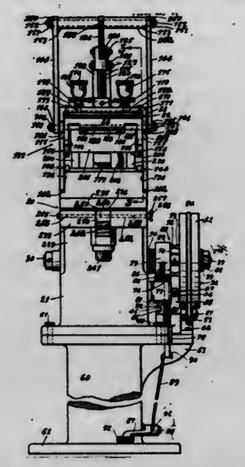
1,453,982. ELECTRICAL RECEIVING OR REPEATING APPARATUS AND METHOD OF OPERATING THE SAME. BURTON W. KENDALL, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Continuation of application Serial No. 50,396, filed Sept. 13, 1915. This application filed Feb. 20, 1917. Serial No. 149,782. 77 Claims. (Cl. 178—71.)

1. The combination of a circuit, a transformer having its primary included therein, an aperiodic circuit associated with the secondary of said transformer, said aperiodic circuit being symmetrically conducting in both directions, a thermionic amplifier and means for asso-

ciating said amplifier with said aperiodic circuit, whereby power in said aperiodic circuit is reproduced in augmented form.

1,453,983. TANK. JOHN WESLEY KERLIN, New Brunswick, N. J. Filed Sept. 28, 1921. Serial No. 503,885. 4 Claims. (Cl. 220—88.)

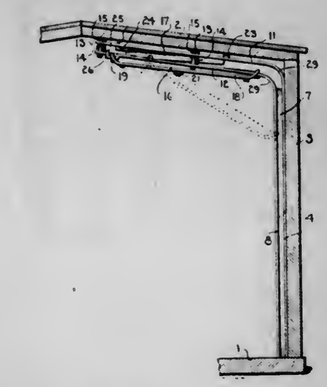
1. A tank of the character described comprising an inner container, an outer casing spaced from the container, means for directing a cooling and fire extinguishing medium into the space between the container and the casing, said casing being open at the top for permitting said medium to flow out the top, together with means to cause said medium to spread out evenly over the casing.



1,453,984. MANUFACTURE OF AMMONIUM PERCHLORATES. RALPH AUSTIN LONG, Tamaqua, Pa., assignor to Atlas Powder Company, Wilmington, Del., a Corporation of Delaware. Filed Nov. 26, 1921. Serial No. 517,889. 1 Claim. (Cl. 23—13.)

A process for the manufacture of ammonium perchlorate which consists of employing a nucleus solution containing approximately 9% to 12% ammonium perchlorate, 1% to 7% sodium perchlorate, and 17% to 22% sodium chloride, adding to this the proper amount of sodium perchlorate and ammonium chloride to produce a solution containing 18% to 30% ammonium perchlorate, 1% to 7% sodium perchlorate, and 17% to 22% sodium chloride, removing the sodium chloride that separates out, diluting the remaining liquid and then removing the ammonium perchlorate at a temperature below 30° C.

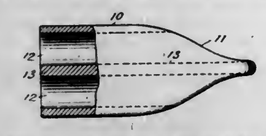
1,453,985. AUTOMATIC MARKING MACHINE. EDWARD G. MEYERS, Cincinnati, Ohio. Filed May 31, 1921. Serial No. 473,689. 10 Claims. (Cl. 101—9.)



1. In a marking machine, a yieldable support adapted to hold material to be marked, a reciprocating marking

means whereby markings are made on the material by a single operation, an inking means for said marking

means and fixing means for instantly indelibly fixing the markings made by said marking means, substantially as set forth and for the purposes specified.



1,453,986. SLIDING DOOR. ORIN J. MILLER, Hurdsfield, N. Dak. Filed July 10, 1922. Serial No. 573,972. 4 Claims. (Cl. 20—32.)

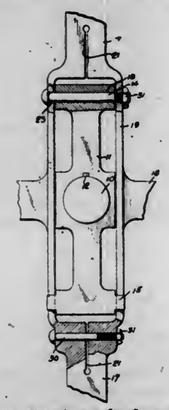
1. A sliding door comprising a plurality of sections, pairs of spaced track bars secured to fixed supports upon opposite sides of the door, the track bars of each pair being located in spaced and offset relation throughout their lengths, track-engaging members on one door section engaging on the inner sides of one set of track bars, and track engaging members on the other door section engaging on the outer sides of the other set of track bars, said sections being movable into vertical alinement to close the doorway and relatively slidable into opposed parallel relation when opening the same.

1,453,987. SINKER. SAMUEL MILLS, New York, N. Y. Filed Sept. 19, 1922. Serial No. 589,165. 7 Claims. (Cl. 43—52.)

4. As a new article of manufacture, a sinker for fish lines having holes extending longitudinally therethrough at opposite sides of the medial line and presenting a

longitudinal web at the medial line between said holes, said web having means affording connection for a fish line.

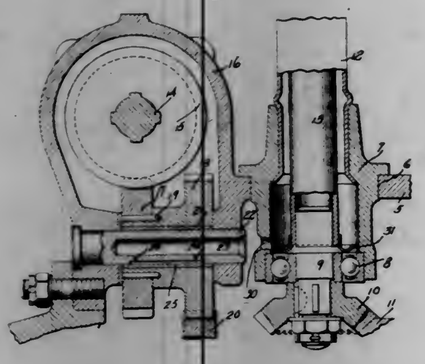
1,453,988. METHOD OF BRIQUETTING SAWDUST, PEAT, COAL DUST, AND SIMILAR PULVEROUS SUBSTANCES. Filed June 25, 1920. Serial No. 391,786. 1 Claim. (Cl. 44—33.)



The method of briquetting saw-dust, coal-dust, air-dried peat and similar pulverous substances, which comprises supplying superheated steam to the pulverous mass until the air contained therein is essentially expelled, and then while the mass still contains condensable vapors only applying pressure until the steam is condensed and the particles of the mass are brought into intimate contact with each other.

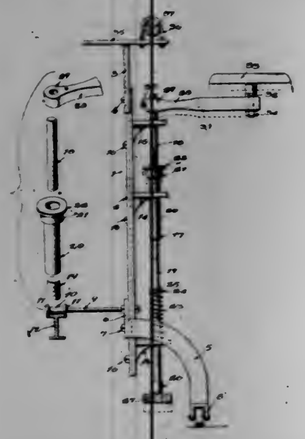
1,453,989. FOLDING BRACE. OLOF A. NORLUND, Williamsport, Pa. Filed July 12, 1921. Serial No. 484,096. 5 Claims. (Cl. 74—33.)

1. A folding brace comprising a crank, and a shank formed of a plurality of alined sections pivotally connected together, means to removably hold said sections in alinement, and an angular clip each end of which is provided with a pair of spaced jaws located at an angle to each other, the adjacent end of the crank and a section of the shank being pivoted in one part of the clip, the two jaws of said clip being adapted to firmly grip adjacent end portions of the section and crank respectively at one side of the pivots.



1,453,990. TILTING STEERING WHEEL. VICTOR W. PAGE, Kew Gardens, N. Y. Filed May 19, 1921. Serial No. 470,986. 1 Claim. (Cl. 74—33.)

In a collapsible steering wheel, a head adapted to be carried by the steering post, a wheel, a yoke formed in

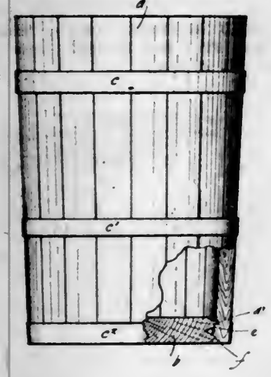


the spokes of said wheel and adapted to embrace the head, said yoke having keys extending into the spokes of the wheel at the ends of the yoke, means for pivotally mounting the wheel on said head, said means also serving to contract that end of the yoke which is pivotally secured to the head to take up wear, and separate means passing through the yoke at its free end for contracting said free end to take up wear therein.

1,453,991. LUBRICATOR FOR INTERMEDIATE GEARING. VICTOR W. PAGÉ, Kew Gardens, N. Y. Filed Nov. 22, 1921. Serial No. 517,036. 7 Claims. (Cl. 64—32.)

7. A lubricating means for gearing comprising a hollow bolt having an exposed open end and forming a support for said gearing, and centrifugal means in alinement with the exposed open end of said bolt for supplying lubricant to said hollow bolt.

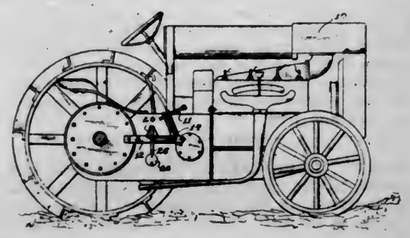
1,453,992. WARPER SEAT. ARTHUR J. PALIN, Pawtucket, R. I. Filed Apr. 17, 1922. Serial No. 553,339. 2 Claims. (Cl. 155—81.)



1. In combination, a fixed support including a horizontal track member, a movable upright supporting structure having a sliding connection at its upper end with the fixed support and having a rolling contact with the said horizontal track, a vertical standard supported upon the movable supporting structure and being movable in the direction of its length, spring means urging said standard upward, a stop carried by the standard and adapted to engage the movable supporting structure to limit the downward movement of the standard, an arm swingingly supported upon the standard adjacent to its upper end and having a longitudinal slot therein, a saddle having a shank arranged with the lower portion thereof depending through said slot and having the upper portion thereof enlarged to rest upon the upper side of the arm, whereby said saddle is adapted for adjustment longitudinally of the slot, and means carried by the shank at its lower end for engaging the arm to lock the saddle in adjusted position along the slot.

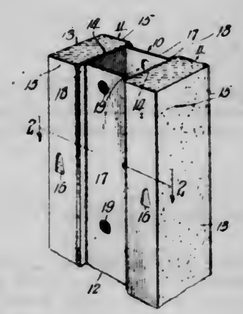
1,453,993. METALLURGICAL REFRACTORY MATERIAL AND PROCESS OF PRODUCING THE SAME. CALVIN PAYTON, Douglas, Ariz., assignor of fifty-five one hundredths to Phelps Dodge Corporation, a Corporation of New York. Filed Jan. 17, 1919. Serial No. 271,738. 3 Claims. (Cl. 75—62.)

1. The process of producing metallurgical refractory material which comprises blowing copper matte without the addition of silica and separating the resulting slag.



1,453,994. WOODEN TUB. FRANK X. PFLUGER, Portland, Oreg. Filed Nov. 3, 1921. Serial No. 512,501. 2 Claims. (Cl. 217—80.)

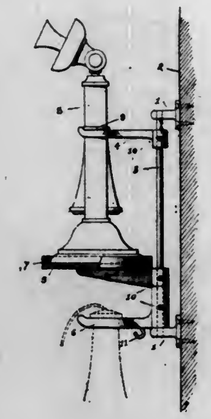
1. A wooden tub comprising staves and a one-piece bottom, the latter being provided with a peripherally projecting flange of wedge form in cross section, and being provided further with a second flange located below said first mentioned flange, and with a third flange located adjacent the under side of the bottom piece, said second flange being of triangular cross-section, the staves being provided on their interior faces with a groove to receive said wedge like top flange of the bottom piece, whereby, on the assembly and pressing of the staves about its bottom piece said flange of triangular cross-section will be pressed into the opposed faces of the staves and form therewith a liquid tight joint, such joint also contributing to the rigidity of the bottom of the tub as a whole.



1,453,995. SAFETY DEVICE FOR TRACTORS. JAMES S. RAIRDEN, Waterford, Calif. Filed Aug. 10, 1921. Serial No. 491,230. 6 Claims. (Cl. 180—82.)

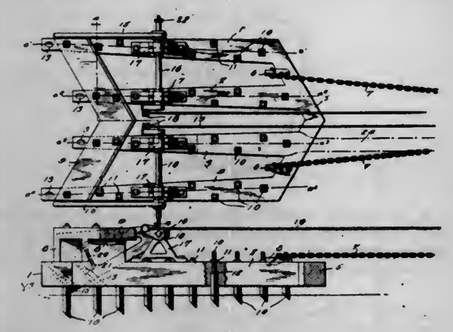
1. A safety device for tractors comprising a bracket to be arranged adjacent the clutch pedal of the tractor, a hook slidably mounted on the bracket and adapted to engage freely over the clutch pedal, a latch mounted for rocking movement and pivoted at its front end to the lower end of the hook, a pendulum-controlled member pro-

jecting over the rear end of the latch and restraining the same, and means associated with the hook to actuate the same and the clutch pedal and exerting force constantly on the latch in opposition to the latch-restraining means.



1,453,996. COMPOSITE STRUCTURE. GEORGE W. RIDDLE, Chicago, Ill. Filed Nov. 8, 1920. Serial No. 422,491. 2 Claims. (Cl. 72—115.)

1. A composite structure of the kind described comprising, oppositely facing, spaced thin sheet metal channels having side members, strips secured to said channels at their sides and adapted to hold said channels in their paced relation, a nailing mixture in said channels, and means connected with said side members to hold the nailing mixture in place therein.

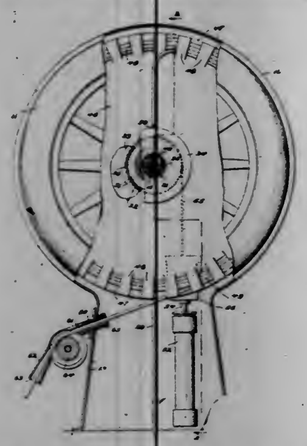


1,453,997. TELEPHONE BRACKET OR SUPPORT. JOSEPH HENRI RIVET, Woonsocket, R. I. Filed Apr. 20, 1920. Serial No. 375,328. 1 Claim. (Cl. 248—20.)

In a telephone support the combination of wall brackets adapted to be secured to a wall in a removable manner and having apertures in their free ends, a rod adapted to seat in the apertures and to be turned with respect to the brackets, an arm adjustably secured to the rod near the upper end thereof and to turn therewith and having an outer forked portion adapted to receive and grip the staff of a telephone, an arm arranged at a point on the rod slightly below the transverse center thereof and adjustably secured thereto and adapted to turn with the rod, a tray mounted on the last named arm, an arm mounted beneath the second arm on the rod and adjustably secured thereto and movable therewith and having

a forked free end adapted at times to receive a telephone receiver, and a hook formed integral on the last named arm to receive a telephone directory.

1,453,998. HARROW AND SCARIFIER. DANIEL M. ROBERTS, Homestead, Fla. Filed Oct. 24, 1921. Serial No. 509,934. 13 Claims. (Cl. 55—3.)



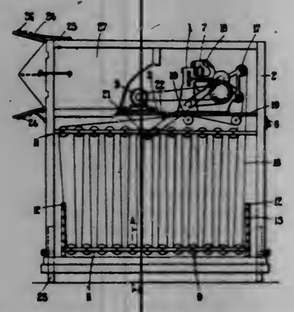
1. A harrow comprising a plurality of bars which are narrower at the rear than at the front of the harrow, and a plurality of sets of harrow teeth, said bars and sets of harrow teeth being arranged substantially parallel to the center line of the harrow.

13. In a harrow, a plurality of substantially parallel bars, a set of teeth for each of said bars, a tooth receiving socket at the rear of each bar and teeth of substantially larger size than the teeth of said sets adapted to be removably mounted in said sockets.

1,453,999. AIR-HOSE STAND. GEORGE F. ROYER, Wilkes-Barre, Pa. Filed June 14, 1920. Serial No. 388,928. 18 Claims. (Cl. 299—78.)

1. In a construction of the kind described, a reel adapted to support an air conveying hose wound thereon, a bearing to which said reel is secured, a fixed shaft on which said bearing is rotatably mounted, said bearing including a drum portion spaced from said shaft to form a spring receiving recess, a coiled spring arranged in said

recess around said shaft, and having one end secured to said bearing and the other to said shaft, and means for

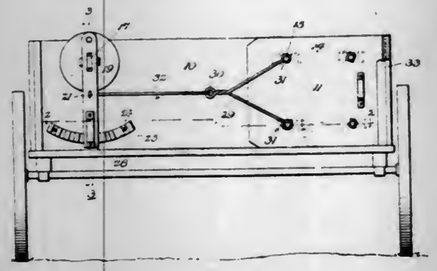


conducting compressed air through said shaft and bearing to said hose.

1,454,000. CERAMIC WARE AND METHOD OF MAKING THE SAME. CHARLES W. SAXE, Worcester, Mass., assignor to Norton Company, Worcester, Mass., a Corporation of Massachusetts. Filed Dec. 2, 1920. Serial No. 427,684. 5 Claims. (Cl. 25—129.)

1. A ceramic article consisting of an impervious portion of porcelain integrally united by vitrification with a porous portion of crystalline alumina granules bonded by vitreous clay material.

1,454,001. CINEMATOGRAPH MACHINE ADAPTED FOR ADVERTISING PURPOSES. WILLIAM EWART GEORGE SMITHERS, Kingston-on-Thames, England. Filed July 19, 1922. Serial No. 576,072. 3 Claims. (Cl. 88—24.)

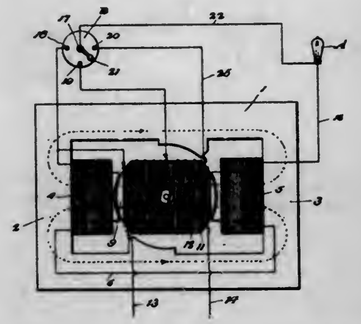


1. Means for providing continuous cinematograph displays in shop windows and the like, adapted for use either in daylight or darkness, having in combination a casing, a screen at one end of said casing, adapted to show on its outer surface pictures projected onto its rear surface, a projector having film feeding means mounted within said casing and behind said screen, means within the casing for driving said projector, an endless film passing over a plurality of sets of rollers arranged in the lower portion of said casing, means for varying the distance between the sets of rollers so as to accommodate for varying lengths of film, and auxiliary film feeding means disposed at a convenient point in the travel of said film over said rollers and driven by and synchronously with the main film feed.

1,454,002. LUBRICATOR. CLAUDIUS VERNIAUD, deceased, late of Quincy, Ill., by Clotilde J. Verniaud, administratrix, Quincy, Ill.; assignor, by mesne assignments, to G. M. C. Metallic Grease Co., Quincy, Ill., a Corporation of Delaware. Filed June 29, 1922. Serial No. 571,797. 3 Claims. (Cl. 87—9.)

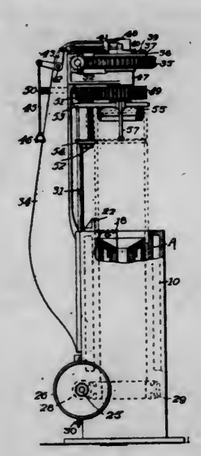
3. A lubricant composed of cup grease, lead dust, babbitt dust, and powdered white lead, combined in substantially the proportions of 50 pounds of cup grease, to 1 pound of lead dust, to one-fourth pound of babbitt dust, to one ounce of powdered white lead.

1,454,003. END GATE. FRANK J. VONDERHARR, Granville, Iowa. Filed Feb. 15, 1922. Serial No. 536,727. 5 Claims. (Cl. 296—54.)



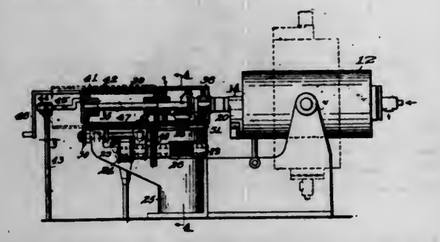
1. An end gate including slidably connected sections, a pivoted swinging lever upon one of the sections operatively connected to another of said sections and swingingly movable in one plane for sliding the latter section, and locking means upon the lever, the lever being pivotally movable in another plane to operatively engage said means with the first section for holding the lever against swinging movement.

1,454,004. PIVOT BUTTON. MORRIS WEISS, New York, N. Y., assignor of one-half to Isidore A. Weidhorn, Lynbrook, N. Y. Filed Aug. 3, 1921. Serial No. 489,483. 2 Claims. (Cl. 24—104.)



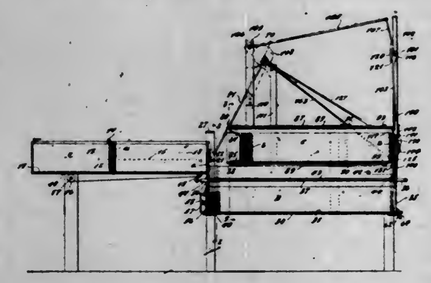
1. As a new article of manufacture, a pivot button of the class described, comprising a hollow body portion, a flanged base portion, a plate having a triangular projection with an opening at the apex carried by the base portion, said triangular portion having its walls integral, means for retaining said plate in position and a smooth stud for engaging in said opening in the projection to attach the button to a fabric.

1,454,005. REGULATING TRANSFORMER. NICOLAS WENZEL, Twin Falls, Idaho. Filed Feb. 10, 1921. Serial No. 443,085. 7 Claims. (Cl. 171—119.)



1. A selective current regulator comprising a movable armature and a primary winding thereon, a closed stationary core with poles situated diametrically opposite each other, a secondary winding on each of said poles and means for altering the inductive relation between the windings to deliver an induced current to the load selectively ranging from maximum strength to approximate zero strength and means choking down the current flow in the primary winding.

1,454,006. TAIL-CUTTING DEVICE FOR TUBULAR PLATES. HENRY A. WISE WOOD, New York, N. Y., assignor to The Wood Newspaper Machinery Corporation, New York, N. Y., a Corporation of Virginia. Original application filed Mar. 11, 1915, Serial No. 13,733. Renewed May 16, 1919. Serial No. 297,565. Divided and this application filed Dec. 11, 1919. Serial No. 344,235. 14 Claims. (Cl. 29—21.)

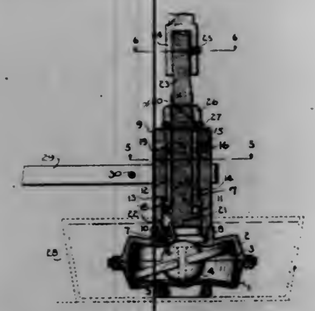


1. The combination with a support for a cast plate, and means for ejecting the cast plate axially from said support, of a gear, means connected with the first named means for constantly rotating said gear when the first named means is in operation, a hub loosely mounted on the gear, means for connecting said hub with the gear for rotating the hub with the gear, a shaft in alignment with the axis of the support and rotatable with said hub, a tail cutter carried by said shaft at a distance from its center and adapted to rotate therewith, and means connected with said ejecting means for rotating said tail cutter on its own axis while it is rotating around the plate.

1,454,007. FINISHING AND COOLING APPARATUS FOR TUBULAR STEREOTYPE PRINTING PLATES. HENRY A. WISE WOOD, New York, N. Y., assignor to The Wood Newspaper Machinery Corporation, New York, N. Y., a Corporation of Virginia. Original application filed Mar. 31, 1915, Serial No. 18,248. Divided and this application filed Dec. 11, 1919. Serial No. 344,236. 10 Claims. (Cl. 29—21.)

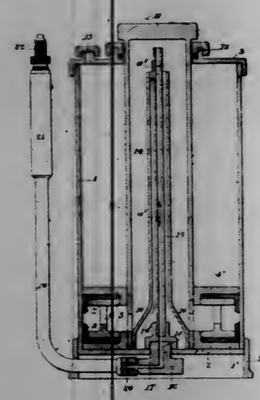
1. In a machine of the character described, the combination of a saddle for receiving a substantially tubular stereotype printing plate, said saddle being of cylindrical form and having a longitudinal fin at the bottom for supporting it and for receiving a gap in the side of the plate, a cylinder freely rotatable on the axis of the saddle for receiving the plate therefrom and having a longitudinal fin adapted to register with said fin, whereby when the plate is moved from the saddle on the cylinder it will be capable of rotating with the cylinder.

1,454,008. ENVELOPE-FILLING MACHINE. POWHATAN J. WOOLDRIDGE, Oldham County, Ky. Filed Aug. 17, 1918. Serial No. 250,295. 37 Claims. (Cl. 93—6.)



1. An envelope filling machine, comprising in combination flap opening means for operating on a series of envelopes in succession, filling means, and a feedway in which the envelopes are deposited from the flap opening means and in which the opened envelopes are accumulated in a column arranged flatwise together and through which the column of opened envelopes is advanced to the filling means.

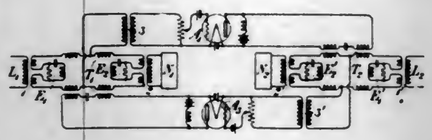
1,454,009. DEVICE FOR GRINDING WATER METERS. OTTO ZACHOW, Clintonville, Wis. Filed Feb. 28, 1922. Serial No. 540,069. 6 Claims. (Cl. 51—26.)



1. A grinding attachment for water meters comprising a body member, means at one end of said member for detachable connection with the piston casing of the meter, an inner sleeve slidably fitted in the body member, means for holding said sleeve from longitudinal movement, a

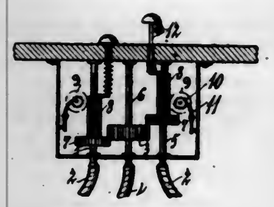
spindle traversing the said sleeve and adjustable longitudinally therein, means for causing the spindle and

sleeve to revolve together, and means formed on the lower end of the spindle to oscillate the meter piston when said spindle rotates.



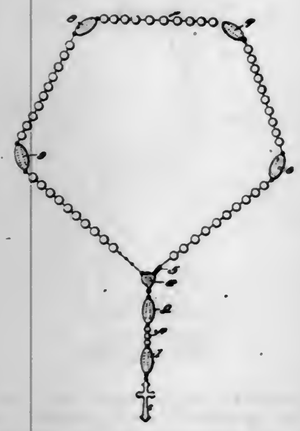
1,454,010. PNEUMATIC JACK. RAOUL BERNAT, Bordeaux, France. Filed Dec. 9, 1921. Serial No. 521,216. 4 Claims. (Cl. 138—9.)

1. A pneumatic jack comprising a casing, a hollow piston in said casing, flexible gaskets positioned between the piston and casing, said hollow piston being formed to receive a fluid, means for supplying pressure fluid to the lower face of the piston, means for supplying fluid to the hollow piston, and means for permitting the pressure of the fluid supplied to the lower face of the piston, to be exerted in the hollow piston, whereby to pack the gaskets against the casing.



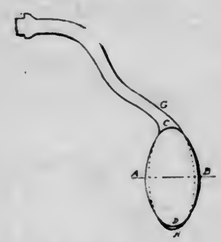
1,454,011. SYSTEM FOR ATTAINING UNIFORM ATTENUATION. OTTO B. BLACKWELL, Garden City, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed June 29, 1918. Serial No. 242,566. 11 Claims. (Cl. 179—170.)

1. In a transmission system, a transmission line the attenuation of which varies with frequency, a repeater system associated with said transmission line, said repeater system including two amplifying transmission paths, one for transmitting in one direction, and the other for transmitting in the opposite direction, and a non-amplifying attenuation equalizing means associated with the repeater system and said transmission line, said equalizing means being so proportioned with reference to



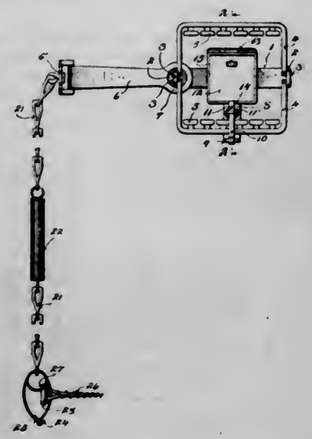
the line that the resultant attenuation of currents transmitted over the system will vary with frequency in a predetermined manner.

1,454,012. TURNING INDICATOR FOR AUTOMOBILES. LEIF TORJUSEN BOLKESJÖ, Notodden, Norway. Filed Dec. 6, 1922. Serial No. 605,274. 6 Claims. (Cl. 116—46.)



1. In a signalling device, a prime mover, a signal element, and power transmitting means for driving the signal element from the prime mover, said power transmitting means including a manually controlled device for connecting and disconnecting the prime mover from the signal element.

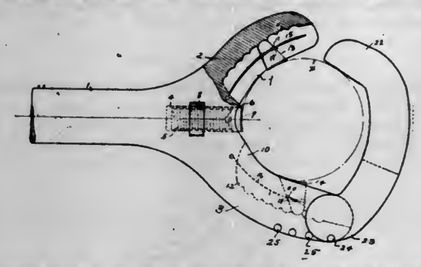
1,454,013. CHAPLET. CHARLES W. BOULTON, Waltham, Mass. Filed May 24, 1922. Serial No. 563,453. 2 Claims. (Cl. 40—2.)



1. In a chaplet of five decades, a connecting piece between the first and last of said five decades having an indicator projecting from one portion of said connecting piece to direct the user in telling the beads, and a series of directional elements spacing said decades.

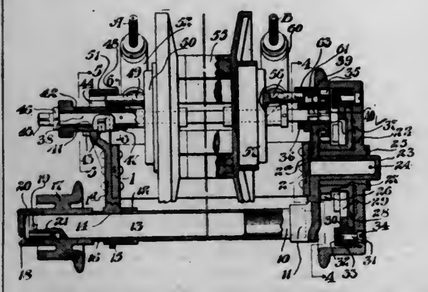
1,454,014. FINGER GUARD FOR THE LINE-SPACE AND CARRIAGE-RETURN LEVERS OF TYPEWRITERS. WINIFRED VIOLET REDFERN and ALFRED EDWARD REDFERN, Victoria, British Columbia, Canada, assignors of one-third to Charles Edward Redfern, Victoria, British Columbia, Canada. Filed May 9, 1922. Serial No. 559,603. 1 Claim. (Cl. 197—180.)

In a typewriter and in combination with the line space and carriage return lever thereof, said lever having a thumb or finger engaging portion: a resilient pad having an area corresponding to said thumb or finger engaging portion and one or more loops integral with said pad adapted to surround the thumb or finger engaging portion and retain the pad in contact with said portion.



1,454,015. ANIMAL TRAP. MICHAEL SCHUETZ, Sheboygan, Wis., assignor of one-fourth to Frank Schommer, Sheboygan, Wis. Filed June 9, 1922. Serial No. 567,081. 1 Claim. (Cl. 43—92.)

A spring trap, a vertically pivoted trigger plate actuable to release the jaws of the trap upon depression, a receptacle, the side walls of which surround the trigger plate, said plate serving as a closure for said receptacle, and one of the side walls being pivoted to permit access to the receptacle for the purpose of setting the trigger.



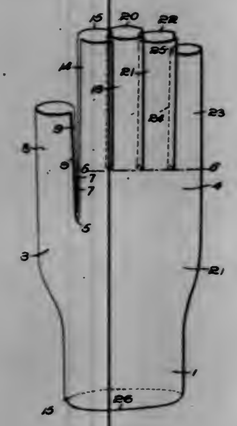
1,454,016. PIPE WRENCH. BUFORD J. STEEN, Christine, Tex. Filed Oct. 5, 1920. Serial No. 414,805. 3 Claims. (Cl. 81—66.)

1. A wrench, including a handle, one end of which is formed with diverging jaws, said handle having a socket between the jaws, a dog mounted in said socket, means for adjusting said dog, the inner faces of said jaws

having slots, a dog adjustably mounted in each slot, and a claw adjustably mounted on one of said jaws.

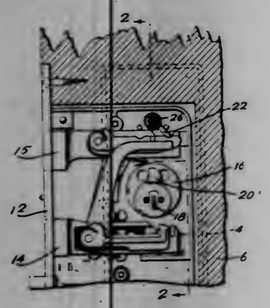
1,454,017. REEL. MORRIS P. HOLMES, Claremont, N. H., assignor, by mesne assignments, to The Jeffery Manufacturing Company, Columbus, Ohio, a Corporation of Ohio. Filed Nov. 20, 1916. Serial No. 132,451. 40 Claims. (Cl. 191—12.)

1. In a reel transporting means, wheeled reel supporting axles disposed in different horizontal planes, a reel, and means for supporting said reel for rotation about an axis spaced from said first mentioned axes and whereby said reel intersects one of said planes.



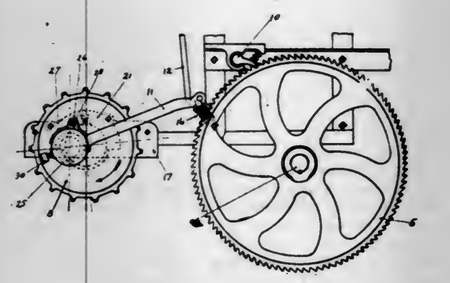
1,454,018. LAWN-EDGE TRIMMER. JOSEPH LEES, Allentown, Pa. Filed May 12, 1920. Serial No. 380,809. 3 Claims. (Cl. 97—227.)

2. A lawn edge trimmer comprising a blade, a distance-gauging pointer which is bendable to indicate various



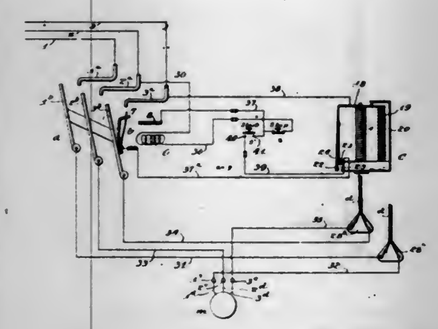
distances from the blade, a turf remover, with a bent and recessed portion carried on the face of the blade, and means for clamping the remover in any position and the pointer in the recess of said portion.

1,454,019. GLOVE AND METHOD OF MAKING THE SAME. GEORGE P. BOSWORTH, Central Falls, R. I., assignor to Hemphill Company, Central Falls, R. I., a Corporation of Massachusetts. Filed May 26, 1919. Serial No. 299,788. 20 Claims. (Cl. 66—4.)



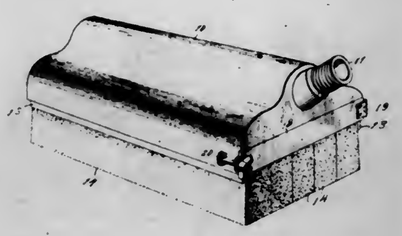
1. A knitted glove having a seamless hand covering, a thumb covering knitted integral with the hand covering and having a seam only at the inside and across the end thereof, a fourth finger covering having a seam extending only along the inside and across the top thereof, and third, second and first finger coverings having seams at opposite sides and across the ends thereof.

1,454,020. LOCK. ERNEST L. TEICH, New Britain, Conn., assignor to The American Hardware Corporation, New Britain, Conn., a Corporation of Connecticut. Filed Jan. 25, 1922. Serial No. 531,587. 7 Claims. (Cl. 70—46.)



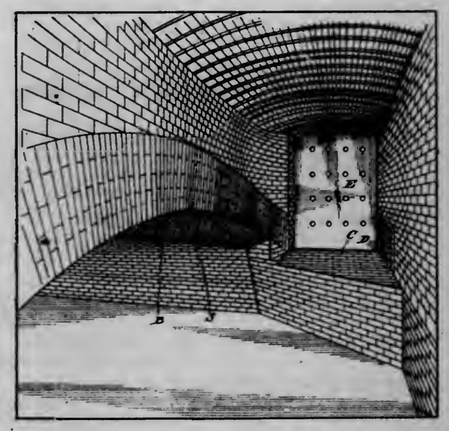
2. A lock of the class described having in combination, a main bolt and an auxiliary bolt having connections between them, a device operable from the outside of the door for projecting and retracting the main bolt, and a device operable from the inside of the door for projecting and retracting the auxiliary bolt, both of said devices being operable by a common key and the second mentioned device being constructed to prevent removal of the key when the auxiliary bolt has been projected thereby.

1,454,021. SELF-LUBRICATING WHEEL AND PITMAN. EDGAR C. LITCHFIELD, HENRY L. LITCHFIELD, and VICTOR SPEER, Waterloo, Iowa; said Speer assignor to said Edgar C. Litchfield and said Henry L. Litchfield. Filed July 18, 1921. Serial No. 485,424. 10 Claims. (Cl. 74—38.)



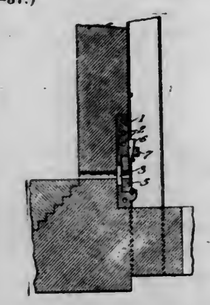
1. A wheel having on opposite sides cup-shaped bearing members whose open ends are directed outwardly, one of said bearing members being at the axis of the wheel and the other being displaced from said axis.

1,454,022. THERMALLY-CONTROLLED SWITCH. GEORGE H. WHITTINGHAM, Baltimore, Md., assignor to Monitor Controller Company, Baltimore, Md., a Corporation of Maryland. Filed July 10, 1922. Serial No. 573,857. 5 Claims. (Cl. 172—179.)



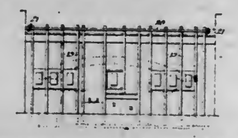
1. The combination with normally open main and auxiliary switches and a magnet for closing the same, of a thermostat relay having two sets of contacts adapted to open successively when the thermostat is heated, a normally open start switch, a circuit for initially energizing the magnet including the relay contacts first to open and the start switch, and a holding circuit for the magnet including the relay contacts last to open and the auxiliary switch.

1,454,023. FOUNTAIN BRUSH. GEORGE M. GALE, San Antonio, Tex. Filed Feb. 28, 1922. Serial No. 539,823. 2 Claims. (Cl. 15—127.)



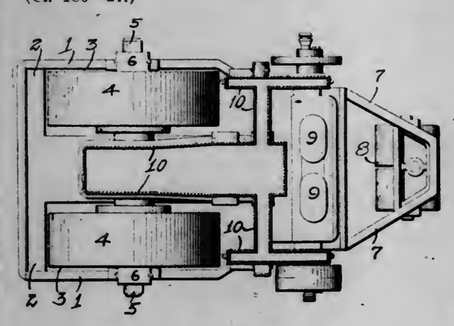
1. A fountain brush including a hollow head portion having longitudinal side-grooves, tongued slides engageable with the grooves of the holder, felt strips arranged side by side and extending longitudinally between the said slides, means fastening the strips to the slides, said strips providing a bottom for the hollow head, said head having a hose connection, and the strips being notched to provide conduits between the strips.

1,454,024. REVERBERATORY SMELTING FURNACE. ARCHIE NOEL JETTE, Anaconda, Mont. Filed Aug. 10, 1920. Serial No. 402,556. 14 Claims. (Cl. 263—40.)



1. A reverberatory furnace comprising a furnace chamber and means for heating the same, a secondary chamber at the exit forming a metal bay, said secondary chamber being of sufficient size to permit the gases coming from the furnace to expand, and an exit flue from the secondary chamber having a damper therein.

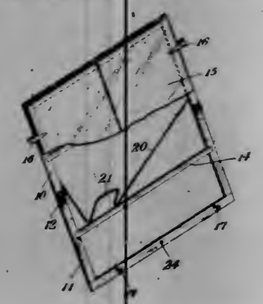
1,454,025. SMELTING FURNACE. ARCHIE NOEL JETTE, Anaconda, Mont. Original application filed Aug. 10, 1920, Serial No. 402,556. Divided and this application filed Jan. 3, 1921. Serial No. 434,759. 5 Claims. (Cl. 266—37.)



1. In a reverberatory furnace, a cast-iron plate having a tap-hole and a recess in the front thereof, a tap-hole block seated in the said recess and means for detachably securing the block in the recess.

1,454,026. CONSTRUCTION OF SMELTING FURNACES. ARCHIE NOEL JETTE, Anaconda, Mont. Original application filed Aug. 10, 1920, Serial No. 402,556. Divided and this application filed Jan. 3, 1921. Serial No. 434,760. 5 Claims. (Cl. 263—46.)

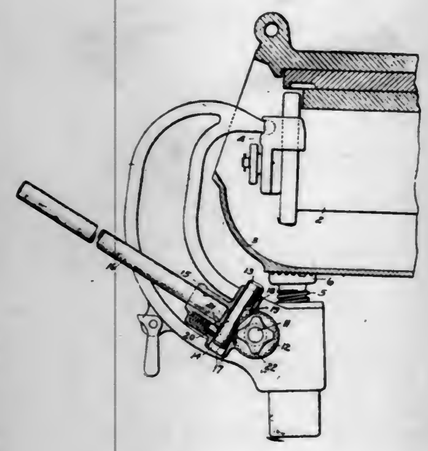
1. The combination with a reverberatory furnace, of frame constructions bearing on opposite ends of the furnace, lateral skew-back plates for supporting the arch of the furnace and connected with the said frame constructions to serve as ties therebetween.



1,454,027. TRACTOR. WILLIAM KNUDSEN, Fremont, Nebr. Filed Apr. 15, 1919, Serial No. 290,264. Renewed Sept. 20, 1922. Serial No. 589,487. 6 Claims. (Cl. 180—27.)

1. In a tractor having a motor and a frame structure providing a chassis extending continuously around the tractor, a platform confined with the frame structure, and a casing adapted to house the driving means from the motor to the driving axle, said casing comprising a unitary structure divided horizontally into upper and lower sections, the latter being fixed and the former being re-

movable, providing means for obtaining access to the driving means, said lower section of the casing adapted to support the bearings for the drive shafts of the driving means.



1,454,028. NEWSPAPER EASEL. ANDY KROL, Uniontown, Pa. Filed Oct. 16, 1922. Serial No. 594,682. 1 Claim. (Cl. 45—57.)

A newspaper easel comprising a sectional frame composed of two like elements each consisting of two side members and a transverse member connecting therebetween, hinges engaging the adjacent ends of said side members, hooks and eyes disposed at the opposite sides of said hinges, flexible supports extending across each pair of side elements, means on the lower transverse bar for supporting articles disposed on the frame, removable means engaging the articles to the upper section of said frame, and means removably engaging the side elements of said frame for adjustably supporting the same.

1,454,029. SELF-LOWERING JACK. CHARLES WILLIAM RIPSCH and JAMES C. DAWLEY, Dayton, Ohio, assignors to The Joyce-Cridland Company, Dayton, Ohio, a Corporation of Ohio. Filed June 27, 1921. Serial No. 480,540. 14 Claims. (Cl. 254—34.)

1. In a lifting jack, a frame adapted to be suspended from a car journal, a lifting element carried by said frame and adapted to extend beneath the load to be lifted, means to actuate said lifting element to elevate the load, said lifting element being of such a character that when unrestrained it will move downward under the weight of the load, and manually operable means for controlling the downward movement of said lifting element.

7. In a lifting jack, a frame, a lifting element carried by said frame and having a screw threaded portion, a nut rotatably mounted in said frame to receive said threaded portion of said lifting element, the threads of said lifting element and said nut having such a pitch that the downward thrust of said lifting element will rotate said nut, a worm wheel connected with said nut, a worm meshing with said worm wheel and adapted to be rotated thereby, means for actuating said worm to impart upward movement to said lifting element, and a device connected with said worm to control its movement by said worm wheel.

Patents Nos. 1,454,030 to 1,454,839.

THE
OFFICIAL GAZETTE
OF THE
United States Patent Office.

Vol. 310—No. 2. TUESDAY, MAY 8, 1923. Price—$5 per year.

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscriptions, $5.00 per annum; single numbers, 10 cents each.
Printed copies of patents are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.

ADVERSE DECISIONS IN INTERFERENCE.

In interferences involving the indicated claims of the following patents, final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,086,489, W. R. Walker, Treating steel in electric furnaces with basic hearths, decided Feb. 24, 1923, claims 1, 2, 3, 4, 5, 7, 8, and 9.

Pat. 1,355,594, B. G. Dunham, Telephone-exchange system, decided Mar. 31, 1923, claims 1, 2, 3, 7, 8, 10, 11, and 12.

Pat. 1,390,105, B. H. Erwin, Drawbolt, decided Mar. 29, 1923, claim 1.

Pat. 1,404,796, H. B. Schofield, Cooling system for internal-combustion engines, decided Mar. 27, 1923, claims 1, 2, 3, 4, and 5.

Pat. 1,430,777, W. O. Wille, Signaling device for vehicles, decided Mar. 17, 1923, claims 1, 2, and 6.

TRADE-MARK REGISTRATIONS CANCELED.

112,823. Sleeping garments—viz, night robes and pyjamas. Ernest Simons Mfg. Co., of Port Chester, N. Y. Registered August 29, 1916. Canceled March 13, 1923.

159,889. Maltless beverages, more specifically soda water. Grone & Co., of St. Louis, Mo. Registered October 10, 1922. Canceled March 28, 1923.

165,882. Vegetable preparation for assimilating the food by regulating the stomach and bowels of infants and children, thereby promoting digestion. The Centaur Company, of New York, N. Y. Registered March 20, 1923. Canceled April 21, 1923.

New Edition of the Patent Laws.

A new edition of the patent laws of the United States has been issued, revised to April 1, 1923.

Disclaimer.

1,452,429.—*George T. Lemelin*, Springfield, Mass. SPRING OILER. Patent dated April 17, 1923. Disclaimer filed April 21, 1923, by George T. Lemelin and by Edward A. Menard, assignee of one-half interest.

Hereby enter this disclaimer to said patent in toto.

Interference Notices.

U. S. PATENT OFFICE, *Washington, Apr. 11, 1923.*

Austin Poor & Co., its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of Ireland Bros., Inc., of 102 Franklin Street, New York, N. Y., for registration of a trade-mark and trade-mark registered June 26, 1906, No. 54,319, to Austin, Poor & Co., of 72 Leonard Street, New York, N. Y., and a notice of such declaration sent by registered mail to said Austin, Poor & Co. at the said address having been returned by the post office undeliverable, notice is hereby given that unless said Austin Poor & Co., its assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

KARL FENNING,
Assistant Commissioner.

U. S. PATENT OFFICE, *Washington, Apr. 16, 1923.*

Jiffy Apron Company, its assigns or legal representatives, take notice:

An interference having been declared by this Office between the applications of Jiffy Jumper Mfg. Co., of 39 West Adams Street, Chicago, Ill., and Guiterman Brothers, of Fourth and Sibley Streets, St. Paul, Minn., for registration of trade-marks and trade-mark registered February 9, 1915, No. 102,521, to Jiffy Apron Company, 255 Gratiot Avenue, Detroit, Mich., and a notice of such declaration sent by registered mail to said Jiffy Apron Company at the said address having been returned by the post office undeliverable, notice is hereby given that unless said Jiffy Apron Company, its assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

KARL FENNING,
Assistant Commissioner.

Condition of Applications Under Examination at Close of Business April 27, 1923

(Total number of applications awaiting action, excluding Trade-Mark Division, 73,728; Trade-Mark Division, 3,909. Oldest new case, May 2, 1922; oldest amended, May 18, 1922. The dates given are 1922 except where * indicates 1923.)

Room No.	Divisions, Examiners, and subjects of inventions.	Oldest new application and oldest action by applicant awaiting office action. New.	Amended	No. of applications awaiting action.

DECISIONS IN PATENT AND TRADE-MARK CASES.

Commissioner's Decision.

JACOBSEN *v.* CARLSON.

Decided February 17, 1923.

INTERFERENCE—SUBSTITUTION OF REISSUE APPLICATION FOR PATENT, WITH ISSUE UNCHANGED.

A patentee involved in interference can not file a reissue application and have it substituted for the patent, the issue remaining the same, and have the interference dissolved on the ground of unpatentability of the issue.

ON PETITION.

FUEL-BURNING APPARATUS.

Mr. Richard Eyre for Jacobsen.

Messrs. Brown, Boettcher & Dienner for Carlson.

FENNING, *Assistant Commissioner:*

Patent No. 1,361,263 issued to Jacobsen. Carlson, having an application filed before Jacobsen's application was filed, copied claim 3 of the Jacobsen patent, which the Examiner refused to allow to him. On appeal the Examiners in Chief held that Carlson was entitled to make the claim, and this interference was accordingly declared. Jacobsen, alleging that the count is broader than is justified by the prior art and realizing that since he had a patent he could not move to dissolve the interference on the ground that the issue was unpatentable, filed a reissue application including the present count and other narrower claims. He then moved to substitute the reissue application for his patent in the interference, believing that the contest would then be between two pending applications and the question of the patentability of the claim could be raised. This motion was denied. This was right, else it would be possible in substantially every interference involving a patent for the patentee to file an application for reissue, move to dissolve on the ground of nonpatentability, and if he prevailed and the interference were dissolved then abandon his reissue application and retrieve his original patent. This would be merely doing by indirection what cannot be done directly; but it cannot be allowed.

Jacobsen has also petitioned the Commissioner to exercise supervisory authority and determine that the count is unpatentable, and so terminate the interference. Since the count is the claim of an issued patent and since it has been allowed to applicant after an appeal to the Examiners in Chief, the showing to justify holding the claim invalid must be exceptionally strong, and such showing is not present here.

I have gone into the matter sufficiently to satisfy myself that Carlson is entitled to make the claim and also that there is a real difference between the inventions of Carlson and Jacobsen, on one hand, and the inventions of the Doble patent and the Scott patent of the prior art. In Doble the ignition circuit and the blower circuit are closed at the same time and through a single contact. The same is true with respect to Scott. It is clear, therefore, that neither of these can meet the claim which calls for separate and successive closures of the ignition circuit and the blower circuit.

The Law Examiner is affirmed.

The petition is denied.

Court of Appeals of the District of Columbia.

IN RE SCHROEDER.

Decided June 5, 1922. No. 1,448.

1. PATENTS—REISSUE WITH BROADER CLAIMS NOT GRANTED AFTER LAPSE OF TWO YEARS, EXCEPT UNDER SPECIAL CIRCUMSTANCES.

Where more than two years have elapsed between the issue of the original patent and the filing of the reissue application, abandonment of improvements not claimed will be presumed unless the delay is accounted for or excused by special circumstances, and a reissue with broader claims will not be allowed after the lapse of that time.

2. SAME—FACT OTHER PATENTEES HAVE ACQUIRED RIGHT TO UNCLAIMED IMPROVEMENT DOES NOT DEFEAT LIMITATION AGAINST REISSUE.

The right of the public to use whatever was disclosed in an application for a patent, but not claimed, is sufficient to warrant the denial of a reissue patent containing broader claims after the lapse of two years where only the rights of the applicant and the public are to be considered, notwithstanding the fact that intervening patentees have since claimed the abandoned matter, and thereby prevented the public from enjoying the fruits of the abandonment.

APPEAL from the Commissioner of Patents.

In the matter of the application of Simon E. Schroeder for reissue of a patent. From a decision of the Commissioner of Patents, denying the application, applicant appeals. Affirmed.

Mr. Percy B. Hills and *Mr. William V. Tefft* for the appellant.

Mr. T. A. Hostetler for the Commissioner of Patents.

VAN ORSDEL, *J.:*

This appeal is from the decision of the Commissioner of Patents, denying appellant's application for reissue of a patent relating to improvements in gearing.

There are 46 claims, the first 7 of which are claims of the original patent. The remaining 39 are copied from patents, the applications for which were copending with appellant's original application, and, with one exception, filed prior to appellant's application.

[1] It is unnecessary to consider the subject-matter of the invention, since the appeal raises only questions of law. The application for reissue was filed over four years after the issue of the original patent, and it is conceded that the 39 claims copied from other patents are broader than the claims of the original patent. Applicant, therefore, comes clearly within the well-established rule of reissue that where, as here, more than two years have elapsed between the issue of the original patent and

the filing of the reissue application, abandonment will be presumed, unless the delay is accounted for or excused by special circumstances.

This court in the case of *In re Starkey* (21 App. D. C., 519; 104 O. G., 2150), following *Mahn* v. *Harwood* (112 U. S., 354; 5 Sup. Ct., 174; 6 Sup. Ct., 451; 28 L. Ed., 665; 30 O. G., 657), *Topliff* v. *Topliff et al.* (145 U. S., 156; 12 Sup. Ct., 825; 36 L. Ed., 658; 59 O. G., 1257), and a long line of decisions of the Supreme Court, said:

We must now regard the law as well settled by the Supreme Court of the United States that, after the lapse of two years after the issue of a patent, a reissue which seeks to enlarge the claims of the original patent will not be granted, or, if granted, will be held invalid, unless special circumstances are shown to excuse the delay.

The tribunals below found that there were no mitigating circumstances which would bring appellant within the exception to the rule, and with this holding we are in accord.

[2] Appellant contends that we are not at liberty to consider the effect of intervening patents or pending applications, but only rights as between himself and the public; and, since no rights have inured to the public, because of intervening patents embracing the claims here involved, the limitation of the statute is without application to this case. After the lapse of two years from the issue of appellant's patent, the public had a right to use whatever had not been claimed. Appellant's dedication to public use of whatever was unclaimed in his invention inured to the public, and the mere fact that intervening patentees claimed the abandoned matter, and thereby prevented the public from entering and enjoying the fruits of appellant's abandonment, affords him no relief.

The property right in a patent is purely statutory, and, whenever the patent fails, no property right remains; the invention belongs to the public. If the public is estopped by the claims of others, it is no concern of the one who has suffered a statutory forfeiture. It is the fate which the law inflicts for failure to claim the invention within the statutory time, irrespective of what others may have done during the period of delay. The effect of their operations upon the right of the public to avail itself of the delay and consequent abandonment in no respect alters appellant's status or weakens the presumption of abandonment to the public. Appellant's situation, therefore, is not different from what it would have been, had no patents, containing the claims of the present issue, intervened.

The decision of the Commissioner of Patents is affirmed.

U. S. Circuit Court of Appeals—Second Circuit.

VICTOR TALKING MACH. CO. *v.* STARR PIANO CO.

Decided April 4, 1922.

[281 Fed. Rep., 60.]

1. PATENTS—896,059, FOR DISK SOUND RECORD FOR TALKING MACHINES, HELD VOID FOR LACK OF INVENTION AND FOR ABANDONMENT.

The Johnson patent, No. 896,059, for disk sound record for talking machines, claims 6 and 8, *Held* void for lack of invention and also for abandonment.

2. SAME—KEEPING INVENTION SECRET FOR YEARS CONSTITUTES "ABANDONMENT."

The keeping of a process secret for years by the inventor constitutes abandonment under the patent laws.

3. SAME—EXPENDITURES FOR NECESSARY EXHIBITS HELD TAXABLE AS COSTS.

Expenditures made for motion pictures and photographs of cutting tools in operation and of the grooves made by these tools, where both tools and grooves were microscopic, and the pictures were necessary to enable the court to understand the processes involved, *Held* taxable as costs.

APPEAL from the District Court of the United States for the Southern District of New York.

Suit in equity by the Victor Talking Machine Company against the Starr Piano Company. Decree for defendant, and complainant appeals. Affirmed.

STATEMENT OF THE CASE.

Appeal by the plaintiff from a decree of the United States District Court for the Southern District of New York, dismissing the bill of complaint for lack of invention and for abandonment.

The suit was to restrain alleged infringement of United States Letters Patent No. 896,059, granted August 11, 1908, to Eldridge R. Johnson. The specification states:

My invention relates to improvements in sound records of either the cylindrical or disk type, and has for its object to provide an improved record such that the walls of the grooves shall be so formed as to reproduce the sounds of the record in tones more clear and distinct than has heretofore been possible from records of prior construction.

In forming records upon sound recording machines for use in talking machines, such as the gramophone, where the sound waves are recorded in the form of a groove of even depth having lateral undulations as distinguished from an undulatory groove of varying depth, as in the type of machines of which the phonograph is an illustration, it is essential, in order to produce a clear record, that the material be neatly and cleanly cut from the grooves in the process of recording so that smooth, well-defined surfaces be formed in the walls of a well-defined groove.

In the art of making sound records comparatively little attention has been paid to the finishing and the forming of the surfaces of the walls of the record groove. The vertical groove has heretofore been cut by a recording tool, which, owing to the character of the groove and the shape of the tool, has not only had a tendency to tear the material of the record, or distort the same, so as to form roughnesses which, in the reproduction of the record or its duplicate, cause disagreeable sounds, owing to the harsh vibrations of the diaphragm caused thereby, but also, among other things, in the vertical type of record, the resistance on the cutting stylus in gouging out the material increases in proportion to the depth, which objection is overcome in my cut laterally undulating record groove, where the resistance to the force exerted by the cutting stylus is uniform and even.

I have discovered by careful experiments that the best results are obtained in a cut-out laterally undulatory groove of substantially constant depth in a record tablet, preferably of wax or other suitable material, and furthermore, when the walls of the groove diverge from the bottom of the same to the surface of the record, or, more specifically, when the walls of the groove are formed by surfaces which in cross section give the lines of a segment of an ellipse, the groove being widest at its mouth, and gradually diminishing in its width toward the bottom. By this construction, the material is neatly and accurately cut out, and forms a groove having smooth and well-defined walls. The recording needle has greater freedom of oscillation, and by reason of the relative contour of the walls of the groove with the outline of the needle this construction prevents any binding effect and secures a maximum ease of movement of the needle with a minimum of wear upon the record. * * *

It is understood that in reproducing, the record thus formed may be used for reproducing purposes directly, or a more durable and indestructible record may be reproduced by various processes from the original record. * * *

The claims relied upon are the following:

6. A disk sound record having a laterally undulatory groove of substantially constant depth in which the record groove was formed by cutting out and removing the material in forming the record grooves, the walls of the said groove diverging from the bottom of the same to the surface of the record tablet.

8. A disk sound record comprising a spirally disposed laterally undulatory groove of substantially constant depth in which the record groove was formed by cutting out and removing the material in forming the record groove, substantially as described.

The defenses were lack of invention, anticipation, and abandonment.

A preliminary injunction was denied in the district court and also on appeal by this court (263 Fed., 82).

Messrs. Kenyon & Kenyon (*Mr. William Houston Kenyon, Mr. Richard Eyre, Mr. John D. Myers, Mr. George T. Bean*, and *Mr. Edgar F. Baumgartner*) for the plaintiff.

Messrs. Kerr, Page, Cooper & Hayward (*Mr. Parker W. Page, Mr. Drury W. Cooper*, and *Mr. Thomas J. Byrne* of counsel) for the defendant.

Before ROGERS, Circuit Judge, and AUGUSTUS N. HAND and KNOX, District Judges.

AUGUSTUS N. HAND, *Dis. J.* (after stating the facts as above):

[1] The invention claimed in the patent in suit and expressed in the two claims in issue is defined by complainant's counsel as embodying: (1) A master record, (2) in disk form, (3) with spiral laterally-undulating sound-record groove of the gramophone type, i. e., of microscopic size and of uniform depth and trench-like for piloting as well as for sound-reproducing purposes, (4) the groove being formed by the direct action of sound waves, (5) in wax or waxlike material, (6) cut out and the material of the groove removed (7) in such way that it becomes and is a well-defined groove of uniform size throughout having continuously smooth, well-defined side walls, both of the smooth side walls contributing by their lateral undulations an accurate reproduction of the composite sound wave being recorded, (8) the groove being everywhere and uniformly diverging (this last limitation appearing in claim 6, and not in claim 8).

The patent in suit came from a division in the Patent Office. The original application was stated to relate to an invention for improvements in cutting tools for sound-recording machines. It was filed August 16, 1898, and finally resulted in Patent No. 778,975. The original specification nowhere claimed any invention for laterally cutting a wax tablet for use as a matrix or for direct reproduction. Indeed it said:

In practice in the production of a record a thin metal plate may be employed upon which is evenly distributed a coating or layer of semiplastic material or partly hardened varnish, or other suitable material. * * *

I have herein referred briefly to the class of machine to which my invention is particularly applicable, so that the cutting operations may be understood, but, as the cutting tool alone is the subject of my present invention, I have not deemed it necessary to herein illustrate, or further describe, the construction of machine to which it may be applied. * * *

The object of my present invention is to provide a cutting tool for cutting grooves in wax or other suitable material for recording sound waves. * * *

The only suggestion in the original specification of a wax matrix capable of direct reproduction is in the following:

It is understood that in reproducing the record thus formed may be used for reproducing purposes directly, or a more durable and indestructible record may be reproduced by various processes from the original record. This feature, however, forms no part of my present invention herein described.

A wax matrix for reproduction was not only not claimed as an invention, but manifestly the process first described referred to the sort of process already in use by Berliner carried out with an improved kind of tool. In the Berliner process a metal plate was coated with lamp-black or other material on which was traced a laterally undulatory record to expose the surface of the disk, which was then etched to form the record groove. Even though cutting out a wax tablet was contemplated, the reference was incidental, and was not claimed as an invention even when the divisional application was filed in 1904. The claims of 1904 related to the shape of the laterally-formed groove. Even then Johnson apparently regarded everything else as old.

Difficulties had been encountered in making satisfactory records by the etching process of Berliner, and in December, 1897, Johnson was employed by the Berliner Company to devise a "new system of taking gramophone records and making matrices" that would "give * * * better results." Nafey worked for Johnson in 1898, and left about September of that year. He was succeeded by Rhinehart, who was asked whether he said to a man named Pancoast that Johnson's apparatus was a failure before Rhinehart came. To this he replied:

Well I may have said it looked like a failure, or something like that. A man would say offhand, you know, when a man is on his oath and is supposed to tell the truth, that he will tell things as straight as he can. If you are just talking to a man ordinarily, you are not so particular whether it is absolutely straight or not. It is more like a story.

Now, whatever preliminary steps Johnson may have made, it was not until 1900, just before Turner came to England, that the process was completed. As Royal, the secretary of the Victor Talking Machine Company, said in his affidavit in 1901: "We never used the first process purchased in 1898." To be sure, Royal testified at the trial of the present suit that his statement was not intended to apply to the cutting out of a lateral groove in wax, but the testimony of Johnson and his witnesses is insufficient to meet the burden Johnson has in order to overturn the application of Jones filed November 18, 1897, nine months prior to the filing date of the patent in suit. The Jones patent, No. 688,739, related to the commercial production of sound records, and had for its object the production of—

a number of copies of an original record characterized by lateral undulations of substantially uniform depth. Heretofore records of this character, generally known as "gramophone records," have been produced by first tracing the lateral undulations or zigzags in a fatty (inky) film that protects an etching surface, then etching this tracing into the material to form a groove, then running a blunt stylus through this groove to smooth the ragged etched surface, and finally electroplating this touched-up surface and pressing the matrix so formed into a suitable material to form the commercial record. The etching process, for reasons unnecessary to state, causes considerable departure or deviations, so that the etched groove is far from being a correct representation of the path of the recording stylus. The deformations from this cause are still further exaggerated by the use of the smoothing stylus. I avoid these objections by producing in the first instance a fully finished original record whose grooves are of the final depth required, slight, but appreciable, thus doing away with the necessity for etching and the subsequent smoothing made necessary thereby. The original records made by this process are electroplated, and the electroplate matrix used as a die in the ordinary manner.

In carrying out my invention I employ a disk or tablet, of suitable recording material (as wax or wax-like

composition, preferably rendered sufficiently hard, as by an admixture of rosin, to withstand the treatment employed in giving it an electrical conducting surface). Upon the surface of this tablet I then form by the use of a sound-recording machine in a well-known manner a spiral groove of practically uniform depth that contains lateral sinuosities or irregularities corresponding to or representing the sound waves recorded. This cutting or engraving of a record groove by the lateral movement of the stylus differs from the operation of the well-known graphophone system in that the resistance offered the stylus of a gramophone in cutting downward to produce the vertical irregularities characteristic of that system varies practically as the cube of the length of the vibrations of the diaphragm and stylus, whereas in producing my original records the resistance encountered by recording stylus is exactly equal to the length of the vibrations. On account of this difference in principle I am enabled to obtain more accurate, and therefore better, records of the original sounds. The original record so formed is an exact copy of the record to be used for reproducing. It is a complete and finished record, its grooves being of a slight yet appreciable depth, and no deepening or retouching by an etching fluid or in any other manner is required. * * *

The specification (page 2, line 50) of the patent in suit states:

It is understood that in reproducing the record thus formed may be used for reproducing purposes directly, or a more durable and indestructible record may be reproduced by various processes from the original record.

It was contended by complainant's counsel that Jones did not intend to employ a cutting out process from a wax record because the word "cutting" was injected into his specification two or three years after the original application was filed in the Patent Office. He did, however, use the word "engraved," and in his specification as originally filed said:

I first make a plate or disk of hard wax, preferably beeswax hardened by the adding of a small quantity of rosin or pitch.

This plate or disk is then placed upon an instrument commonly employed for the purpose of recording sound vibrations, and a helical groove of even depth containing sinuosities representing sound waves produced by the movement of the diaphragm and stylus is engraved upon the plate or disk.

We think it evident that this was a cutting-out process within the meaning of the art and the words used in the Johnson specification and claims.

The Jones patent seems to disclose the same process as the patent in suit and to include the process for making a sound record cut out of a wax tablet described in claims 6 and 8 in issue. Indeed, Johnson himself admitted in a former litigation that he could see no difference between the Jones process and his. Judge Mayer held in *American Graphophone Co.* v. *Emerson Phonograph Co.* (D. C., 255 Fed., 574) that the patent in suit did not anticipate the Jones patent.

It is a significant fact that Johnson controlled the Universal Talking Machine Manufacturing Company, which was the defendant in the suit of *American Graphophone Co.* v. *Universal Talking Machine Manufacturing Co.* (151 Fed., 595; 81 C. C. A., 139), brought for infringement of the Jones patent, and that it was never contended in that case that the invention of the patent in suit was prior art or anticipated the Jones patent. It was not until after the Jones patent was sustained by this court in the litigation last mentioned that Johnson attempted in his divisional application to expand his claims by employing the words—

cutting out and removing the material forming the record groove,

and we think that the fact that such a method was disclosed by the Jones process cannot be reasonably doubted. Anything that remained to be done to perfect the mechanism commercially was a matter of shop practice which skilled operatives could work out by careful experiments, and was not developed beyond the disclosure of the Jones patent by any improvement which Johnson has set forth. It is not uncommon for inventors to seek to interpret an old application in such a way as to cover an expanding art, but it is legally of no avail. (*American Graphophone Co.* v. *Emerson Phonograph Co.*, D. C., 255 Fed., 574).

In the Edison British patent to Couraud, No. 15,206, 1891, the specification says, at page 4:

The recording surface of the phonogram blank is ordinarily made of wax or wax-like material, and it might be supposed that a steel tool of the best quality would be satisfactory for employment in connection with such a comparatively soft substance. It has, however, been found that such tools are liable to become rough. This is partly due to the chemical action of acids or other substances present in the wax or wax-like composition, of which the phonogram blank is made, and partly to the dulling and roughening action of the fine particles of silica or other hard material which get accidentally mixed with the wax during its manufacture into a blank, or which lodge on the surface of the blank itself. After many trials, it has been discovered that sapphires and similar jewels act in the most effective manner on the wax or wax-like phonogram blank, since the acids thereof do not attack them; they do not rust; and they are able to withstand the dulling action of the hard particles of silica or other substances.

A jewel-cutting tool suitable for the recorder may be in the shape of a cylinder, the outer end being hollowed out; this leaving a curved sharp edge for cutting the surface of the blank. This particular form is, however, not essential. It is mounted in a socket or sleeve at one end of a pivoted lever, the opposite end of which is connected to the diaphragm. * * *

The recorders hitherto used are moved by the diaphragm toward and away from the surface of the blank. An improved form of recorder, in which the recording point moves laterally in a succession of minute arcs, has, however, been devised.

The specification further says, at page 11:

Vibrations are more truly recorded in this manner than by indenting the blank in the usual way; the reproduced sounds being accordingly improved.

The foregoing patent clearly covers cutting from a wax tablet. The Bell and Tainter patent, No. 341,214, granted May 4, 1886, also seems to have disclosed lateral cutting. The specification reads (page 1, line 16):

The invention consists thirdly in cutting or engraving the record in the form of a groove with sloping walls, the sound waves being represented by elevations and depressions at the bottom of the groove or otherwise. The advantage of this form of record is that it forms an efficient guide to the reproducing style.

The Volta article describing the work of Bell and Tainter, which became public in 1896, clearly shows that they were familiar with lateral cutting. Indeed, the closeness of the reference of the Bell and Tainter patent to the patent in suit is further indicated by the statement of Bell and Tainter, at page 2, line 4, of their patent, that:

The invention consists, fifthly, in reproducing directly from the wax record. It is found that such record has sufficient strength to withstand the rubbing action of the reproducing style, so that a considerable number of reproductions can be obtained from it. The smoothness of the wax gives it a great advantage in this regard. So far as we are aware, no one has reproduced sound from a wax record by rubbing a style or reproducer over it.

In view of the foregoing language and general scope of the Bell and Tainter patent, we think it reasonable to infer, as Judge Learned Hand did in the court below, that this court in the case of *American Graphophone Co.* v. *Universal Talking Machine Co.*, supra, sustained the Jones patent over the Bell and Tainter patent because of the novelty and usefulness of the combination of the former, and not because any single element thereof was patentable.

Johnson admitted in his examination that the particular difference between the tool described in Figures 5 and 6 of the Bell and Tainter patent, No. 341,214, is that the Johnson tool had sharper lateral edges. The most that can be said of the Johnson patent in suit is that it disclosed a method of cutting out a lateral undulatory groove of substantially constant depth by an improved form of stylus. Everything except the improved tool which his specification discloses seems to have been old, and the improved tool was apparently a matter of workmanship, and at any rate is not an element in the claims in suit.

The master record in disk form, with a spiral laterally-undulating groove of uniform depth, cut in wax, which plaintiff claims as his invention, was directly foreshadowed by Bell and Tainter, Couraud, and Jones. Nothing remained but work for skilled artisans in order to fabricate a satisfactory sound record. Nothing was achieved worthy of a patent in producing the Johnson matrix.

The plaintiff seeks to save the Johnson patent by the large commercial success of the process employed, but commercial success has already been found by this very court to be attributable to the Jones patent, of which plaintiff was a licensee. (*American Graphophone Co.* v. *Universal Talking Machine Co.*, 151 Fed., 595; 81 C. C. A., 139.) Success cannot be attributable to both patents substantially involving the same process. We think it clear that the patent in suit is void for lack of invention. It seems evident that Johnson invented nothing new in the way of a matrix laterally cut out of wax, and that he did not think that he had done so. He, at most, by more experienced workmanship, produced better results through methods that were undoubtedly old than had formerly been secured.

[2] The only reason offered to meet the contention that the invention, if ever made, was abandoned, is that plaintiff's counsel until after the decision in *American Graphophone Co.* v. *Universal Talking Machine Co.*, supra, in which the Jones patent was sustained, advised defendant that the invention for lateral cutting out of wax was invalid under the Bell and Tainter patent, No. 341,214. Under this advice, Johnson for years relied upon keeping his process secret. Such conduct was a clear abandonment under the decisions. (*Kendall* v. *Winsor*, 21 How., 322; 16 L. Ed., 165; *United States Rifle & Cartridge Co.* v. *Whitney Arms Co.*, 118 U. S., 22; 6 Sup. Ct., 950; 30 L. Ed., 53; 35 O. G., 873; *Macbeth-Evans Glass Co.* v. *General Electric Co.*, 246 Fed., 695; 158 C. C. A., 651; 248 O. G., 501.)

[3] Objection is made to the allowance of $841.64 taxed as costs by the defendant for motion pictures and photographs of cutting tools in operation, and of the grooves made by these tools. It is contended by plaintiff's counsel that these items are not allowable under such decisions as *Wooster* v. *Handy* (C. C., 23 Fed., at pages 61, 62); *Cornelly* v. *Markwald* (C. C., 24 Fed., 187); *Hussey* v. *Bradley* (Fed. Cas., No. 6946[a]). In these cases expenditures for models made and used at the trial and for photolithographing sketches introduced by witnesses in giving their evidence were disallowed. They were treated as expenditures relating to argumentative matters, and not to physical exhibits bearing a direct relation to the patent in suit or infringement thereof, such as photographs of models deposited in the Patent Office or of infringing devices. In this case, however, it was practically impossible for the trial court to get a visual idea of the operation of cutting tools and of the character of the grooves formed by them without illustration and enlargement in the way adopted. Both the tools and the grooves were of microscopic proportions, so that the situation, while not without some resemblance to that of models in other cases, should be differentiated because illustration here was necessary to enable the trial court to understand the processes and to make a proper record for review in this court. Much abuse can arise from too free a taxation of such items of costs as are here under consideration, and it would be better practice to obtain an order of the trial court before incurring the expense, but in this particular case the expenditure seems to have been justified. (*The S. V. Luckenbach*, 197 Fed., 888; 117 C. C. A., 214.)

The decree is affirmed, with costs.

PATENT SUITS.

[Notices under section 4921, Revised Statutes, as amended February 18, 1922.)

621,540, H. S. Reynolds, Construction of receptacles; 750,394, same, Method of making metal barrels and like structures, suit filed Nov. 13, 1920, U. S. D. C., S. D. N. Y., Doc. E 19/292, *H. C. Cochrane* v. *The Steel Barrel Co. of America, Inc.* **Dismissed for lack of prosecution.**

ADJUDICATED PATENTS.

(U. S. C. C. A. Ohio.) Haefely patent, 858,384, claims 2, 3, and 5, for machine for manufacturing insulating tubes, *Held* not infringed. *Westinghouse Electric & Mfg. Co.* v. *Formica Insulation Co.*, 286 Fed. Rep., 495.

(U. S. D. C. N. J.) Foster patent, 1,081,731, for electric self-starter, valid and infringed. *Westinghouse Electric & Mfg. Co.* v. *Simms Magneto Co.*, 286 Fed. Rep., 558.

(U. S. C. C. A. N. J.) Foster patent, 1,081,731, for electric self-starter, claims 2, 5, 6, and 7, *Held* void for anticipation. *Simms Magneto Co.* v. *Westinghouse Electric & Mfg. Co.*, 286 Fed. Rep., 562.

(U. S. C. C. A. Del.) Onderdonk patent, 1,123,576, claim 16, for multiple-needle sewing-machine mechanism, *Held* not infringed. *Union Special Mach. Co.* v. *Metropolitan Sewing Mach. Corporation*, 286 Fed. Rep., 519.

(U. S. C. C. A. Calif.) Hotchner patent, 1,259,237, for illuminated sign, not infringed. *Hotchner* v. *Federal Electric Co.*, 286 Fed. Rep., 487.

(U. S. C. C. A. Calif.) Hotchner patent, 1,315,187, for illuminated sign, not infringed. *Hotchner* v. *Federal Electric Co.*, 286 Fed. Rep., 487.

(U. S. C. C. A. N. J.) Krauth reissue patent, 14,189, claims 6, 11–15, for autographic register, *Held* not infringed. *Autographic Register Co.* v. *Diesbach*, 286 Fed. Rep., 470.

TRADE-MARKS

OFFICIAL GAZETTE, MAY 8, 1923.
[VOL. 310. No. 2.]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 14 of said act, a fee of ten dollars must accompany each notice of opposition.

Ser. No. 112,202. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) C. W. JEAN COMPANY, Worthington, Ind. Filed July 18, 1918.

C.W.J. J Superior

No claim is made for the word "Superior" apart from the mark shown.

Particular description of goods.—Eggs.

Claims use since on or about June 1, 1913.

Ser. No. 129,890. (CLASS 19. VEHICLES, NOT INCLUDING ENGINES.) F. H. HEADLEY, Edgbaston, Birmingham, England. Filed Mar. 18, 1920.

TANSAD

Particular description of goods.—Motor Cycles and Perambulators, Pillory-Seat Supports, and Saddles for Motor Cycles.

Claims use since April, 1915.

Ser. No. 139,353. CLASS 39. CLOTHING.) P. GOLDSMITH'S SONS, Cincinnati, Ohio. Filed Nov. 8, 1920.

GOLD SMITH

Particular description of goods.—Bat Bags, Baseball Caps, Bathing Caps, College Caps, Jersey Caps, Men's Sport Clothes, Ladies' Sport Clothes, Athletic Hose, Athletic Jerseys, Basket-Ball Pants, Bathing Pants, Football Pants, Hockey Pants, Jersey Knee Pants, Running Pants, Soccer Pants, Turner Pants; Athletic Shirts, Sweat Shirts, Baseball Shoes, Basket-Ball Shoes, Football Shoes, Gymnasium Shoes, Jumping Shoes, Running Shoes, Striping Shoes; Men's Bathing Suits, Ladies' Bathing Suits; Jersey Tights, Baseball Uniforms, and Baseball Belts and Bathing Belts.

Claims use since Oct. 1, 1901.

Ser. No. 140,073. (CLASS 36. MUSICAL INSTRUMENTS AND SUPPLIES.) SEARS, ROEBUCK AND COMPANY, New York, N. Y., and Chicago, Ill. Filed Nov. 23, 1920.

SILVERTONE

Particular description of goods.—Sound Boxes for Phonographs.

Claims use since October, 1915.

Ser. No. 140,919. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) COLEMAN AND COMPANY LIMITED, Norwich, England. Filed Dec. 11, 1920.

WINCARNIS

Particular description of goods.—Food Preparation Containing Extract of Meat and Other Ingredients, in Liquid and Tablet Form.
Claims use since Feb. 15, 1890.

Ser. No. 141,193. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) JOSHUA GEORGE SMITH, St. Paul, Minn. Filed Dec. 16, 1920.

JEWELS

Particular description of goods.—Chocolates Wrapped in Colored Metal Foil.
Claims use since on or about Jan. 1, 1920.

Ser. No. 142,044. (CLASS 50. MERCHANDISE NOT OTHERWISE CLASSIFIED.) TETRALIN GESELLSCHAFT MIT BESCHRÄNKTER HAFTUNG, Berlin, Germany. Filed Jan. 10, 1921.

Tetralin

Particular description of goods.—Rubber Mats, Waterproofed Fabrics and Rubberized Fabrics, Slabs of Rubber Composition for Use in Making Shoe Soles, Waterproofed Coverings for Persons, Animals, and Vehicles.
Claims use since Dec. 12, 1906.

Ser. No. 142,184. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) VIRDEN PACKING COMPANY, San Francisco, Calif. Filed Jan. 12, 1921.

Particular description of goods.—Smoked Meats.
Claims use since Jan. 1, 1913.

Ser. No. 144,853. (CLASS 50. MERCHANDISE NOT OTHERWISE CLASSIFIED.) DECORATIVE ARTS LEAGUE, New York, N. Y. Filed Mar. 17, 1921.

DecArtS

Particular description of goods.—Art Objects—Namely, Sculpture, Medallions Depressed or in Relief, Art Work, and Reproductions Thereof.
Claims use since Dec. 17, 1920.

Ser. No. 145,403. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) CHARLES VANDER KOOGH, Plainfield, N. J. Filed Mar. 29, 1921.

Vander's
OLIVTASTE

Particular description of goods.—Mayonnaise Dressing.
Claims use since Mar. 18, 1921.

Ser. No. 146,440. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) JOHNSON-APPLEBY COMPANY, Boston, Mass. Filed Apr. 20, 1921.

Particular description of goods.—Canned Fruits, Flavoring Extracts for Foods, Fruit Jams, Fruit Jellies, Fruit Marmalades, Fruit Pie Materials, Fruit Preserves, Fruit Relishes Spiced, Fruit Salad, Melons Spiced as Pickles, Mincemeat, Olive Oil, Olives, Pickles, Preserved Vegetables, Salad Oil, Spiced Fruits as Pickles.
Claims use since June 1, 1896.

Ser. No. 147,426. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) HAWAIIAN PINEAPPLE COMPANY, LTD., San Francisco, Calif., and Honolulu, Territory of Hawaii. Filed May 9, 1921.

PALM ISLAND

Particular description of goods.—Canned Pineapple.
Claims use since Feb. 15, 1921.

Ser. No. 147,649. (CLASS 39. CLOTHING.) VANITY FAIR SILK MILLS, Reading Pa. Filed May 12, 1921.

Mayfair

Particular description of goods.—Ladies' Silk Underwear.
Claims use since Jan. 21, 1921.

Ser. No. 147,960. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) HOOD RIVER APPLE VINEGAR CO., also doing business as Mountain Maid Products Company, Hood River, Oreg. Filed May 20, 1921.

MOUNTAIN MAID

Particular description of goods.—Apple Vinegar, Canned Pork and Beans, Canned Soup, Canned Chile Con Carne, and Canned Mincemeat.
Claims use since 1916.

Ser. No. 148,549. (CLASS 39. CLOTHING.) CHAS. V. PARKER CO., Harrisburg, Ill. Filed June 2, 1921.

No claim is made to the words "Cover Saline County" apart from the showing made in the drawing.
Particular description of goods.—Men's, Women's, and Children's Suits, Cloaks, Overcoats, Hats, Caps; Shoes Made of Leather, Rubber, Fabric, or Any Combination Thereof; Underwear of Knitted or Textile Fabric, Dress Shirts, Negligee Shirts, and Work Shirts, Waists, and Dresses.
Claims use since July 1, 1920.

Ser. No. 148,774. (CLASS 39. CLOTHING.) TOEWEAR HOSIERY INCORPORATED, Norristown, Pa. Filed June 6, 1921.

Particular description of goods.—Hosiery.
Claims use since Apr. 21, 1921.

Ser. No. 149,772. (CLASS 39. CLOTHING.) DR. A. POSNER SHOES, INC., New York, N. Y. Filed June 28, 1921.

The middle of the flag raised by the figure and the letters "o, a, e, e" in the name are lined for red.
Particular description of goods.—Hosiery.
Claims use since about June, 1919.

Ser. No. 151,864. (CLASS 39. CLOTHING.) THE BAMBERGER REINTHAL CO., Cleveland, Ohio. Filed Aug. 17, 1921.

No claim is made to the words "Three Caps in One" apart from the mark as shown.
Particular description of goods.—Knitted Caps.
Claims use since Mar. 1, 1921.

Ser. No. 153,297. (CLASS 11. INKS AND INKING MATERIALS.) KEE LOX MANUFACTURING COMPANY, Rochester, N. Y. Filed Sept. 24, 1921.

ALL AMERICAN

Particular description of goods.—Carbon Paper.
Claims use since about Apr. 1, 1920.

Ser. No. 153,385. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) "CÉRÈS" DOCKS, MINOTERIE, SEMOULERIE PATES ALIMENTAIRES, Nice, France. Filed Sept. 26, 1921.

All the reading matter appearing on the drawing with the exception of the word "Ceres" is disclaimed apart from the mark shown on the drawing.
Particular description of goods.—Semolinas, Rices, Alimentary Pastes, and Biscuits.
Claims use since Apr. 1, 1921.

Ser. No. 153,923. (CLASS 39. CLOTHING.) COLONY HOSIERY MILLS, New York, N. Y. Filed Oct. 10, 1921.

COLONY HOSIERY

No claim is made to the word "Hosiery" apart from the mark shown on the drawing.
Particular description of goods.—Hosiery.
Claims use since Sept. 20, 1921.

Ser. No. 154,374. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) MCCOMAS & GOODWIN, Los Angeles, Calif., assignors to Vapor Lubricant Company, Los Angeles, Calif., a Corporation of California. Filed Oct. 20, 1921.

VAPOLENE

Particular description of goods.—Fuel Intensifier and Carbon Preventive for Internal-Combustion Engines.
Claims use since June 1, 1921.

Ser. No. 154,679. (CLASS 39. CLOTHING.) CHICAGO MERCANTILE CO., Chicago, Ill. Filed Oct. 28, 1921.

Monna Vanna HAT
MICHIGAN AVE.
CHICAGO.
RUE VIVIENNE. PARIS.

No claim made to the words "Hat, Michigan Ave., Chicago, Rue Vivienne, Paris" apart from the mark shown.
Particular description of goods.—Hat Linings for Ladies' Hats.
Claims use since Oct. 1, 1921.

Ser. No. 155,662. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) CARL A. BAUMANN, doing business as Lake Mills Milk Company, Jefferson, Wis. Filed Nov. 21, 1921.

WONDER

Particular description of goods.—Canned Evaporated Milk.
Claims use since July 5, 1921.

Ser. No. 155,663. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) CARL A. BAUMANN, doing business as Lake Mills Milk Company, Jefferson, Wis. Filed Nov. 21, 1921.

Trade-mark consists of the picture of a cow with the map of Wisconsin showing as one of its spots shown in the accompanying drawing.
Particular description of goods.—Canned Evaporated Milk.
Claims use since Sept. 21, 1921.

Ser. No. 155,823. (CLASS 36. MUSICAL INSTRUMENTS AND SUPPLIES.) THE MAGNAVOX COMPANY. Oakland, Calif. Filed Nov. 23, 1921.

TELE-PHONOGRAPH

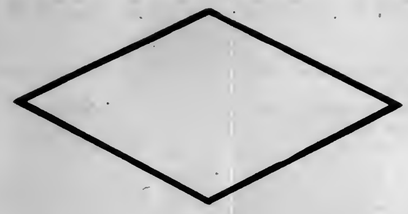
Particular description of goods.—Electrical Sound Amplifiers for Phonographs.
Claims use since Apr. 1, 1921.

Ser. No. 156,100. (CLASS 9. EXPLOSIVES, FIREARMS, EQUIPMENTS, AND PROJECTILES.) MITSUI BUSSAN KAISHA, LTD., Tokyo, Japan. Filed Nov. 30, 1921.

The word "Brand" is disclaimed apart from the mark as shown in the drawing.
Particular description of goods.—Matches.
Claims use since Aug. 4, 1921.

Ser. No. 156,101. (CLASS 9. EXPLOSIVES, FIREARMS, EQUIPMENTS, AND PROJECTILES.) MITSUI BUSSAN KAISHA, LTD., Toyko, Japan. Filed Nov. 30, 1921.

FREEDOM



Particular description of goods.—Matches.
Claims use since Aug. 4, 1921.

Ser. No. 156,653. (CLASS 39. CLOTHING.) THE MALLORY HAT COMPANY, Danbury, Conn. Filed Dec. 13, 1921.

BRAEBURN

Particular description of goods.—Hats for Men, Women, and Children.
Claims use since October, 1921.

Ser. No. 157,024. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) CALIFORNIA ALMOND GROWERS EXCHANGE, San Francisco, Calif. Filed Dec. 22, 1921.

Particular description of goods.—Almonds in the Shell and Unshelled.
Claims use since May 7, 1910.

Ser. No. 157,025. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) CALIFORNIA ALMOND GROWERS EXCHANGE, San Francisco, Calif. Filed Dec. 22, 1921.

DIAMOND

Particular description of goods.—Almonds in the Shell and Unshelled.
Claims use since May 7, 1910.

Ser. No. 157,535. (CLASS 39. CLOTHING.) REAL SILK HOSIERY MILLS, Indianapolis, Ind. Filed Jan. 5, 1922.

No claim is made to the exclusive use of the expressions "Indianapolis," "Real Silk," and "From Mill to Millions" except in association with the other features of the mark.
Particular description of goods.—Hosiery.
Claims use since Dec. 1, 1920.

Ser. No. 157,566. (CLASS 38. PRINTS AND PUBLICATIONS.) THE GOODYEAR TIRE & RUBBER COMPANY, Akron, Ohio. Filed Jan. 6, 1922.

THE GOODYEAR NEWS

The longitudinal lines in drawing are merely used as shading.

Particular description of goods.—House-Organ Publications Issued at Regular Intervals.

Claims use since on or about July 21, 1921.

Ser. No. 173,287. (CLASS 44. DENTAL, MEDICAL, AND SURGICAL APPLIANCES.) LAMKE & STEMME, INC., New York, N. Y. Filed Dec. 12, 1922.

The trade-mark illustrated by the accompanying drawing shows the inscription "Lamke & Stemme, Inc. New York" displayed in the annular space formed by two concentric circles. The inner circle surrounds the letter "L," printed in a single thick line and overlapping the letter "S," printed in double thinner lines, monogram fashion. The outer circle is inscribed into and edgewise overlaps the figure of a vertical rhomboid, and in the open top panel of said rhomboid is shown the outline of a laurel leaf, while in the lower panel is placed the representation of an upright scepter, around which a snake coils in the form of an S. Both figurative panel displays, laurel leaf, and scepter with snake are meant to be symbolic of the initials of the firm "L" and "S." The lower panel design, known as an esculapian staff, is also symbolic of the firm's trade in medical and surgical articles. No special claim is made to the words "New York" apart from the mark shown in this drawing.

Particular description of goods.—Surgical Rubber Goods and Druggists' Sundries.

Claims use since July, 1921.

Ser. No. 173,347. (CLASS 32. FURNITURE AND UPHOLSTERY.) THE ROCKSTEDE FURNITURE CO., Evansville, Ind. Filed Dec. 15, 1922.
